To: Mr. L. S. Hutchinson.
From: Harold T. Fuller.

Effective April 6, 1942, this being the day on which the Area Engineer assumed authority over all material and supplies, I consider myself relieved of all responsibility for knowledge of where material was used, and for having sufficient supplies on hand to carry on construction, for reasons detailed below.

As you know, the Area Engineer has acted very concerned about the amounts of building material on hand, and since his appointment has consistently followed a policy leading to the reduction of these same amounts. He has also issued materials to almost anyone who would ask for them whether covered by a job order or not. This whole situation is illustrated by an incident which happened today when Mr. Tillman diverted a truck loan of 2 x 4, consigned to job order 354-W, which is Bellows Field Construction, to some other work of which we had no knowledge whatever.

2948 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

On none of these occasions does Mr. Tillman refer to the Constructors Office in anyway. The impossibility of our keeping any track of materials, and the absurdity of expecting me to keep a stock on hand should be evident from the above.

HAROLD T. FULLER,
*Office Manager, Fifth Field,
Hawaiian Constructors.*

HTF:SSK

Exhibit No. 31-M

To: Mr. Lloyd Hutchinson, Area Superintendent, Fifth Field Area.
From: Harold T. Fuller, Office Manager, Fifth Field Area.
Subject: Property.
Date: April 26, 1942.

Again referring to the assumption of authority by the Assistant Area Engineer, by which he arbitrarily disposes of tools and equipment which are charged to Hawaiian Constructors, I wish to inform you of the latest incident of this type.

Today, April 26, the Assistant Area Engineer went into our tool house accompanied by one A. E. Plummer and took therefrom six wooden handle steel brushes, leaving no record or charge for their removal. The whole transaction would have unrecorded had not the author noticed the above parties leaving the vicinity with the articles in question and made inquiries of the tool room man. The tool room man was inexperienced and had not doubted the Engineer for authority but after questioning, had on his own initiative, asked the Engineer for a Tally-Out for the items of property. The Engineer signed a Tally form saying the articles were for the use of A. E. Plummer, but no job number was given.

It is again requested that the whole question of property be brought up and jurisdiction and responsibility be definitely fixed. As the matter stands now the Engineers dispossit property charged to us without referring to us in any way, yet there has been no suggestion of their releasing us from responsibility for that same property.

HAROLD T. FULLER,
Office Manager, Fifth Field.

COPY—SSK

Exhibit No. 31-N

APRIL 24, 1942.

To: L. S. Hutchinson.
From: H. T. Fuller.
Subject: Property.

For your possible information, and in line with recent events concerning property, may I review the whole manner in which it is handled.

The item "property," as used in dealings between the Constructors and the U. S. E. D., includes all tools, machinery, small equipment, office furniture, etc.—in other words, everything that is non-expendable, but not classed as equipment. These items of property are supplied to the Constructors by the Engineers, and then charged to Hawaiian Constructors for as long as they are in use by the Constructors. The U. S. E. D. charge is made to the Constructors as a whole, but the Constructors maintain a property section whose function it is to charge these items to the individual person—usually the Area Superintendent. The person to whom they are charged signs a receipt of the property and thereafter is financially responsible for its return. While in possession of the Constructors "property" is not under the authority of the U. S. E. D. unless transferred formally in such a way as to lift the financial obligation.

The above system is fixed in practice, and many precedents are on record, wherein we have deducted from employees pay checks to cover missing property.

This all is repeated because of an incident which happened this morning, and which I will now detail. The Assistant Area Engineer, Mr. T. E. Tillman, came into our tool house and arbitrarily told our property man to provide a certain individual, who accompanied Mr. Tillman, with six picks. This man then signed the tally-out for the tools. The point of this note is that the tool man was ordered to supply tools to an individual unknown to him, with no knowledge of when they would be returned, and for use on a job which we are not working.

This is the second time that Mr. Tillman has assumed this authority. I think it very important that the matter be brought to Mr. Tillman's attention in a way that will make it clear to him that such practice is not to be repeated.

H. T. FULLER,
*Office Manager, Fifth Field,
Hawaiian Constructors.*

ARMY PEARL HARBOR BOARD EXHIBIT No. 9

HOUSE OF REPRESENTATIVES

COMMITTEE ON MILITARY AFFAIRS

WASHINGTON, D. C.

In Re: Hans Wilhelm Rohl.

STATE OF CALIFORNIA,

County of Los Angeles, ss:

Nils M. Olsen, aged 42 years, married 14 years, owns his own home at 1114 Dolphin Street, San Pedro, California, first being duly sworn, deposes and says:

That I was living at 718 60th Street, Brooklyn, N. Y., when I met H. W. Rohl, in July, 1933, when he employed me as Steward aboard the yacht "Ramona", which he had just purchased in New York. I was introduced to Rohl by Capt. Gudmundsen, the former captain of the Ramona. I worked for Rohl as steward until February, 1936, and the checks were signed by Irma Dickey and bore the printed name of H. W. Rohl. This same custom was followed while I was steward on the Vega. About a year after I was employed I asked Rohl personally for a \$15.00 raise, and he gave it to me—so thenceforth I received \$150.00 per month.

The Ramona sailed from New York, equipped with a new Mackay radio which Rohl installed in New York, and the Mackay operator boarded the vessel there. Mr. and Mrs. Rohl, and his son, Fred, were aboard. We sailed to Guantarramo Bay, where we stopped three or four days while Rohl received treatment for broken ribs at the Naval Hospital—he was injured during a storm in the Caribbean Sea and fell down a companionway. I'm certain we were inspected by Immigration when we left New York. We then stopped at Colon overnight after sailing through the Canal. We then went to Acapulco, Mexico, for fuel and water, and left after several hours. Then we anchored near Coronado Islands, and someone came aboard. I believe it was Mr. Tom Connolly, Rohl's partner. Next we anchored off Catalina Island for a short time, then tied up overnight at Wilmington—at the California Yacht Club. The Captain told us no one could leave the boat that night because we hadn't been cleared by immigration officials. Mr. and Mrs. Rohl nevertheless left the boat that night and returned to their home in Los Angeles. I was present and actually saw them leave, so Mr. Rohl never did clear Immigration, this was on September 3, 1933.

On September 4, 1933, at Fellows and Stewart's Yacht landing, where we tied up that morning at San Pedro, Immigration officers came aboard; there were several inspectors. There were ten men in the crew, and we cleared in about two hours. One Norwegian, Hans Anderson, was an alien, had no papers, and he was eventually deported.

The crew had only signed on for this one cruise, and they were all paid off the next day, September 5th, 1933, except Earle Schetne, who was hired as captain, and myself.

Mrs. Rohl had nothing to do with directing the crew and the operations of both the Ramona and the Vega. All the crew was firmly of the opinion that both boats were Rohl's.

Thereafter the only trips we took were back and forth to Catalina Island from the Fellows and Stewart Pier at San Pedro.

Sometime in 1935 Rohl told me he was bringing a guest aboard, and he instructed me to be particularly courteous and attentive to him. I think it was in the summertime. He boarded the boat, and we went to Catalina and the two men went to Rohl's rock quarry and inspected the rock, which was to be used in constructing the Long Beach Breakwater. Rohl got drunk, but the guest signalled me that he didn't want much to drink, and he remained sober. We

returned to San Pedro the following day. The guest was short, chunky, full face, smooth-shaven, dark brown hair.

On October 1, 1939, I was employed by Rohl as steward on the Vega—having worked in other positions after I left the Ramona in January or February, 1936. On August 13, 1941, I went to Colorado as cook for Rohl and remained until November 20, 1941. Mr. Rohl didn't stay with us all this time. Sometime after September 15, 1941, Rohl left us where we were staying at Caddoa, Colorado, and went to the Hawaiian Islands.

The Vega carried a crew of eight men during most of the time she was running between Newport or San Pedro and the Catalina Islands, before we went to Colorado.

After we returned the Vega remained tied up at the Rohl-Connolly slip near Wilmington, until she went to Honolulu.

Rohl asked me to come to his home late in November, 1941; he had been drinking quite heavily, and was plainly drunk. He said he was about to be made a general, and was going to rent the Vega to the Army Engineers for a dollar a year, and asked me to get his old master, Captain Otto Mathies, offering to pay him \$450.00 per month, and he offered me \$250.00. Accordingly we loaded the boat, Rohl told me to put on plenty of stores, so I did. Eighteen cases of whisky arrived, (4 cases Bourbon, 4 Johnnie Walker, 2 cases Brandy, 8 cases Ballentine), and the man who delivered it stated that it was for Mr. Rohl, so I stored it aboard. Captain George Goldrainer actually signed on as master, and we all signed on for one year, about December 1, 1941, under Hawaiian constructors. We were supposed to leave for Honolulu on December 8, 1941, and at that time Rohl was in the Hawaiian Islands. There was also ten cases of Pabst beer aboard. I am positive the Vega was not armed when we sailed from San Pedro in a convoy, bound for Honolulu to turn the boat over to the Hawaiian Constructors, which, I understood, was in turn to lease it to the Army Engineers. I also bought \$2700.00 worth of new uniforms for the crew at Rohl's direction, from Brown Bros., in San Pedro. The store of supplies amounted to \$3800.91, exclusive of the liquor. The uniforms were later returned to Rohl.

We sailed on February 20, 1942 in the late afternoon, and spent 18 days en route to Honolulu. We first went to the Pearl Harbor Naval Dock, and next day we tied up at Pier 6 or 7, for about three month. The liquor was removed a few days after we arrived, at Mr. Rohl's order—he was there when we landed. Our master received his orders from C. C. Middleton, general superintendent for Hawaiian Constructors. During this three months we did absolutely nothing. What it amounted to was simply a trip to carry 18 cases of whiskey from San Pedro to Pearl Harbor. I wanted to do something, and so did the crew. We all felt that our country was at war, and we wanted to do something to help; but after we docked, not a thing was removed from the vessel except the whiskey, and the whole crew just remained idle for the entire three-month period—and I even complained to Rohl about it. I knew perfectly well that martial law had been proclaimed in the Hawaiian Islands, and that it was strictly against the law for Rohl to bring any liquor ashore.

During the three months we were paid by the Hawaiian Constructors, because although we were actually working for the U. S. Engineers, Rohl told us we should give him a power of attorney so that he could pay us through the Hawaiian Constructors to save time for us, so we all gave him the power of attorney and thereafter received our checks from Hawaiian Constructors.

Rohl, meanwhile, went to Los Angeles, and when he returned I complained to him about the inactivity. He said he could fix it so we could leave without a convoy, and he did, because we left on May 1, 1942, arriving in San Francisco. The next day we sailed for San Pedro, and tied up at our old dock, Rohl-Connolly, Wilmington, May 15, 1942.

The Coast Guard took over the boat, and I left it about June, 1942. After we left Hawaii, our checks came from U. S. Engineers instead of Hawaiian Constructors, and were for the same basic amount.

While in the Hawaiian Islands, anything I got for the vessel was requisitioned from Hawaiian Constructors.

I am now Ship's Cook, first class, U. S. Coast Guard Reserve, attached to Training Station, Catalina Island, Eleventh U. S. Naval District.

(signed) Nils M. Olsen.
NILS M. OLSEN.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., April 4, 1944.

INTERVIEW

Present: George H. Moody, H. Ralph Burton.

BURTON. May I ask your name?

MOODY. George H. Moody.

Q. During what period were you in Hawaii?

A. I just left there a few weeks ago and I am going back. That is my home.

Q. You, at one time, were with the Corps of Engineers?

A. Yes, and then under the Engineer Corps when they changed the designation. I worked there in camouflage and then Colonel Nurse asked me to come over on this investigation. He is an excellent man and straight as a die. He built Hamilton Field. They finally retired him. He is back in San Francisco now. Of course, when the Engineers started in Honolulu, they took people who wanted jobs so they got a great many crackpots and screwballs.

Q. That was back in '41?

A. After December 7.

Q. Do you know anything that happened prior to December 7?

A. No, I wasn't involved at all.

Q. Do you know anything about the Hawaiian Constructors?

A. Yes, I was on their payroll and then taken over to the Corps of Engineers payroll later.

[2] Q. Did you have occasion to observe anything about the Hawaiian Constructors?

A. Yes, more or less.

Q. Did you know Hans Wilhelm Rohl or Paul Grafe?

A. No, I never met them.

Q. Did you come into sufficient contact to determine whether the Hawaiian Constructors were proceeding rapidly and efficiently as they could?

A. I think they were doing the best they could. I did later come into contact with some purchases—for instance, there was a jackhammer which ordinarily would cost \$90, they paid \$150—they bought pieces of equipment at the most outrageous prices.

Q. Do you refer to the Hawaiian Constructors?

A. I am referring to the Engineers.

Q. Do you remember Col. Theodore Wyman?

A. I know of him. I know where you could find some contracts that I would look into—one I investigated and turned over to Colonel Nurse. It was made with Weaver. Mr. Weaver, himself, was an automobile mechanic. He was set up immediately after the blitz with engineer equipment. He didn't have any of his own. He was paid \$4,000 a month for the pleasure of taking care of repairs plus \$4 an hour for his labor. When we checked the contract, Colonel Nurse told Colonel Wymer that the contract was impossible and would have to be renegotiated. He told him three or four times. Finally he had that renegotiated, making Weaver and Company purchase the equipment and cutting him from \$4 to \$2.50 an hour and cancelled the \$4,000 a month payment. Several months ago Weaver tried to negotiate for \$3.50 an hour. His travelling expenses were \$1,000 a month. Where he could travel, I don't know. His bookkeeper and auditing came to \$650 a month. His bookkeeper was his wife. At the time I left, however, his contract had not been renegotiated in his favor.

Q. During what period was this contract made?

A. After December, while Colonel Wymer was still there. Wymer signed the contract, but he was acting under Colonel Wyman.

Q. Was Colonel Wymer over Colonel Wyman?

A. The man you are talking about was Wyman. Under him was Wymer.

2952 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[3] Q. That contract was between the Government and this man Weaver?
A. Weaver and Company, which was organized overnight.

Colonel Nurse headed this division which Colonel Cramer set up to investigate everything that was going on and this division has kept records of everything they investigated. You could learn a great deal if you could get those records of the Bottleneck Busting Division under the Engineers headed by Colonel Nurse. The records are in Honolulu. Talk to Colonel Nurse who is in San Francisco. He knows more about it than anyone else. He is an old Quartermaster man who has been in the Army 30 or 35 years. Colonel Hunt came out from here under the Inspector General's Office last spring, but I don't know what his report was.

Q. Did he go over this Bottleneck Busting Division's records?

A. Not much. He was out to prove that nobody was willing to testify that Colonel Wyman was crooked.

Q. The facts we are looking for probably will be in these particular records?

A. They will be if they haven't been destroyed. If they have been destroyed, I have my own copy of the records.

Q. What is your address?

A. King Street, Honolulu. I have a firm there, Grossman Moody.

I am here now to get the Government to get houses for us. I am on the Housing Committee, Labor Commissioner, and work with the Red Cross Disaster Relief Committee.

There is considerable rowing there with military authorities. They are putting men in jail for absenteeism. They are not military plants. They say they are necessary workers, and the Army puts them in jail for absenteeism. They are not managing any better than we are.

The YWCA is one of the few buildings in town the civilians can use. They announced to the YWCA that they were going to take over two floors. There were a number of women living there and they called me. A Colonel came in and announced they were taking over two floors and wanted them immediately. The Colonel said, "People in Honolulu will have to change their minds about a lot of things because we are going to put civilian employees of the Army in these houses." He said they would give us a week to find a place for these women. I told them that was impossible. Later I gave them a list of just what the [4] Engineers had that was not being used. Around the island there were 2800 beds not in use. Now you will find one man in a room where formerly were housed 4 girls. Across the street is the Pleasanton Hotel which hadn't had a soul in it for five weeks. I told them they had better give us back the hotel instead of trying to take over the YWCA. So, the next week, we got back the Pleasanton Hotel. We used to build 2500 houses a year, but we have only had permission to build 500 houses.

Q. What is the official name of the division headed by Colonel Nurse?

A. It is known as the B. B. D. (Bottleneck Busting Division), District Engineers Office for the Hawaiian Territory under the direction of Colonel Nurse.

REPORT OF PROCEEDINGS

HEARING HELD BEFORE EXECUTIVE SESSION, SPECIAL COMMITTEE OF THE COMMITTEE
ON MILITARY AFFAIRS, HOUSE OF REPRESENTATIVES, U. S., WASHINGTON, D. C.,
FEBRUARY 9, 1944

CONTENTS

	Page
Testimony of Major General Julian L. Schley, U. S. A-----	2393

[2393]

EXECUTIVE SESSION

WEDNESDAY, FEBRUARY 9, 1944

HOUSE OF REPRESENTATIVES,
SPECIAL COMMITTEE OF THE COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C.

The special committee met, pursuant to notice, at 3:00 o'clock p. m., in room 1310 New House Office Building, Hon. John M. Costello (chairman) presiding.

Present: Representatives Costello (chairman), Durham, Martin, Elston, and Fenton.

Also present: Mr. H. Ralph Burton, General Counsel to the Committee, and Joseph Colgan, Investigator; Major General Julian L. Schley, and Lieutenant Colonel Miles H. Knowles.

The **CHAIRMAN**. Proceed, gentlemen.

TESTIMONY OF MAJOR GENERAL JULIAN L. SCHLEY, UNITED STATES ARMY

(Major General Schley was sworn as a witness.)

The **CHAIRMAN**. Will you state your full name for the record?

General **SCHLEY**. Major General Julian L. Schley, United States Army.

The **CHAIRMAN**. Now, will you state your present position?

General **SCHLEY**. I am presently recalled from the retired [2394] list to the active list and assigned to the Office of Coordinator of Inter-American Affairs.

The **CHAIRMAN**. Proceed, Mr. Burton.

Mr. **BURTON**. General, you were Chief of Engineers of the United States Army, were you not?

General **SCHLEY**. That is correct, sir.

Mr. **BURTON**. Please state for what period.

General **SCHLEY**. From about October, 1937, to September, 1941.

Mr. **BURTON**. Do you recall having recommended the approval of a contract between the United States and Hawaiian Constructors, which was signed on December 20, 1940, for certain installations in the Hawaiian Islands and some of the South Pacific islands?

General **SCHLEY**. I do not remember that, no, as such. I do remember that activity near that time was considerable and increasing in construction work in the Hawaiian Islands, and it was my function to make such recommendations in such instances.

The particular case you refer to, I do not remember, no.

Mr. **BURTON**. Do you know Colonel Theodore Wyman, Jr.?

General **SCHLEY**. Very well.

Mr. **BURTON**. Do you remember that he was here in December, 1940?

General **SCHLEY**. I could not associate his presence here [2395] with that date. He did come to Washington from the Hawaiian Islands—I don't remember how many times—for consultation, and he did come here from his previous position while I was in that office, which was in Los Angeles, California. He came East several times. It was not uncommon for him to do that which you mention, and he did come here from time to time.

Mr. **BURTON**. Do you recall that certain defense installations were constructed in the Hawaiian Islands at that time?

General **SCHLEY**. In a general way.

Mr. **BURTON**. This morning you called me on the telephone and at that time you said that you wanted to refresh your recollection by referring to the files. Did you do that, sir?

General **SCHLEY**. No, I did not. I called the office of the Chief of Engineers and asked if they could make those papers available to me and they said that they were unable to locate them at that time, they were in the hands of another office, but they probably could be made available in a day or two, as soon as they found them.

I don't remember now whether it was the Army Service Forces or the Under Secretary's Office or whose office, or someone in that office, because we discussed them all, as to where they might be.

I talked to a major who did look for them in the files.

I don't mean by that that they are lost, [2396] but they are not in the Chief's office at this time.

Mr. **BURTON**. Do you remember that one of the contracting firms was the Rohl Connolly Company?

General **SCHLEY**. No, I do not.

Mr. **BURTON**. And you can't recall any discussion of this contract?

General **SCHLEY**. Not that one in particular, no.

Mr. **BURTON**. Do you recall anything whatever about the conduct of the work in the Hawaiian Islands?

General **SCHLEY**. No, I do not. I don't remember any of the details of it. If anything had gone very wrong with it, it probably would have come to my desk.

If anything was worthy of note in any direction, it probably would have come to me. We had two main branches in my office, one having to do with the expansion of the military side and the training of the troops, and the other side having to do with what we call Rivers and Harbor work, and also fortification construction work.

About this time we received, in addition to that, the construction for the Army Air Forces. That was the first step in adding to our functions.

Mr. BURTON. Can you say what procedure would be followed in considering a contract of that nature?

General SCHLEY. Yes, sir, I remember that quite clearly, although it changed as we proceeded, and I am not quite certain [2397] in which phase this came.

Before the great increase in activities in that kind of work, there was not anything outside of our office necessary to have such a contract entered into and have its work progress. It was a normal function within our own office.

At the time of the large expansion there was added review given and all those contracts had to be approved, I think, from the beginning of this change in practice, by the Under Secretary, who at that time was Mr. Patterson. I think he still is.

Before submitting it to him, however, before making a recommendation to him, we first contacted O. P. M., Office of Production Management.

Later there was an additional consultation which we followed, and that was a committee which we always looked on as Mr. Patterson's committee. It was formed in the Quartermaster General's Office and was called the Construction—something—Committee.

Mr. ELSTON. Advisory?

General SCHLEY. Construction Advisory Committee, perhaps that was the name of it. Later, after we started this program, General George R. Spalding, whom I knew well, was placed at the head of it. I doubt if it was this early.

In this particular case I am not sure whether we went to O. P. M. or this committee for approval, or to both. We [2398] looked on this committee as Mr. Patterson's committee and I would not be surprised if he instructed us so to do.

We consulted them because we knew he would send it there anyway.

The CHAIRMAN. In passing on the contracts, you had nothing to do with the contract? It would be simply routine for you to approve a contract that came to your desk?

General SCHLEY. I would not put it quite that automatically, but that is true to some extent.

The form of contract we used before the expansion took place was our own. Of course, it had been reviewed by the Comptroller General and other departments interested in those things, and it was a standard form.

The difference between contracts was, of course, what you were undertaking to do, but the clauses were about the same. Those clauses in that form were at some time under this procedure changed and reviewed and we got a new form, and if I am not mistaken the Quartermaster General's committee was instrumental in getting that form. Perhaps the O. P. M. was.

The CHAIRMAN. But you didn't go into details of the contract when it was submitted to you for approval?

General SCHLEY. Unless I saw something on the face of it. I looked through all contracts I signed to see if there was anything I should look into further.

[2399] The CHAIRMAN. Whose duty would it be in the first place to approve and recommend a contract at this time for your signature?

General SCHLEY. We kept the thing decentralized into the field. I was in no small part instrumental in continuing that practice.

There was talk at one time of determination being made in Washington. There was a definite policy of the Administration of having what they called local contractors on the job, and we finally got to look on a local contractor as within the State in which the work was being done.

I think the Rivers and Harbors districts, 40-odd, our officers in those offices were the best-informed men as to who were the best contractors in the States. They had been conducting work of that kind right along.

Of course, I wanted all the review possible in Washington, and in case of disagreement we got from an approved list of contractors which these review officers had, contractors' names who were satisfactory to them and whom we also ap-

proved, and sent them back as suggestions only, and left the initiative in the hands of the field.

The CHAIRMAN. And a contract of this kind would be initiated in the field?

General SCHLEY. When you go outside the territory of the United States we may have suggested contractors we knew [2400] were satisfactory.

Of course, a lot of things were to be considered besides being a satisfactory contractor. The fact that he was a large contractor who could undertake a big job and had experience in that work and was responsible financially had to be considered.

The CHAIRMAN. The officer in the field would be largely responsible for the direct negotiations with the contractors in the beginning?

General SCHLEY. In the beginning, and then it was subject to our review and later by O. P. M.

I think they continued later to review, as well as the Review Board in the Quartermaster General's Office.

Mr. BURTON. This contract involved a sum of \$84,436,961. Is it possible that a contract of that size would be approved simply as a routine matter?

General SCHLEY. I would say that a \$84,000,000 contract at that stage of our procedure would be a very big and very unusual-sized contract, and probably would receive very careful consideration.

One thing that was bothering us at that stage was the amount of the fixed fee. The contractors, of course, were holding out for figures which they thought proper. We were trying to hold to what we thought was proper. That naturally would be smaller.

[2401] The Assistant Secretary, Mr. Patterson, was very attentive to that figure and before the thing was over he gave us a table which we could not exceed. The table was composed of fixed percents, although the fee was not. In very large contracts it was a smaller percent of the table. In smaller contracts the fixed fees were a larger percent of the contract table.

Mr. BURTON. Aren't there records of the various conferences and discussions affecting a contract of this size?

General SCHLEY. I doubt if there would be records of conferences at that stage. I will say there should have been kept records of any approvals or consultation with these several agencies to determine their agreement or disagreement with us.

The CHAIRMAN. Those records would be simply letter memoranda from one agency to another?

General SCHLEY. I think so. I think that those will all be of record in the form of memos or letters, initialed or approved by someone.

Many times when we were in a hurry, it may have been done by phone, but if they didn't make a record it was bad business. It should have been done.

Mr. BURTON. Those records could be made available to you and from those records you could probably refresh your recollection on what took place?

[2402] General SCHLEY. If the committee wishes I will make every effort to produce whatever the Chief of Engineers office has.

I left that office, as I say, in 1941, and their records, of course, are undoubtedly all the same now. They are all there, I presume. I have no records with me which pertain to this work.

The CHAIRMAN. I think it ight be well, General, for you to review the records that are available in the office there and whatever additional records you can get.

General SCHLEY. You are speaking of the approval of this contract with this contractor?

The CHAIRMAN. That is right, any record that may be there involving any conferences.

General SCHLEY. May I have the name again?

The CHAIRMAN. Rohl Connolly.

General SCHLEY. And Company?

Mr. BURTON. This contract was with the Hawaiian Constructors, and that was a syndicate or association of contractors, consisting of Rohl Connolly Company, the Gunther Shirley Company, and Price Callahan.

The CHAIRMAN. Possibly, General the contract number would be a help. The contract number is W-414-Eng-602. The date of signing was December 20—.

General SCHLEY. Is a "W" before the number "414"?

[2403] The CHAIRMAN. Yes; W-414-Eng-602. That was executed December 20, 1940.

General SCHLEY. That is the date of the signature with the contracting office?

The CHAIRMAN. By Colonel Wyman and on behalf of Hawaiian Constructors by Paul Grafe.

Colonel KNOWLES. Does this obviate the necessity of our office now securing this information? This has been asked for.

Mr. BURTON. No, that does not obviate any request that we have made.

Colonel KNOWLES. It is only going to duplicate work. You are asking the General to produce information that has been requested from our office.

The CHAIRMAN. We wanted to get from the General any information that he might have in connection with the signing of the contract and the circumstances surrounding the signing of the contract.

Colonel KNOWLES. This was not a \$84,000,000 contract initially; it was about \$1,800,000, and it was increased from time to time by supplements. Isn't that correct, Mr. Burton?

Mr. BURTON. It doesn't say that in the letter. This letter says, "The total estimated cost involved in this contract was \$84,436,961, and the contract called for a fixed fee of \$1,014,690."

[2404] Colonel KNOWLES. But that includes numerous supplements to the original contract.

Mr. BURTON. Those supplements could not very well have borne date of December 20, 1940.

Colonel KNOWLES. No, they were dated later. But they were all under that contract number, and the fixed fee was increased as the supplements were added to the original contract.

Mr. ELSTON. May I suggest there, Mr. Chairman, that we get in the record the exact dates when each supplement was entered into and the amount and the work included in the contract? I think we should have it in the record.

Mr. BURTON. A full and complete report on the entire contract and supplements has been requested from the War Department and that is being prepared at this time. It was the purpose, however, in calling General Schley, as the Chairman has said, to ascertain from him what he could recall about the negotiations at the time that led up to the signing of the contract with Hawaiian Constructors.

Mr. ELSTON. I want to ask a couple of questions.

The CHAIRMAN. Very well.

Mr. ELSTON. General, is this committee that you spoke about, which might be the Construction Advisory Committee, what is known as the Blossom Committee?

General SCHLEY. That name does sound familiar in [2405] connection with it. Someone was at the head of it originally and he was replaced by George R. Spalding. It may have been Blossom.

Mr. ELSTON. There was a man named Blossom at the head of one of those committees and he was replaced.

General SCHLEY. That may be. I bring the committee into the picture because that was along the line of our change in the expansion and the change in the practices.

Mr. ELSTON. How much of an investigation would be made into the character and background of contractors bidding on work in strategic areas like in the Hawaiian Islands?

General SCHLEY. I would say that it is a subject which should be covered in the investigation as well as the financial responsibility and reputation of a construction firm. Certainly it is a proper item to look into, particularly with the war apparently in the not distant future.

Mr. ELSTON. Well, who would have the responsibility of making that investigation?

General SCHLEY. I think all along the line that investigation would cover.

Mr. ELSTON. Where would it start and where would it finish?

General SCHLEY. I should say it would start with the man in the field, who would be the district engineer.

Mr. ELSTON. In this case it would be Colonel Wyman?

[2406] General SCHLEY. I should say Colonel Wyman. If there had been anything about the matter which looked as if unsafe agencies were involved, he would be the first one to know, I should think. He is the man right in the field.

The next responsibility would have been on the Chief of Engineers' Office, and that, of course, I take responsibility for, because I was the head of it.

Next, I would say that it would be in this board that you speak of, and the Under Secretary himself, I assume—I don't know what means of investigation, or other organization, he would have besides that board.

Mr. ELSTON. Would the Chief of Army Engineers' Office accept the word of the District Engineer without making some independent investigation?

General SCHLEY. That is a little difficult to answer categorically. I know of no district engineer who had any important work under him—any district engineer in whom we did not have implicit confidence. I will put it that way.

On the other hand, I would say anybody who reviews anything must not do it automatically, and without his eyes and ears open, so a review would cover naturally whatever was proper to be looked into, and no man can shirk that responsibility. The responsibility is his.

Mr. ELSTON. I think about that time the War Department began to require even stenographers who worked in the War [2407] Department to be fingerprinted and furnish birth certificates and show what their background was.

Was any greater strictness required of employees in the War Department than was required of contractors who were going out and doing millions of dollars worth of business in strategic areas?

General SCHLEY. Well, now, I can't tell you whether that same thing was required of all workmen on all contracts or not.

Mr. ELSTON. I am not talking about the workmen as much as I am talking about the heads of the firms.

General SCHLEY. Well, I don't know whether they were similarly investigated in the matter that you speak of, the same as men in the offices of the War Department, or not.

Mr. ELSTON. I don't know whether you know it or not, General, but the head of this firm was a German alien and did not become a citizen of the United States until December 15, 1941, three months—no, nine months after the original contract was entered into.

Was any effort made to determine the citizenship of people engaged in contracts for the Government?

General SCHLEY. That is difficult to answer at that stage, whether that was gone into or not, because I just don't remember.

There undoubtedly was a time, somewhere along the [2408] line of the passage of time, as things became more and more threatening, when that was done. Whether it was done at this stage or how far back, I couldn't advise you.

Mr. ELSTON. Would you have any records indicating when that was done?

General SCHLEY. No, I have no doubt in my mind that at that time—in fact, I don't know whether I am safe in saying it was not done to a certain time and was done from then on. I should say it should have been done at all times, with the war threatening us.

Mr. ELSTON. General, you yourself would not have approved any contract entered into between any alien enemy and the United States Government. Of course, we were not then at war with Germany.

General SCHLEY. One year before.

Mr. ELSTON. But Germany was at war at that time with nations to whom we were furnishing lend-lease materials and money, and it was evident which side we were on.

Now, you yourself would not have approved a contract in a strategic area like the Hawaiian Islands, if the head of the company was a German, would you?

General SCHLEY. Well, that question you naturally tend to answer in the negative because, looking back on the picture now, we can see clearly that such a thing should not have been done.

[2409] I should say, on December 20, 1940, knowing what we know now, it should not have been done.

Looking forward from the back end, I don't know how the situation looked from the other end. It is pretty hard to say we should or should not have looked into such a matter at that time.

Mr. ELSTON. I don't suppose a German citizen could have gotten a job in the Government at that time.

General SCHLEY. That I can't answer.

Mr. ELSTON. They couldn't have gotten a job in an aircraft factory or any shipyard. They would have been excluded from work of that kind.

General SCHLEY. Yes.

Mr. ELSTON. Certainly there must have been some place along the line where you inquired into the citizenship of people who were engaged in contracts in critical and strategic areas like the Hawaiian Islands.

General SCHLEY. It does seem, looking from where we now sit, that that should have been done, yes.

Mr. ELSTON. We are seeking to find out whether it was done. Is there any way you can tell us whether it was done or not?

General SCHLEY. No, I can't tell you. In the first place, I don't remember the contract. I don't remember its being signed.

[2410] You ask me a hypothetical question as to what I would do under those conditions at that time. I don't know but what my only answer would be that I should look into such a thing.

Mr. ELSTON. In any event, if you knew that you would certainly call it to the attention of the Under Secretary or whomever you had to report to, wouldn't you?

General SCHLEY. From where I now sit it looks that way. To turn the clock back, I should say it should be done.

Mr. ELSTON. That was after we passed the Lend-Lease Act and after we began the conscription of American boys.

Mr. MARTIN. After we had shipped quite a number of vessels, after Dunkirk, too.

Mr. ELSTON. And after we had given them 50 destroyers. Don't you think at that time that you would immediately have caused an investigation to be made if you had any information that a big contractor in a strategic area was an alien of this country and a citizen of Germany?

General SCHLEY. Yes, I would say if there was any suspicion to that effect it should have been done.

If that is the stage in our national relations, if it is as you now put it, which is undoubtedly true—I have not reviewed it myself but I dare say it is—it does definitely look as if a German, a person suspected of being a German citizen, should have been gone into in considerable detail.

Mr. ELSTON. Would you expect a district engineer under [2411] your supervision to furnish you with information of that kind if it was within his knowledge?

General SCHLEY. At the time when we should have been on notice, definitely so. Not only should he not have recommended, but we should not have approved, beginning at whatever time it was that we should have been on notice that things could be done by a contractor which would harm our situation, our defense.

There is no question, the district engineers should be responsible in the first instance, and we would be in the second instance, assuming there was some reason for suspicion.

I don't know what Rohl—

Mr. ELSTON. His first name was Hans and his middle name was Wilhelm and his last name was Rohl. "Hans Wilhelm" should have been a suggestion to anybody, and I think it was generally known he was not a citizen of the United States.

Now, where in the record would the recommendation of the engineer, the District Engineer, appear?

General SCHLEY. I would say that it could be either in a letter of transmittal, or under his signature itself if it was on the document.

Mr. ELSTON. What document?

General SCHLEY. The contract itself. If his signature is on the document I would say there was no doubt in his mind unless you find some correspondence at the time which raised [2412] the question.

I would so accept it.

If the contract came in without correspondence, signed by the District Engineer, I would say there was nothing in his mind that raised a doubt as to the contractor.

Mr. ELSTON. Well, as supplements were let and the amount increased, until it reached the amount of \$84,000,000, wouldn't there have been some investigation even though the District Engineer had approved the contract in the first instance?

General SCHLEY. As to the nationality of the man?

Mr. ELSTON. His character and his background, his nationality, and anything that should be brought to the attention of the Government.

General SCHLEY. I would say that as that contract went along, it did start at a smaller figure and got very large, that we would have been under obligation to do whatever the proper thing was to do.

Mr. ELSTON. Were any instructions sent out to the district engineers instructing them to exercise great care in the selection of contractors because of the critical situation in which we were getting?

General SCHLEY. That I don't recall.

Mr. ELSTON. Would your file contain any recommendations that had been made with respect to this firm?

General SCHLEY. I don't know by whom you mean. By our [2413] own people?

Mr. ELSTON. By anybody at all.

General SCHLEY. I don't know that I could answer that question. If there was any written recommendation concerning him, it certainly would be there, and for any oral recommendation made you might or might not find a memorandum on the subject.

Mr. ELSTON. Well, asking you the question directly: have you any recollection of anybody ever recommending to you that this contractor, this firm of contractors, be approved?

General SCHLEY. No, I don't remember the contract at all.

Mr. ELSTON. That is all.

The CHAIRMAN. Mr. Martin.

Mr. MARTIN. General, do you recall any disapprovals of contracts at all in 1940 on the ground of citizenship of the proposed contractors?

General SCHLEY. I don't know that I do.

Mr. MARTIN. Another question along a little different line. What time in 1941 did you leave the position of Chief of Engineers?

General SCHLEY. My 4 years were up in the autumn of 1941—my 4 years assignment as chief. I left the service at that time.

Mr. MARTIN. Do you recall any checking up on the progress of the Rohl contract, as to whether or not it was lagging in [2414] performance?

General SCHLEY. There is no doubt that knowledge of conditions on every contract we made was reported in to our office in Washington.

Mr. MARTIN. Do you recall anything at all about the work being done in Hawaii giving rise to concern about the maintenance of the schedule as originally planned?

General SCHLEY. No, I do not. And I might say there were many such cases where the contractors were behind schedule on the contracts. There were cases where they were up and cases where they were ahead.

Mr. MARTIN. Could you find out from your examination of the records down here, whether or not the Hawaiian defense construction was one of those that had given occasion for alarm or concern? And I would like to know also whether any of these supplemental contracts were awarded to this Hawaiian Constructors after it had been discovered that there was some delay in construction causing such concern.

The CHAIRMAN. General, when you were Chief of Engineers, did you receive periodically from the field progress reports on the various construction contracts let by your office?

General SCHLEY. They were received by the office.

The CHAIRMAN. But they were not brought to your attention, your personal attention?

General SCHLEY. At one stage of the game, when the work [2415] became very great, we had special reports prepared which kept us all informed of the progress of the work.

The amount of current contracts was quite large and there was quite a volume. That came to the desks of all of us.

Naturally there were brought to my attention cases where a cancellation was involved because of being behind schedule or any other reason.

The CHAIRMAN. But you didn't make it a part of your position to actually keep an eye on the actual progress being made?

General SCHLEY. At one stage it came to my desk.

The CHAIRMAN. Did you have some particular officer whose duty it was to watch progress?

General SCHLEY. Part of the office had to do with civil engineering construction, Rivers and Harbors, and watched those things. Into one of the branches of it came these periodic reports.

The CHAIRMAN. But no specific officer was charged with that study?

General SCHLEY. I have no doubt there was. We had quite a number of officers in our office at that stage.

The CHAIRMAN. How is the work divided up in the Rivers and Harbors division? Do the contracts come in generally to all the officers or are there separate units for all areas?

General SCHLEY. There was a separate section. I don't [2416] know what it was called at that time, but it had to do with the contract features.

And there was another breakdown on the class of work, which was the engineering. The Rivers and Harbors, Flood Control Section, and Military Construction, I think were the three main branches.

The CHAIRMAN. And the contracts at this time came under the Military Construction Section, building airfields and so forth?

General SCHLEY. That may be, because there was military work here involved. And we did have a Fortification Division. It is quite possible this was under the fortifications part of the Military Division.

This was because we took over airfield construction and, of course, later we took over all camp construction, and this was all done on the civil engineering side.

But it is quite possible that this, since it had to do with fortifications in Hawaii such as gun emplacements—

The CHAIRMAN. The letter indicates the contract called for construction including airfields, fortifications, and other defense projects. It is all-inclusive.

General SCHLEY. You can't tell from that which branch it was handled in.

The CHAIRMAN. Most of it was in the Fortification or Military Construction units of your office?

[2417] General SCHLEY. All in my office.

The CHAIRMAN. And any supervision of the progress being made on construction would go to those divisions in your office and not necessarily come to your attention?

General SCHLEY. Until this time when we had the whole thing presented in very easily consolidated form, clearly expressed form, and rather voluminous, and in that case it came to all of us.

The CHAIRMAN. A general progress report of everything?

General SCHLEY. The progress of each contract set forth in it. I have to add there that I didn't pay much attention to the progress being made because there were men whose function it was to do that.

Mr. DURHAM. Did this Construction Committee make its recommendation direct to you on these contractors?

General SCHLEY. Under the Quartermaster General's Office. Our only consultation with them might have been called a preliminary consultation because, if I am not mistaken, Judge Patterson referred his contracts to that committee as a final step.

Mr. DURHAM. Then he would make the recommendations to the Secretary of War?

General SCHLEY. But we found we saved a lot of time if we didn't go too far into the thing until we found they were going to approve the contractor. And they would say, "No [2418] question about him, he is on our list," or, "not on our list."

Mr. DURHAM. Then the contractors were finally approved by Judge Patterson's office. If that correct?

General SCHLEY. I think at this stage everything was going to his office, no matter whether this committee was a part of it or not. But before that, as I say, the Office of Production Management was consulted by us and perhaps along parallel with it later. I can't recall that.

They also had a list of contractors who were considered to be proper for us to contract with.

Mr. BURTON. According to information which has been given to this committee, negotiations for this contract took place between about December 16 and December 20, and the committee has also been informed that the negotiations were conducted by T. E. Connolly of the Rohl Connolly Company, and Paul Grafe of the Price Callahan Company, with you and General Robbins and Major Newman.

I would like to know if you recall any such negotiations taking place.

General SCHLEY. No, I do not. However, the names Major Newman and General Robbins are two who were in that branch of the office, and if I was consulted on this case those are the proper men to consult me. I would say that is the proper trio to be considering such a thing if it was before me.

[2419] Mr. DURHAM. Do you know T. E. Connolly or Paul Grafe?

General SCHLEY. I can't recall T. E. Connolly. Paul Grafe I have known for many years. My first acquaintance with him was that his three companies entered into a contract with the Canal Zone for the construction of the Gatun Dam, which was built while I was in the Canal Zone.

He represented the contractors. It so happens that Gunther and Shirley and the Callahan Construction Company were the three groups which were in this contract, and Paul Grafe was resident manager for them. I was at that time Engineer of Maintenance at the Panama Canal and it was my job to deal with him.

Mr. BURTON. Now, if this contract was negotiated in about four days with Colonel Wyman present here from the Hawaiian Islands, wouldn't that have taken place in your office?

General SCHLEY. If Wyman was in the city and the negotiations proceeded in the city, for a contract of that kind, I would say it would have taken place in the office of the Chief of Engineers, and Wyman would have been present and I might also add that it would be entirely proper for General Robbins and Major Newman to be present.

The CHAIRMAN. What specifically, General, were their duties in connection with your office?

General SCHLEY. In the early part of our expansion of work, Newman was in charge of this very contract work in our [2420] office. He reported to General T. M. Robbins, who was in charge of that half of our office, the Rivers and Harbors half, which had the construction more of a civil nature. This was handled by them and not by the Fortification Division. It would have come under General Robbins and Newman.

Mr. BURTON. Had it been brought to your attention by Colonel Wyman or anyone else that Hans Wilhelm Rohl was a German alien, would you have then and there suspended negotiations until you could have found out about him?

General SCHLEY. Well, I answered a question very much of that same kind a moment ago.

Mr. BURTON. You did and I recall it.

General SCHLEY. And I said that looking at it from what we now know on the passage of time, I would say unquestionably that would be true.

Mr. BURTON. But you couldn't say that as of that time?

General SCHLEY. As of that time it is a little difficult for me to say what I would have done. From sitting where I am now I would say if someone had raised the suspicion I think I would have looked into it.

Mr. BURTON. Do you recall the nature of the installations being constructed in the Hawaiian Islands at that time, that is, December, 1940?

General SCHLEY. Only to this extent, that they were unquestionably installations of a national defense nature.

[2421] Mr. BURTON. That being the case, couldn't you say definitely that had you known a German alien was being employed as a contractor, you should have looked into his citizenship?

General SCHLEY. Sitting where we are now at this time, unquestionably.

Mr. BURTON. I mean at that time generally, as long as they were defense installations, and there existed, as there did exist at that time, very delicate relationships with Germany and with Japan. Don't you think it should have been done?

General SCHLEY. I would have been inclined, as well as I can now turn back the time and sit in that period—I would have been very much inclined to either do that or consult someone above me on the subject to be sure it was the proper thing to do at that time.

Mr. BURTON. All the facts could have been ascertained by a telephone call to the Immigration and Naturalization Bureau, could it not?

General SCHLEY. I have no doubt it could on practically anybody.

Mr. BURTON. Do you know whether or not Colonel Wyman ever did call your attention to the fact that Hans Wilhelm Rohl was a German alien?

General SCHLEY. Of course, not remembering the incident at all, not remembering the name of the contractor, it would [2422] follow that I didn't remember that.

Mr. FENTON. General, on work of that kind, even the plans were secret and confidential, were they not?

General SCHLEY. Yes.

Mr. FENTON. And the very purpose of keeping them secret and confidential was to prevent their falling into the hands of persons who might be enemies of this country?

General SCHLEY. Well, we usually went further than that because, you try to keep things out of the hands of people who might be disloyal, no matter who they are. A man's name might be John Smith and still he could be disloyal.

Mr. FENTON. But you wouldn't assume that any person who might be an enemy alien could be loyal?

General SCHLEY. Certainly not, and I might say this: that in all contracts where you are dealing with very secret installations, you have that very serious problem.

It is not like a manufacturing concern where people are all closely held and all employed for usually long lengths of time, and the firm itself has a certain feeling of responsibility, but where you have a contractor who hires and fires men in the field day after day, and they are all working on extremely secret matters, it is a very serious problem.

Mr. FENTON. You even have the F. B. I. investigate people working on installations of that character?

General SCHLEY. Beginning at this stage of international [2423] developments we did, of course, report every suspicious case.

Mr. FENTON. When did you arrive at that stage?

General SCHLEY. I can't tell you that because I don't fit it into the times, but it was before I left the Chief's office that we not only had that, but also had an F. B. I. man in our own office. The name of the man in the office was not known to anyone. I, of course, knew who it was.

Mr. FENTON. When was that office set up?

General SCHLEY. I can't recall that.

Mr. FENTON. Was it as far back as December, 1940?

Mr. MARTIN. Off the record.

(Discussion off the record.)

Mr. FENTON. When was the period of time you said you were Chief of Engineers?

General SCHLEY. 1937 to 1941.

Mr. FENTON. And I believe you said you knew Colonel Wyman very well?

General SCHLEY. From the last war. He entered the service in the last war before this one.

Mr. FENTON. Did you have any reports at any time derogative to the ability of Colonel Wyman?

General SCHLEY. No, I am sure I can say that the only criticisms I have ever heard of him came from people who suffered from the fact that he was a hard driver in his contract work.

[2424] He was very exacting of his contractors. He was a hard worker himself and he demanded a great deal of the people he was working with, whether his own people or contractors.

Mr. FENTON. You never heard anything derogative to his behavior?

General SCHLEY. No.

Mr. DURHAM. Had he ever had experience in building fortifications of this type before, General?

General SCHLEY. He is an engineer and therefore he knows construction work. He has been in the Corps of Engineers since the earlier war, he has been on the West Coast, Los Angeles, and I am sure he had because his district was quite extensive and that was his job just before he went to the Hawaiian Islands.

I would say Colonel Wyman was thoroughly familiar with the secrecy of the fortification plans and so forth.

Mr. ELSTON. Were you in the Chief of Engineers' Office when Colonel Wyman was transferred from Hawaii and placed in charge of the Canol project in Canada?

General SCHLEY. I am quite sure I was not because I didn't even know that he was placed in charge of that. My last recollection of him is that he was in the Hawaiian Islands. He was transferred from Los Angeles to that assignment when I was in the Office of the Chief of Engineers.

The CHAIRMAN. That was a transfer from Los Angeles to [2425] Hawaii?

General SCHLEY. To Hawaii.

Mr. BURTON. Do you recall any of the circumstances surrounding or connected with his transfer from Los Angeles to Hawaii?

General SCHLEY. I remember one or two features connected with it. One was that he had been kept in Los Angeles quite a long time and it was our policy to relieve men at the end of a 4-year tour at the end of one of those assignments, if possible. We didn't want them to get too closely connected with local affairs. We wanted them to retain their national point of view.

We left him long enough to be thoroughly familiar with the work, and we usually considered 4 years to be that time.

My recollection is that he was at Los Angeles longer than that and we left him there because he was doing well at it. It was a large job with large expenditures being made.

And also, if I remember correctly, the Los Angeles flood control interests were very much pleased with him. His transfer out there was, I would say, a normal thing.

Mr. ELSTON. General, who passed on his transfer from Los Angeles to Hawaii? Who made that assignment?

General SCHLEY. I would say that it would be made in that instance by the man who occupied the position of assistant on that half of the office, unless it

was something [2426] of such importance that it was taken to the top where the responsibility would be carried.

Mr. ELSTON. Who was that?

General SCHLEY. At that time it was probably General Robbins, the same man you spoke of. His predecessor was General Max C. Tyler, but I don't think he was there at that time.

Mr. ELSTON. You seem to have some knowledge of the work Colonel Wyman was doing in the Los Angeles area. Have you any knowledge of his being transferred to the Hawaiian area and the circumstances surrounding that transfer?

General SCHLEY. Only those that I have just mentioned.

Mr. ELSTON. If anyone suggested his transfer or urged it, would it appear in the files?

General SCHLEY. If they urged it in writing it certainly would.

Mr. ELSTON. Do you recall anybody suggesting his transfer?

General SCHLEY. Not outside of our own office.

Mr. ELSTON. Do you remember anybody in your office suggesting it?

General SCHLEY. I have a recollection that I knew of the transfer at the time and that is what I recall in connection with it, that he had been in Los Angeles quite a long time. That is the feature that I recall.

[2427] Mr. ELSTON. You won't recall anybody suggesting the transfer to Hawaii?

General SCHLEY. You mean anybody in my organization or outside of it?

Mr. ELSTON. Either way.

General SCHLEY. No. As a place selected for him to go?

Mr. ELSTON. Yes.

General SCHLEY. No. I remember something connected with his personal affairs at the time, because he had been recently divorced and his alimony was quite considerable, and he felt that going to the Hawaiian Islands would be—in some way he felt it would be an additional expense which it would be difficult for him to carry and, if I remember correctly, he spoke of that in connection with his transfer, as if he would just as lief be left in the United States. I don't remember what that feature was.

Mr. ELSTON. Did he talk to you about that?

General SCHLEY. No. I don't recall his having mentioned it to me.

Mr. ELSTON. From whom did you get that information?

General SCHLEY. I probably got it from my own office.

Mr. ELSTON. Do you at any time pay any attention to the requests of the engineer himself as to where he would like to go?

General SCHLEY. Yes, we invite him to comment on his [2428] preferences.

Mr. ELSTON. Did you or anyone in your office consult with Colonel Wyman on this matter?

General SCHLEY. That I don't recall. I say we do it automatically because, as you may know, the Adjutant General used to invite in the reports which were made periodically, your own request as to where you would be stationed next, and the class of work you preferred to be on. And often an officer might ask for a particular station. We would consider that.

It might be something about family affairs or some other affairs.

Mr. ELSTON. Do you have them made out a request in writing when they want a transfer to some particular place?

General SCHLEY. Not necessarily.

I might say this: That it is unusual for a man to request a certain assignment and get it, because most of them don't request and, in the second place, usually something stands in the way.

So, as a rule, I would say a man gets a new station rather as a surprise, and he takes it and likes it.

Mr. ELSTON. Well, in the Army wasn't the transfer to the Hawaiian area considered one of the best?

General SCHLEY. I have never so considered it. Of course, when you say "one of the best," many things bear on [2429] that. You have more good times at certain places than you do at others. You have more responsibility at some places than at others. Your chances of advancement are greater if you get certain assignments rather than others.

All those things count, depending upon the individual and his personal affairs.

Mr. ELSTON. General, is there an increase in salary when an officer is sent from the United States to Hawaii or overseas?

General SCHLEY. At that time my recollection is that there was not. There were several stages of that, looking away back in the earlier service. There was a 10 percent increase for foreign service. At that time the foreign service was the more unhealthful places, such as the Philippines. At that time certain stations were excluded from that special treatment and, as I recall it, it was all wiped out. They found the health records in the Panama Canal Zone were better than in the United States. Hawaii was one of the earlier ones withdrawn because it was a healthful place.

The CHAIRMAN. General, as soon as these records are available to you in the War Department, I wonder if you would make it a point to review them and see if you can secure any further information?

General SCHLEY. Whom would they be sent to?

The CHAIRMAN. The committee has already requested certain documents to be forwarded to the committee, which the Department [2430] is assembling for that purpose.

I suggest that you yourself might obtain access to the records and refresh your own memory in regard to them in connection with the Hawaiian Constructors contracts.

General SCHLEY. Then you want me to call the committee?

The CHAIRMAN. I thought we might call you further as a witness after you have had an opportunity to refresh your memory.

General SCHLEY. I will examine the files rather than produce them here, and be prepared to answer these questions about these phases of it.

The CHAIRMAN. I believe Mr. Burton has already requested the documents to be made available to the committee, so that request will stand.

Mr. BURTON. I have requested certain records but there are probably some records in addition to those that it will be necessary for you to consult.

I doubt if everything necessary to refresh your recollection will be included. Do you think they will be, Colonel?

Colonel KNOWLES. I am of the impression that there were no minutes kept of conferences preliminary to the institution of the contract, and that was one point that was discussed in the earlier part of the general testimony.

My understanding is there are no such transcripts. The contract speaks for itself.

[2431] So, as I see the picture, the General would have to refresh his recollection from the contracts and the supplements and from such directives as were in existence at that time governing the negotiations.

Mr. BURTON. Is there no correspondence, no transcripts of telephone calls? Wasn't this recommendation which was made to the Under Secretary in writing?

Colonel KNOWLES. The contracts were transmitted from the Corps of Engineers up to a certain period in 1941 where they amounted to over \$500,000. I thing around April or May, 1941, that was changed to \$5,000,000.

After that period, without being sent to Washington, they were executed in the field.

Mr. BURTON. This was in 1940.

Colonel KNOWLES. That is right. The original contract was for \$1,800,000. That would be submitted to the Under Secretary's office for approval.

Mr. BURTON. There would be some record of that?

Colonel KNOWLES. It would be sent with a transmittal slip.

Mr. BURTON. Then, a copy of that would be available?

Colonel KNOWLES. Well, what is available is the last page of the contract where it shows the approval of the Under Secretary. It would come into the Under Secretary's office with probably a buff slip for approval and signature. He [2432] would sign under the approval.

General SCHLEY. I would say if it was signed by Colonel Wyman and somebody in the office of the Chief of Engineers, and then went to Mr. Patterson, it would be assumed that it was approved. I would say the fact that it was signed before it reached Mr. Patterson, is prima facie evidence that we recommended that it be signed.

Mr. ELSTON. Wasn't that contract signed in Washington by all parties?

Mr. BURTON. Yes.

Mr. ELSTON. Certainly someone must have sat around a table and there would be some record of that. Perhaps Colonel Wyman could advise you whom he saw when he came to Washington if he did at this time.

You call up some of these departments downtown and they turn on a phonograph and get a record of the conversation. They are getting very particular about some people and very careless about others if they don't keep a record.

General SCHLEY. Of course, responsibility is pretty well fixed. I don't have to have a memorandum. I always assume that with something coming from the field, if a paper comes to my desk with the signature on it, certainly that is recommended to me.

Mr. ELSTON. The fact that they came to Washington to execute that original contract would show that it was necessary [2433] to talk it over with somebody in Washington before the contract could be approved, wouldn't it?

General SCHLEY. Let me put my answer a little different from that. I would say it was not usual for the District Engineer to accompany a contract to Washington. I think anything done outside the country might have had a different light thrown on it.

In the Hawaiian office you have a number of contractors. I have not been in the Hawaiian Islands for 40 years, but I have been in Panama a great deal. In Panama you can't find a local contractor except those who have come down to do some work and stay on for another piece of work.

Mr. DURHAM. Wouldn't that District Engineer have to be ordered here by somebody higher up?

General SCHLEY. He would have to ask permission to come to Washington or we would send for him to come.

Mr. ELSTON. The name of the company, Hawaiian Constructors, would imply that they were ready to do business in Hawaii.

Mr. BURTON. On December 16, according to information that the committee has, this contract had not been signed, and it was negotiated in Washington between December 16, 1940, and December 20, 1940. That is, Colonel Wyman did not accompany the contract here, but he came here and it was negotiated in Washington and, as I said before, according to the information we have, that negotiation took place between Paul Grafe, T. E. [2434] Connolly, yourself, General Robbins, and Major Newman.

According to Mr. Connolly's own signed statement, he came here on December 16, 1940, and that it the first time he ever heard of the contract.

I think that is all.

The CHAIRMAN. We appreciate your coming here today, General, and Major Knowles, and I wonder if you will make an effort to review whatever records you might be able to obtain, and you might let Mr. Burton know whatever you are able to obtain, and if we deem it necessary to do so we might have you come back and question you further with regard to certain matters.

(Thereupon, at 4:30 o'clock p. m., an adjournment was taken without date.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 11A

Vol. 70

REPORT OF PROCEEDINGS

HEARING HELD BEFORE EXECUTIVE SESSION, SPECIAL COMMITTEE OF THE COMMITTEE ON MILITARY AFFAIRS, HOUSE OF REPRESENTATIVES, U. S., WASHINGTON, D. C., MAY 4, 1944

CONTENTS

Statement of Schley, Major General Julian L----- Page 3282

[3282]

CONTRACT—ROHL-CONNOLLY

THURSDAY, MAY 4, 1944

HOUSE OF REPRESENTATIVES,
SPECIAL COMMITTEE OF THE COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C.

The special committee met at 3:20 p. m., pursuant to adjournment, in Room 1310 New House Office Building, Honorable John W. Costello (chairman) presiding.

Present: Representative Costello (chairman), and Representative Elston (Ohio).

Also Present: Mr. H. Ralph Burton, General Counsel to the Committee.

The CHAIRMAN. I understand, General, that you are prepared to give some testimony to the Committee in connection with the testimony which you gave to us previously, after you had had an opportunity to refresh your memory from documents in the War Department, and so on, in connection with your duties there.

STATEMENT OF MAJOR GENERAL JULIAN L. SCHLEY

Gen. SCHLEY. That is correct, sir, and I have been at it from time to time as I found papers in the Chief of Engineers' Office, and kept Mr. Burton informed, as soon as I learned some papers were on the way from the Hawaiian Islands which I knew would throw some light on some parts of it.

[3283] After they did arrive, I have had a chance to look over some of them. I have learned in the last few days that many more are on hand, or rather on their way too, but I thought since it has been some time since I appeared last, I thought I better notify Mr. Burton so that I could at least bring you up to date on the situation.

I would like to correct, first, one point on which I was somewhat hazy when the question was first asked me when I was here before, not having had time to consult the records, and that is, that this particular contract was reviewed and approved after it left the Corps of Engineers, by William S. Knudson, of the Advisory Commission of the Council of National Defense. It was subsequently approved by Robert P. Patterson, as Under Secretary of War. That position of Mr. Knudson and that Commission was one of the steps in the development of those review boards; it was later changed to another board.

Mr. BURTON. You are speaking of contract W-414-E. N. G. 602?

Maj. Gen. SCHLEY. That is correct, sir. Answering one of the questions which the Committee asked me specifically, and that is to see if I could locate any notes, memos, or letters which bore on the conferences or negotiations or anything to alter the contract, and I have done that and I find none. There is some additional information, however, on this particular contract after it was prepared, and that was that the [3284] application for approval of a cost plus a fixed fee form of construction, which we had to do in those early days, was submitted the 14th of December by Colonel Wyman.

The CHAIRMAN. What year is that?

Maj. Gen. SCHLEY. 1940. And forwarded from the Division Engineer, Col. J. D. Matherson, to the Chief of Engineers' Office. On December 18, a letter was written to the Assistant Secretary of War by Lt. Col. Earl E. Gessler, of the Financial Section, similarly requesting authority, or in other words forwarding this application for authority for the use of the cost plus a fixed fee contract. This was approved by the Assistant Secretary of War on December 20, 1940, and this endorsement stated that the Secretary of War had determined it was necessary to enter into a cost plus a fixed fee contract for the construction proposed, and that authority to enter into negotiations of that contractor selected and the constructors—contractors' fee being subject to subsequent approval by the Assistant Secretary.

Mr. BURTON. You spoke of the Assistant Secretary. Do you mean the Under Secretary?

Maj. Gen. SCHLEY. I mean Mr. Patterson. I am not sure whether at that time he was Assistant Secretary or Under Secretary. The records, I think, show at that time Assistant.

On December 26, 1940, Col. Gessler sent a memorandum to me, as Chief of Engineers, with the contract, dated [3285] December 20, between the United States and the constructors. The constructors consisted of W. E. Callahan, of Nebraska, Gunther Shirley, of Nebraska, and Rohl-Connley (spelled C-o-n-n-l-e-y-), a Nevada corporation.

Mr. BURTON. I think it is C-o-n-n-o-l-l-y. I think it is.

Maj. Gen. SCHLEY. I have it another place here. But the contract will show.

On December 28, Col. Gessler sent a memorandum to Commissioner Wm. S. Knudson requesting clearance for the award of contract W-414-E. N. G. 602 with constructors. On December 28, same day, Col. Gessler sent a letter to the Under Secretary of War, now recorded here as "Under Secretary, transmitting the contract and giving certain information concerning it. This was approved by Robert P. Patterson under date of January 3, 1941.

That corrects some approximate information which I tried to give from memory when I came here before.

The Committee wanted to know the supplemental agreements. Do you still want me to give information on them? You now have them, I believe.

Mr. BURTON. Copies of those are now in our office. As I remember, there was an original contract dated December 20, 1940, and there were forty-six supplements.

Maj. Gen. SCHLEY. I might say that the first four [3286] supplements were effected before I left the Service: Number 1 on March 22, 1941; No. 2 on May 5, 1941; No. 3 on May 22, 1941; No. 4 on June 19, 1941.

Now, the other question I was asked was the progress made under the contract. In other words, was the contractor, did he show any great amount of delinquency? I have made a very extensive effort to try to get some information on that, and what I have got is very unsatisfactory, not as to the contractors' progress, but as to my ability with the papers at hand and time at my disposal to check. However, I can throw some light on the subject.

The manner in which the contract deals with the question of time is interesting, and I think it is understandable when we realize the changes which were made as the contract progressed. Indicating that work was crowding on the contracting officer to be done, and that when this contract was entered into, something of that was undoubtedly foreseen. Because it reads as follows as to the time and as to what was to be done specifically: The contract is quite general in what it proposes to be done, and falls under five categories, one of which, for instance, is railroad trackage at location specified in article 1, paragraph 1. When we returned to article 1, paragraph 1, we will see that it still is a very general statement of what is to be done. In paragraph (f) under article 1, section 1 of paragraph 1, is the [3287] following:

Additional work may be required to be done under the terms, if and when additional monies appropriated for National Defense purposes become available, provided such additional work is ordered to be done by the contracting officer.

That, plus the very indefiniteness of these requirements under the contract, show to me that there was not in the mind of the contracting officer, and therefore not in the mind of the contractor, any specific quantity of work to be done, except that the estimated work was a definite number of dollars and cents, and that must have been based on an estimate for doing some particular work.

Mr. BURTON. Do you find there an item, General, for air raid warning stations, and, I think, also, for storage of ammunition?

Gen. SCHLEY. Here is the warning service one. The second of the group of kinds of work to be done: Warning service stations at locations to be determined specified in article 1, section 1. Article 1, section 1, says this, under (b) of article 1, section 1: Aircraft warning service stations on the Islands of Oahu, Hawaii, Maui, and Kauai, involving certain installations including the building of roads, trails, cableways, haulage ways, and other structures appertinent to aircraft warning service, as directed by the contracting officer. That is what the contract includes in that category.

[3288] Then, I read this item on additional work, another paragraph just a little further down, reading as follows:

It is estimated that the total cost of the construction work covered by this contract will be approximately \$1,097,673, exclusive of contractors' fees and that the work herein contracted for will be ready for utilization by the Government within six months from the date of this contract.

Then follows this: It is expressly understood, however, that the contractor does not guarantee the correctness of either of these estimates.

Mr. ELSTON. What was the date of that, General?

Gen. SCHLEY. That is in the contract proper.

The CHAIRMAN. What is the date of it?

Gen. SCHLEY. December 20, 1940. Now, that, I give not to try to prove to the Committee that it is useless to try to pursue that question, because I don't intend to do any such thing; and with the proper group of men to do the research and with all the papers present, it is quite possible to tie together a little more, certainly better than I have been able to do here, those two things, and that is what was expected and what was done.

Now, let's turn to job orders on that same subject. There are a great many job orders, and while I have not been [3289] able to establish the fact, I think no work was done under this contract unless it was covered by a job order. In other words, I don't think the job orders are in addition to what is mentioned in broad terms in the contract, and what is mentioned more specifically

in the several supplements following, but I think that they are all included in the job orders, but I have not been able to establish that.

Now, the job order as to time reads this way:

Estimated time for completion: The job order has the work to be done, the place where it is to be done, commencement date, that is usually the same date as the job order, and estimated time for completion, showing there, again, that, apparently, the relationship between the contractor and the contracting officer was that the contracting officer was to drive the contractor to do the work, the contractor to do it efficiently and rapidly or not, depending on how good a contractor he was.

Now, if you care, I will attempt to go into the several efforts to follow up requirements, as compared to progress, but it is scarcely worth your time, to be frank.

I have one other piece of information to add to what I gave you before, and that is a little more specific about the times when certain officials in the Office of the Chief of Engineers were on duty connected with this kind of work. In general, the Chief of Engineers, the Chief Engineer did work [3290] under two categories: First, entering into the contract, which was a matter of determining the contractor, determining the terms of the contractor, including the work to be done, and having the necessary formalities gone through with, the bonds furnished, signature supplied, and approval of what is called the Contracting Claims Branch. Claims arising out of contracts by the Construction Section, the branch follows it up on contracts. It is the one which handled the reports on progress, and seeing that the contractor—reviewing the work in the field to the extent the Office of Chief Engineer found it necessary and desirable to review them. The Claims, the Contracting Claims Branch, during the entire period that interests me in this particular contract, was under Lt. Col. Earl E. Gessler. I gave you that information over the phone one day, Mr. Burton.

Mr. BURTON. Yes, sir.

Gen. SCHLEY. He was assisted in this work, insofar as these particular jobs were concerned, under Major James B. Newman, from October 7, 1940, to June 4, 1941, when he was relieved. Major Joseph W. Cox was in immediate charge of that work from June 16, 1941, to December 12, 1941.

The construction Section, during the entire time, was under Major J. R. Harden, who is the one which followed up on the progress of the contract. He was there until December 16, 1941, which covers my period.

[3291] One of his three branches, he had one on Navigation and River Improvement, one on Flood Control, and one of—one on Defense Projects, and that branch on Defense Projects, which relates to this work, was under Major E. G. Plank, who happened to come into the office the same date this contract was dated, December 20, 1940, and stayed there all through 1941 calendar year.

Now, the Fortifications Section was under a different part of the office again, Lt. Col. George Mayo. I might explain to you this much to give you a little more background which I had to refresh my memory on as to time. As you know, the Corps of Engineers in time of peace had the construction of all our sea coast fortifications. As a matter of fact, that is the only kind we build in time of peace, so we might say, all of the fortifications. They had also certain public works which are classed under Rivers and Harbors; that is what it is called here, and Flood Control too. The construction work, therefore, was of a civil nature, and the military work—construction of fortifications—was the only part of a military nature, and they came under the military side of the office.

As the Army expanded and work began to increase of defense preparedness, there was transferred to the Corps of Engineers from the Quartermaster's Corps, first, the work on air corps construction. That was done under letter of Adjutant General dated November 20, 1940, one month before this contract. [3292] In those instructions, we were definitely advised that it would not be effective, the transfer, on a certain date, but that the Corps of Engineers would take over from the Quartermaster's Corps each project at each air field as it reached a stage where the transfer could be made in an orderly manner so as not to cause confusion or loss of progress. The result was that it was some period of months before November 20 before that transfer was complete.

All work of the Constructing Quartermaster was turned over to the Corps of Engineers on December 6, 1941. That is a year and two months later—three months.

The organization of the Chief of Engineers' Office changed to meet these changes, the Fortifications Section continuing to do fortifications up to a certain date, which I don't remember, it is past my time, when it was absorbed into the larger construction work. The Construction Section has just indicated setting up a third branch called the Defense Projects Branch, and its first work was to handle this air crops construction which was mostly air fields. And in addition, Newman was set up followed by Cox on what I might call emergency work of further contract in violation of the normal laws after due advertisement and competition by selecting the contractor and making it a cost plus a fee basis. Those men came in to undertake that work.

Mr. BURTON. Have you anything which would throw light [§293] upon the progress of the work concerning the air raid warning stations? According to the contract, those stations were supposed to be completed within six months after the date of the contract, or, at least, after the approval on January 3, 1941, and they were not finished on December 7, 1941, and if you can throw any light on what caused the delay—

Gen. SCHLEY. I am afraid I haven't enough—

Mr. BURTON. We would like to have it.

Gen. SCHLEY. I checked between the requirements and the progress to be able to answer you that question, but feel quite certain—I will verify it in a minute—that there was a good deal of warning stations included also in the supplements. I may be mistaken, I will look it up and see (consulting file). I am quite certain you will find that better in the job orders, which I haven't with me because they are so numerous, but I feel quite certain you will find air raid warning things running through the entire file, not only for this period that I have which relates to me, but also to subsequent periods. I will see whether those I was able to match up whether there was any aircraft warning.

Mr. BURTON. Doesn't the original contract provide that air raid warning stations should be installed on the Island of Oahu?

Gen. SCHLEY. I read to you, I think, everything that is in the contract itself on the subject, and that is in the [§294] second item under the work to be done which says: Warning service stations at locations to be determined as specified in article 1, paragraph 1. And then, turning to that article, under (b) is this expression: Aircraft warning service stations, on the Islands of Oahu, Hawaii, Maui, and Kauai, including certain installations, including building roads, trails, cableways, haulage ways, and other structures appurtenant to aircraft warning service, as directed by the contracting officer.

Now, the job orders—there are many of them—which relate to this aircraft work, aircraft warning work; and it will be necessary to get all progress reports and compare them in order to see if there was a time sufficiently set which was exceeded in the instructions. I have not those and have not been able to find them in Washington. It may be among the things which are coming from Hawaii which are on the way now by regular mail.

The CHAIRMAN. But, General, where the original contract provided for certain air raid warning installations, did these job orders amplify the nature of those installations that were to be put into various places on the Islands?

Gen. SCHLEY. As I said a few minutes ago, sir, I assume that no work was done that isn't covered by a job order, which may be a further detail of what the contracted intended in more general terms to require. But I find this statement [§295] in the contract, and I have been unable to find the part which it refers to. "In accordance with the drawing and specifications, our instructions contained in Appendix A hereto attached and made a part hereof are to be provided hereafter by the Contracting Officer and subject in every detail to his direction and instructions."

Now, you have not in your set that Appendix A, nor have I a set with Appendix A. Appendix B is there, which is a less important paper; it is quite possible all Appendix A's were in the Hawaiian Islands.

Mr. BURTON. You have a set of photostats of the contracts which are similar to those which we have, have you not?

Gen. SCHLEY. I received a set day before yesterday. But I have examined the originals, and I have verified the fact that in those originals there is not this Appendix A. Now, whether that will give the details or whether the job orders are intended to do so is something I am not familiar with. I have seen all the job orders; you now have those, I believe, or they are coming.

Mr. BURTON. I have not received the job orders yet.

Gen. SCHLEY. I have examined all of the job orders pertaining to 1941, and there again I fail to find the design which was referred to, the drawings, but

I find enough, I think, to serve this purpose. When you get them, I think [3296] you will be able to tell pretty well where the job was to be done, what the estimated cost was, and the estimated materials to go into it, date commenced, and estimated time for completion. But you are going to run into this difficulty, which is extremely complicated. Sometimes, you have as many as 24 addendums. There will be Job Order 25 with 24 addendums. Those addendums will add to the job until you get toward the end, and then it begins to cancel some of them. So it is going to be quite an undertaking to tabulate those so that you can see what was under way at any particular time in the progress of every job order. And that job order may run to 1943, some of them do, for something which was started in the early part of 1941.

Mr. BURTON. Insofar as you know, there isn't anything else that would give definite information on the progress of work or reason for delay other than the job order item, except as it may be in the papers which are now enroute. The papers left the Islands, I would say, a week ago by straight mail, probably too heavy for Airmail.

Mr. BURTON. This is off the record.

(Discussion outside the record.)

Mr. BURTON. According to the records of our office, the original contract of December 20, 1940, schedule B, reads: "Aircraft warning stations on the Islands of Oahu and Kauai involving certain installations including buildings, [3297] roads, cableways, haulage ways, and other structures pertinent to aircraft warning service."

Gen. SCHLEY. My copy which I have made here from the contracts have two more Islands: Hawaii and Maui, besides the two you read.

Mr. BURTON. Pearl Harbor is at Oahu?

The CHAIRMAN. Yes.

Gen. SCHLEY. Pearl Harbor is on the Island of Oahu.

Mr. BURTON. That is the particular reason why we were interested in the air raid warning stations?

Gen. SCHLEY. Yes.

Mr. BURTON. Which were, according to the contract, to be installed within six months after the date of the contract?

Gen. SCHLEY. Yes.

Mr. ELSTON. And they were not furnished, not finished when Pearl Harbor was bombed?

Mr. BURTON. That is right.

Mr. ELSTON. And were not finished, as I understand it, for about two months after that, isn't that correct?

Mr. BURTON. That is right.

Mr. ELSTON. Now, General, right in that connection, what action did the War Department take when the contractor didn't complete his contract on time?

Gen. SCHLEY. I would say that a large number of [3298] contracts are not completed on time for various reasons, some the fault of the contractor, and some not the fault of the contractor. I would say that it is not unusual for a contractor to be late in his contract. I would say that what the Government does depends a great deal on the circumstances, and I don't doubt that policies change from time to time with conditions and with individuals who are responsible.

Mr. ELSTON. Do you know what was done in this particular case, if anything, when these air raid warning stations, which were supposed to be completed in six months, were not completed even within a year?

Gen. SCHLEY. Well, of course, I can't agree with you—I don't want to argue, the time was different from six months, but it is worthy of note that the contract was not specific as to the time. It was evidently an estimate. Second,—

Mr. ELSTON (interposing). Well, isn't that a rather inaccurate estimate as it is estimated? They estimated it can be completed in six months and it wasn't completed in a year and two months?

Gen. SCHLEY. I think you have to give weight to the wording in the contract which says that it is expressly understood, however, that the contractor does not guarantee the correctness of either of these estimates. Those two estimates being the cost and the time. And the cost estimate reading in this manner:

[3299] "It is estimated that the total cost, etc., and that the work herein contracted for will be ready, it is estimated that it will be ready."

Now, that is not the form of contract which is entered into. That phraseology is unusual, except in this form of contract, of the cost plus a fee. Where you

advertise for bids, as undoubtedly you know, and then enter into a firm contract to do a specific job, the design and the structure is finished; the estimate of cost is all made by the contractor and by the Government representative; advertisement is made in which bids are submitted, firm bids, and the man, each bidder submits a bond that he would enter into the contract if the contract is awarded to him. Then when it is awarded to the lowest responsible bidder, that bond is released and then he gives bond as he entered into the contract that he will perform this work as required and that requirement, in all cases, we might say, involves a question of time.

When the contractor finishes his job and does it certainly within the time and he has paid the standard amount of money, that, in this kind of contract, is by no means not the case. If you took the time—one man could not do it—but if a group of men investigated this thing and got the picture at any one time of the number of things which the contractor was called on to do, and when the completion dates of those things were, then you could judge at any one time whether he was [3300] seriously in fault. But you must remember the requirements of this original contract were added to and subtracted from as the contract progressed. I am not saying the contractor was not grossly delinquent at the end of six months. He may have been; I don't know that he was, but I do think that in charging or judging, it is proper that the Committee take into consideration that phraseology, which is peculiar to a cost plus a fee form of contract. The contractor has agreed to nothing except that he is willing to accept this amount of fixed fee and he is going to undertake to do the work at a time specified, but no guaranty. He may have been grossly delinquent at the end of six months, but I don't think we have the facts to show it; I haven't, at least.

Mr. ELSTON. There were no bonds given on the contracts of that kind?

Gen. SCHLEY. I don't think so.

The CHAIRMAN. Is there a penalty provision?

Gen. SCHLEY. I don't think so.

The CHAIRMAN. The contract, then, did not ask for any penalties to be paid by the contractor for not making a completion of the work?

Gen. SCHLEY. If I am not mistaken, the remedy is to throw the contractor off the job and enter into contract with another one. If you are faced with that sort of step, you know you are going to cause delay by that very action, and [3301] it is often a very close decision, even if the contractor is delinquent, to keep him on the job and try to drive him, or get rid of him and take the loss which is always part of such a change.

The CHAIRMAN. If you had in most of these contracts a penalty for failure to keep within the time, that is your best incentive to get the contract completed in time?

Gen. SCHLEY. That will stand up in the courts under certain conditions. Sometimes the court will throw out the whole action; in other cases, where you can show real damage, you can.

Mr. ELSTON. Well, that is in a case where something occurs which the contractor could not reasonably anticipate. Do you know whether anything occurred in this case that the contractor could not reasonably have anticipated?

Gen. SCHLEY. That, I could not say, sir.

Mr. ELSTON. He didn't have any strikes, did he?

Gen. SCHLEY. I couldn't say; I have not the facts. I have found in one case that I was able to check through, I did find that the steel for a tower had not been received for coast defense work.

Mr. ELSTON. General, wouldn't there be some record showing why he hadn't completed it? Certainly, a few days wouldn't make a lot of difference, but where six additional months go by and the job isn't completed, there must have been [3302] something in the record to show why it wasn't completed.

Gen. SCHLEY. That may be, sir.

Mr. ELSTON. Well, do you think you could find anything in your records along that line so that we would know what did occur that prevented this contract from being completed short of fourteen months?

Gen. SCHLEY. I think I have consulted, I have reason to believe that I have consulted everything that bears on the subject that is now in the Office of the Chief of Engineers or in the Secretary of War's office. He has some of the original papers. I have no reason to believe that anything has not been shown to me. The files have been searched many times, I have asked specific questions, and have searched them no later than this morning and made my last effort to find some other things, I thought I might be able to locate. However, we must

2972 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

remember that these things are on the way, and I would say that if this Committee puts a large enough force on it to analyze it for yourselves fully, you will be able to get a satisfactory answer to that very question.

The CHAIRMAN. The supplements, General, are in the nature of a separate contract itself for different items and different amounts?

Gen. SCHLEY. Some of them apparently extend the quarters in the original contract and in each other, and others enter into new kinds of work.

[3303] Mr. BURTON. I thought the original contract of December 20, 1940, was only for \$1,790,000-odd dollars, where supplement six is for \$2,249,600 for construction of underground facilities for various gasoline storage. I could state for the record that the total amount of the contract, the total estimated amount of the original contract and all of the supplements was about \$135,000,000, about 65% of which was completed on January 31, 1943, when the contract was terminated for the convenience of the Government.

Gen. SCHLEY. I could throw some light on that which I ran into in the files, but it doesn't seem to be my part of the responsibilities, so I should, perhaps, leave that for others.

Mr. BURTON. Do you recall whether or not the Rohl-Connolly Company was particularly recommended for efficiency and ability to complete work rapidly?

Gen. SCHLEY. No, I find nothing in the files about that, nor have I personal knowledge of that company. It so happens that the other two companies I do know, and have worked with in Panama. I know them and had very long dealings with them for almost three years. The Rohl-Connolly, the name is new to me, new to me since you have commenced this inquiry; I don't remember having seen it. The Callahan Company is quite well known. There were even more than those three before the thing ended. During my time, supplement 3 [3304] brings in one additional contractor, Ralph E. Wooley.

Mr. BURTON. That is true. At the beginning, Rohl-Connolly Company and then Callahan each had a participation of 40 percent, and Gunther Shirley 20 percent in the Iron Constructors, Inc. Later on, they took in others, and the relative participation was reduced.

Gen. SCHLEY. Off the record.

(Discussion outside the record.)

Mr. BURTON. Well, I think that is about all that we have. That is all the General can give us on the subject.

The CHAIRMAN. Do you have anything more you wish to add?

Gen. SCHLEY. No. I regret I wasn't able to check progress; I would like to have. I examined the general project reports for the Office of the Chief of Engineers, which had circulated in the office from field reports, but it did not pertain to contracts. It was to familiarize the higher officials of the office, what was on the books and how far completed it was, but they were in classes of work. For instance, there would be 700 barrels at a certain location; there would be 53 something else there. But not broken down by contracts. The progress of the contracts were not in those.

The CHAIRMAN. You were located, General, in Hawaii at this time?

Gen. SCHLEY. No, sir, I was here.

[3305] The CHAIRMAN. Here in Washington. You were never over in Hawaii at the time of the progress of these contracts?

Gen. SCHLEY. No, it so happens I did not visit the Hawaiian Islands during my entire four years in the job.

Mr. BURTON. I had asked the General to give us what he could because this contract was negotiated in Washington, and I thought, for that reason, that he might recall some of the incidents related to it.

The CHAIRMAN. You have nothing further to add to any testimony you may have given the Committee regarding negotiations that took place here in Washington concerning the contract?

Gen. SCHLEY. No, sir, nor have I anything at all which bears on the question which you have asked me.

The CHAIRMAN. Those negotiations were not conducted directly by you or with you personally?

Gen. SCHLEY. I did not take part in them at all. I signed the contract as it shows as recommending its approval to the Under Secretary of War.

The CHAIRMAN. That would be done, as you recall, as a matter of routine business like so many other contracts coming to your attention for approval by inferior officers?

Gen. SCHLEY. Yes, except as I said when I was here before, in spite of a number of things of the kind which I signed, I tried to grasp what the thing was that I was signing [3306] to see if there was anything on the fact of it that I wanted to ask about of the responsible officers who were my assistants who were handling it. This was not one of those. There seemed to me to be nothing on the face of this which prompted me to go into it further before signing.

The CHAIRMAN. Any further questions?

Thank you very much, General, we appreciate your cooperation with the Committee.

(Whereupon, the meeting adjourned at 4:10 p. m.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 12

(Exhibit No. 12 consists in the main of the following photostated items:

Folder of Hotel Biltmore, Los Angeles, records relating to H. W. Rohl, which will be found reproduced as Items No. 10, 11, 12, and 13.

Bank statements from Seventh and Figueroa Branch, Bank of America, Los Angeles, relating to Theodore Wyman, Jr., which will be found reproduced as Items Nos. 14, 15, 16, 17, 18, 19, 20, 21, 22, and 23.

Signature cards of Bank of America in name of Theodore Wyman, Jr., reproduced as Items Nos. 24 and 25.

Folder of Daily Records of Long Distance Calls, the Biltmore Hotel, during period July 15 to December 21, 1940, which will be found reproduced as Items Nos. 26, 27, 28, 29, 30, and 31.

The Items to which reference is made, *supra*, will be found reproduced in the volume EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

VETERANS ADMINISTRATION

January 1, 1925—Adjusted Service Certificate A-2,430,361, \$1557 issued to Colonel Theodore Wyman, Jr.

January 15, 1936—Final settlement by Veterans Administration. Amount—\$782.92 (\$774.04 deducted for loans, interest, etc.)

April 1, 1936—U. S. life insurance policy K213051 surrendered for cash, \$3834.99.

ARMY PEARL HARBOR BOARD EXHIBIT No. 13

JOHN WEINER, INVESTIGATOR FOR HOUSE MILITARY AFFAIRS COMMITTEE

It was expected that at the February 15 hearings of the Committee there would be testimony indicating that during the Spring of 1942 in Hawaii Colonel Wyman and three other Army officers participated in an evening of drinking in a hotel barroom. Wyman became quite intoxicated and stated:

"There are probably a good many things which I have done during my life that are not exactly right, but there is one thing I have not done and that is to sell out my country the way that s. o. b. Rohl did to his German friends. I should never have trusted him and what I should do now is take this service revolver, go out and shoot him and then blow my own brains out."

It is said that Weiner has an affidavit from a Capt. Gutter who was attached to the General Staff at Washington in July 1943 embodying Wyman's remarks.

The day after the carousal Capt. Gutter and the other officers reported the incident to the G-2 office at Honolulu. Nothing was heard for about six weeks when the officers were called in and statements taken. Nothing further was heard of it.

2974 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

ARMY PEARL HARBOR BOARD EXHIBIT No. 14

(Exhibit No. 14 consists of telephone toll tickets, Los Angeles, California, which will be found reproduced as Items Nos. 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46 and 47, EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 15

(Exhibit No. 15 is a radar plotting sheet of December 7, 1941, Opana, and will be found reproduced as Item No. 48, EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 16

Volume of broadcasts, Fulton Lewis, Jr. (Withdrawn after examination by Board and returned to witness.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 17

Documents selected from folder relating to Canol Project. (Withdrawn after examination by Board and returned to witness.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 18

Documents selected from personal file. (Withdrawn after examination by Board and returned to witness.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 19

ITEMS APPEARING IN THE HONOLULU ADVERTISER

Headline, Page 1, Sunday, 30 November 1941

"Japanese May Strike Over Weekend."

"Kurusu Bluntly Warned Nation Ready For Battle."

Headline, Page 1, Monday, 1 December 1941

"Hull, Kurusu In Crucial Meeting Today."

Excerpt: "Secretary of State Hull meets at 10 AM today with Saburo Kurusu and Kichisaburo Normura, Japanese envoys, amid rising tension but apparently with the United States prepared to wait for Japan's next move, even if it is against a military objective."

Excerpt: "Some unofficial quarters asserted that Japanese Premier Gen. Hideki Tojo's speech on Saturday indicated that Japan may possibly have decided upon war."

Headline, Page 1, Tuesday, 2 December 1941

"Japan Called Still Hopeful of Making Peace With U. S."

Excerpt printed from Japanese newspaper *Nichi Nichi*: "We appreciate the government's last effort to make peace with the United States however futile it is to listen any more to U. S. hypocritical peace talks."

Excerpt printed from Japanese newspaper *Asahi*: "We are deeply impressed that the negotiations are heading toward a finale without any hope of success."

Headline, Page 5, Tuesday, 2 December 1941

"Japan Gives Two Weeks More to Negotiations."

Excerpt: "Prospects for successful conclusion of Japanese American negotiations in Washington are most difficult the newspaper Nichi Nichi said tonight and therefore the Japanese government is making preparations to meet whatever eventualities occur."

Headline, Page 1, Wednesday, 3 December 1941

"Huge Pincer Attack on U. S. by Japan, France Predicted."

Excerpt: "Sen. Claude Pepper, D., Fla., tonight predicted that Japan and Vichy would soon bring a huge pincer movement into operation in an effort to slow the flow of materials to Britain and Russia. 'An aggressive action with Vichy and Japan acting in concert with and as a pawn of Hitler will be apparent in a few days' Senator Pepper said. 'Hitler, in effect, is attempting to give us a war on two fronts.'"

Two Column Headline, Page 1, Friday, 5 December 1941

"Pacific Zero Hour Near; Japan Answers U. S. Today."

Excerpt: "Secretary of State Cordell Hull meets at 11 AM today with Japanese negotiators to receive Japan's reply to President Roosevelt's inquiries concerning troop movements in French Indo-China. One Congressional leader emerging from a White House conference last night admitted that the situation looks pretty serious and there was some hint that negotiations might collapse entirely."

Headline, Page 1, Saturday, 6 December 1941

"America Expected to Reject Japan's Reply on Indo-China."

Excerpt: "Japanese News Agency Domei said: 'Feverish war preparations in Australia, the Netherlands East Indies, Burma, Malaya, Singapore, and the Philippines with Japan as the hypothetical enemy make the future of negotiations darker and peace in the Far East is hanging by a very thin thread.'"

Headline, 1st Column, Page 6, Saturday, 6 December 1941

"Japanese Navy Moving South."

Excerpt: "The Australian press said today that a Southward movement of Japanese Navy has been confirmed. Other Australian sources also confirmed that the Japanese Navy is moving Southward as the Cabinet met twice in Melbourne instead of at Canberra in order to maintain closest contact with the armed forces. The Cabinet abandoned its weekend adjournment plans due to late advices seeming to indicate an immediate break in Japanese-American relations."

Two Column Leadline, 1st Page, Saturday, 6 December 1941

"Detailed Plans Completed For M-Day Setup."

Excerpt: "Detailed recommendations for administration of the Hawaii Defense Act, otherwise known as the M-Day law were received by Governor Poindexter yesterday from his advisory council on civilian defense preparations."

Headline, 1st Page, Sunday, 7 December 1941

"F. D. R. Will Send Message to Emperor on War Crisis."

Excerpt: "President Roosevelt will send a message to Emperor Hirohito of Japan on the Far Eastern situation, the State Department announced tonight as further Japanese southward movements were reported."

ARMY PEARL HARBOR EXHIBIT NO. 19A

ITEMS APPEARING IN THE HONOLULU STAR-BULLETIN

Headline, Page 1, Saturday, 29 November 1941

"U. S. Waits Japan Reply."

Excerpt: "Secretary of State Cordell Hull and Viscount Halifax, British Ambassador, conferred today for an hour over the critical oriental situation and waited to see whether Japan will choose war or peace in the Pacific."

2976 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Excerpt: "NBC reported today that it heard a broadcast from Tokyo today sharply attacking the United States and holding Washington responsible if anything breaks out in the Pacific. The broadcast said that 'the United States has broken the peace.'"

Headline, Page 1, Monday, 1 December 1941

"U. S. Army Alerted in Manila, Singapore Mobilizing as War Tension Grows."

Excerpt: "Information reaching non-British quarters from the Far East today indicated possible movement of Japanese Naval forces southward, presumably for the purpose of obtaining naval and other bases in Thailand. Indication in London continued to point to Thailand as the next objective if Japan moves southward."

Leadline, Column 1, Page 1, Monday, 1 December 1941

"Japan Envoys Resume Talks Amid Tension."

Excerpt: "Japanese-American conversations were resumed again today as reports across the Pacific reflected an increasing tension and the possibility of general war."

Leadline, Column 2, Page 5, Monday, 1 December 1941

"War Fears Grow in Philippines."

Excerpt: "War fears have increased perceptibly over the weekend as the Philippine Island's populace anxiously awaited Japan's reply to Secretary of State Cordell Hull's note. Reliable sources said today that the Army and Navy is now on alert with officers on leave ordered back to their posts."

Headline, Page 1, Thursday, 4 December 1941

"Japan Spurns U. S. Program."

Excerpt: "Domei Japanese News Agency reported tonight that it is 'utterly impossible for Japan to accept American proposals' for settlement of the Far Eastern situation as Premier Hideki Tojo and Foreign Minister Shigenori Togo explained current diplomatic issues to the privy council."

Excerpt: "The Nationalistic newspaper Hochi charged that the United States ignores 'the new situation in East Asia' and said that 'in event Japan is forced to rise in order to break through Anti-Japan encirclement to secure existence and power, the responsibility would be the United States'."

Headline, Page 1, Saturday, 6 December 1941

"Singapore on War Footing."

Excerpt: "Great Britain suddenly recalled all fighting men to their posts today at Singapore as the Far East crisis hung in delicate balance. The summoning of all men of the fleet, air, and army completes the present state of readiness at the 'Gibraltar of the Orient.' The order was so sudden that trucks and other vehicles were dispatched to downtown points to transport men to ships, fields, and posts."

Leadline, Column 3, Page 1, Saturday, 6 December 1941

"New Peace Effort Urged in Tokyo."

Excerpt: "A proposal to appoint a Japanese-American commission to iron out the present Pacific deadlock gained ground here today in important civilian circles."

Excerpt: "Meanwhile the Japanese press hardened its hostility toward the United States and voiced opinions which were war minded. Kokumin asserted that in event of 'American aggression, a billion people in East Asia would become bombs' against Batavia and the United States."

Excerpt: "Asahi editorially said that the United States has abandoned its post war defense policy and is now openly pursuing an offensive attitude. It is dangerous to think, Asahi said, that the United States is sticking to appeasement."

Leadline, Column 2, Page 4, 6 December 1941

"Civilians Urged to Leave Manila."

Excerpt: "The Cabinet in a special meeting at Baguio presided over by President Manuel Quezon decided today to urge the immediate evacuation of non-essential citizens from Manila and other 'danger zones.' It was indicated that the move would be followed by compulsory evacuations."

ARMY PEARL HARBOR BOARD EXHIBIT No. 20

CONFIDENTIAL

[1]

ARMY SERVICE FORCES,
HEADQUARTERS FIRST SERVICE COMMAND,
Boston 15, Massachusetts, 18 August 1944.

Lieutenant General GEORGE GRUNERT, USA,
President, Army Pearl Harbor Board,
Munitions Building, War Department, Washington 25, D. C.

DEAR GENERAL GRUNERT: I am grateful to you for authorizing a transcript of my testimony to be sent to me for correction. I am returning it herewith with my personally penned corrections. There were certain minor errors, due to misunderstanding on the part of the stenographer as to what I said or inexact expressions on my part. There was one rather serious error, which I have also corrected, regarding the inevitability of war with Japan (pages 113 and 114), in which I either made or was understood to have made conflicting statements.

What strikes me forcibly in rereading my testimony is that it is quite inadequate to accomplish your stated purpose—to get “the War Department background and viewpoint prior to and leading up to the Pearl Harbor attack” (page 91). The questions propounded to me are no doubt relevant to the issue you have before you, in that they were designed to bring out various points and angles of that issue. But they were almost entirely confined to specific points in a very broad picture. The sum of my answers to these specific questions does not, as I see it, present more than a relatively small part of the background which I understand you desire. You may not consider it necessary to obtain this background from me; but I feel bound to say that my testimony, per se, misses the wood for the trees.

You are examining into what occurred at Pearl Harbor on the morning of December 7th and why it occurred. I submit that the causes of the disaster at Pearl Harbor cannot be judged solely from what happened in the Hawaiian Department, or what the War Department did or did not do with regard to the Hawaiian Department. Hawaii was only one of five United States areas vulnerable to Japanese attack should war ensue. It was, as a matter of fact, the strongest fortress in the world, measured in terms of garrison and armament strength. A great fleet was present in its waters. It offered less permanent military advantage to successful enemy attack than did the Panama Canal. Its defense against its sole potential enemy, Japan, had been the subject of continuous study by our Army and Navy for some 40 years. Many of these studies assumed the absence of our fleet from the Pacific, a crippling damage to the Panama Canal, and little or no warning in the way of strained diplomatic relations—conditions much less favorable to us than those of 1941. The Hawaiian defense plans, prepared [2] by responsible Commanding Generals and approved by the War Department, were both detailed and comprehensive. The Army garrison was commanded by a Lieutenant General, with the Commander-in-Chief of the United States Fleet present in Hawaiian waters. I think it fair to say that these senior and responsible officers required no specific directives as to what they should or should not do under a threat of war, or, indeed, any warnings other than the knowledge of the serious situation then existing.

But this still does not give the whole picture. In 1941, up to at least November, the most poignant military concern of the United States lay in the outcome of the war in Europe. We were still feverishly preparing for “hemisphere defense.” The most obvious threat to the Western Hemisphere lay in the success of German arms, against which our lend-lease and other measures were progressively aligning us, and in subsequent Axis penetration through the “bulge” of Brazil. Even after Pearl Harbor, we rushed marines and air ground forces into northeastern Brazil, and I was sent on a hurried trip to South America for intelligence purposes in this regard. Japan, on the other hand, was engaged in a war with China, none too successfully. Her military threat to us lay in her possible reaction to our own measures in belatedly cutting off her oil and scrap purchases in this country, and, still more belatedly, denying some of her ships the use of the Panama Canal.

2978 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

It is true that we had Japan on the carpet in our diplomatic negotiations in Washington, and that it was becoming increasingly apparent that she would probably make some radical move. The military oligarchy that ruled her was not obtaining notable results in China, had failed to dislodge the Russians in the private war of the Kuantung Army in 1938 and '39, and was apparently losing face. This was particularly so in comparison with the great successes of the German Army up to December, 1941.

Nevertheless, it was none too apparent that the United States would be the next victim of Japanese aggression. As stated in the dispatch of November 27th, Japan's actions were unpredictable. She might well have attacked Russian Siberia and the Maritime Provinces, particularly in view of the then successful German invasion of European Russia. Or she might have elected to drive south against the Dutch East Indies. Or she might have taken the greater risk of including the British possessions in her southern drive. Or she might well have declined to take on any other enemy, and thrown her whole weight against China. I remember the Chinese military attaché coming to me in the fall of 1941, and stating his concern that the stiffening attitude of the Western Powers towards Japan might force the Japanese to throw everything in against China and clean her out. Or she might adopt the boldest and most dangerous of all of her alternatives and take on the two greatest naval powers in the world, plus the Dutch.

All of these factors and all of these contingencies were given due weight by the General Staff. The causes of the disaster at Pearl Harbor must be viewed in the light of the situation as a whole. An open [3] attack by Japan on the United States was by no means inevitable. One could only say that the tension was steadily growing because of our increasing cooperation with the Allies, particularly Britain; because of our diminishing willingness to supply Japan with essential materials of war; and because of our stiffening attitude in the negotiations in Washington. All of these major factors, producing increasing tension in Japan, were well known to our responsible commanders in Hawaii and elsewhere. The hasty dispatch of Admiral Nomura to Washington, and his passage through Honolulu, was but one of the clear signs of this increasing tension. The tension curve mounted dangerously on November 27th, signalized by the Chief of Staff in his dispatch to his higher commanders in the field. Finally there was the personal appeal of the President of the United States to the Emperor of Japan which, if my memory serves me, was published in the American press on Friday, December 5th, or the morning of Saturday, the 6th.

The Overseas Departments and the West Coast were fully informed of the essential elements of the mounting crisis, and the War Department knew that they were so informed. When one considers the Hawaiian garrison and the Fleet in that area, with but a single potential enemy in view and carefully prepared plans to meet him, the broad knowledge which they unquestionably had of the increasing tension should have been decisive. In Washington there was absolute confidence that that knowledge of the situation had been translated into full alert. This became very apparent on the morning of December 7th, when the only question on the sending of the final warning was whether it was necessary, or indeed advisable to prod further those commands which were actually facing the issue. The Chief of Naval Operations went so far as to refuse, on that ground, to send a warning similar to ours.

As Commanding General of the Philippine Department earlier in 1941, no doubt you are aware of the broad outlines of the picture I am trying to draw. The other members of your Board may or may not have similar knowledge. In any event, if you think it advisable to have on the record my testimony along these lines, as you seemed to indicate when I appeared before your Board last week, I will, of course, be happy to give it, and to answer any further questions which your Board may desire to ask.

With best personal regards,
Sincerely yours,

Sherman Miles,
SHERMAN MILES,
Major General, United States Army.
Commanding.

ARMY PEARL HARBOR BOARD EXHIBIT No. 21

[1] TELEPHONE CONVERSATION OF DEC. 3, 1941 BETWEEN A CITIZEN IN HONOLULU (JAPANESE) & A MILITARY OR NAVAL OFFICER IN TOKIO. TRANSLATED & AVAILABLE TO MILITARY INTEL. HAWAII DEC. 5, 1944.

IC (J) Hello, is this Mori?

(H) Hello, this is Mori.

(J) I am sorry to have troubled you. Thank you very much.

(H) Not at all.

(J) I received your telegram and was able to grasp the essential points. I would like to have your impressions on the conditions you are observing at present. Are airplanes flying daily?

(H) Yes, lots of them fly around.

(J) Are they large planes?

(H) Yes, they are quite big.

(J) Are they flying from morning till night?

(H) Well, not to that extent, but last week they were quite active in the air.

(J) I hear there are many sailors there, is that right?

(H) There aren't so many now. There were more in the beginning part of this year and the ending part of last year.

(J) Is that so?

[2] (H) I do not know why this is so, but it appears that there are very few sailors here at present.

(J) Are any Japanese people there holding meetings to discuss US-Japanese negotiations being conducted presently?

(H) No, not particularly. The minds of the Japa—here appears calmer than expected. They are getting along harmoniously.

(J) Don't the American community look with suspicion on the Japanese?

(H) Well, we hardly notice any of them looking on us with suspicion. This fact is rather unexpected. We are not hated or despised. The soldiers here and we get along very well. All races are living in harmony. It appears that the people who come here change to feel like the rest of the people here. There are some who say odd things, but these are limited to newcomers from the mainland, and after staying here from three to six months, they too begin to think and feel like the rest of the people in the islands.

(J) That's fine.

(H) Yes, it's fine, but we feel a bit amazed.

(J) Has there been any increase in . . . ? . . . of late? That is, as a result of the current tense situation.

[3] (H) There is nothing which stands out, but the city is enjoying a war building boom.

(J) What do you mean by enjoying a war building boom?

(H) Well, a boom is many fields. Although there is no munitions industry here engaged in by the army, civilian workers are building houses for the army personnel. Most of the work here is directed towards building houses of various sorts. There are not enough carpenters, electricians and plumbers. Students at the High School and University have quit school and are working on these jobs, regardless of the fact that they are unskilled in this work.

(J) Are there many big factories there?

(H) No, there are no factories, but a lot of small buildings of various kinds are being constructed.

(J) Is that so?

(H) It is said that the population of Honolulu has doubled that of last year.

(J) How large is the population?

(H) The population increase is due to the present influx of Army and Navy personnel and workers from the mainland.

(J) What is the population?

(H) About 200,000 to 240,000. Formerly there were about 150,000 people.

(J) What about night time?

(H) There seems to be precautionary measures taken.

(J) What about searchlights?

(H) Well, not much to talk about

[4] (J) Do they put searchlights on when planes fly about at night?

(H) No.

(J) What about the Honolulu newspapers?

(H) The comments by the papers are pretty bad. They are opposite to the atmosphere pervading the city. I don't know whether the newspaper is supposed to lead the community or not, but they carry headlines pertaining to Japan daily. The main articles concern the US-Japanese conferences.

(J) What kind of impression did Mr. Kurusu make in Hawaii?

(H) A very good one. Mr. Kurusu understands the American mind, and he was very adept at answering queries of the press.

(J) Are there any Japanese people there who are planning to evacuate Hawaii?

(H) There are almost none wishing to do that.

(J) What is the climate there now?

(H) These last few days have been very cold with occasional rainfall, a phenomena very rare in Hawaii. Today, the wind is blowing very strongly, a very unusual climate.

(J) Is that so?

(H) Here is something interesting. Litvinoff, the Russian ambassador to the United States, arrived here yesterday. I believe he enplaned for the mainland today. He made no statements on any problems.

(J) Did he make any statements concerning the US-Japan question?

[5] (H) No. Not only did he not say anything regarding the US-Japan question, he also did not mention anything pertaining to the Russo-German war. It appears he was ordered by his government not to make any statement.

(J) Well, that means he was very different from Mr. Kurusu.

(H) Yes.

(J) What kind of impression did Litvinoff make?

(H) A very good one here. He impressed the people as being very quiet and a gentleman.

(J) Did he stop at the same hotel as Mr. Kurusu?

(H) Yes, at the Royal Hawaiian Hotel overnight. He has already enplaned for the mainland.

(J) Do you know anything about the United States fleet?

(H) No, I don't anything about the fleet. Since we try to avoid talking about such matters, we do not know much about the fleet. At any rate the fleet here seems small. I don't all of the fleet has done this, but it seems that the fleet has left here.

(J) Is that so? What kind of flowers are in bloom in Hawaii at present?

(H) Presently, the flowers in bloom are fewest out of the whole year. However, the hibiscus and the poinsettia are in bloom now.

*(J) does not seem to know about poinsettias. He admits he doesn't know.

(J) Do you feel any inconvenience there due to the suspension of importation of Japanese goods?

[6] (H) Yes, we feel the inconvenience very much. There are no Japanese soy, and many other foodstuffs which come from Japan. Although there are enough foodstuffs (Japanese) left in stock to last until February of next year, at any rate it is a big inconvenience.

(J) What do you lack most?

(H) I believe the soy is what everyone is worried about most. Since the freeze order is in force, the merchants who have been dealing in Japanese goods are having a hard time.

(J) Thanks very much.

(H) By the way, here is something interesting about Hawaii. Liquor sells very fast due to the boom here. The United States, which twenty years ago went under prohibition, is today flooded by liquor. British and French liquors are also being sold. The Japanese merchants, whose business came to a standstill due to the suspension of importation of Japanese goods, engage in liquor manufacture. The rice from the United States is used in brewing Japanese sake here, and the sake is exported back to the mainland.

*(H) explains that the Japanese sake brewed in Honolulu is called "Takara-Masamuno", that a person named Takagishi was the technical expert in charge of the brewing; and that said Takagishi is a son-in-law of Grand Chamberlain Hyakutake, being married to the latter's daughter; and that said Takagishi returned recently to Japan on the Taiyo Maru. He adds that Japanese here and the Americans also drink sake. He informs (J) that Japanese chrysanthemums are in full bloom here, and that there are no herring-roe for this year's New Year celebration.

(J) How many first generation Japanese are there in Hawaii according to last surveys made?

[7] (H) About fifty thousand.

(J) How about the second generation Japanese?

(H) About 120,000 or 130,000.

(J) How many out of this number of second generation Japanese are in the United States Army?

(H) There aren't so many up to the present. About 1,500 have entered the army, and the majority of those who have been drafted into the army are Japanese.

(J) Any first generation Japanese in the army?

(H) No. They do not draft any first generation Japanese.

(J) Is that right, that there are 1,500 in the army?

(H) Yes, that is true up to the present, but may increase since more will be inducted in January.

(J) Thank you very much.

(H) Not at all. I'm sorry I couldn't be of much use.

(J) Oh no, that was fine. Best regards to your wife.

(H) Wait a moment please?

(J) off phone.

Honolulu, T. H.

Thru: District Engineer, Honolulu, T. H.

To: Commanding General, Hawaiian Department, Fort Shafter, T. H.

I. DATE OF INSPECTION

1. This inspection was conducted by Lieutenant Colonel E. B. Whisner, Infantry, Assistant Department Inspector General, during the period 13-20 August 1941.

2. This is the initial inspection report on the District Engineer's Office. The inspection was made as the result of a directive from the Commanding General, Hawaiian Department, in accordance with the provisions of letter AG 600.12 (2-13-41) M-IG, W. D., A. G. O., 17 February 1941, subject: "Inspection of Cost-Plus-A-Fixed-Fee construction Projects."

II. ORGANIZATION

3. *General.*—a. This report, on the organization of the office of the District Engineer in Honolulu, deals with the administrative framework which has been set up by that government agency for the supervision of the construction projects that are under its control. This report is informative in nature and is intended to serve as a background for a better understanding of the subsequent reports that will be submitted on the more detailed phases of the inspections of the cost-plus-a-fixed-fee construction projects in the Hawaiian Department.

b. The District Engineer (Lieutenant Colonel Theodore Wyman, Jr. (O-7925), C. E.) operates directly under the South Pacific Division Engineer in San Francisco, who in turn operates directly under the Chief of Engineers in Washington, D. C. Lieutenant Colonel Wyman has been in charge of the Honolulu district since 15 July 1939.

c. The main offices of the District Engineer are on the fifth and sixth floors of the Young Hotel Building in Honolulu. In addition to this, other portions of the organization are scattered in the following locations in Honolulu:

First Floor, Young Hotel Building—Fiscal section (Adm. Div.)
Pier 2-A—Transportation and Supply section (Oper. Div.)
Hickam Field—Storage yard for materials
Wheeler Field—Storage yard for materials

[2] d. The executive function of the District Engineer's office is divided into three parts—engineering division, operations division, and administrative division. See copy of organization chart attached and marked Exhibit "A". Since this chart was published, the fourth part (shown as the transportation-and-supply division) has been absorbed by the operations division.

e. This organization is based upon instructions issued by the Chief of Engineers. These directives state that the District Engineer shall provide an adequate inspection, cost accounting, and auditing force prior to the start of actual construction on projects under cost-plus-a-fixed-fee contracts. The amount of personnel required to satisfy these control objectives is left to the judgment of the District Engineer.

f. In order to facilitate administration, the District Engineer has divided the Hawaiian Islands into seven field areas, each of which is in charge of an engineer who is directly responsible to the District Engineer. Each of the construction projects is placed under the direct supervision of these area engineers.

g. The civilian organization, which furnished the skilled technicians and actually performs the construction work for the District Engineer, is a corporation known as the Hawaiian Constructors, and it consists of a combination of the following construction firms:

W. E. Callahan Construction Company of Nebraska
Gunther and Shirley Company of Nebraska
Rohl-Connally Company of Nevada
Ralph E. Woolley Company of Honolulu

These four organizations have pooled their resources of plant and personnel to complete the projects assigned to the District Engineer in the Hawaiian Islands. A separate report is being prepared, which will describe the organization of the Hawaiian Constructors and explain more fully its relationship to the District Engineer.

h. In order to establish policies and to effect control of the efforts of this large force, the District Engineer issues his instructions from time to time in the form of district orders and district circulars, which are distributed to the various office divisions, the field area engineers, and the Hawaiian Constructors. These directives settle local problems and disseminate the decisions of the higher engineer echelons.

4. Engineering Division.—a. The duties of this branch of the District Engineer's office are to prepare all engineering designs, specifications, and original estimates for construction projects. In addition, it plans all future work in connection with the Honolulu district.

b. After the request for a certain local defense project has been approved by the War Department, the job is assigned to the District Engineer in Honolulu through the South Pacific Engineer Division in San Francisco.

c. The job is in turn assigned by the District Engineer to the chief of his engineering division for study. If it is of a military nature, the job is given to the military-engineering section. There the designs are prepared to determine the most economical and feasible type of construction. If surveys are necessary, parties are sent out to prepare a report upon which designs and estimates will be based. These [3] are then submitted to the District Engineer for approval and later, forwarded to the station commander who sponsored the project, for his comment as to general design features. Following this, the work is then transmitted through channels to the Chief of Engineers for approval.

d. When these plans are approved in Washington, they are returned to the local engineering division for final design, estimates, and specifications, so that construction work can start.

e. The military-engineering subdivision prepares all designs relating to such projects as underground storage magazines, tunnel construction, highways, railway-gun positions, fire-control stations, searchlight towers, demountable towers, air-warning stations, and all major reinforced concrete structures in the Honolulu district.

f. The function of the civil-engineering subdivision is to prepare the designs, specifications, and estimates on all work of a civil nature. In addition, it prepares the plans and specifications for dredging, as well as for work on all runways for airports for the Army Air Corps, the Civil Aeronautics Authority, and other agencies.

g. The principal duties of the building-and-utilities subdivision is to prepare plans, specifications, and bills of material for all military camp buildings, and the utilities in connection with them. It also designs all gasoline installations at all air fields.

h. The drafting-and-survey subdivision operates principally as a supply agency. After the designs and details have been prepared by another group, they are sent here for the final drafting. In addition, it handles all reproduction work such as blue printing, photostating, lithographing, and various other types.

i. The materials-testing subdivision is entrusted with the testing of all materials entering into the final construction of any project. Samples of concrete are taken from the batches as they are being placed into a structure, and the strength is determined. Tests are conducted on all mineral aggregate in order to determine their strength, characteristics, and suitability for construction purposes. Chemical tests are prepared in order to determine the existence of harmful ingredients which would tend to cause deterioration to the finished concrete structure. Soils are tested for their physical properties in order to determine their bearing capacities, fineness, modulus, moisture content, and other necessary features required for the proper design of a structure. Asphalt used in the construction of roads and pavements is also tested in this subdivision.

j. In brief, the duties of the engineering division are to design sound engineering structures which meet the requirements of standard practice, and to produce a structure at a minimum cost for the service it is intended to perform.

5. Operations Division.—a. The function of the operations division is to carry into effect the work as designed by the engineering division, in accordance with the plans and specifications. The work to be done is accomplished by one of

several methods—by construction contract (lump sum), or by hired labor (purchase & hire), or by cost-plus-a-fixed-fee contract.

b. To accomplish the work to be done by a construction [4] contract, it is necessary to advertise the work, receive bids, and enter into a contract with the lowest responsible bidder who guarantees to the government that he will perform the work as specified within the time allotted and at the price fixed in his proposal. This is the common form of contract, which has been accepted as standard by most government agencies.

c. The work to be done by hired labor usually comprises minor jobs, which for obvious reasons can be performed more effectively by government plant (owned or leased) with hired labor, under the direction of a representative of the District Engineer. Hired-labor jobs are initiated by work orders which are prepared by the operations division, and the work is performed under the direction of an area engineer.

d. The method of performing work by a cost-plus-a-fixed-fee contract was authorized by Congress to meet the conditions which exist during a period of national emergency. This type of contract is entered into only after approval by the Under Secretary of War, who has been designated as the authority to fix the terms and conditions of such contracts. These agreements are referred to as "negotiated contracts", because the formality of advertising, publicly opening bids, and awarding the work to low bidders has all been eliminated. The contract is concluded after informal negotiation between the authorized government agency and a reputable contractor.

e. In order to qualify for work under a cost-plus-a-fixed-fee contract, it is necessary for a firm to establish the fact of proven ability and of financial capacity to perform the work to be done. This type of contract was designed (1) to speed up the work, (2) to remove some of the causes for delays in the construction, (3) to remove some of the hazards of construction which are inherent in the more formal contract procedure, and (4) to secure savings to the government in the cost of the work to be done.

f. Before a contract can be entered into by any method, it is necessary to determine the money value of the work to be done; this takes the form of an estimate. These are prepared by the estimating section, which is composed of engineers who have had experience in construction and who are proficient in determining in advance the cost of the work to be done. These estimators must have a knowledge of the cost of materials which are to be included in the construction, of the value of machinery rental which must be charged to the work, and of the labor requirements which will be necessary to accomplish the work.

g. All of these costs are assembled and tabulated to determine the "field cost" of the construction. To this must be added the "engineering cost" for both field and office, together with the "overhead cost" of administration. This latter includes a flat 8% of the construction cost to cover the expenses of the area office, the district office, the division office, and the Chief of Engineer's office. After all of these costs have been assembled, the resulting document is the estimated cost for doing the work and it is presented to the District Engineer for approval. It is then used as a basis for making the award of the contract.

h. The operations section handles the administrative details of the operations division, such as the correspondence to the field [5] agencies concerning the purchase of plant and the rental rates on these items of equipment, employment, and the increases in rates of pay. This section gathers the necessary data from other sections for the preparation of correspondence.

i. The transportation-and-supply section is responsible for all engineer motor transportation which is not under the supervision of the field area engineers. The transportation subsection moves materials from the piers to the base yards, where it is turned over to the supply subsection for storage. The Hawaiian Constructors are responsible for the delivery of material to the various projects, and they dispatch their trucks to the base yards where they are loaded by employees of the District Engineer. The supply subsection handles the records on the receipt, warehousing, and issue of materials and plant.

j. The construction-contract section is responsible for the administration of the processes of construction by contract. It advertises the work to be done by contract, receives bids, assists at the opening of bids, tabulates them, and prepares an abstract of the bids to form a permanent record of the procedure. This section advises the bidders of the award of the contract, prepares the contract form, issues notices to proceed with the work, and exercises the custodianship of all contract documents. It also negotiates change orders and supple-

mental agreements that may become necessary after the original contract has been signed.

k. The inspection-and-safety section sends out personnel to visit the site of the various jobs during the construction period, to inspect the quality of the work being done, and to report any deviations from the plans and specifications. It is responsible for the acceptance or rejection of material and equipment which is to be incorporated into the work. After the completion of the project, personnel from this subdivision make the final inspections and recommendations, which (if favorable) result in the acceptance of and payment for the work under the contract. After the final acceptance of the finished project, this group prepares and forwards a completion report covering the construction.

l. The inspection-and-safety section is also charged with the daily inspection of all construction work in the furtherance of a safety program. It trains personnel in first aid to the injured, and it investigates and reports on all claims for compensation or liability which arise out of the construction activities of the projects.

m. The cost section assembles the cost data, breaking down expenditures into cost items covering the various elements of the construction of each job. This type of work begins when notice is received that construction on a certain project can start and it continues throughout the period of construction. It is not until after the structure has been finished and the final payment has been made that a complete analysis of the cost of the finished structure can be made. In order that cost records may be maintained in an orderly fashion, forms are prepared at the beginning of each job with symbols for identifying each of the various elements of the work for which costs are to be kept. These symbols are used throughout the duration of the job. The data furnished by this cost subdivision are used by the estimating subdivision in arriving at their figures as to the money value of new proposed work of a comparable nature.

[6] n. The right-of-way section is charged with investigating records of title of the real estate affected by the construction projects. Whenever necessary, it procures the permits that are essential before work can proceed.

o. The procurement-and-property section is organized under two subexecutives, one of whom is responsible for procurement and the other for control of property. The procurement subsection functions as the purchasing agent for both the District Engineer and the contracting organization known as the Hawaiian Constructors. Purchase requisitions, in most instances, are instigated by these constructors and after proper approval, are routed through the procurement subsection, where they are acted upon in accordance with a purchasing procedure which has been set up by the District Engineer. This subdivision has jurisdiction over all purchases of plant, property, and materials, with the exception of those involving proper purchase contracts and certain mainland purchases on which delivery can be expedited by side-tracking the regular purchase procedure. The property subsection records all items of property which are purchased for use on projects supervised by the District Engineer. Property items are recorded in relation to field areas in such a way that a personal responsibility is established for each item.

p. The works-progress-administration section handles the details pertaining to the construction projects to be paid for from WPA appropriations, none of which are on a cos-plus-a-fixed-fee contract.

q. In brief, it is the responsibility of the operations division (1) to provide a well-regulated flow of material, supplies, and equipment to the field, and (2) to aid the forces in the field in all matters essential to the orderly prosecution of the construction activities in the district.

6. *Administrative Division.*—a. This division is charged with the administration of all matters pertaining to personnel, finances, and miscellaneous office services. It also coordinates all administrative activities in the district office and in the area offices.

b. The payroll-and-personnel subdivision is responsible (1) for the enforcement and the administration of civil service rules and regulations, (2) for the maintenance of proper personnel and payroll records, (3) for the preparation of recommendations for changes in the status of employees, (4) for the employment of personnel, and (5) for the miscellaneous work pertaining thereto.

c. The finance subdivision is charged (1) with the proper disbursement of and accounting for all funds allotted to the District Engineer, (2) for the maintenance of the records of financial budget and encumbrances, and (3) for the preparation of all financial reports required by law and regulation.

d. The office-service subdivision prepares all correspondence not specifically assigned to stenographers employed in other divisions of the District Engineer's office. It maintains a file of correspondence, reports, and other papers pertaining to the district except those papers which are filed in the personal records of civilian employees. It furnishes data from the office files upon receipt of proper requests and authority. It is responsible for the delivery and dispatch of all [7] incoming and outgoing mail, and for the maintenance of messenger service for the delivery of inter-office communications. It also furnishes the telephone switchboard, the information desk, the district supply room, and other miscellaneous office services.

III. ADMINISTRATIVE CONTROLS

7. *General.*—The District Engineer has based the organization of his office on instructions issued to him by the Chief of Engineers at Washington. These instructions direct that provisions be made for adequate inspection, cost accounting, and auditing before actual construction is started on a cost-plus-a-fixed-fee contract. The District Engineer has accomplished these objectives by creating the departmental controls within his organization which are described below.

8. *Fiscal Audit.*—For the protection of the disbursing officer (who is also the District Engineer's executive assistant), an audit section has been established in the finance subdivision of the administrative division. This audit section accumulates for the disbursing officer sufficient evidence which is intended to substantiate the payments that will encumber the funds allotted to the District Engineer. In order to accomplish this objective, the audit section is required to keep in close touch with timekeeping and with the preparation of payrolls; and it must correlate purchase orders with receiving reports before approving payment of purchase invoices. The audit section records and approves payments for the rental of contractor's plant, and it is instrumental in checking and approving all invoices of a miscellaneous nature before they are presented to the disbursing officer.

9. *Procurement.*—The procurement subdivision is organized under the operations division. Requisitions for purchases must be approved by the executive in charge of operations before the procurement subdivision is authorized to make purchases. In this manner all purchases, regardless of origin of the request, will clear through one individual who is responsible directly to the District Engineer. By following this procedure, besides creating an automatic purchasing control, the District Engineer is conscious of fund expenditures prior to the time the money is actually spent.

10. *Storage and Issue.*—The warehousing controls are also exercised by the operations division in the property and procurement section. Through this agency, the District Engineer is assured that his organization has constant supervision of purchased items until such time as they are issued for delivery to specific projects. From the standpoint of control, the protection this system offers is adequate—the contractor may designate the articles he needs; but the purchasing and storage operation is the responsibility of the District Engineer, while the contractor functions only as a receiving agent.

11. *Cost Section.*—The cost section is organized under the operations division and serves as an instrument for accumulating cost [8] data based upon units of work, for the purpose of justifying operating methods and for the accumulation of historical data to be used for future reference.

12. *Control of Property.*—Property records are established in the office of the District Engineer as each unexpendable item is purchased. When these items of property are turned over to the contractor for use in construction, he is held accountable until such time as they are returned. The property records are verified by a physical inventory which is made at regular intervals.

13. *Control of Plant.*—Plant is purchased by the contractor and rented to the District Engineer on an agreed contract basis. The District Engineer's audit section keeps a plant-control record which lists each piece of equipment, as well as the rental payments which have been made to the contractor. The rental rate is prorated monthly through the cost section to the projects on which each piece of equipment was utilized. The plant records are verified by a physical inventory which is made at regular intervals.

IV. ENGINEER FIELD AREAS

14. *General.*—In order to facilitate the inspection and control of the projects under construction, the Territory of Hawaii has been divided into seven field areas, each of which is in charge of an area engineer who is directly responsible to the District Engineer. As each new project is assigned to the contractors, the responsibility for the close supervision of that new job is delegated to the area engineer in whose zone the project is to be located. The first area is the only one in which there are no projects being constructed under a cost-plus-a-fixed-fee contract.

15. *Organization.*—The organization of each area is similar to that of the District Engineer's office except that it is on a smaller scale. The area engineer has two executive subordinates, one in charge of administration, the other in charge of engineering. The administrative head is the chief clerk who controls the personnel and stenographic clerks. Operating through a cost accountant, he is also in charge of cost clerks and timekeepers. The engineering section controls the project inspectors and draftsmen who are the area engineer's direct contact with project construction.

16. *Cost Accounting.*—Area cost sections are organized to accumulate direct labor and material charges by projects, as a control for the area engineer to use in checking project estimates against actual construction schedules. In order to verify the correctness of his figures, the accountant in charge controls the timekeepers and account-distribution clerks by verifying a daily balance between payrolls and account charges to the respective job orders. In order to verify his material charges, he exercises control over receiving clerks. Periodically, he submits cost reports to the District Engineer's office where they are accumulated on a monthly basis and combined with project [9] overhead for presentation as final cost figures.

17. *First Area.*—The office for this area is on the second floor of the Engineer Building at Pier 2-A in Honolulu. The work at present being done in this area consists of the following:

Dredging in Pearl Harbor for the Navy Department.

Dredging in Kaneohe Bay for the Navy Department.

Maintenance and repair of fortification work.

Surveys in connection with Keelii Lagoon project.

Harbor patrol to enforce pollution laws.

None of the work that is being performed in this area is under a cost-plus-a-fixed-fee contract.

18. *Second Area.*—The office for this area is at Hickman Field, Oahu, and the majority of the projects assigned to it are under cost-plus-a-fixed-fee contracts. This is the second largest area, from the view point of number of projects and the amount of funds involved. The jobs are all located on the air field and include a miscellaneous assortment of various types, many of which were transferred from the Constructing Quartermaster. They include such projects as:

Bomb-storage magazines.

Buildings of various types.

Utilities for buildings.

Access roads to buildings.

Hospital.

Air Corps hangars.

Reservation fence.

19. *Third Area.*—The office of this area is at Wheeler Field, Oahu, and the majority of the projects assigned to it are under cost-plus-a-fixed-fee contracts. It is the largest area, both as to the number of individual projects and the amount of appropriations involved. The work includes:

Bombproof ammunition storage magazine.

Fire control stations.

Office buildings.

Mobilization buildings.

Warm-up aprons.

Railway gun positions.

Grading of airport.

Searchlight shelters.

Underground gasoline storage.

2988 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

20. *Fourth Area.*—The office of this area is located at Waimea on the island of Kauai, and the projects are being constructed under cost-plus-a-fixed-fee contracts. They include such work as:

- Gasoline storage tanks.
- Air-warning-station roads.
- Utilities and fences.

21. *Fifth Area.*—The office for this area is located at Bellows Field, Oahu, and the projects are being constructed on cost-plus-a-fixed-fee contracts [10] They include such work as:

- Mobilization buildings
- Gasoline storage tanks
- Utilities and storehouses.

22. *Sixth Area.*—The Engineer in charge of this area has his office at Wailuku, Maui, and he will supervise the projects on the islands of Molokai, Maui, and Niihau. At the present time, work is proceeding on Maui on an air-warning station and access road thereto. Other projects are in the survey stages.

23. *Seventh Area.*—The office for this area is in Hilo on the island of Hawaii. The cost-plus-a-fixed-fee construction projects include:

- Gasoline storage tanks
- Air-warning station
- Utilities.

V. DISCUSSION

24. *Contract and Supplements.*—On 20 December 1940, the District Engineer entered into the original contract with the Hawaiian Constructors for the construction of assigned defense projects on a cost-plus-a-fixed-fee basis. This contract was issued under standard government stipulations common to this type of agreement. The contractor was instructed to function as a separate contracting unit and was held responsible for various constructing and administrative operations. The District Engineer established inspection and audit controls to check the contractor's operations, and had his executive officer designated as a government finance disbursing agent for the purpose of satisfying obligations entered into by the contractor in connection with fulfilling the terms of the contract. Supplemental agreements have been added to the original contract since the date of its issue and subsequent additions will be made as appropriations for new projects are received. These agreements assign additional defense projects to the Hawaiian Constructors and adjust the fixed-fee stipulation to compensate for this increased responsibility.

25. *Contract Modifications.*—a. On 19 May 1941, the District Engineer modified the original contract stipulations by transferring, from the office of the contractor to the office of the District Engineer, the responsibility for procurement, timekeeping, preparation of payrolls, and the actual payment of all salaries and purchase invoices. These changes were made for several reasons:

- (1) To afford greater protection of government funds.
- (2) To eliminate duplication of data being accumulated by the District Engineer.
- (3) To eliminate inaccurate data being presented by the contractor.
- (4) To increase employee efficiency, because it would no longer be necessary to provide an auditing team to control the contractor's method of handling these operations.

[11] b. The installation of these changes had, in effect, changed a true cost-plus-a-fixed-fee contract to represent in large measure the purchase-and-hire contract used in many instances by government construction agencies. The fixed-fee stipulation is the only contractual requirement which basically makes one type of contract differ from the other. From the standpoint of the District Engineer, these changes in the application of the cost-plus-a-fixed-fee contract are sound and can be substantiated as the best solution for most efficiently completing assigned projects under conditions as they exist in the Territory of Hawaii.

26. *Deficiencies.*—A study of the District Engineer's organization, and of the checks installed for controlling and protecting the expenditures of government funds, shows the executive direction to be generally efficient and logical. However, the execution of the directives and checks fails to achieve the objectives sought in some instances, because subordinates have not given sufficient stress to these control factors. These deficiencies are apparently the result (1) of insufficient experience on the part of some subordinates and (2) of the necessity to complete assigned projects in the shortest possible time, in a locality which

does not possess an available supply of skilled clerical technicians. These conditions have allowed project construction to draw away from intended internal audit checks.

VI. CONCLUSIONS

27. After a study of the organization of the office of the District Engineer in Honolulu, and preliminary visits to various construction projects under the supervision of that government agency, the following conclusions have been drawn:

a. That the system of safeguards, for the protection of government funds, property, and plant (inspection, cost accounting, and auditing), as directed by the Chief of Engineers, have been established by the District Engineer.

b. That deficiencies do exist within the organization, apparently caused by inadequate inter-office coordination and a lack of sufficiently-skilled clerical employees. These deficiencies have generally allowed clerical controls to lag behind the progression of actual construction, resulting in partial failures in the system of cost accounting, procurement, and storage-and-issue.

c. That conscientious efforts, on the part of the District Engineer and his key assistants, are apparently being made to correct these deficiencies, as soon as they manifest themselves.

d. That skilled clerical technicians for administrative duties are difficult to obtain because of the large number needed by other competing government agencies and because of higher wages offered by civilian firms for similar services.

e. That the field areas, established for the prosecution of the construction projects under contract, appear to be well organized and to be working generally in an efficient manner.

f. That progress on the construction of many projects has been delayed by the shortage of material, which in turn has been caused [12] by (1) the shortage of transportation facilities from the mainland, (2) the inability of local firms to deliver materials on schedule, and (3) the status of defense priorities established for the District Engineer's office.

VII. RECOMMENDATIONS

28. Based upon this initial survey and inspection of the office of the District Engineer in Honolulu, the following recommendation is submitted:

a. That the District Engineer institute adequate measures to correct the deficiencies noted in paragraph 28 and in subparagraph 27b above.

E. B. WHISNER,
Lieut Colonel, Infantry,
Asst Dept Inspector General.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT INSPECTOR GENERAL,
4 November 1941.

IG 333.1—Dist Engr
Honolulu, TH, FY 1942

Subject: Special Report on the Organization of the Office of the Hawaiian Constructors, Honolulu, T. H.

Thru: Hawaiian Constructors and District Engineers, Honolulu, T. H.

To: Commanding General, Hawaiian Department, Fort Shafter, T. H.

I. DATE OF INSPECTION AND BY WHOM MADE

1. This is the initial inspection report on the organization of the Hawaiian Constructors, the civilian organization which furnishes the skilled technicians and actually performs the construction work for the District Engineer in the Hawaiian Department under Cost-Plus-A-Fixed-Fee contract W 414-Eng-602. The inspection was made by Lieutenant Colonel E. B. Whisner, Infantry, Assistant Department Inspector General, during the period 4 to 11 September 1941, pursuant to a

2990 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

directive from the Commanding General, Hawaiian Department, in accordance with the provisions of letter AG 600.12 (2-13-41) M-IG, WD., AGO, 17 February 1941 subject: "Inspection of Cost-Plus-A-Fixed-Fee Construction Projects."

II. ORGANIZATION

2. General.—*a.* This report deals with the administrative framework which has been created by the Hawaiian Constructors to accomplish the construction work required by their contract. Reference is made to my report IG 333.1-Dist Engr, Honolulu TH, FY 1941, 2 September 1941, subject: "Special Report on the Organization of the Office of the District Engineer, Honolulu, TH."

b. The Hawaiian Constructors consist of a corporation of the construction firms listed below, who have pooled their resources of plant and personnel to carry out this contract:

W. E. Callahan Construction Company of Nebraska
Gunther and Shirley Company of Nebraska
Rohi-Connally Company of Nevada
Ralph E. Woolley Company of Honolulu

c. The main office of the Hawaiian Constructors is located at Pier 2-A, Honolulu, T. H., where the administrative work of the overhead is conducted. See the attached chart marked Exhibit "A".

d. The Hawaiian Constructors receive and acknowledge all project plans and specifications from the District Engineer. They are held responsible by the District Engineer for planning projects well in advance of construction in a manner which meets with the approval of the engineer in charge of the field area in which the projects will be constructed. The contractor is responsible for transporting materials, equipment, and property from points of issue to the respective projects, and is responsible for the organization and direction of all construction crews.

e. The Hawaiian Constructors are controlled by an executive committee composed of Mr. Paul Grafe, vice-president of the W. E. Callahan Construction Company, Mr. Ralph E. Woolley, a local general and building contractor, and Mr. E. E. Ashlock, a supervising operations engineer with the W. E. Callahan Construction Company. This committee operates as the corporation's administrative control board, and is responsible for designating the policies which govern construction operations. Mr. Grafe is the senior executive and has been delegated the authority to contractually bind the corporation. He divides his time between Los Angeles and Honolulu, and serves as the corporation's mainland representative. Mr. Woolley acts in the capacity of an operating consultant, giving to the corporation the value of his experience and also the value of his many local contacts. Mr. Ashlock is the general superintendent in charge of engineering, operations, and administration.

f. On 19 May 1941 the stipulations of the original contract were modified and the responsibility for procurement, timekeeping, and the preparation of payrolls was transferred from the Hawaiian Constructors to the District Engineer. (See paragraph 25 of the report mentioned in subparagraph 2 *a* above.) This change resulted in all procurement clerks, payroll clerks, and timekeeping being transferred to the District Engineer, which considerably reduced the number of office employees on the Hawaiian Constructors monthly payroll. However, a sufficient staff was retained to act as a coordinating unit between the departments referred to above and the field superintendents in charge of operations. In effect the District Engineer has taken from the Hawaiian Constructors the responsibility for all overhead functions leaving them a pure responsibility for project construction.

3. *Engineering Division.*—The engineering division is responsible for studying and analyzing all project plans and specifications, in order that periodic operating estimates can be outlined and a satisfactory procedure established for the operations division. At the present time the engineering division has a staff of only four employees. However, this is not adequate and additions are contemplated in the near future.

4. *Operations Divisions.*—The Hawaiian Constructors have placed an operating superintendent in charge of the projects in each of the field areas which have been established by the District Engineer. The superintendent in each field area situated on the island of Oahu (Hickam, Wheeler and Bellows Fields) is responsible to a field superintendent who functions as an assistant to the general superintendent. The project superintendents [3] in the areas located on islands other than Oahu, are directly responsible to the general superintendent.

Besides controlling area superintendents, the field superintendent on Oahu also has charge of a group of specialized construction foremen, who, with their crews, are shifted between projects as they are needed. There are five foremen of this type who are respectively responsible for concrete buildings, heavy excavating, underground work, equipment, and transportation.

5. *Administrative Division*.—*a. Office Manager*.—An office manager is in charge of the several administrative duties. He is a bonded employee and is responsible for supervising the clerical staff assigned to the subdivisions described below.

b. General Office.—The general office concerns itself with all correspondence and filing, and is responsible for the control and issue of office equipment and supplies. The section has five employees, who are sufficient to perform adequately the assigned duties.

c. Personnel and Payroll Auditing.—(1) This subdivision is the hiring agency for the Hawaiian Constructors. In each instance where it is necessary for the contractor to hire personnel, the District Engineer requires that a request must first be submitted for his written approval. The personnel section of the subdivision is responsible for securing this written approval as requisitions for employees are received from operating supervisors.

(2) The personnel and payroll-auditing subdivision was formerly a time-keeping and personnel subdivision. When the District Engineer took over time-keeping and the preparation of payrolls, the contractor retained sufficient personnel to check the payrolls against the hiring authorizations from the District Engineer, prepare social security records, and prepare a bimonthly payroll for about one hundred employees. The payroll comprises employees of the supervisory staff and clerical group hired by the contractor on a monthly-pay basis. The District Engineer has ruled that this payroll will continue to be prepared and submitted by the contractor. It is also necessary for this subdivision to keep in contact with the contractor's foremen in charge of construction crews, as these foremen must keep a daily time record of employees in order to have a check against time rolls prepared by government timecheckers before they are submitted for record.

(3) This subdivision lacks proper coordination for most efficiently performing assigned duties. It is in a state of reorganization following the recent transfer of the timekeeping and payroll responsibility to the District Engineer, systems in use are not fully developed, duties are not clearly outlined, and the subdivision head does not exercise a sufficient control over the personnel section. These deficiencies are aggravated by inadequate office accommodations.

d. Procurement.—(1) This subdivision, consisting of [4] eight employees, is necessary for operation of the purchasing procedure directed by the District Engineer. The contractor is required to submit to the District Engineer's Procurement Division requisitions for supplies as they are needed in construction. These requisitions must show a description of the required item and the accounting symbol designating the procurement authority under which the purchase is to be made.

(2) This subdivision also acts as the contact agency between the Contractor's project engineers and the storage-and-issue subdivision of the District Engineer's organization. Purchases are catalogued by delivery dates so that this information can be relayed to project engineers to assist them in the preparation of efficient work schedules.

e. Plant Records.—(1) A major portion of the constructing equipment used on defense projects is obtained by the Hawaiian Constructors under third-party lessor agreements and is rented to the District Engineer at a monthly rate equal to one-twelfth plus one percent of its purchase value. These procurements are made only with the prior approval of the District Engineer. All payments covering purchase and rental of equipment are made by the District Engineer.

(2) This accounting subdivision composed of five employees, was established primarily for the purpose of maintaining an up-to-date record of all plant purchases, to insure that all obligations are settled in accordance with purchase stipulations.

(3) This subdivision also records transactions of a miscellaneous nature, such as employee transportation expenses and the cost of certain office supplies, and prepares invoices which are audited and paid by the District Engineer.

f. Property Records.—(1) In order to conform to contract stipulations a property subdivision was established, with a total of nine employees, consisting of one section head, one office clerk, and seven property clerks.

2992 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(2) Its functions are to maintain records of all property issued to the contractor on memorandum receipt by the District Engineer. The receipts are recorded by project areas, the section head and office clerk posting property control ledgers to show accountability vested in the property clerks of the different engineer field areas. This requires a system of tally-in and tally-out for all property issued for temporary use by individuals.

(3) The property records kept by the section head were found to be up-to-date and accurate. Those kept by area clerks are, in most instances, incomplete and carelessly posted. These irregularities were most prominent on Job 5.0 at Wheeler Field, and Job 9.0 at Hickam Field.

g. Commissary (Wheeler Field Tent Camp).—Because of the shortage of housing facilities for men employed on defense contracts, the [5] Hawaiian Constructors have established a tent camp at Wheeler Field for the purpose of housing and feeding approximately one hundred and twenty employees. The system installed for handling cash collections for boarders at the camp is not sufficiently safeguarded. Bookkeeping records are untidy and entries are made in a haphazard manner.

III. IRREGULARITIES AND DEFICIENCIES

6. *Irregularities.*—*a.* Property records kept by area clerks re incomplete and carelessly posted. (II 7f (3))

b. The handling of cash collections and bookkeeping records at the commissary are unsatisfactory. (II 7g)

7. *Deficiencies.*—*a.* Need for additional personnel in the engineering division. (II 3)

b. The personnel and payroll auditing subdivision lacks proper departmental coordination and adequate office accommodations for most efficient performance of duty. (II 5o (3))

IV. CONCLUSIONS

8. That the contractor is not exercising adequate supervision over property accounting and operations of the commissary.

9. That the corporation executives are attempting to effect an organization that will insure completion of project construction with the greatest degree of efficiency.

10. That shortages of building supplies, skilled clerical assistants and trained construction laborers are adversely affecting efficient operations; that these conditions will continue for sometime due to the lack of adequate transportation and manufacturing facilities, and to the time required to train personnel properly.

V. RECOMMENDATIONS

11. That action be initiated to correct the irregularities and deficiencies noted in paragraphs 6 and 7 of Section III above.

/s/ E. B. Whisner,
E. B. WHISNER,
Lieut Colonel, Infantry,
Assistant Dept Inspector Gen.

ARMY PEARL HARBOR BOARD EXHIBIT No. 29

Exhibit F

[1]

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, 29 August 1944.

Refer to File No, SPEAF

Subject: Priorities on Hawaiian Construction—Army Pearl Harbor Board Investigation.

To: Colonel D. I. McKay, Room 5114—War Dept. Bldg.

1. Pursuant to Major Loxier's request, the facts revealed by the records in the Office of the Chief of Engineers and the personal recollections of the undersigned on priorities matters relating to Hawaiian construction projects are set forth

hereunder for whatever purpose they may serve in connection with the Army Pearl Harbor Board Investigation.

2. Numerous requests for assistance in securing priorities ratings for construction projects in Hawaii were received from the District Engineer, Honolulu, T. H., the Department Engineer, Hawaiian Department, and from the Division Engineer, South Pacific Division, before Pearl Harbor. Many of these are a matter of record in the Office of the Chief of Engineers. Other assistance rendered, and attempted to be rendered, through this office by telephone and by personal contact with higher authorities cannot be documented but were material in scope nevertheless.

3. Until approximately June 1941, construction projects in Hawaii were rated on the same basis as similar projects in Continental United States; e. g., on the basis of the type of facility and not like projects in Panama, which were uniformly rated A-1-b. The isolated location of Hawaii presented difficulties in procurement and in transportation from the mainland, which the Commanding General, Hawaiian Department, reported to the Adjutant General in letters dated 4 June 1941,¹ 3 July 1941,² and again in a letter dated 28 July 1941.³ In the letter dated 28 July 1941, the Commanding General endorses the recommendation of the Division Engineer, South Pacific Division, for the establishment of a stockpile of materials, since "the delay in securing necessary materials for our construction program has become a matter of serious concern" and "this materials situation may become critical." This recommendation of the Division Engineer, South Pacific Division, was approved in a modified form by the Adjutant General by 1st indorsement, dated 27 September 1941, to the letter dated 28 July 1941.⁴

[2] 4. In his letter, dated 3 July 1941¹, to the Adjutant General, the Commanding General reported that despite efforts to anticipate their needs, the construction agencies cannot anticipate every item; local suppliers' stocks are being depleted without their being able to replenish their stocks, or to secure shipping space; that "To our knowledge there is now no coordinated shipping priorities"; "the Aircraft Warning Service Project is the most important single project in the department" and under the priority directive its rating would be A-1-f; "the conditions facing this department are similar to those in Panama and * * * a similar blanket [A-1-b] priority * * * for our defense projects should be authorized, and * * * this rating should be high". He recommended the establishment of a blanket priority for Hawaiian defense projects as has been done for Panama, the granting of authority to his office to select suppliers to whom ratings could be issued, and the establishment of a liaison with shipping agencies on the West Coast.

5. As early as 3 March 1941² transportation difficulties were reported to the Chief of Engineers by the Division Engineer, South Pacific Division. Pursuant to this report, the Office of the Chief of Engineers took up the matter with the General Staff and subsequently informed the Division Engineer that the Office of the Quartermaster General will handle all arrangements and that "hereafter full dependence [will] be placed upon that Service [Water Transport] to supply all transportation needs".

6. The Office of the Chief of Engineers, based upon a telegraphic request from the Division Engineer, South Pacific Division, dated 13 May 1941³ for a priorities rating on the AWS (Contract W-414-eng-784, dated 13 April 1941), obtained an a-1-f. This rating was not regarded⁴ as sufficiently high by the Division Engineer, since the Commanding General "considers it urgently necessary that the Aircraft Warning System * * * be completed and placed in operation without delay". A rating of A-1-c was obtained by the Office of the Chief of Engineers from the Army and Navy Munitions Board by telephone on 17 June 1941. A specific instance of assistance rendered by the Office of the Chief of Engineers to a contractor on the AWS despite the A-1-c rating already assigned to it was through personal contact with the Office of Production Management whereby it was arranged to transfer a pattern and the order for castings from one foundry to another which could make better deliveries⁵. In a letter

dated 24 July 1941 to the OPM on this project requesting assistance in obtaining steel, this office pointed out that "the project on which this material is needed is one which is vital to the defence of Hawaii" and "would take on added importance should the situation in the Pacific become more critical".

[3] 7. In a letter dated 11 July 1941¹ to this office, the District Engineer, Honolulu, T. H., requested a priorities rating on Contract W-414-eng-602 "as high as possible consistent with current priorities directives" because of the isolated location, and procurement and transportation problems obtaining. A rating of A-1-g had been assigned 28 February 1941 to this Hawaiian Constructors contract², as well as to numerous others (W-414-eng-658, 660, 669, 670, 672, 683, 696, 722)³. Based upon this request of 11 July 1941 from the Honolulu District Engineer, a rating of A-1-c was secured from the ANMB⁴ on contract Eng-602, and, about this time, on numerous others⁵.

8. The Office of the Chief of Engineers in requesting priorities ratings for gasoline reserve projects from the ANMB in a letter dated 4 June 1941 recommended the highest possible priority because "the need for building up adequate * * * reserves is of utmost importance"⁶. The Board authorized an A-1-b for projects in Panama and an A-1-c in Hawaii.⁷

9. Individual requests for ratings and for assistance in obtaining equipment, materials, and supplies for Hawaii have been received from Hawaii directly, or through the Division Engineer. The assistance the Office of the Chief of Engineers had been able to render was not spectacular because the Army and Navy Munitions Board had to be guided by the Priorities Directives. Since the Hawaiian construction projects were considered in the same defense category as domestic projects, the priorities ratings in the early part of 1941 were A-1-g⁸. It was not until June-July 1941 that certain projects were authorized ratings of A-1-c⁹. The general authorization to assign a rating of A-1-c to all contracts in Hawaii, even though Panama was authorized an A-1-b, was not favorably considered. Each contract had to be submitted separately to the ANMB for a priorities rating and for a priorities certificate, even though it was known beforehand what rating the Priorities Directive authorized. It was not until 8 August 1941 that the Office of the Chief of Engineers could advise the Division Engineer by teletype that a rating of A-1-e could be applied to all contracts in Hawaii and to any critical list item¹⁰. It was not until 20 August 1941 that an ANMB directive was published containing this authorization.¹¹

[4] 10. Even this authority was not adequate since ratings could be extended only to critical items or materials authorized by the Priorities Directive, whereas for construction, requiring literally thousands of items, few were listed as "critical", although the materials going into their fabrication were frequently classified as "critical". Gen. Reybold in a letter dated 25 August 1941¹² to Gen. Hines, Chairman of the Army and Navy Munitions Board, recommended the addition of construction projects to the critical list along with aircraft, ordnance and shipbuilding because "Of these categories, only construction is unable to readily obtain the numerous parts required, although it requires fully as varied a group of materials, component parts and accessories as any of the other categories above". This letter encompassed all construction, domestic as well as overseas, but it had particular significance for Hawaiian projects because of transportation and communication difficulties.

11. Pursuant to the teletype 8 August 1941 from this office to the Division Engineer, information was submitted on all Hawaiian construction for the purpose of supporting a Project Rating Order which would permit the assignment of the authorized rating (A-1-c) to all items required, critical as well as those not deemed critical. The Project Rating Order was issued 2 October 1941.¹³

12. The documents in the files of the Office of the Chief of Engineers cannot be purported to present fully the activities of this office in attempting to obtain the highest rating for Hawaii. This office was in frequent daily personal con-

¹⁴ OPM to OCE file 400.1301) 95.

tact with the personnel of the ANMB and was constantly urging a rating of A-1-a. This office was more successful in the case of Alaskan construction, since an A-1-a rating was assigned thereto 4 September 1941.² No documents have been found in this office showing a request for an A-1-a rating for Hawaii, nor can it be recalled whether such a request was actually reduced to writing. However, the undersigned recalls distinctly that on the day following Pearl Harbor, Jacob R. Hershey, Captain, CE, in the ANMB office, called him and said, in substance, "Well, I guess from what happened yesterday you were justified in asking to have Hawaii advanced to an A-1-a".

13. Of particular significance on the number of requests received by the Office of the Chief of Engineers from or on behalf of Hawaiian construction projects was the policy of the ANMB for granting priorities higher than assigned by Priorities Directives. Actually, the amount of general and detailed information required by the ANMB and the OPM in support of each such request was so comprehensive that the mere compilation consumed considerable manpower and time. In fact, the ANMB states that: "It is the announced policy to utilize priorities only as a last resort for relieving production difficulties. The results of efforts by the Chiefs of Supply Arms and Services to solve procurement problems by other means must be known by the Army and Navy Munitions Board before relief by priorities measures can be justified"³. Under these circumstances proportionately few requests reached the Office of the Chief of Engineers, since the major effort had to be exerted at contractor levels, and the district and the division levels before this office could approach the ANMB for assistance.

[5] 14. Also to be noted is the fact that about the time the ANMB began assigning A-1-c ratings to certain Hawaiian projects⁴ that Board published a letter, dated 17 June 1941⁵, stating the broad objectives of the Priorities System and the basis on which requests for higher ratings would be considered. The letter stated that: "From the point of view of priorities agencies [ANMB and OPM], delays in completing some contracts are but a measure of the improvement made possible in other contracts of greater importance * * * the delays occasioned to lower rated orders are indication that the system, as a whole, is functioning". It further states that: "While this Board is entirely sympathetic with the aims [to assure completion and delivery, as scheduled] of these agencies * * *, it is desired to point out that requests based *only upon a desire to complete a contract on time is not a valid reason to raise the priorities*" (italics supplied). Requests for higher-than-normal preference ratings were considered justifiable when "(a) the military importance of a particular project or order exceeds that importance of the general item * * *, and (b) where a minor amount of material is needed to complete a relatively large contract * * *".

15. The Commanding General of the Hawaiian Department, the Office of the Chief of Engineers, and the lower echelons of each, had to be governed by the broad view of the rearmament program when priorities assistance was requested for individual projects⁶ and for all projects collectively⁷ similar to that for Panama. At least twice in the recollection of the undersigned a verbal sounding-out of the Board for an A-1-a rating for Hawaii was made; e. g., when priorities on Alaskan projects were raised to that level⁸ on 4 September 1941 and when the Transpacific Ferry Route project was similarly rated⁹ on 24 October 1941, both at the request of this office. Apparently, the military importance of Hawaiian projects was considered to merit an A-1-c rating, as viewed at that time.

16. In conclusion, from the evidence available in the files of this office and from personal recollections of the undersigned, the agencies responsible for directing and supervising construction projects in Hawaii [6] were not remiss in stressing procurement and transportation difficulties and in urging high priority for individual projects and for all work in Hawaii. Requests to

higher authorities for assistance in securing specific items had to be preceded first by exhaustive efforts on the part of the field to secure the items and, if unsuccessful, had to be fully supported with detailed information and supporting statements. Although this policy of the ANMB was not so intended, in practice it resulted in many fewer requests for assistance being submitted to higher authorities than the number of instances which actually existed.

17. Some of the cases which a search of the files in the Office of Chief of Engineers has disclosed are appended hereto.

27 Sept. 41	-----	TAG to QMGM	1st Ind. to CG of 4th Ind. to Ser. 1 above, directing QMGM to establish stock pile available to Engineers.
[12]			
29 Sept. (?)	10	QMGM to ZCQM	Instructs ZCQM in Hawaii to enable Engineers to withdraw materials from stock pile as required.
20 Oct. 41	2	QMGM to ZCQM	Requests outline of steps taken to implement Ser. 10.
28 Oct. 41	1st, 2	ZCQM to QMGM	Reports that conference held 16 Oct. with D. E. Honolulu, and G-4 outlining plan.

[12A]

FILE: 635 (WAR RESERVE)

4 June 41	141	OCE to ANMB	Recommends highest possible rating for aviation gasoline reserve. "The need for building up adequate * * * reserves is of utmost importance."
9 June 41	1st, 141	ANMB to OCE	Authorizes A-1-b for Panama; A-1-c for Hawaii; and A-1-e for domestic projects.
12 Nov. 41	412	OCE to S. Pac. Div.	Advises delivery dates for tanks. Offers assistance if dates are unsatisfactory.
3 Dec. 41	543/1	Supplier to OCE	Steel for gasoline storage for Hawaii being held-up. Requests assistance.
9 Dec. 41	543	OCE to OUSW	Information from supplier not sufficient but attempt made to secure assistance from OUSW Steel Unit. Pittsburgh D. E. advised that A-1-c is applicable since tanks are diverted to Hawaii.

[13]

FILE: 3820 (PRIORITY—PREFERENCE RATING)

8 Aug. 41	(3)	ACE to S. Pac. Div.	Authorizes A-1-c to projects in Hawaii. Requests detailed information to support request for blanket rating.
27 Aug. 41	3	ACE to ANMB	Transmits information on Hawaiian projects submitted pursuant to TT Ser. (3).
18 Aug. 41	5	Hw. Dep. Engr. to OCE	Requests rating for steel for Honolulu Iron Works which is a supplier to defense contractors and should have stocks on hand. See also letter 15 Oct. 41, 400.1301/134.
9 Sept. 41	21	ANMB to OPM	Recommending A-2 for Honolulu Iron Works, re Ser. 5.
6 Sept. 41	16	ANMB to OPM	Forwarding request recommending A-1-d on equipment for Honolulu water system.
11 Sept. 41	-----	Gen. Reybold to ANMB	Outlines difficulties on construction because of priorities system since only end items and contracts are assigned ratings but not projects nor items not on critical list, yet these items contain materials which are critical. Requests addition of projects to critical list, including AWS (a general letter in which Hawaii was not mentioned specifically but the comments were pertinent thereto.)
23 Oct. 41	126	OCE to OPM	Requests Proj. Rating Order for Hawaii-Phil. Ferry Route.
24 Oct. 41	1st, 126	OCE to S. Pac. Div.	Advising A-1-a assigned, re Ser. 126 (Blders. Ser. No. 62).
24 Oct. 41	(126)	OCE to S. Pac. Div.	TT—Advising of A-1-a.
10 Oct. 41	127	Hw. Dept. Eng. to OCE	Requests assistance on equipment for Hilo Electric

[13] FILE: 3820 (PRIORITY—PREFERENCE RATING)—Continued

Date	File Serial No.	Offices Originating & Receiving Corres.	Substance of Correspondence
14 Oct. 41	131	Hw. Dept. Eng. to OCE....	Refers to letter dated 11 July 1941 from D. E., Honolulu (his file Engrl 400.174, not in OCE file), requesting assistance in getting hose for fire equipment for city of Honolulu. Requests further effort.
[14]			
30 Oct. 41	1st, 131	OCE to ANMB.....	Strong recommendation made to accrue hose.
18 Nov. 41	4th, 131	ANMB to OCE.....	Advises A-4 rating assigned.
13 Feb. 42	7th, 131	Hw. Dept. Eng. to OCE.....	Reports hose delivered.
13 Nov. 41	189	Hw. Dept. Eng. to OCE.....	Requests assistance on equipment for vocational school on national defense.

[15]

FILE: 400.1301

NOTE: Requests listed herein for priorities assistance to local supplier, public utilities, city of Honolulu, and other non-defense agencies were supported by the Commanding General, HD, because the local suppliers maintained stocks upon which defense contractors drew, and because the other agencies directly or indirectly contributed to construction progress. These requests were submitted to the Office of the Chief of Engineers because the CG, HD, appointed the Department Engineer as priorities officer and coordinator. See letter from DG, HD, to OCE, dated 11 July 1941—file 523.07 (Hawaiian Department) 1.

26 July 41	1	Hwn. Dept. Eng. to OCE....	Requests rating for City of Honolulu water system materials.
13 Aug. 41	(1)	OCE to ANMB.....	Requests rating re Ser. 1.
28 July 41	5	Hwn. Dept. Eng. to OCE....	Requests assistance on lift trucks for a drayage company.
1 Aug. 41	8	Hwn. Dept. Eng. to OCE....	Requests assistance on steel and other materials for Honolulu Water system.
15 Aug. 41	1st, 8	OCE to ANMB.....	Transmits request re Ser. 8.
9 Sept. 41	61	OPM to Bd. Wtr. Sup.....	Assigns A-1-d to materials re Ser. 8.
2 Aug. 41	9	Hwn. Dept. Eng. to OCE....	Requests assistance for material for Hilo Electric Co.
18 Aug. 41	1st, 9	OCE to ANMB.....	Transmits request, re Ser. 9.
2 Aug. 41	11	Hwn. Dept. Eng. to OCE....	Requests assistance for rating on multi-fork trucks for Castle and Cooke Terminals, Ltd.
8 Sept. 41	59	OPM to Supplier.....	Assigns A-1-c, re request Ser. 11.
16 Aug. 41	12/1	ANMB to OPM.....	Recommends A-1-d on pipe and fittings, City of Honolulu. Basic request not on file.
8 Aug. 41	16	Hwn. Dept. Eng. to OCE....	Requests assistance on meters and other equipment for Hilo Electric.
22 Aug. 41	1st, 16	OCE to ANMB.....	Requests rating be secured from OPM re Ser. 16.
25 Aug. 41	112	ANMB to OPM.....	Recommends A-1-d to OPM.
9 Aug. 41	17	Hwn. Dept. Eng. to OCE....	Requests rating on fittings for school used in defense training.
26 Aug. 41	37/1	ANMB to OPM.....	Recommends A-4 to OPM re Ser. 17.
8 Aug. 41	18	Hwn. Dept. Eng. to OCE....	Requests rating for Honolulu Water System supply for housing.
25 Aug. 41	111	ANMB to OPM.....	Recommends A-1-d to OPM re Ser. 18.
[16]			
8 Aug. 41	19	Hwn. Dept. Eng. to OCE....	Requests rating for cement lined water pipe and fittings for City of Wahiawa. City "will be used for dispersion of evacuees from Honolulu and other crowded areas" in time of an emergency.
25 Aug. 41	110	ANMB to OPM.....	Recommends A-1-s to OPM re Ser. 19.
27 Sept. 41	89	ANMB to OCE.....	Advises OPM issued A-1-o to Wahiawa Water, re ser. 19.
21 Aug. 41	43	Hwn. Dept. Eng. to OCE....	Requests rating on materials and equipment for Hilo Electric.
26 Aug. 41	54	OCE to ANMB.....	Requests A-1-a for 50% of blasting caps, including for Hawaii.
3 Sept. 41	68	Hwn. Dept. Eng. to OCE....	Requests rating on material for electric system of private company.
16 Sept. 41	1st, 68	OCE to ANMB.....	Recommends assistance be obtained from OPM.
8 Sept. 41	72	Hwn. Dept. Eng. to OCE....	Requests rating for Hilo Elec. to extend its lines.
18 Sept. 41	1st, 72	OCE to ANMB.....	Transmits request re Ser. 72.
19 Sept. 41	76	ANMB to OPM.....	Recommends A-1-d for Hilo Elec., re Ser. 72.
16 Sept. 41	73	OPM to OCE.....	Advises A-1-d rating issued on water system.
18 Sept. 41	65	OCE to ANMB.....	Requests assistance on certain materials for Hilo Electric.
19 Sept. 41	75	ANMB to OPM.....	Transmits request to OPM without recommendation.
19 Sept. 41	74	OPM to OCE.....	Advises of A-1-d for Hilo Elec., re Ser. 65.

3000 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

FILE: 400.1301—Continued

Date	File Serial No.	Offices Originating & Receiving Corres.	Substance of Correspondence
2 Oct. 41	95	OPM to OCE.....	Assigns A-1-c in blanket to Hawaiian project (only reference is in index to file 400.1301).
29 Aug. 41	118	Hwn. Dept. Eng. to OCE....	Transmits 42 requests for ratings for Hilo Electric.
22 Sept. 41	105	Hwn. Dept. Eng. to OCE....	Recommends favorable action for police force equipment for County Provisional Police Guard.
15 Oct. 41	134	Hwn. Dept. Eng. to OCE....	Requests assistance for Honolulu Iron Works stock pile.
29 Oct. 41	1st, 134	OCE to ANMB.....	Recommends referring to OPM for favorable action.
[17]			
15 Oct. 41	135	Hwn. Dept. Eng. to OCE....	Requests rating on equipment for St. Francis Hospital.
28 Oct. 41	1st, 135	OCE to ANMB.....	Recommends reference to OPM for favorable action.
20 Oct. 41	139A	So. Pac. Div. to OCE.....	TT requesting A-1-a for Transpacific Ferry Route.
29 Oct. 41	163	Hwn. Dept. Eng. to OCE....	Requests A-1-d for Hilo Elec. equipment.
14 Nov. 41	1st, 163	OCE to ANMB.....	Recommends A-1-d, re Ser. 163.
31 Oct. 41	172	Hwn. Dept. Eng. to OCE....	Requests rating for St. Francis Hospital equipment.
1 Nov. 41	173	Hwn. Dept. Eng. to OCE....	Requests rating for sewerage system of Honolulu.
18 Nov. 41	1st, 173	OCE to ANMB.....	Recommends reference to OPM for rating.
5 Nov. 41	175	Hwn. Dept. Eng. to OCE....	Requests rating on equipment for St. Francis Hospital.
4 Nov. 41	148	OCE to So. Pac. Div.....	TT—Advising that A-1-c was assigned for all materials, critical and non-critical, for numerous projects by Preference Rating Order No. 19, Builders' Serial No. 60 (information therefor submitted to ANMB 27 Aug. 41, see 3820 (Priority Preference Rating) 3 in OCE).
19 Nov. 41	188	ANMB to OPM.....	Recommends A-1-d on manhole covers for City of Honolulu.
25 Nov. 41	189	OCE to Hwn. Dept. Eng....	Informs that St. Francis assigned A-1-d re Ser. 135

Following cases originating after Pearl Harbor are cited to show that A-1-c for Hawaii was not changed generally.

10 Dec. 41	258	So. Pac. Div. to OCE.....	TT—Quoting DE, Hon. requesting A-1-a for rock crushed.
13 Dec. 41	-----	OCE to ANMB.....	Requests A-1-a for rock crushed re Ser. 258 (note on TT Ser. 258).
15 Dec. 41	254	ANMB to OCE.....	Authorizes A-1-a, re Ser. 258.
15 Dec. 41	-----	OCE to So. Pac. Div.....	Advises A-1-a authorized, re Ser. 258.
[18]			
20 Dec. 41	274	So. Pac. Div. to OCE.....	Informs that A-1-a on approximately \$5,000,000 of equipment is not high enough. Requests OPM issue blanket AA rating for 60 days for all equipment.
22 Dec. 41	(274)	OCE to So. Pac. Div.....	Advises AA not favorably considered. Offers assistance on specific items.
16 Dec. 41	288	So. Pac. Div. to OCE.....	TT—Quoting DE, Hon. requesting AA on 15 generators.
17 Dec. 41	(288)	OCE to So. Pac. Div.....	Advises ANMB requests all information to consider case.
22 Dec. 41	305	OCE to So. Pac. Div.....	TT—Replying to SPD TT 19 Dec. 41 advises that request for blanket A-1-a or better for all materials not approved as it would disrupt priorities system. System must be controlled centrally. OCE will act on telephone or telegraph request direct from project but all information to be furnished in first instance.
22 Dec. 41	342	OCE to So. Pac. Div.....	Assigns A-1-a to all emergency repair required as a result of enemy action. AA upon request.

[19] FILE: #676.3 (AWS—HAWAII)

13 May 41	33	S. Pac. Div. to OCE.....	TT—Requesting blankets rating for aerial cable for AWS Station on W-414-eng-784. Advises that track, cable, traction rope, structural steel, electric motors are required but are not on critical list. Completion required 20 Sept. 1941. CG, HD, desires station completed at earliest possible date. Recommends authorization of rating commensurate with desire of Department.
22 May 41	(33)	OCE to S. Pac. Div.....	TT—Advising ANMB assigned A-1-f to prime contractor for items on critical list (by 1st Ind., 20 May 1941 to Ser. 33).

FILE: #676.3 (AWS-HAWAII)—Continued

Date	File Serial No.	Offices Originating & Receiving Corres.	Substance of Correspondence
12 June 41	39	S. Pac. Div. to OCE.....	Refers to 13 May TT and advises A-1-f priority is not sufficiently high; that it will cause delay but cannot say how much. Informs that CG, HD states AWS is urgent. Requests highest possible rating.
17 June 41	1st, 39	OCE to ANMB.....	Stresses urgency of AWS.
20 June 41	2nd, 39	ANMB to OCE.....	Assigns A-1-e to AWS.
24 June 41	3rd, 39	OCE to S. Pac. Div.....	Advises of A-1-e and that contractor notified; offers further assistance. (See Ser. Nos. 45, 46 and 50.)
11 June 41	37	CG, HD to TAG.....	TT—Informs TAG that A-1-g on Contract 784 will result in delay of 15 weeks. Requests A-1-b.
17 June 41	2nd, 37	OCE to TAG.....	Advises TAG that A-1-e was assigned by ANMB upon telephonic request (pursuant to request from Division Engineer, see Ser. 39 above).
9 July 41	45	Contractor to OCE.....	Contractor gives evidence of inability to get steel deliveries.
11 July 41	(45)	OCE to Contractor.....	Informs contractor of procedure to get assistance.
[20]			
21 July 41	46	Contractor to OCE.....	Contractor requests assistance to obtain castings for AWS.
24 July 41	(46)	OCE to OPM.....	Submits forms and order for castings. Points out—"The project [AWS] on which this material is needed is one which is vital to the defense of Hawaii [and] which would take on added importance should the situation in the Pacific become more critical." Urges every possible assistance be given to contractor.
11 Aug. 41	54	OPM to OCE.....	Advises that, by shifting patterns and order, castings will be delivered 15 Sept. 41.
12 Aug. 41	(46)	OCE to Contractor.....	Advises that OPM, by shifting patterns and order to another supplier, has moved up delivery to 15 Sept. 41.
13 Aug. 41	(57)	OCE to S. Pac. Div.....	Advises Division Engineer of 12 Aug. 41 letter to Contractor.
4 Aug. 41	50	Contractor to OCE.....	Requests higher rating on Contract 784, difficulty in getting steel.

[21]

FILE: 600.1 (HICKAM FIELD)

8 Mar. 41	139	DE, Hon. to OCE.....	Transmits cc of priority certificate of A-1-g on W-414-eng-672, 696, 683, 722, 658, 669, 670 and 660. Requests for these priorities have not been located in OCE files, but under the priorities system each had to be preceded by a request which went to the ANMB for approval and for assignment of a rating.
8 Mar. 41	140	DE, Hon. to OCE.....	
8 Mar. 41	141	DE, Hon. to OCE.....	
8 Mar. 41	142	DE, Hon. to OCE.....

1 Apr. 41	162	DE, Hon. to OCE.....	
28 Mar. 41	147	So. Pac. Div. to OCE.....	Requests extension of A-1-g to certain items not on the critical list.
6 Apr. 41	148	ANMB to OPM.....	Transmits request re Ser. 147 requesting A-1-e.
22 Apr. 41	186	So. Pac. Div. to OCE.....	Follow-up on Ser. 147 and 148.
29 Apr. 41	192	ANMB to OCE.....	Re Ser. 147. Advises that supplier can ship without rating.
12 June 41	270	So. Pac. Div. to OCE.....	Requests rating for tandem rollers (not critical item) for W-414-eng-602.
18 June 41	1st, 270	OCE to ANMB.....	Requests assignment of rating.
17 July 41	2nd, 270	ANMB to OCE.....	Advises OPM issued rating.
19 June 41	282	So. Pac. Div. to OCE.....	TT follow-up re Ser. 270 (A note on TT states OCE was advised that OPM wired supplier to release and Division Engineer was informed).
30 July 41	4th, 270	So. Pac. Div. to OCE.....	Advises shipment made.
6 June 41	274	So. Pac. Div. to OCE.....	TT requesting assistance on shipping of cable.
12 June 41	(274)	OCE to So. Pac. Div.....	TT DE Ser. 274 advises shipping arranged.
21 June 41	277	So. Pac. Div. to OCE.....	Requests A-1-b for steel in lieu of A-1-g on contract 722.
24 June 41	1st, 277	OCE to So. Pac. Div.....	Advises A-1-c is authorized.
24 June 41	(277)	OCE to So. Pac. Div.....	TT advises A-1-c is authorized.
7 July 41	303	So. Pac. Div. to OCE.....	Request priority for rock crusher on contract Eng 602.
10 July 41	1st, 303	OCE to ANMB.....	Requests rating. Informs ANMB that request for contract rating was requested under 600.1 (Hwn. Dept. Airfields) 130.
12 July 41	(303)	ANMB to OPM.....	Recommends A-1-c for rock crusher.
12 July 41	2nd, 303	ANMB to OCE.....	Transmits cc Ser. (303).
14 July 41	3rd, 303	OCE to So. Pac. Div.....	Advises A-1-c rating on contract 602 and transmits cc Ser. (303).

3002 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

FILE: 600.1 (HICKAM FIELD)—Continued

Date	File Serial No.	Offices Originating & Receiving Corres.	Substance of Correspondence
13 July 41 [22]	317	DE, Hon. to OCE.....	TT advising that A-1-c has been assigned to W-414-eng-696.
28 Nov. 41	(504)	OCE to OUSW.....	Steel Unit, OUSW, requested to secure allocation of steel for Fire Control and Repair Bldg. at Hickam which steel the Division Engineer cannot obtain.
2 Dec. 41	504	OUSW to OCE.....	Re Ser. (504). Advises that OPM requested to insert rolling of steel in January 1942 schedules.

[23]

FILE: 523.07 (HAWAIIAN DEPARTMENT)

Letter dated 11 July 1941 from CG, HD, to OCE (through TAG), filed as Serial No. 1 under this file. Although this letter primarily advises that the Commanding General appointed the Department Engineer as the coordinating officer on all priorities matters under his command, it contains as an inclosure a letter dated 3 July 1941 from the CG, HD, to the TAG. The substance of this letter, dated 3 July 1941, is important in that it reports upon materials and transportation difficulties on Hawaiian projects, and refers to prior reports made by him on the same subject.

The letter of 3 July 1941, in substance, as follows:

Increasing difficulties in procurement of materials. Hawaii presents special problems in procurement due to shipping. Construction agencies are anticipating their needs, but it is impossible to anticipate every item. There is no apparent coordination of shipping priorities on the West Coast. Contractors and local suppliers are encountering increasing difficulties. Reports that ANMB in its directive of 27 November 1940 placed Panama in an A-1-b priority, but assigned no similar blanket coverage for Hawaii. He stated that:

"The Aircraft Warning Service is the most important single project in this Department, and under the general classification in this directive the highest priority which could be assigned to it would be A-1-f. It is believed that the conditions facing this Department are similar to those in Panama and that * * * blanket priority classification for our defense projects should be authorized, and this rating should be high."

He recommended: high blanket ratings; authority be given him to select essential firms (local suppliers) to which ratings may be given; and the establishment of a liaison on shipping on the West Coast for shipping priorities.

SECRET

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington, March 15, 1941.

Lieut. General WALTER C. SHORT,

*Commanding General, Hawaiian Department,
Fort Shafter, T. H.*

DEAR GENERAL SHORT: The matters referred to in your secret letter dated March 6, 1941, and the inclosures thereto, have been given careful study.

The War Department appreciates fully the necessity for the early establishment of the aircraft warning service stations in the Hawaiian Department. However, it will be necessary to comply with certain fixed regulations in those cases where facilities are to be established on lands pertaining to the Department of the Interior. The National Park Service officials are willing to give us the temporary use of their lands when other lands are not suitable for the purpose,

3006 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

but they will not waive the requirements as to the submission of preliminary building plans showing the architecture and general appearance. They are also very definitely opposed to permitting structures of any type to be erected at such places as will be open to view and materially alter the natural appearance of the reservation.

I have given these matters my personal attention, and have conferred with officials of the National Park Service. War Department radiogram of March 12, 1941, outlines what appears to be the most practical solution at this time. The War Department finds it necessary to ask the Department of the Interior for the use of many tracts of land in the National Parks, and for their cooperation in the transfer of large areas of public lands. It is not believed that it would be advisable to attempt to alter the informal decisions of the Department of the Interior by carrying this matter to higher authority, or to prolong the discussion through official channels.

We are as anxious as you to work out a solution for these problems with the least practicable delay, and I know that I can count upon you for fullest cooperation.

Faithfully yours.

/s/ G. C. MARSHALL,
per WB.

In the absence of the Chief of Staff.

(Note in longhand:)

SHORT: Gen Marshall had this letter prepared but he went off on a trip before signing. I am sending it on.

/s/ BRYDEN.

Date: 29 May 1941

In reply refer to: Engr. 676.3

Subject: Base Camp Haleakala AWS Station

To: District Engineer, Honolulu, T. H.

1. Reference is made to 1st Indorsement, this headquarters, 9 May 1941, on your letter, file 2014-42, April 23, 1941, subject: "Haleakala Aircraft Warning Service Station."

2. The War Department has informed this headquarters by radio, paraphrase of which is attached as Inclosure No. 1, that the National Park Service has approved the building designs and layout and is issuing a special use permit for the 6.67 acre camp site. All negotiations with the War Department and the National Park Service concerning the Haleakala AWS Station have now been completed and your office is free to proceed with the construction of both summit installation and the base camp.

3. Also attached is copy of letter from Mr. Edward G. Wingate, Superintendent, Hawaii National Park, which states that the CCC Camp at Haleakala, recently vacated, is available for such use as the Army may care to make of it. There are accommodations at this camp for approximately 25 persons, including a mess hall which can be used for feeding twice that number. It may be convenient to utilize these facilities for quartering at least a portion of the construction crew which will be engaged on the work at the Haleakala sites.

4. Outside of the Mt. Kaala Station, the Haleakala installation is the most important link in the aircraft warning system and it is consequently essential that the work thereon be carried to early completion.

For the Commanding General:

O. M. McDole,
Major, A.G.D.,
Assistant Adjutant General.

C. G., HAWAIIAN DEPARTMENT:

Re your letters dated 31 March and 5 May as to the location of the base camp, Haleakala Aircraft Warning Service Station. The National Park Service has approved plans for proposed installations and for use of 6 and 2/3rds acre camp site as recommended by you. National Park Service, by radiogram dated 17 May 1941, notified Superintendent Wingate that you may proceed with installations as planned pending issue of special use permit now being prepared by Department of Interior. Your correspondence is being filed in the War Department.

Engr. 676.3.

Subject: Approval of preliminary sketches and plans for proposed buildings at AWS Stations.

1st Ind.

HEADQUARTERS, HAWAIIAN DEPARTMENT,
Fort Shafter, T. H., 6 March 1941.

To: District Engineer, Honolulu, T. H.

1. The general plans of the proposed communication buildings on Oahu, Maui, and Kauai are approved.

2. The proposed buildings for the Maui and Kauai base stations as shown on drawing F-4/9 are approved.

3. The proposed buildings for Mount Kaala and the layout at that station shown on your drawing, file No. F-4/10, are approved.

4. The proposed buildings shown for construction at Manawahua on this same drawing is not approved; a *portable building* will be substituted for this design. In connection with the approval of the layout at Mount Kaala attention is invited to section 1 (f page 4) of letter this headquarters, Engr. 676.3, 7 November 1940, to you, subject: "Construction of Aircraft Warning Stations," which requested that particular care be exercised in the construction of the station to take every advantage of possibilities for concealing the installations from aerial observation.

5. The proposed garage buildings shown in your drawing F-4/11 are approved for general designs. No further work should be done on the design of these garages, however, pending further instructions from this headquarters. The question of whether or not these garages will be constructed with funds of the Aircraft Warning Service project has been submitted to the War Department and no answer has as yet been received. You will be notified when a definite decision on this point has been received from the War Department.

ARMY PEARL HARBOR BOARD EXHIBIT No. 37

A. W. S. INFORMATION CENTER—FT. SHAFTER, OAHU

J. O. #39.0

Characteristics: This project consists of a series of interconnected tunnels 890 feet long and varying in diameter from 10 feet to 30 feet. Access to the tunnel is gained by two entrances. Originally the structure was to be located at Hickam Field, but later in June, 1940, it was decided to locate the center at Alimamu Crater. On 9 April 1941 the structure was finally located at Ft. Shafter, Oahu.

Ft. Shafter site approved by Commanding General, Hawaiian Department and War Department.....	9 April 1941
Layout plan (File No. F4/57) and estimates of cost of station submitted to Commanding General, Hawaiian Department, and Chief of Engineers.....	18 April 1941
Layout plan held by Headquarters Hawaiian Department and District Engineer notified that change in plan contemplated by War Department.....	17 May 1941
Plans of revised layout approved by Commanding General, Hawaiian Department.....	5 August 1941
Work started on station.....	19 June 1941
Percent complete on 7 December 1941.....	72%

This job at first contemplated a small tunnel about 600 feet long involving 3600 yards of rock with completion date fixed for August 11, 1941.

3010 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

The project was expanded in the layout approved August 5, 1941 to 3 tunnels with a total length of 890 feet and about 10,200 yards of rock excavation. Due to the rooms and number of tunnels this was not straight driving. The completion date was fixed at December 15, 1941. This was not excessive. Hand methods were used initially. When the larger project was adopted, additional tunnel equipment was ordered.

Excavation was completed October 31, 1941. The % of completion on 7 December was only 72% because Using Services had not yet decided interior arrangement so that side walls could be completed. These decisions not made until after Pearl Harbor. During period immediately after Pearl Harbor it was used as a bomb proof shelter.

1st Ind.

HEADQUARTERS, HAWAIIAN DEPARTMENT,
Fort Shafter, T. H., 17 May 1941.

To: District Engineer, Honolulu, T. H.

1. Action on approval of the design submitted by basic communication has been held in abeyance as a result of instructions received from the War Department that this structure for the Aircraft Warning Service would be combined with the Command Post for the Hawaiian Air Force and the Antiaircraft Groupment. Similarly the data necessary for your office to design the Command Post of the Air Force and of the Command Post of the Antiaircraft Groupment for which you were directed to prepare detail designs has not yet been submitted.

2. This entire matter is now undergoing final study at this headquarters and you will be advised of the final requirements of the Information Center, the Air Force Command Post and the Anti-aircraft Groupment Command Post in the near future. It is believed that the combination of these three units and the elimination of some duplication will result in a lowered cost.

HAWAIIAN CONSTRUCTORS,
Room 1216 Balfour Bldg.,
351 California Street,
San Francisco, California.

Attention Mr. C. C. Middleton

Subject: Authority to purchase plant and establish rental rates.

GENTLEMAN: You are hereby notified that the Assistant Secretary of War approved your Contract No. W-414-eng-602, January 4, 1941.

In accordance with Article II, paragraph 2, purchase of the following list of plant is authorized subject to the maximum amounts set opposite each item. If it is considered advisable to modify the list of plant, or change the makes or models of equipment proposed, application should be made to this office, or to the District Engineer, Honolulu, T. H. This authority covers the items discussed by Colonel Wyman and Mr. Middleton on December 24, 1940.

Item No.	Quantity	Description	Maximum approved unit cost f. o. b. origin
1	2	Northwest Shovels, 1½ cu. yd.	25,305.00
2	3	Tractors, with angledozers, RD-8 or RD-7 as alternates.	7,886.40
3	1	Patrol grader No. 12 Caterpillar.	6,258.00
		or No. 99 Austin-Western.	7,272.00
4	1	Tractor, D-7, with sheepsfoot rollers Ben Hulse D-7 and W 2 Sheepsfoot.	7,488.20
5	2	Compressors, 500 cu. ft. 2-stage, Diesel, C. P. or equal.	8,875.00
6	15	4 cu. yd. dump trucks GMC Model AC-703, Model 361 engine, S 4452 transmission, W-12 body with model, F 4 C hoist, 10.00 x 20 mud and snow tread tires, model E-527 front axle, and E-2680 rear axle.	3,780.00
7	2	1 cu. yd. Paver Ransome, Rex or Koehring as selected by contractor.	3,578.00
[2]			
8	1	Batching Plant, 150 ton capacity Blaw-Know.	3,200.00
9	2	¾ cu. yd. Shovel-crane, N. W. Model 25.	12,580.00
10	3	5-ton trucks, Ford, with 5-ton Freuhauf trailers.	(Price to be separately authorized).
11	1	40-ton low-bed trailer, Freuhauf or equal.	5,088.00
12	1	Electric Welder, 300 amp. G. E., gas driven.	995.00
13	1	10-ton Tandem roller, Buffalo-Springfield Model VT-21.	4,350.00
14	1	3-ton Utility roller, Buffalo-Springfield model VT-9.	2,350.00
15	1	Pug Mill, ½-ton capacity, Madsen Iron Works.	2,677.50
16	4	¾-ton Pick-up trucks, Ford V-8.	779.60
17	4	Light weight automobile sedans.	865.50
18	4	Light weight automobile Coupes, Ford V-8.	779.60
19	1	Rubber-tired sack mixer, gas driven.	1,140.00
20	2	Drifters, 3½" G. D. Model AF-9H.	515.00
21	1	12" Ventilating Fan, Sutterbilt Corp.	520.00
22	1	Concrete placing outfit, 7 cu. ft. electric Ransome.	1,800.00
23	1	Crane, Z-1114, stiff-leg, mounted on a D-7 tractor.	7,520.00
24	1	Logging winch, 2-drum, Heavy duty, D-7 Hyster.	2,093.50

Attention is invited to items numbered 1 and 11. It is preferred by the contracting officer that 2½ cubic yard shovels be purchased instead of 1½ cubic yard size. If the 2½ cubic yard shovels are obtainable without undue delay authority is hereby given for their purchase. If shovels of 2½ cubic yard capacity are used it will be necessary to obtain a low-bed trailer of sufficient capacity to handle them. Authority is hereby granted to modify item 11 accordingly. The district engineer, Honolulu, T. H. and this office should be advised promptly as to the sizes of these two items and the purchase prices involved.

3012 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[3] Monthly rental rates for the equipment authorized by this letter shall be computed on the basis of one-twelfth of the purchase price, f. o. b. point of origin, not to exceed the maximum approved unit prices listed herein, plus one (1) percent per month, or fraction thereof, that such plant has been in use. The cost of any transportation shall not be included in this figure. See Article II, paragraph 2 of the contract.

It is desired by the contracting officer that this equipment be shipped by Army or other Government transport, if practicable, and if such transportation is available. Therefore, it is requested that you notify this office of probable shipping dates, weights and cubic measurements of the equipment. Application should be made on this office for necessary Government bills of lading for commercial shipments.

Yours very truly,

/s/ Warren T. Hannum,
WARREN T. HANNUM,

In reply refer to : Engr. 676.3

Memorandum to District Engineer :

1. In accordance with conversation, Colonel Powell-Major Robinson, and Major Fleming, on the Aircraft Warning Service, it is requested that you arrange to obtain from the Signal Officer the necessary metal building and towers for installation at Kokee and Haleakala. As you know, the installation at Kokee will consist of the metal detector building and a 100-foot tower and at Haleakala, will consist of the combined metal building and 35-foot tower.

2. It is my understanding that these metal buildings are now on hand at the Signal Corps yard at Fort Shafter. This can be verified by having someone check the buildings on hand in the yard. If the buildings are now complete, shipment of them to Haleakala and Kokee and their erection at the site should be expedited.

3. It is also requested that erection of the power house at these two stations be expedited. It is understood that your office has designed and is furnishing all materials for these power houses. Their completion should be expedited in order to enable early installation of the equipment.

4. Also, in the discussion referred to, it was decided that the Signal Corps would furnish an employee at Kokee and at Haleakala to assist in the erection of the buildings and to see that they are properly screened and shielded as required. It is also tentatively agreed that the District Engineer would suballot funds to the Department Signal Officer to cover the cost of this employee's transportation and time while engaged on this work. In view of the need of this Signal Corps employee's assistance during the erection of the building, it is requested that you notify this office before the actual erection starts in order that arrangements can be made to send him to the site.

5. The Department Commander is extremely desirous that these stations be placed in operation without delay.

Aircraft Warning Service Stations

DEPARTMENT ENGINEER,
*Headquarters, Hawaiian Department,
Fort Shafter, T. H.*

1. In answer to your memorandum of September 8 regarding the installation of the Aircraft Warning Service buildings at Kokee, Kauai and Haleakala, Maui, and the necessary funds for furnishing Signal Corps employees to assist in erection of these buildings, the following information is submitted for your convenience:

a. The necessary metal buildings and towers have been shipped to Kokee and Haleakala.

b. The necessary steel for the power houses at these stations is now being fabricated and upon completion the erection will be expedited.

c. Bill for the Signal Corps employees' time and transportation while engaged in this work will be submitted to the District Engineer and payment will be made directly from this office instead of suballotting the necessary funds to the Department Signal Officer as mentioned in memorandum referred to above.

d. The actual erection of the metal buildings and station towers at these stations will be started as follows: Haleakala, as soon as Signal Corps employees arrive; Kokee, approximately October 1, 1941.

2. You will be notified, as soon as can be determined, the exact date that erection of buildings and tower will be started. Arrangements have been made at these stations for the accommodation of the Signal Corps employees.

3. It is requested that this office be informed the day before the employees are to leave for Maui and Kauai.

C. of E. 676.3 (Aircraft Warning Service)

Subject: Requirements for A. W. S. Building Construction.

To: The Chief Signal Officer.

1. The Chief of Engineers is apprehensive as to his ability to accomplish the design and construction of the necessary buildings for Aircraft Warning Service with fiscal year funds unless definite information can be obtained of Signal Corps requirements. Preliminary designs of structures have been prepared but it is felt that preparation of type plans for transmission to the field can not be completed until a definite statement of the equipment to go in each structure, and the space requirements for operation can be obtained. This information was requested by letter this office, dated May 21, 1940, subject: Requirements for A. W. S. Building Construction, C. of E. file 676.3 (A. W. S.), and has been requested informally at intervals since that time.

2. The Chief of Engineers is ready and anxious to cooperate in working out any details in connection with this important program. It is considered essential that basic information with type plans be transmitted to the constructing agencies, in the near future, with authority for local determination of details. Unless such information and necessary funds for accomplishment of the work are made available and authority decentralized the program will be seriously delayed.

For the Chief of Engineers:

C. L. ADCOCK,
*Major, Corps of Engineers,
Executive Officer.*

Copy of C. of E. 676.3 (Aircraft Warning Service) 21.

ARMY PEARL HARBOR BOARD EXHIBIT No. 42A

OCSigO 676.3—AWS Gen.
(8-5-40)

1st Ind. 6

WAR DEPARTMENT, OCSigO,
Washington, August 16, 1940.

To the Chief of Engineers.

1. Reference is made to your drawing "21 Man Barracks for AWS Station" dated April 3, 1940. This general plan and layout is suitable for fixed stations if due consideration be given to the local climate conditions and to the provision of space for heating plant as may be required. Space for personnel should be as follows:

a. Panama.

1 Officer, 22 enlisted men.

b. Hawaii.

Stations at Kokee and Haleakala.

2 detachments at each, consisting of

(1) 1 Officer, 19 enlisted men.

(2) 1 Officer, 26 enlisted men.

c. All other fixed stations requiring this type of construction—1 Officer, 19 enlisted men (Puerto Rico: Alaska; Kaala, T. H.).

d. Requirements at Burrwood, La., are not known at this time. If existing barracks space is now available there will be required only space necessary to house the communications and shop equipment, office, etc. This may also be available.

In connection with the stations in Hawaii, requirement for heating cannot be definitely stated other than that, from personal experience, provision for heating the communications building at Haleakala is essential. The requirements at the other two stations (Kokee and Kaala) should be investigated before completing the final plans.

Detailed projects have not yet been received enumerating the specific items of equipment to be installed at each station; however, there will be installed in the radio room a minimum of

a. 1 radio transmitter, 24' x 24' x 72' high, weight—1000 lbs.

2 radio receivers mounted in a rack 19' x 16' x approximately 76' high.

2 operating tables or desks, chairs, etc.

A power building located adjacent to the communications building is required for each fixed station. Except at Burrwood, La., where commercial power is available, the power building will house three power units and necessary switchboards. The minimum clear floor space required is 16' x 21' and ceiling height should be at least 9'. The building at Burrwood will house one power unit and should be 12' x 16' with 9' ceiling.

The communications building and power building at each station should be sufficiently removed from the detector station (minimum 300 yd.) to avoid interference with the operation of the detector. If practicable, these buildings should be located at somewhat less elevation than the detector.

2. Reference is made to your drawing "Preliminary AWS Information Centers" dated April 25, 1940. Requirements for the plotting room are stated by the Signal Corps Board as a room at least 30' x 30' x 20' high with a balcony 9' from the floor on at least two sides of the room, the major item of equipment being a plotting board 18' x 18'. The power room is required to provide space for an emergency power unit and switchboard. This room should be approximately 12' x 15' minimum.

The telephone room and radio room should each be approximately 12' x 25' minimum, the dimensions indicated providing for the most economical use of space. It is desirable, although not essential, that the radio room be readily accessible to the outside for installation of antenna lead-ins. The office should provide approximately the amount of floor space indicated in your drawing. The repair shop and storeroom may be reduced in area by about one-third.

3. In connection with the mobile detector stations no protection will be required for the equipment. No provision should be made at this time for quarters for personnel at these stations.

4. The information centers in the continental United States and Alaska are contemplated as separate buildings; in the overseas departments, the information centers will be combined with the command post. The information centers in the United States will be designed as splinter-proof with provision for later bomb-proofing as required. Provision will not be made at this time for housing for information center personnel.

5. All equipment should be suitably housed to give it the normal protection from excess moisture as is required for radio and telephone equipment in fire control installations.

6. It is requested that prior to their completion, plans be referred to this office, or that a representative of this office be given an opportunity to inspect such

3016 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

plans, in order that provision may be made for necessary ducts for carrying communication and power circuits.

7. For all building one duct from the exterior will be required for communication cable and one for power cable. The detailed requirements within the buildings are not available at this time. It is hoped that this information will be available in the near future. There will be required for information centers and communications buildings provision for antenna lead-ins.

For the Chief Signal Officer:

PAUL C. GRIPPER,
Major, Signal Corps.

Subject: Drawings and Instructions for Aircraft Warning Service Construction.

To: The Division Engineer,
South Pacific Division,
1200 Balfour Building,
351 California Street,
San Francisco, California.

1. Reproducible prints of drawings listed below applicable to foundations for and erection of the several types of Aircraft Warning Service towers and buildings, are forwarded for your information.

- a. ES-D-351-A Relative position of 100' tower and building.
- b. ES-D-8511 Standard building sheet-metal details.
- c. ES-D-8518 Electroforged grating.
- d. P-12619 (Blaw-Knox) Sections and bill of materials.
- e. P-12620 (Blaw-Knox) Sections.
- (Blaw-Knox) Sheet-metal diagram—B-K building
- f. P-12085 19'8" x 20' x 12 $\frac{3}{8}$ ".
- g. P-12086 (Blaw-Knox) Steel diagram—B-K building 19'8" x 20' x 12 $\frac{3}{8}$ ".

3018 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- h. P-12087 (Blaw-Knox) Ceiling for B-K building 19'8" x 30' x 12'2 3/8".
- i. P-15836 (Blaw-Knox) Foundation plan, transmitter building.
- j. P-12788 (Blaw-Knox) Erection diagram, transmitter building
- k. P-12789 (Blaw-Knox) Erection diagram, special radio tower.
- l. P-12790 (Blaw-Knox) Special radio tower.
- m. P-11659 (Blaw-Knox) Foundations for 100' special radio tower.
- n. P-12792 (Blaw-Knox)
- P-12793 (Blaw-Knox) Erection diagrams, 100' special radio tower
- P-12794 (Blaw-Knox)

2. Attention is invited to the fact that drawing P-11659 (Blaw-Knox) is the equivalent of drawings ES-D-7421, ES-D-7422, and ES-D-7423, previously furnished Division Engineers, and drawing P-15836 (Blaw-Knox) is the equivalent of drawings ES-D-7424, and ES-D-7425, which were also furnished Division Engineers in letter from this office dated October 23, 1941, subject: "Aircraft Warning Service—Foundation Drawings."

3. Also inclosed are five copies of each of the following erection instructions.

- a. "Erection Instructions for Blaw-Knox operation building—20' x 20' x 12'."
- b. "Instructions for erecting 100-foot special radio tower."
- c. "Instructions for erecting combination 36-foot tower and transmitter building."

ARMY PEARL HARBOR BOARD EXHIBIT No. 45

[1] STATEMENT OF COLONEL THEODORE WYMAN, Jr.,
COVERING ALLEGATIONS CONTAINED IN
HOUSE REPORT No. 1638, 78th CONGRESS
SECOND SESSION RELATING TO HIS
RESPONSIBILITY FOR PEARL HARBOR DISASTER

WAR RESERVE AVIATION GASOLINE

J. B. 314, 5 September 1940, contemplated storage for 250,000 barrels for the Army and 100,000 barrels for the Navy, on the basis of an estimated cost of \$2.00 per barrel in commercial tanks of 25,000 barrel capacity. The directive of 28 December 1940 raised the estimate of cost to \$4.00 per barrel, reduced the quota (Army) for Hawaii to 100,000 barrels, and authorized preliminary surveys to be made. In March 1941, \$5,000 was made available to the District Engineer for these surveys.

The surveys were made in March 1941, and during March a representative of the Air Corps came to Hawaii, inspected sites and made recommendations. On 3 April 1941 the Commanding General forwarded to the Adjutant General his recommendations (in which the District Engineer and the Naval Commandant concurred) for locations at two sites. By letter 5 April 1941 the Chief of Engineers notified the District Engineer that priority for steel for tanks could not be obtained until the contract for the tanks had been let.

By letter 9 April 1941 the Chief of Engineers directed the District Engineer to prepare a definite project report for a total capacity of between 125,000 and 133,000 barrels, and by letter 21 April 1941 to submit recommendations regarding protection at both sites. On 21 June 1941 the District Engineer received notice that the proposed Army storage had been increased from 100,000 to 250,000 barrels.

[2] On 17 June 1941 the District Engineer was notified that funds had been authorized (\$600,000 cash and \$1,400,000 contract authorization) and directed to commit the contract authorization before 1 July. On 24 June 1941 the District Engineer forwarded his definite project report, stating that the construction for 200,000 barrels at Site "B" had been put under the Hawaiian

Constructors contract, and that the estimated completion time would be eight months. The Chief of Engineers, in forwarding this report to the Adjutant General, recommended 25,000 barrel capacity tanks instead of 50,000.

On 23 July 1941 the Division Engineer relayed to the Chief of Engineers the District Engineer's request to be permitted to proceed with excavation work, but on 26 July 1941 the District Engineer was instructed not to start work as the plans were being materially changed.

On 3 September 1941 the Adjutant General requested the Chief of Engineers to revise the plans. On 23 September 1941 the District Engineer was directed to proceed with construction at Site "B" but not to start work at Site "A" pending arrival in Honolulu of the Engineer's Advisory Committee. On 27 September 1941 the District Engineer was notified that installation of eight 40,000 barrel capacity tanks had been approved and that negotiations for procuring these eight tanks had been begun.

On 9 October 1941 the District Engineer forwarded the report of the Advisory Committee (which had been in Honolulu in September) and concurred in its recommendations, and on 31 October 1941 the District Engineer was directed to proceed with the work in accordance with the recommendations of the Advisory Committee. On 15 November 1941 the District Engineer informed [3] the Division Engineer that he estimated the tanks and the pipe line could be installed sixty days after their arrival. Construction began 19 November 1941 with a completion date of 1 June 1942. On 25 November 1941 the District Engineer wired the Division Engineer requesting immediate shipment of the channel anchors and bars. By letter 25 November 1941 the Division Engineer forwarded to the District Engineer a copy of an indorsement for the Chief of Engineers to the Navy stating that four tanks would be shipped by 30 November and the steel for the other five by 15 January 1942. On 28 November 1941 the District Engineer was notified that the channel anchors and bars were shipped 26 November.

Plans and specifications for the 40,000 barrel tanks were received by the District Engineer 22 December 1941.

[Hand written:] The foregoing history is conclusive that it would have been impossible to have completed the war reserve gas storage by the date of Pearl Harbor.

THEODORE WYMAN, Jr.,
Theodore Wyman, Jr.
Lt. Col. C. E.
Contracting Officer.

This contract is authorized by the following laws: National—Defense—Strengthening—Chapter 508, 3d Session (Public—No. 703—76th Congress).

I hereby authorize change of this classification from "SECRET" to "RESTRICTED."

[2]

COST-PLUS-A-FIXED-FEE CONSTRUCTION CONTRACT

THIS CONTRACT, entered into this 20th day of December, 1942 by THE UNITED STATES OF AMERICA, hereinafter called the Government, represented by the Contracting Officer executing this contract, ~~W. E. Callahan Construction Company~~ Hawaiian Constructors, Honolulu, T. H., consisting of W. E. Callahan Construction Company, a Nebraska Corporation, Gunther and Shirley Company a Nebraska Corporation and Rohl-Connolly Company, a Nevada Corporation. ~~corporation organized and existing under the laws of the State of Nebraska partnership consisting of~~ (not applicable).

"and" individual trading as (not applicable) of the City of Honolulu in the Territory of Hawaii hereinafter called the Contractor, witnesseth that:

In order to expedite the building up of the national defense, it is necessary, out of moneys appropriated for national defense purposes for the fiscal year ending June 30, 1941, to enter into a contract, without advertising, for the construction, rehabilitation, conversion, and/or installation at various military posts, depots, stations, and other locations within the Hawaiian Islands, such plants, buildings, facilities, utilities and/or appurtenances as are or may become necessary to the functioning of the national defense plan.

¹ Delete all lines which do not apply.

[3] WHEREAS, the Government desires to have certain work performed, specifically enumerated but not restricted to the following:

1. Ammunition storage magazines on the Island of Oahu, specified in Article I, 1.
2. Warning service stations at locations to be determined, specified in Article I, 1.
3. Railway trackage at locations specified in Article I, 1.
4. Fixed Fortification Structures at locations specified in Article I, 1.
5. An addition to radio station WTJ, Island of Oahu, as specified in Article I, 1.

-----; and
WHEREAS, the accomplishment of the above-described work under a cost-plus-a-fixed-feed contract, entered into after negotiations approved by the Secretary of War, and without advertising for proposals, is authorized by law; and

WHEREAS, as a result of such negotiations, the Secretary of War has directed that the Government enter into a cost-plus-a-fixed-fee contract with the Contractor for the accomplishment of the above-described work;

Now, THEREFORE, the parties do mutually agree as follows:

ARTICE I—STATEMENT OF WORK

1. The Contractor shall, in the shortest possible time, furnish the labor, materials, tools, machinery, equipment, facilities, supplies not furnished by the Government, and services, and do all things necessary for the completion of the following work:

A. Ammunition storage magazines on the Island of Oahu complete with service roads, railroad spur tracks and appurtenances. The major items of work involved in the construction of the ammunition storage magazines include the approximate quantities as follows:

- Excavation 200,000 cu. yds.
- Compacted backfill 135,000 cu. yds.
- Concrete in floors, walls and protected covering 36,000 cu. yds.
- Reinforcing steel 6,000,000 lbs.

All service roads will be constructed at locations to be determined by the Contracting Officer, and will involve grading, installation of drainage structures, preparation of the sub-grade and constructing bituminous type pavements. The major features of construction include the following approximate quantities:

- Excavation 180,000 cu. yds.
- Compacted earth embankment 15,000 cu. yds.
- Foundation for pavement 6" thick, 23,000 sq. yds.
- Bituminous type pavement 3" thick, 28,000 sq. yds.
- Culverts, Total length 1,410 lin. ft.

The major items of work involved in the construction of the railroad spur tracks will include transporting government furnished materials and supplies to the site of the work, preparing the site for the tracks, furnishing ballast and constructing the tracks complete in all details as directed by the Contracting Officer. All ties, rails, switches, fastenings and track accessories will be furnished by the Government.

B. Aircraft warning service stations on the Islands of Oahu, Hawaii, Maui and Kauai, involving certain installations, including buildings, roads, trails, cableways, haulage ways and other structures appurtenant to aircraft warning service, as directed by the Contracting Officer.

C. Railway trackage on the island of Oahu at certain locations to be designated, in accordance with detailed instructions to be issued from time to time by the Contracting Officer. All track materials, including ties, rails, frogs, switches, fastenings and track appliances, will be furnished by the Government.

D. Fortification structures for use in connection with fixed fortifications at locations to be determined by the Contracting Officer.

E. An addition to radio station WTJ in accordance with detailed instructions to be issued by the Contracting Officer.

F. The items of work to be done, enumerated in Article I, paragraphs A, B, C, D and E, include construction for which funds have been provided, in whole or in part. Additional work may be required to be done under the terms, if

and when additional moneys, appropriated for national defense purposes, become available, provided such additional work is ordered to be done by the Contracting Officer. [4] in accordance with the drawings and specifications or instructions contained in appendix "A" hereto attached and made a part hereof, or to be furnished hereafter by the Contracting Officer and subject in every detail to his supervision, direction, and instructions.

It is estimated that the total cost of the construction work covered by this contract will be approximately One Million Ninety Seven Thousand Six Hundred Seventy Three dollars (\$1,097,673.00), exclusive of the Contractor's fee, and that the work herein contracted for will be ready for utilization by the Government within six (6) months from the date of this contract. It is expressly understood, however, that the Contractor does not guarantee the correctness of either of these estimates. The estimated total cost set forth above is based upon a detailed estimate agreed to by both the Government and the Contractor, a copy of which is on file in the office of ² The Chief of Engineers.

In consideration for his undertaking under this contract the Contractor shall receive the following:

- (a) Reimbursement for expenditures as provided in article II.
- (b) Rental for Contractor's equipment as provided in article II.
- (c) A fixed fee in the amount of Fifty-two thousand, two hundred twenty dollars (\$52,220) which shall constitute complete compensation for the Contractor's services, including profit and all general overhead expenses.

2. The Contracting Officer may, at any time, by a written order and without notice to the sureties, make changes in or additions to the drawings and specifications, issue additional instructions, require additional work, or direct the omission of work covered by the contract. If such changes cause a material increase or decrease in the amount or character of the work to be done under this contract, or in the time required for its performance, an equitable adjustment of the amount of the fixed fee to be paid to the Contractor shall be made and the contract shall be modified in writing accordingly. Any claim for adjustment under this article must be asserted within 10 days from the date the change is ordered: Provided, however, That the Contracting Officer, if he determines that the facts justify such action, may receive and consider, and, with the approval of the Chief of Branch, adjust any such claim asserted at any time prior to the date of final settlement of the contract. If the parties fail to agree upon the adjustment to be made the dispute shall be determined as provided in article XV hereof. But nothing provided in this article shall excuse the Contractor from proceeding with the prosecution of the work so changed.

3. The title to all work, completed or in the course of construction, shall be in the Government. Likewise, upon delivery at the site of the work or at an approved storage site and upon inspection and acceptance in writing by the Contracting Officer, title to all materials, tools, machinery, equipment and supplies, for which the Contractor shall be entitled to be reimbursed under article II, shall vest in the Government. These provisions as to title being vested in the Government shall not operate to relieve the Contractor from any duties imposed under the terms of this contract.

4. The work shall be executed in the best and most workmanlike manner by qualified, careful, and efficient workers, in strict conformity with the best standard practices.

[5] 5. Except it be otherwise authorized by the Contracting Officer, all materials shall be of the best quality of their respective kinds. If the Contracting Officer requires that the Contractor submit for prior approval samples of materials proposed for use in the work covered by this contract, the Contractor shall make no commitments for such materials until the submitted sample has been approved by the Contracting Officer.

ARTICLE II—COST OF THE WORK

Reimbursement for Contractor's Expenditures.

1. The Contractor shall be reimbursed in the manner hereinafter described for such of his actual expenditures in the performance of the work as may be approved or ratified by the Contracting Officer and as are included in the following:

- (a) All labor, material, tools, machinery, equipment, supplies, services, power,

² Insert name of chief of branch concerned.

and fuel necessary for either temporary or permanent use for the benefit of the work. All articles of machinery or equipment valued at \$300 or less shall be classed as tools and shall be charged directly to the work. Title thereto shall thereupon pass to the Government.

(b) All subcontracts made in accordance with the provisions of this agreement.

(c) Rental actually paid by the Contractor, at rates not to exceed those approved by the Contracting Officer, ~~mentioned in the schedule of rental rates in appendix "B," hereto attached and made a part hereof, except as hereinafter set forth;~~ for construction plant in sound and workable condition, such as pumps, derricks, concrete mixers, boilers, clamshell or other buckets, electric motors, electric drills, electric hammers, electric hoists, mechanical shovels, locomotive cranes, power saws, engineers' levels and transits, and such other equipment exceeding \$300 in value as may be necessary for the proper and economical prosecution of the work. Each contract for the rental of construction plant or parts thereof by the Contractor from third parties shall be in a form prescribed by the Secretary of War, shall be subject to approval by the Contracting Officer, and shall contain the same provisions entitling the Government to acquire title to such plant or any part thereof upon the same conditions as those contained in paragraph 2 of article II of this contract.

(d) Loading and unloading at the site of the work of construction plant, owned or rented by the Contractor; the transportation thereof to the place or places where it is to be used in connection with said work and return transportation f. o. b. cars to the point of original shipment or equivalent mileage, except as hereinafter set forth; the installation and dismantling thereof, and such repairs and spare parts as are not included in the rental; provided such repairs or spare parts are not made necessary by defects in such plant, or parts thereof, or by the fault or negligence of the Contractor or his employees; but charges for transportation of such construction plant over distances in excess of 500 miles must have the written authorization of the Contracting Officer in advance.

(e) Transportation charges on materials and supplies.

(f) Transportation and traveling expenses to and from the work of the necessary field forces for the economical and successful prosecution of the [6] work; expenses of procuring labor and expediting the production and transportation of material and equipment. Expenditures under these items must have the written authorization of the Contracting Officer in advance.

(g) Salaries of resident engineers, superintendents, timekeepers, foremen, and other field employees of the Contractor in connection with the work. In case the full time of any field employee of the Contractor is not applied to the work his salary shall be included in this item only in proportion to the actual time applied thereto. No person shall be assigned to service by the Contractor as superintendent of construction, chief engineer, chief purchasing agent, chief accountant, or similar position in the Contractor's field organization, or as principal assistant to any such person, until there has been submitted to and approved by the Contracting Officer a statement of the qualifications and experience of the person proposed for such assignment. The regular salary or compensation rate of any such person shall not be in excess of the highest salary or compensation rate received by him during the year preceding the date of this contract plus such increase as the Contracting Officer may approve.

(h) Temporary rights in land required in connection with the work.

(i) Buildings and equipment required for necessary field offices, commissary, hospital and other facilities and the cost of maintaining and operating said offices, hospital and other facilities, including minor expenses such as telegrams, telephone service, expressage, and postage. The cost of maintaining commissary buildings and utility service therein will be reimbursed, but the cost of all commissary operating personnel and supplies will be borne by the Contractor. All commissaries shall be operated as nearly as possible without profit or loss and shall be subject to such sanitary regulations as the Contracting Officer may prescribe.

(j) Premiums on such bonds and insurance policies as the Contracting Officer may require for the protection of the Government; the cost of all public liability, employer's liability, workmen's compensation, fidelity, fire, theft, burglary, and other insurance that the Contracting Officer may approve as reasonably necessary for the protection of the Contractor.

(k) Losses and expenses, not compensated by insurance or otherwise (including settlements made with the written consent of the Contracting Officer), actually

sustained by the Contractor in connection with the work and found and certified by the Contracting Officer to be just and reasonable.

(l) The cost of reconstructing and replacing any of the work destroyed or damaged, and not covered by insurance, but expenditures under this item must have the written authorization of the Contracting Officer in advance.

(m) Payments from his own funds made by the Contractor under the Social Security Act, and any applicable State or local taxes, fees, or charges which the Contractor may be required on account of this contract to pay on or for any plant, equipment, process, organization, materials, supplies, or personnel; and, if approved in writing by the Contracting Officer in advance, permit and license fees, and royalties on patents used including those owned by the Contractor.

[7] (n) Such portion of the transportation traveling, and hotel expenses of officers, engineers, and other employees of the Contractor as is actually incurred in connection with this work. Expenditures under this item must have the written authorization of the Contracting Officer in advance.

(o) When specifically approved in advance by the Chief of Branch, a reasonable allowance for work done in the Contractor's general offices exclusively for and directly chargeable to the work.

(p) Such other items as should, in the opinion of the Contracting Officer, be included in the cost of the work. When such an item is allowed by the Contracting Officer, it shall be specifically certified as being allowed under this paragraph.

(q) It is agreed that, unless otherwise authorized by the Contracting Officer, all allowances as items of cost on account of the work under this contract for travel expenses and subsistence provided for herein shall conform to the allowances authorized by the "Standardized Government Travel Regulations."

Rental for Contractor's Equipment.

2. Rental shall be paid to the Contractor for such construction plant or parts thereof, as he may own and furnish, at not to exceed the rates mentioned in the ~~schedule of rental rates hereto attached, except as hereinafter set forth,~~ approved by the Contracting Officer. Except as specified below, such rental shall begin on the date of the delivery of such plant, or part thereof to a common carrier for shipment to the site of the work, as evidenced by the bill of lading covering such shipment, and shall terminate, unless title thereto passes to the Government at an earlier date, on the date of the delivery of such plant, or parts thereof, to a common carrier for shipment from the ~~site of the work~~ Government dock at Fort Mason, Calif., as evidenced by the bill of lading covering such shipment, provided such plant, or parts thereof, are so delivered without delay after notice by the Contracting Officer to the Contractor that such plant, or parts thereof, are no longer required; otherwise, the rental shall terminate on the date of such notice. If such plant, or any part thereof, is not in sound and workable condition when it arrives at the site of the work, the rental period therefor shall not begin until such plant, or parts thereof, shall have been placed in sound and workable condition at the expense of the Contractor, and no rental therefor shall be paid for any prior period. If such plant, or parts thereof, cannot be placed in sound and workable condition, no transportation charges for the shipment thereof shall be included in the cost of the work or paid, either directly or indirectly, by the Government. Determination as to whether such plant, or parts thereof, are in sound and workable condition shall, in every instance, be made by the Contracting Officer. Slight delays in the use of such plant, or parts thereof, caused by necessary minor or field repairs and replacements shall not interrupt the rental period, but no rental shall be paid for the period of any delay in the use of such plant, or parts thereof, caused by other than necessary minor or field repairs. ~~When such construction plant or any part thereof shall arrive at the site of the work, the Contractor shall file with the Contracting Officer a schedule setting forth the fair valuation at that time of each part of such construction plant. Such valuation shall be deemed final unless the Contracting Officer shall, within 10 days after the machinery has been set up and working, modify or change such valuation. When and if the total rental paid to the Contractor for any such part shall equal the valuation thereof, plus one percent (1%) per month for each~~ [7.1] Before the delivery of any item of plant to the site of the work, the contractor shall file with the contracting officer a schedule setting forth the fair valuation at that time of each part of such construction plant. Such valuation shall be deemed final unless the contracting officer shall, within 10 days after the

machinery has been set up and working, modify or change such valuation. Any new equipment purchased by the contractor for rental on the job must be acceptable to the contracting officer, and no purchase of any item of equipment at a cost exceeding \$500 shall be made without prior approval of the contracting officer. When and if the total rental paid to the Contractor for any such part shall equal the valuation thereof, plus one percent (1%) per month for each month or fraction thereof such part has been in use, no further rental therefor shall be paid to the Contractor, and title thereto shall vest in the Government. At the completion of the work or upon termination of the contract as provided in article VI, the Government may at its option purchase any part of such construction plant by paying to the Contractor the difference between the valuation of such part or parts, plus one percent (1%) per month for each month or fraction thereof such part or parts have been in use and the total rentals theretofore paid for such part or parts. The contracting officer will furnish necessary fuel and lubricants required for the operation of the construction plant at the site of the work. The contractor will maintain at all times a suitable supply of repair parts acceptable to the contracting officer, payments for such parts delivered to the site of the work and deemed necessary by the contracting officer for the maintenance and operation of the plant will be made upon presentation of a receipted proper invoice.

[8] ~~month or fraction thereof such part has been in use, no further rental therefor shall be paid to the Contractor, and title thereto shall vest in the Government. At the completion of the work or upon termination of the contract as provided in article VI, the Government may at its option purchase any part of such construction plant by paying to the Contractor the difference between the valuation of such part or parts, plus one percent (1%) per month for each month or fraction thereof such part or parts have been in use and the total rentals theretofore paid for such part or parts.~~

SEE PAGE 7-A

General

3. The Government reserves the right to furnish any materials, construction equipment, machinery, or tools necessary for the completion of the work.

4. The Government reserves the right to pay directly to common carriers any or all freight charges on construction plant, materials, and supplies.

5. The Government reserves the right to pay directly to the persons concerned all sums due from the Contractor for labor, materials, or other charges.

6. Rates of rental as substitutes for scheduled rental rates may be agreed upon in writing between the Contractor and the Contracting Officer, such rates to be in conformity with similar rates of rental charged in the particular territory in which the work covered by this contract is to be performed. Such substitute rates shall be subject to the approval of the Chief of Branch, but shall be followed until so approved, at which time any necessary adjustments in prior payments will be made.

7. No salaries of the Contractor's executive officers, no part of the expense incurred in conducting the Contractor's main office or regularly established branch offices, and no overhead expenses of any kind, except as specifically authorized in section 1 of this article, shall be included in the cost of the work; nor shall any interest on capital employed or on borrowed money be included in the cost of the work.

8. The Contractor shall, to the extent of his ability, take all cash and trade discounts, rebates, allowances, credits, salvage, commissions, and bonifications, and when unable to take advantage of such benefits he shall promptly notify the Contracting Officer to that effect and the reason therefor. In determining the actual net cost of articles and materials of every kind required for the purpose of this contract, there shall be deducted from the gross cost thereof all cash and trade discounts, rebates, allowances, credits, salvage, commissions, and bonifications which have accrued to the benefit of the Contractor or would have so accrued except for the fault or neglect of the Contractor. Such benefits lost through no fault or neglect on the part of the Contractor, or lost through fault of the Government, shall not be deducted from gross costs.

9. All revenue from the operations of the hospital or other facilities, except commissaries, or from rebates, discounts, refunds, etc., shall be accounted for by the Contractor and applied in reduction of the cost of the work.

[9]

ARTICLE III—PAYMENTS

Reimbursement for Cost.

1. The Government will currently reimburse the Contractor for expenditures made in accordance with article II upon certification to and verification by the Contracting Officer of the original signed pay rolls for labor, the original said invoices for materials, or other original papers. Generally, reimbursement will be made weekly but may be made at more frequent intervals if the conditions so warrant.

Rental for Contractor's Equipment.

2. Rental as provided in article II for such construction plant or parts thereof as the Contractor may own and furnish shall be paid monthly upon presentation of proper vouchers.

Payment of the Fixed-Fee.

3. The fixed-fee prescribed in article I shall be compensation in full for the services of the Contractor, including profit and all general overhead expenses. Ninety percent (90%) of said fixed-fee shall be paid as it accrues, in monthly installments based upon the percentage of the completion of the work as determined from estimates made and approved by the Contracting Officer. Upon completion of the work and its final acceptance, any unpaid balance of the fee shall be paid to the Contractor. If the contract is terminated for the convenience of the Government, before completion, the Contractor will be paid that proportion of the prescribed fee which the work actually completed bears to the entire project, less fee payments previously made. If the contract is terminated due to the fault of the Contractor, no additional payments on account of the fee will be made.

Payments by Contractor.

4. If bills for purchase of material, machinery or equipment, or pay rolls covering employment of laborers or mechanics incurred by the Contractor or by any subcontractor hereunder are not promptly paid by the Contractor or subcontractor as the case may be, the Contracting Officer may, in his discretion, withhold from payments otherwise due the Contractor an amount equivalent to the amount of any such bill or pay roll. Should the Contractor neglect or refuse to pay such bills or pay rolls or to direct any subcontractor to pay such bills or pay rolls within five (5) days after notice from the Contracting Officer so to do, the Government shall have the right to pay such bills or pay rolls directly, in such event a deduction equal to five percent (5%) of the amount so paid directly shall be made from the Contractor's fee.

Final payment.

5. Upon completion of the work and its final acceptance in writing by the Contracting Officer, the Government shall pay to the Contractor the unpaid balance of the cost of the work determined under Article II hereof, and of the fee, less any sum that may be necessary to settle any unsettled claims for labor or material, or any claim the Government may have against the Contractor. The Contracting Officer shall accept the completed work with reasonable promptness. [10] The Contractor shall, if required, furnish the Government with a release of all claims against the Government arising under and by virtue of this contract other than such claims, if any, as be specifically excepted by the Contractor from the operation of the release in stated amounts to be set forth therein.

ARTICLE IV—RECORDS AND ACCOUNTS—INSPECTION AND AUDIT

1. The Contractor agrees to keep records and books of account, on a recognized cost-accounting basis, showing the actual cost to him of all items of labor, material, equipment, supplies, services, and other expenditures of whatever nature for which reimbursement is authorized under the provisions of this contract. The system of accounting to be employed by the Contractor shall be such as is satisfactory to the Contracting Officer.

2. The Contracting Officer shall at all times be afforded proper facilities for inspection of the work and shall at all times have access to the premises, work and materials, to all books, records, correspondence, instructions, plans, drawings, receipts, vouchers, and memoranda of every description of the Contractor pertaining to said work; and the Contractor shall preserve for a period of 3 years after completion or termination of this contract, all books, records, and other papers herein mentioned.

3. Any duly authorized representative of the Contractor shall be accorded the privilege of examining the books, records, and papers of the contracting officer relating to the cost of the work for the purpose of checking up and verifying such cost.

ARTICLE V—SPECIAL REQUIREMENTS

1. The Contractor hereby agrees that he will:

(a) Procure and thereafter maintain such bonds and insurance in such forms and in such amounts and for such periods of time as the Contracting Officer may approve or require.

(b) Procure all necessary permits and licenses; obey and abide by all applicable laws, regulations, ordinances, and other rules of the United States of America, of the State, Territory, or subdivision thereof wherein the work is done, or of any other duly constituted public authority.

(c) Unless this provision is waived in writing by the contracting officer, reduce to writing every contract in excess of two thousand dollars (\$2,000) made by him for the purpose of the work hereunder for services, materials, supplies, machinery, or equipment, or for the use thereof; insert therein a provision that such contract is assignable to the Government; make all such contracts in his own name, and not bind or purport to bind the Government or the Contracting Officer thereunder. No purchases in excess of \$500 shall be made or placed without the prior approval of the Contracting Officer.

(d) Enter into no subcontract for any portion of the work, except in the form prescribed by the Secretary of War, nor without the written approval of the Contracting Officer. Subcontracts are defined as contracts entered into by the Contractor with others which involve the performance, wholly or in part at the site of the work, of some part of the work described in Article I hereof.

[11] (e) At all times during the progress of the work keep at the site thereof a duly appointed and qualified representative who shall receive and execute on the part of the Contractor such notices, directions, and instructions as the Contracting Officer may give.

(f) The Contracting Officer may require the Contractor to dismiss from the work such employee as the Contracting Officer deems incompetent, careless, insubordinate, or otherwise objectionable.

(g) At all times use his best efforts in all acts hereunder to protect and subserve the interest of the Government.

ARTICLE VI—TERMINATION OF CONTRACT BY GOVERNMENT

1. Should the Contractor at anytime refuse, neglect, or fail to prosecute the work with promptness and diligence, or default in the performance of any of the agreements herein contained, or should conditions arise which make it advisable or necessary in the interest of the Government to cease work under this contract, the Government may terminate this contract by a notice in writing from the Contracting Officer to the Contractor. Such termination shall be effective in the manner and upon the date specified in said notice and shall be without prejudice to any claims which the Government may have against the Contractor. Upon receipt of such notice the Contractor shall, unless the notice directs otherwise, immediately discontinue all work and the placing of all orders for materials, facilities, and supplies in connection with performance of this contract and shall proceed to cancel promptly all existing orders and terminate work under all subcontractors insofar as such orders and/or work are chargeable to this contract.

2. If this contract is terminated for the fault of the Contractor, the Contracting Officer may enter upon the premises and take possession, for the purpose of completing the work contemplated by this contract, of all materials, tools, equipment, and appliances and all options, privileges, and rights, and may complete or employ any other person or persons to complete said work.

3. Upon the termination of this contract as hereinbefore provided, full and complete settlement of all claims of the Contractor arising out of this contract shall be made as follows:

(a) The Government shall assume and become liable for all obligations, commitments, and claims that the Contractor may have theretofore in good faith undertaken or incurred in connection with said work and in accordance with the provisions of this contract; and the Contractor shall, as a condition of receiving the payments mentioned in this article, execute and deliver all such papers and

3030 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

take all such steps as the Contracting Officer may require for the purpose of fully vesting in the Government the rights and benefits of the Contractor under such obligations or commitments.

(b) The Government shall reimburse the Contractor for all expenditures made in accordance with Article II and not previously reimbursed.

(c) If this contract is terminated for the convenience of the Government, the Government shall reimburse the Contractor for such further expenditures after the date of termination for the protection of Government property and for accounting services in connection with the settlement of this contract as the Contracting Officer may approve.

[12] (d) The Government should pay to the Contractor any unpaid balance for the rental of the Contractor's equipment in accordance with Article II to the date of termination, and if any of the Contractor's equipment is retained by the Government under the provisions of this article, additional compensation therefore shall be paid in accordance with Article II, either by purchase or rental at the election of the Contracting Officer.

(e) The obligation of the Government to make any of the payments required by this article, or by paragraph 3, Article III of this contract, shall be subject to any unsettled claims for labor or material or any claim the Government may have against the Contractor.

ARTICLE VII—PREFERENCE FOR DOMESTIC ARTICLES

1. In the performance of the work covered by this contract the Contractor, subcontractors, materialmen or suppliers, shall use only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States. The foregoing provision shall not apply to such articles, materials, or supplies of the class or kind to be used or such articles, materials, or supplies from which they are manufactured, as are not mined, produced or manufactured, as the case may be, in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality, or to such articles, materials, or supplies as may be excepted by the head of the department under the proviso of title III, section 3, of the act of March 3, 1933, 47 Stat. 1520 (U. S. Code, title 41, section 10b).

2. Inasmuch as the materials listed below or the materials from which they are made are not mined, produced, or manufactured, as the case may be, in the United States in sufficient and reasonably available commercial quantities and of satisfactory qualities, their use in the work herein specified is hereby authorized without regard to the country of origin:

Asbestos.	Nickel.
Balsa wood.	Nickel alloy
China wood oil	(Monel metal).
(Tung oil).	Platinum.
Chromium.	Rubber.
Cork.	Silk.
Jute.	Sisal.
Kaurigum.	Teak wood.
Lac.	Tin.

Articles, materials, or supplies made in the United States and containing mercury, antimony, tungsten, or mica of foreign origin may be used (subject to the requirements of applicable specifications) in the work herein specified, if such manufactured articles, materials, or supplies have been made in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States.

ARTICLE VIII—CONVICT LABOR

The Contractor shall not employ any person undergoing sentence of imprisonment at hard labor.

[13]

ARTICLE IX—RATES OF WAGES—NONREBATE

1. In accordance with the act of August 30, 1935 (49 Stat. 1011; 40 U. S. C. 276a and 276a-1), the following provisions shall apply:

(a) The Contractor or his subcontractor shall pay all mechanics and laborers employed directly upon the site of the work, unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account the full amounts accrued at the time of payment, computed at wage rates not less than those established by the Secretary of Labor for the work herein specified, regardless of any contractual relationship which may be alleged to exist between the Contractor or subcontractor and such laborers and mechanics; and the scale of wages to be paid shall be posted by the Contractor in a prominent and easily accessible place at the site of the work. The Contracting Officers shall have the right to withhold from the Contractor so much of accrued payments as may be considered necessary by the Contracting Officer to pay to laborers and mechanics employed by the Contractor or any subcontractor on the work the difference between the rates of wages required by the contract to be paid laborers and mechanics on the work and the rates of wages received by such laborers and mechanics and not refunded to the Contractor, subcontractors, or their agents.

(b) In the event it is found by the Contracting Officer that any laborer or mechanic employed by the Contractor or any subcontractor directly on the site of the work covered by the contract has been or is being paid a rate of wages less than the rate of wages required by the contract to be paid as aforesaid, the Government may, by written notice to the Contractor, terminate his right to proceed with the work or such part of the work as to which there has been a failure to pay said required wages and prosecute the work to completion by contract or otherwise and the Contractor shall be liable to the Government for any excess costs occasioned the Government thereby.

2. Should the Contractor or any subcontractor pay to any laborer or mechanic a wage based upon a rate in excess of the wage rate for the classification in which said laborer or mechanic is included as established for the work by the Secretary of Labor, such increased wage shall be at the expense of the Contractor and shall not be reimbursed by the United States. When, in connection with the audit and check by the Contracting Officer or his authorized representative, of the Contractor's pay rolls, prior to reimbursement as contemplated in paragraph 1 of article II hereof, it is found that one or more laborers and/or mechanics have been paid wages at rates in excess of the wage rates, established for such laborers and/or mechanics, the reimbursement made to the Contractor on account of such pay rolls will not include such excess payments. The provisions of this section shall not apply when wage rates for a particular classification greater than those prescribed by the Secretary of Labor have been approved in writing by the Contracting Officer who executed this contract or his successor.

3. The Contractor shall furnish to the Government representative in charge at the site of the work covered by this contract or if no Government representative is in charge at the site, shall mail to the Federal agency having control of the project, within 7 days after the payment of each and every weekly pay roll, an affidavit in the form prescribed by regulations issued jointly by the Secretary of the Treasury and the Secretary of the Interior under date of January 8, 1935, or any modification thereof pursuant to the act of June 13, 1934 (48 Stat. 948; 40 U. S. C. 276b and 276c), sworn to by the officer or employee of the Contractor supervising such payment to the effect that each and every person employed on the work has been paid in full the weekly wages shown on the pay roll covered by the affidavit; that no rebates, or deductions from any wages due such employee or employees not required by law have been made either directly or indirectly, and that to the best of the knowledge and belief of the affiant no agreement or understanding exists with any person employed on the project pursuant to which any person, directly or indirectly, by force, intimidation, threat, or otherwise, induces or receives any deductions or rebates in any manner whatever from any sum paid or to be paid any person for labor performed in carrying out this contract. At the time upon which the first affidavit with respect to wages paid employees is filed the Contractor shall also furnish an affidavit executed by its president or a vice president, setting forth the name of the officer or em-

3032 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

ployee who supervises the payment of employees and stating that such officer or employee is in a position to have full knowledge of the facts set forth in the affidavit respecting the payment of wages of employees. A similar affidavit shall be filed immediately in the event that a change is made in the officer or employee who supervises the payment of employees. The Contractor shall cause appropriate provisions to be inserted in all subcontracts relating to this work to insure fulfillment of the requirements of this article.

ARTICLE X—WORKMEN'S COMPENSATION LAWS

The act of June 25, 1936 (49 Stat. 1938, 1939; 40 U. S. C. 290), provides that the several States have authority to make their workmen's compensation laws applicable to contracts for the construction, alteration, or repair of a public building or public work of the United States, and the several States are vested with the power and authority to enforce such State laws on lands of the United States.

ARTICLE XI—ACCIDENT PREVENTION

The Contractor shall at all times exercise reasonable precautions for the safety of employees on the work and shall comply with all applicable provisions of Federal, local, State, and municipal safety laws and building and construction codes.

ARTICLE XII—OFFICIALS NOT TO BENEFIT

No Member of or Delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this contract or to any benefit that may arise therefrom, but this provision shall not be construed to extend to his contract if made with a corporation for its general benefit.

ARTICLE XIII—APPROVAL REQUIRED

This contract shall be subject to the written approval of ~~Assistant~~ Under Secretary of War and shall not be binding until so approved.

ARTICLE XIV—COVENANT AGAINST CONTINGENT FEES

The Contractor warrants that he has not employed any person to solicit or secure this contract upon any agreement for a commission, percentage, brokerage or contingent fee. Breach of this warranty shall give the Government the right to terminate the contract, or in its discretion, to deduct from payments due the Contractor the amount of such commission, percentage, brokerage, or contingent [15] fee. This warranty shall not apply to commissions payable by Contractors upon contracts or sales secured or made through bona fide established commercial or selling agencies maintained by the Contractor for the purpose of securing business.

ARTICLE XV—DISPUTES

Except as otherwise specifically provided herein, all disputes concerning questions of fact arising under this contract shall be decided by the Contracting Officer, subject to written appeal by the Contractor within 30 days to the Chief of Branch concerned or his duly authorized representative, whose decision shall be final and conclusive upon the parties hereto, when the amount involved is \$15,000 or less. When the amount involved is more than \$15,000, the decision of the Chief of Branch shall be subject to written appeal within 30 days by the Contractor to the Secretary of War or his duly authorized representative, whose decision shall be final and conclusive upon the parties hereto. In the meantime the Contractor shall diligently proceed with the work as directed.

ARTICLE XVI—CONTRACTOR'S ORGANIZATION AND METHODS

Upon the execution of this contract the Contractor shall submit to the Contracting Officer a chart showing the executive and administrative personnel to be regularly assigned for full or part-time service in connection with the work under contract, together with a written statement of the duties of each person and the administrative procedure to be followed by the Contractor for the control and direction of the work; and the data so furnished shall be supplemented

as additional pertinent data become available. There shall also be submitted to the Contracting Officer by the Contractor charts of the various field organizations showing all personnel, other than artisans, mechanics, helpers, and laborers to be assigned for full or part-time service outside of the central-office organization, together with a written statement of the duties and rates of pay of each person and the procedure proposed to be followed by the Contractor for the accomplishment of all field work, including temporary requirements; and the data so furnished shall be supplemented as additional pertinent data become available. Statements of procedure shall include purchasing, disbursing, accounting, transportation, storage, employment, housing, sanitation, subsistence, recreation, and similar essential activities and methods.

ARTICLE XVII—DEFINITIONS

1. The term "Chief of Branch" refers to the head of a branch or bureau of the War Department, viz., the Quartermaster General, the Chief of Engineers, etc.

2. The term "his duly authorized representative" shall mean any person authorized by the Secretary of War or a chief of branch, as the case may be, to act for him, other than the Contracting Officer.

3. Except for the original signing of this contract, the term "Contracting Officer" as used herein shall include his duly appointed successor or his authorized representative.

[16]

ARTICLE XVIII—ALTERATIONS

The following changes were made in this contract before it was signed by the parties hereto:

APPENDIX "B" was added.

In Article 11, Section 2, line 9, the words "the site of the work" were deleted and in lieu thereof the following words were inserted: "Government dock at Fort Mason, Calif." Beginning in line 28 of said Article and Section with the word "When" the balance of the section was deleted and page 7A added.

ARTICLE XIX—EIGHT-HOUR LAW—OVERTIME COMPENSATION

No laborer or mechanic doing any part of the work contemplated by this contract, in the employ of the contractor or any subcontractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work at the site thereof, except upon the condition that compensation is paid to such laborer or mechanic in accordance with the provisions of this article. The wages of every laborer and mechanic employed by the contractor or any subcontractor engaged in the performance of this contract shall be computed on a basic day rate of eight hours per day and work in excess of eight hours per day is permitted only upon the condition that every such laborer and mechanic shall be compensated for all hours worked in excess of eight hours per day at not less than one and one-half times the basic rate of pay. For each violation of the requirements of this article a penalty of five dollars shall be imposed upon the contractor for each laborer or mechanic for every calendar day in which such employee is required or permitted to labor more than eight hours upon said work without receiving compensation computed in accordance with this article, and all penalties thus imposed shall be withheld for the use and benefit of the Government: *Provided*, That this stipulation shall be subject in all respects to the exceptions and provisions of U. S. Code, title 40, sections 321, 324, 325 and 326, relating to hours of labor, as in part modified by the provisions of Section 303 of Public Act No. 781, 76th Congress, approved September 9, 1940, relating to compensation for overtime.

ARTICLE XX—LOADING AND UNLOADING RAILWAY CARS

The contractor shall load promptly all railroad cars furnished for loading upon his order and shall unload from railroad cars promptly upon arrival all shipments consigned to him and shall provide storage facilities and other facilities necessary for these purposes; and the contractor shall not order railway cars for loading unless they can be loaded promptly and shall not cause or permit shipments to be consigned to him unless they can be unloaded from railroad cars promptly upon arrival.

[17] IN WITNESS WHEREOF, the parties hereto have executed this contract as of the day and year first above written.

DIRECTIONS FOR PREPARATION OF CONTRACT

1. This form shall be used when authorized by the Secretary of War for formal contracts for the construction, alteration, or repair of buildings or works accomplished under the provisions of the law specifically authorizing the use of a cost-plus-a-fixed-fee contract.

2. There shall be no deviation from this approved contract form, except as provided for in these directions, without approval of the Secretary of War or his duly authorized representative. Where interlineations, deletions, additions, or alterations are authorized, specific notations of the same shall be entered in the blank space following the article entitled "Alterations" before signing. This article is not to be construed as general authority to deviate from the form. Deletion of the descriptive matter not applicable in the preamble need not be noted in the article entitled "Alterations."

3. All blank spaces on the little page must be filled in including a citation of the act or acts authorizing the contract. The Contracting Officer or his duly authorized representative will sign the certificate of availability of funds appearing on the title page.

4. The blank space in the preamble is intended for the insertion of a statement of the work to be done, together with place of performance, or for the enumeration of papers which contain the necessary data.

5. The blank spaces in articles I and XIII must be filled in with the data indicated therein. The contract must be dated, and the performance and payment bonds, if required, must bear the same date.

6. Each appendix will contain a sufficiently descriptive statement to identify it with the contract viz.:

APPENDIX "A" to Contract No. W414-Eng-602, dated December 20, 1940 between THE UNITED STATES OF AMERICA and Hawaiian Constructors for the construction of works of National Defense at locations within the Hawaiian Islands.

7. Contracts subject to approval are not valid until approved by the authority designated to approve them, and the Contractor's number will not be delivered [19] ed, nor any distribution made, until such approval. All changes and deletions must have been made before the contract is forwarded for approval.

8. The number of executed copies and of certified copies, designation of

disbursing officer, statement of appropriation, amount of bond if required, as well as other administrative details, shall be as directed by the Chief of Branch to which the contract pertains.

9. An officer of a corporation, a member of a partnership, or an agent signing for the principal, shall place his signature and title after the word "by" under the name of the principal. A contract executed by an attorney or agent on behalf of the Contractor shall be accompanied by two authenticated copies of his power of attorney, or other evidence of his authority to act on behalf of the Contractor.

10. If the Contractor is a corporation, one of the certificates following the signature of the parties must be executed. If the contract is signed by the secretary of the corporation, then the first certificate must be executed by some other officer of the corporation under the corporate seal, or the second certificate executed by the Contracting Officer. In lieu of either of the aforementioned certificate there may be attached to the contract copies of so much of the records of the corporation as will show the official character and authority of the officer signing, duly certified by the secretary or assistant secretary, under the corporate seal, to be true copies.

11. The full name and business address of the Contractor must be inserted, and the contract signed with his usual signature. Typewrite or print name under all signatures to contract or bonds.

12. Any provisions respecting labor or materials required by law to be included in this contract and any additional contract provisions deemed necessary for the particular work shall be made the subject of one or more additional articles or included in the specifications, appendix "A".

[20]

APPENDIX "B"

To Contract No. W414-Eng-602, dated December 20, 1940, between THE UNITED STATES OF AMERICA and W. E. Callahan Construction Company, Hawaiian Constructors.

1. The following changes were made in the aforementioned contract before it was signed:

a. In Article II, Section 1 (c), lines 1, 2 and 3, the words "mentioned in the schedule of rental rates in Appendix "B", hereto attached and made a part hereof, except as hereinafter set forth," were deleted therefrom and in lieu thereof the following words were inserted: "approved by the Contracting Officer,".

b. In Article II, Section 1 (d), the following phrase was inserted in line 1 between the words "Unloading" and "of": "at the site of the work". There was also inserted in line 3 in said Article and Section between the word "work" and the comma immediately following it, the phrase: "and return transportation f. o. b. cars to the point of original shipment or equivalent mileage".

c. In Article II, Section 2, lines 2 and 3, the words "mentioned in the schedule of rental rates hereto attached, except as hereinafter set forth," were deleted therefrom and in lieu thereof the following words were inserted: "approved by the Contracting Officer."

d. In Article IX, Section 2, the following sentence was added at the end thereof: "The provisions of this section shall not apply when wage rates for a particular classification greater than those prescribed by the Secretary of Labor have been approved in writing by the Contracting Officer who executed this contract or his successor."

e. A new Article, Number XIX, is added and shall read as follows:

"ARTICLE XIX—*Eight-Hour Law*—Overtime Compensation. No laborer or mechanic doing any part of the work contemplated by this contract, in the employ of the contractor or any subcontractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work at the site thereof, except upon the condition that compensation is paid to such laborer or mechanic in accordance with the provisions of this article. The wages of every laborer and mechanic employed by the contractor or any subcontractor engaged in the performance of this contract shall be computed on a basic day rate of eight hours per day and work in excess of eight hours per day is permitted only upon the condition that every such laborer and mechanic shall be compensated for all hours worked in excess of eight hours per day at not less than one and one-half times the basic rate of pay. For each violation of the requirements of this article a penalty of five dollars shall be imposed upon the contractor for each laborer or mechanic for every calendar day in which such employee is required

or permitted to labor more than eight hours upon said work without receiving compensation computed in accordance with this article, and all penalties thus imposed shall be with- [21] held for the use and benefit of the Government; *Provided*, That this stipulation shall be subject in all respects to the exceptions and provisions of U. S. Code, title 40, sections 321, 324, 325 and 326, relating to hours of labor, as in part modified by the provisions of Section 303 of Public Act No. 781, 76th Congress, approved September 9, 1940, relating to compensation for overtime."

f. A new Article, number XX, is added and shall read as follows:

"**ARTICLE XX—Loading and Unloading Railway Cars.** The contractor shall load promptly all railroad cars furnished for loading upon his order and shall unload from railroad cars promptly upon arrival all shipments consigned to him and shall provide storage facilities and other facilities necessary for these purposes; and the contractor shall not order railway cars for loading unless they can be loaded promptly and shall not cause or permit shipments to be consigned to him unless they can be unloaded from railroad cars promptly upon arrival."

End of Appendix "B"

RESTRICTED

Contract No. W-414-eng-602

SUPPLEMENTAL AGREEMENT

This supplemental agreement entered into this 22d day of March, 1941, by and between the UNITED STATES OF AMERICA, hereinafter called the Government, represented by the contracting officer executing this agreement, and The Hawaiian Constructors, a joint venture, composed of W. E. Callahan Construction Company, a Nebraska corporation; Gunther & Shirley Company, a Nebraska corporation, and Rohl-Connolly Company, a Nevada corporation, joint contractors and co-adventurers, hereinafter called the contractor, WITNESSETH That:

WHEREAS, On the 20th day of December, 1940, the parties hereto entered into contract No. W-414-eng-602 for the performance of work therein described at locations within the Territory of Hawaii, hereinafter referred to as the said contract; and

WHEREAS, It is found advantageous and in the best interests of the United States to modify the said contract so that construction work and services, more particularly hereinafter described, in addition to that covered by the said contract, may be performed for the benefit of the National Defense; and

WHEREAS, The work and services to be performed by this Supplemental Agreement are authorized by, are for the purpose set forth in, and are chargeable to, Procurement Authority No. Eng-602 P99A-0540.063-N, the available balance of which is \$1,687,000, and to Procurement Authority No. Eng-716 P99A-0540.062-N, the available balance of which is \$283,880.

[2] Now, THEREFORE, The said contract is hereby modified in the following particulars, but in no others:

1. The contractor agrees, for and in consideration of the fixed fee being increased as hereinafter provided, to perform the work and services (in addition to that covered by the said contract) described in Schedules A and B herein and made a part hereof.

2. The estimated total cost of the work and services covered by this Supplemental Agreement is approximately \$1,671,000, exclusive of the contractor's fee for said work and services. The estimated total cost set forth above is based upon field data now available and agreed to by both the Government and the contractor.

3. The fixed fee stated in the said contract shall be increased in the amount of sixty-nine thousand dollars (\$69,000), which shall cover all the work and services irrespective of the cost thereof.

4. The work shall be done in conformity with the provisions of the War Department Construction policy dated June 15, 1940, File AG 600-12 (6-15-40) M-D-M, and its supplements.

5. Work to be done shall be undertaken immediately after receipt by the contractor of notice to proceed. The work shall be prosecuted with faithfulness and energy and shall be completed as follows:

(a) Temporary housing construction and facilities as described in Schedule A within sixty (60) calendar days from date of notice to proceed.

(b) Bomb storage magazines and facilities as described in Schedule B within one hundred (100) calendar days from date of notice to proceed.

[3] 6. Minor changes in structures and facilities as may be found necessary in the interest of economy or required due to climatic conditions may be directed by the contracting officer without additional compensation to the contractor.

7. The work as described in Schedules A and B shall be in accordance with applicable paragraphs of the Standard Specifications of the Quartermaster General (Construction Division) for similar items.

THIS SUPPLEMENT AGREEMENT shall be subject to the approval of the Under Secretary of War.

AFFIDAVIT

DISTRICT OF COLUMBIA
City of Washington, ss:

Paul Grafe, being first duly sworn, deposes and says:

That he is authorized and empowered to execute any and all contracts for construction work, and modifications and amendments thereto, in connection with such work in the Territory of Hawaii, by signing the name Hawaiian Constructors, by Paul Grafe (the said Hawaiian Constructors being a joint venture composed of W. E. Callahan Construction Company, a Nebraska Corporation; Gunther & Shirley Company, a Nebraska Corporation, and Rohl-Connolly Co., a Nevada Corporation, joint contractors and co-adventurers) with the same effect and efficacy as if the same were executed by each and all of the said co-adventurers; that the Hawaiian Constructors is about to enter negotiations with the United States for the following work: Construction for increase in air corps consisting of temporary housing and facilities and construction of bomb storage magazines and facilities, in the Territory of Hawaii; that he did not nor has any of the joint adventurers, or any officer or member of the said joint adventurers employed any person, either directly or indirectly, to solicit or secure a contract or supplemental agreement for the above described work or services upon any agreement for a commission, percentage, brokerage, or contingent fee; that all information and data submitted by them to the United States incident to

the above mentioned negotiations are accurate and true to the best of his knowledge and belief. Furthermore, that in event the aforementioned contract or supplemental agreement is awarded to any of the above firms, no part of the fixed-fee given as compensation therefor shall be paid to any persons, firm or corporation for soliciting or assisting in any manner whatsoever in securing this contract.

HAWAIIAN CONSTRUCTORS,

Contractor.

By Paul Grafe,

PAUL GRAFE.

Subscribed and sworn to this 22d day of March 1941.

My commission expires the 14th day of March 1946.

Contract No. W-414-eng-602

[1] 600.1 (Haw. Dept. Airfields)-75/3

SUPPLEMENTAL AGREEMENT No. 2

This supplemental agreement entered into this fifth day of May, 1941, by and between the UNITED STATES OF AMERICA, hereinafter called the Government, represented by the contracting officer executing this agreement, and The Hawaiian Constructors, a joint venture, composed of W. E. Callahan Construction Company, a Nebraska corporation, Guenther & Shirley Company, a Nebraska corporation, and Rohl-Connally, a Nevada corporation, joint contractors and co-adventurers, hereinafter called the contractor, WITNESSETH That:

WHEREAS, On the 20th day of December, 1940, the parties hereto entered into Contract No. W-414-eng-602 for the performance of work therein described at locations within the Territory of Hawaii, hereinafter referred to as the said contract, and

WHEREAS, On the 22nd day of March, 1941, the parties hereto executed a supplemental agreement modifying said contract, in order to provide for additional construction work and services, which supplemental agreement is hereinafter referred to as the first Supplemental Agreement; and

WHEREAS, It is found advantageous and in the best interests of the United States to modify the said contract as modified by said first Supplemental Agreement so that construction work and services, more particularly hereinafter described, in addition to that covered by the said contract as modified by said first Supplemental Agreement, may be performed for the benefit of the National Defense; and

WHEREAS, The work and services to be performed by this Supplemental Agreement hereinafter referred to as the Second Supplemental Agreement are authorized by, are for the purposes set forth in, and are chargeable to, Procurement Authorities which, with the available balances are listed below:—

(a) Procurement Authority No. SC 1450 P99A-0605-01, the available balance of which is \$130,000.00.

(b) Procurement Authority No. CAC 131 P99A-1210-N, the available balance of which is \$20,400.00.

(c) Procurement Authority No. CAC 126 P99A-1210-01, the available balance of which is \$7,758.00.

(d) Procurement Authority No. CAC 128 P99A-1204-01, the available balance of which is \$5,242.00.

(e) Procurement Authority No. Eng. 812 P99A-0540.068-N, the available balance of which is \$150,000.00.

(f) Procurement Authority No. Eng. 790 P99A-0540.067-N, the available balance of which is \$221,000.00.

(g) Procurement Authority No. Eng. 784 P99A-0540.067-N, the available balance of which is \$138,000.00.

3040 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(h) Procurement Authority No. Eng. 765 P99A-0540.068-N, the available balance of which is \$100,000.00.

(i) Procurement Authority No. Eng. 749 P99A-0540.068-N, the available balance of which is \$16,000.00.

(j) Procurement Authority No. Eng. 677 P99-0540.068-N, the available balance of which is \$2,943.00.

[2] (k) Procurement Authority No. Eng. 715 P99-0540.035-N, the available balance of which is \$300,000.00.

(l) Procurement Authority No. Eng. 602-P99A-0540.068-N, the available balance of which is \$176,000.00.

(m) Procurement Authority No. Eng. 711 P99A-0540.035-N, the available balance of which is \$80,500.00.

Now, THEREFORE, The said contract is hereby modified in the following particulars, but in no others:

1. The contractor agrees, for and in consideration of the fixed fee being increased as hereinafter provided, to perform the work and services (in addition to that covered by the said contract as modified by said first Supplemental Agreement) described in Schedules A to P (inclusive) herein and made a part hereof.

2. The estimated total cost of the work and services covered by this Supplemental Agreement is approximately \$1,123,875, exclusive of the Contractor's fee for said work and services. The estimated total cost set forth above is based upon field data now available and agreed to by both the Government and the Contractor.

3. The fixed fees stated in said contract and in said first Supplemental Agreement shall be increased in the amount of \$27,200 which shall cover all the work and services irrespective of the cost thereof. If the funds now available are not sufficient to perform all of the work and services herein described and if any additional sum or sums become available, the Contractor may be required to perform any work and services which may be necessary to complete any of the work and services herein described, for which there shall be no additional fee. Provided, however, that there shall be no adjustment in the amount of the fixed fee as provided in the said contract, or in the said contract as modified and amended, nor shall there be any claim for increased compensation, because of any errors and/or omissions made in computing the estimated cost of the construction of the work under the said contract, or under the said contract as modified and amended, or where the actual cost varies from the estimated cost of the work provided in the said contract, or in the said contract as modified and amended.

4. The work shall be done in conformity with the provisions of the War Department Construction policy dated June 15, 1940, File AG 600-12 (6-15-40) M-D-M, and its supplements.

5. Work to be done shall be undertaken immediately after receipt by the Contractor of notice to proceed. The work shall be prosecuted with faithfulness and energy and shall be completed as follows:

[3] (a) Construction of additional roads for aircraft warning service installations in the Territory of Hawaii as described in Schedule A within 60 calendar days from date of notice to proceed.

(b) Construction of additional fire control stations on the Island of Oahu as described in Schedule B within 60 calendar days from date of notice to proceed.

(c) Construction of portable seacoast searchlights shelter as described in Schedule C within 90 calendar days from date of notice to proceed.

(d) Armament, Fire Control, Supply and Repair Building (bombsight) as described in Schedule D within 120 calendar days from date of notice to proceed.

(e) Armament, Instrument Inspection and Adjustment Building as described in Schedule E within 120 calendar days from date of notice to proceed.

(f) Temporary warehouse as described in Schedule F within 120 calendar days from date of notice to proceed.

(g) Construction necessary for installation of utilities as described in Schedule G within 90 calendar days from date of notice to proceed.

(h) Installation of utilities consisting of additions to gasoline distribution system as described in Schedule H within 60 calendar days from date of notice to proceed.

(i) Grading, clearing and grubbing as described in Schedule I within 40 calendar days from date of notice to proceed.

(j) Construction of gasoline storage and distribution system in the Territory of Hawaii as described in Schedule J within 90 calendar days from date of notice to proceed.

(k) Warming up apron, Wheeler Field, as described in Schedule K within 40 calendar days from date of notice to proceed.

(l) Construction of third floor addition to Wing Operations Building as described in Schedule L, within 60 calendar days from date of notice to proceed.

(m) Construction of air base paint, oil and dope building as described in Schedule M within 60 calendar days from date of notice to proceed.

(n) Installation of cleaning fluid storage as described in Schedule N within 40 calendar days from date of notice to proceed.

(o) Construction necessary for installation of electric and steam services to hangars as described in Schedule O within 40 calendar days from date of notice to proceed.

(p) Construction of pipe line facilities, etc., as described in Schedule P within 60 calendar days from date of notice to proceed.

[4] 6. Minor changes in structures and facilities as may be found necessary in the interest of economy or required due to climatic conditions may be directed by the contracting officer without additional compensation to the contractor.

7. The work as described in Schedules A to P (Inclusive) shall be in accordance with the applicable paragraphs of Standard Specifications attached hereto and made a part hereof. The work and services to be performed under the contract, in addition to the procurement authorities enumerated therein, will be chargeable also to Procurement Authority No. CAC 131 P99-A 1210-N.

THIS SUPPLEMENTAL AGREEMENT shall be subject to the approval of the Under Secretary of War.

[5]

SCHEDULE "A"

Construction of additional roads for Aircraft Warning Service Installations to be located in the Territory of Hawaii as directed by the Contracting Officer

The work to be done shall include all excavating, backfilling and compacting necessary to the construction of the roadway and/or roadways and appurtenances thereto; the construction and/or installation of all drainage structures, complete, with approach and discharge ditches; the construction of paved surfaces on the prepared roadway subgrade, when and as directed. In general, the pavements to be constructed will consist of hot-mixed asphaltic concrete wearing surface on compacted rock base course.

SCHEDULE "B"

Construction of additional fire control stations including instrument structures and bunk houses, together with access roads and trails, as part of the fixed fortification to be located in the territory of Hawaii as directed by the Contracting Officer in accordance with applicable plans.

Instrument structures will be of reinforced concrete design approximately 16' x 16', and Bunk Houses of temporary wooden construction to be built in accordance with plans to be furnished. Access roads and trails will, in general, be unpaved.

SCHEDULE "C"

Construction of a Shelter for portable Seacoast Searchlight units, to be located in the Territory of Hawaii as directed by the Contracting Officer

The building will consist of light steel construction with corrugated iron walls and roof. The floor will be of concrete.

[6]

SCHEDULE "D"

Construction of an Armament, Fire Control, Supply and Repair Building (bomb-sight), in the Territory of Hawaii

This building shall be in general conformity with Quartermaster Corps drawings for the Armament, Fire Control, Supply and Repair Building at San Antonio Air Depot (Duncan Field), Texas, as modified.

Building will be of reinforced concrete design approximately 67' x 90' in dimensions.

3042 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

SCHEDULE "E"

Construction of an Armament, Instrument Inspection and Adjustment Building in the Territory of Hawaii

This building shall be in general conformity with Quartermaster Corps drawings for the Armament, Fire Control, Supply and Repair Building designed for the San Antonio Air Depot (Duncan Field), Texas, as modified.

Building will be of reinforced concrete design approximately 67' x 130' in dimensions.

SCHEDULE "F"

Construction of a Temporary Warehouse in the Territory of Hawaii

This building consists of one (1) Air Corps Depot Supply Building. It shall be constructed in general conformity with Quartermaster plans for the present Mobile Depot Supply Building, as modified.

It shall be of reinforced concrete and steel design and approximately 100' x 200' in dimensions.

SCHEDULE "G"

Construction necessary for installation of utilities

This work shall consist of furnishing a Sanitary Sewer System, Water System and Electrical System, necessary to service a population of approximately 2,000 men at Bellows Field. Work shall be in conformity with plans to be furnished.

[7]

SCHEDULE "H"

Installation of Utilities, Hickam Field, T. H.

This installation shall consist of supplying compressed air, water and electrical service to existing outlet pits in the warm-up aprons at Hickam Field and for interconnecting the existing five (5) gasoline delivery lines at that place. Work shall conform to plans to be furnished.

SCHEDULE "I"

Grading, clearing, and grubbing

This work shall consist of clearing, grubbing and minor grading of approximately 25 acres of land at Wheeler Field, T. H., as shown on plot plans to be furnished.

SCHEDULE "J"

Construction of Gasoline Storage and Distribution System

This work shall consist of fabricating and installing underground, in accordance with plans to be furnished, twenty-four steel tanks of 50,000-gallon capacity each, together with necessary fittings, pumps and appurtenances. Installations shall be at those points in the Territory of Hawaii designated by the contracting officer.

SCHEDULE "K"

Warming-up Apron, Wheeler Field, T. H.

Item No.	Item	Unit	Quantity
1.....	Concrete apron.....	Cu. yds.....	8,500

Construction shall be in accordance with plans furnished and shall include necessary service pits, utility lines to the pits and tie down rings.

[8]

SCHEDULE "L"

Construction of Third Floor Addition to Wing Operations Building, Hickam Field, T. H.

Work shall conform to plans to be furnished in general conformity to the reinforced concrete design of the existing Wing Operations Building.

SCHEDULE "M"

Construction of Air Base Paint, Oil and Dope Building

This building shall be of fireproof construction in accordance with plans to be furnished. Location of building is Hickam Field, T. H.

SCHEDULE "N"

Installation of Cleaning Fluid Storage, Hickam Field, T. H.

Item No.	Item	Unit	Quantity
1.....	5,000-gallon gasoline tank.....	Each.....	1
2.....	1,000-gallon kerosene tank.....	Each.....	1
3.....	1,000-gallon tank (used fluids).....	Each.....	1

SCHEDULE "O"

Construction necessary for installation of electric and steam services to hangars

Work shall consist of providing ducts in the floor of existing hangar and installing therein the necessary piping, electric cable, outlets, connections and fittings, all in accordance with plans to be furnished.

SCHEDULE "P"

Construction of Pipe Line Facilities, Hickam Field, T. H.

This work shall consist of the following items;

1. Make rigid the existing aviation gasoline lines on deck at Hickam Field.
- [9] 2. Install pressure relief valve.
3. Replace existing control valves.
4. Install tank car unloading facilities.
5. Install two (2) pumps and measuring meter.
6. Install approximately 5,000 lineal feet of pipe line.

All work to be performed in accordance with plans to be furnished.

[10] IN WITNESS WHEREOF, The parties hereto have executed this agreement as of the day and year first above written.

THE UNITED STATES OF AMERICA,
By Theodore Wyman, Jr.,
THEODORE WYMAN, Jr.,
Contractor Officer,
Lt. Col., Corps of Engineers,
District Engineer.
HAWAIIAN CONSTRUCTORS,
Contractor.

By Paul Grafe
PAUL GRAFE,

U. S. Engineer Office,
Honolulu, T. H.

Approved Jun 25, 1941.

ROBERT P. PATTERSON,
Under Secretary of War.

Approval recommended Jun 23, 1941.

John J. Kingman,
JOHN J. KINGMAN,
Brigadier General,
Acting Chief of Engineers.

[1]

SECTION IV—CONCRETE

4-01. *Proportioning.* Concrete shall be composed of cement, natural or crushed aggregates, and water of the qualities herein specified and in the required proportions; these ingredients to be well mixed and brought to a proper consistency. The exact proportions in which such materials are to be used for different parts of the work shall be as determined by the contracting officer from time to time during the progress of the work, and as analyses and tests are made of samples of the aggregates and the resulting concrete. In general, the proportions shall be designed to produce a concrete of maximum practical economy to the Government and having ultimate compressive strength at the age of 28 days of not less than the following amounts for the various classes.

Class	Pounds per sq. inch	Nominal limits in size of aggregate in inches
A.....	3,300	$\frac{1}{4}$ " to $1\frac{1}{4}$ "
B.....	3,000	$\frac{1}{4}$ " to $1\frac{1}{4}$ "
C.....	2,500	$\frac{1}{4}$ " to $1\frac{1}{4}$ "

[3]

No. 4 Rock and Rock Dust

Size of Screen (Square opening)	Per cent of weight passing
No. 4 sieve.....	90-100
No. 8 sieve.....	50-85
No. 16 sieve.....	27-85
No. 100 sieve.....	2-10

(f) *Composite grading limits.* The grading of coarse aggregate in the mixed concrete shall fall within the following limits:

	Per cent of weight passing
Maximum size mesh screen (square mesh).....	95-100
• $\frac{1}{2}$ maximum size mesh screen (square mesh).....	40-70
No. 4 sieve.....	0-10

(g) *Storing.* In the event coarse aggregate is stored in stock piles in advance of concreting operations, such stock piles shall be built up by approved methods so that coning or segregation of the material cannot occur.

4-05. *Water for Concrete.* The water used in the mixing of concrete must be clean and free from objectionable quantities of organic matter, alkali, salts, and other impurities which, in the opinion of the contracting officer, might reduce the strength, durability, or other qualities of the concrete.

4-06. *Measurement of cement and aggregate.* (a) *Measurement.* The amount of cement and the amount of each separate size of aggregate entering each batch of concrete shall be determined by direct weighing equipment; provided, that where batches are proportioned so as to contain an integral number of sacks of cement, and the cement is delivered at the mixer in the original unbroken sacks, the weight of the cement contained in each such sack may be taken without weighing as 94 pounds. Said direct weighing equipment shall comply with the following requirements:

(1) The accuracy of the weighing equipment shall conform to the requirements of the United States Bureau of Standards. Spring scales will not be permitted.

(2) The equipment shall weigh each aggregate separately and each unit shall include an under and overweight indicator. The underweight indicator shall indicate the filling of the last 200 pounds of the batch. The overweight indicator shall indicate overweight to a maximum of 50 pounds. Both shall be graduated in a manner at least as legible as 5 pound units indicated by alternate black and white divisions $\frac{1}{8}$ inch wide with other markings to emphasize 25, 50 and 100 pounds. At the contractor's option approved cumulative weighing equipment may be used instead of the individual weighing equipment herein specified. [4] Said cumulative weighing equipment shall be equipped with a visible dial or equally

suitable device which will accurately indicate scale load at any state of the weighing operation from zero to full load.

(3) The equipment shall be so arranged that the operator may conveniently observe and inspect the operation of the bin gates and also the materials in the weighing hopper. The under and overweight indicators or weighing dials shall be in full view of the operator when he is at the controls.

(4) The equipment shall be capable of ready adjustment for compensating for the varying weight of moisture contained in the aggregates, or for changing the proportionate batch weights.

(5) The equipment shall be so operated as to control the weight of the cement to within one per cent of that specified and the weight of the fine and coarse aggregates to within two per cent of the specified weight for each separate size of aggregate. Automatic weighing and batching equipment shall be used unless the use of manually-operated equipment is authorized by the contracting officer.

(6) The equipment shall be so arranged as to permit the convenient removal of overweight material in excess of the prescribed tolerances.

4-07. *Measurement of water.* The quantity of water entering the mixed shall be measured by a suitable water meter or other measuring device of a type approved by the contracting officer and capable of measuring the water in variable amounts within a tolerance of one per cent. The meter mechanism shall be capable of being locked in position so as to deliver constantly any specified amount of water to each batch of concrete. A positive quick-acting valve shall be used for a cut-off in the water line to the mixer. The operating mechanism must be such that leakage will not occur when the valves are closed. The use of horizontal tanks for the measurement of water will not be permitted.

4-08. *Construction of forms.* (a) Forms shall be of wood, steel or other approved material except that, unless specifically authorized, the sheathing for all exposed surfaces shall be tongue and groove lumber, plywood or fibreboard of uniform width and thickness. All forms shall be true in every respect to the required shape and size, shall conform to the established alignment and grades, and maintain their position and shape under the loads and operations incident to placing and vibrating the concrete. Metal forms shall be accurately made so that similar removable parts will be interchangeable.

The contracting officer may select and/or approve a maximum size of aggregate within the above limits which he considers the most adaptable for the type of constructions being performed or the conditions under which it is to be placed.

4-02. *Water content.* (a) In calculating the total water content in any mix, the amount of moisture carried on the surface of the aggregate particles shall be included. Unless otherwise directed by the contracting officer, the total water content per bag of cement for each batch of concrete shall not exceed the following:

Class "A"	5.5 gallons	or	45.8 pounds
Class "B"	6.5 gallons	or	54.1 pounds
Class "C"	7.0 gallons	or	58.3 pounds

(b) *Variation.* In all cases, however, the amount of water to be used shall be the minimum amount necessary to produce a plastic mixture of the strength specified and of the desired density, uniformity and workability. In general, the consistency of any mix shall be that required for the specific placing conditions and methods of placement, and ordinarily the slump shall be between 1½" and 4" when tested in accordance with the current specifications for "Method of Test for Consistency of Portland Cement Concrete," of the American Society for Testing Materials.

(c) *Increase.* An increase in the maximum water content will not be permitted unless comparative tests under job conditions show conclusively that such increase in water content will not result in a decrease in concrete strength and provided further that such increase does not exceed one gallon per cubic yard.

[2] 4-03. *Cement.* All cement used shall be Portland, of American manufacture, conforming to Federal Specification SS-C-191A. All cement delivered to the site of construction shall be in sacks bearing the brand and name of the manufacturer. All cement delivered for any one project shall be all of the same brand. All cement will be furnished to the contractor by the Government.

4-04. *Aggregates.* (a) All aggregates will be furnished the contractor by the Government which shall conform to the following requirements. Fine aggregate

3046 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

for concrete shall consist of a mixture of equal parts of natural sand and rock dust. Sand shall be composed of clean, hard, strong, durable, uncoated grains, free from shale, salt, lumps, soft or flaky particles and from injurious amounts of dust, alkali, organic matter, loam or other deleterious substances. The sand shall be taken from a part of the beach which has not been recently in contact with salt water.

(b) Beach sand shall be graded in accordance with the following requirements:

<i>Size of Screen</i>	<i>Per cent by weight passing</i>
No. 4 sieve-----	100%
No. 100 sieve-----	0.5%

(c) Coarse aggregate shall consist of gravel or broken stone composed of strong, hard, clean, durable, uncoated pebbles or rock fragments, free from alkali, organic or other deleterious matter. All broken stone or gravel shall be washed and uniformly moistened before batching. The relative amounts of each size of broken stone or gravel to be used in each mix of concrete in all parts of the work will be determined by the contracting officer, and will be based on securing a well-graded aggregate producing concrete having the required workability, density, strength and economy without the use of excess sand, water, or cement.

(d) *Maximum sizes.* For class "A", "B" and "C" concrete, the maximum size mesh screen for the aggregate shall be not less than one-half inch and not more than one and one-half ($1\frac{1}{2}$) inches.

(e) *Grading.* The aggregate shall be separated and graded in accordance with the following requirements and the specified sizes delivered separately to individual proportioning hoppers.

No. 2 Rock ($1\frac{1}{2}$ inch to $\frac{3}{4}$ inch size)

<i>Size of Screen (Square opening)</i>	<i>Per cent by weight passing</i>
$1\frac{1}{2}$ "-----	95-100
$\frac{3}{4}$ "-----	0-10

No. 3 Rock (3.4 inch to No. 4 mesh size)

<i>Size of Screen (Square opening)</i>	<i>Per cent by weight passing</i>
$\frac{3}{4}$ "-----	95-100
$\frac{3}{8}$ "-----	20-45
No. 4 sieve-----	0-10

(b) *Securing.* Suitable and effective means shall be provided for holding adjacent edges and ends of panels and sections tightly together and in accurate alignment so as to prevent the formation of ridges, fins, [5] offsets, or similar surface defects in the finished concrete. The forms shall be tight, so as to prevent the loss of water, cement, and fines during placing and vibrating of the concrete.

(c) *Number of forms.* Adequate and suitable means for removing forms, without injury to the surface of the finished concrete, shall be provided. Forms shall be of such construction as to permit them to be moved forward rapidly, and a sufficient number of forms of each kind shall be provided to permit the required rate of progress to be maintained.

(d) *Form ties.* When ties extending through the concrete are used to support or to strengthen forms, they shall be so constructed and so removed that no tie other than metal will be left in the concrete, and that no metal tie which extends to within one and one-half inches of any concrete surface shall be left in the concrete.

4-09. *Maintenance of forms.* Forms shall be maintained at all times in good condition, particularly as to size, shape, strength, rigidity, tightness, and smoothness of surface. Before concrete is placed the forms shall be thoroughly cleaned and coated with a non-staining mineral oil or other lubricant approved by the contracting officer. Any excess lubricant shall be satisfactorily removed before placing concrete. Fibre-board and plywood, when used as form facing material, shall be given a coat of shellac before being oiled.

4-10. *Removal of forms.* Directions of the contracting officer as to the removal of forms shall be strictly followed and all such work shall be done with care so as to avoid injury to the concrete. No heavy loading on green concrete shall be

permitted. Immediately upon removal of the forms the concrete surfaces shall be thoroughly wet down and kept wet until the sealing compound is applied or other curing procedure made effective as hereinafter specified. As soon as the forms are removed, the inspector shall carefully examine the surface of the concrete after which any irregularities in the surface shall be repaired as required.

4-11. Preparing of surfaces for concreting. (a) Rock surfaces, upon or against which concrete is to be placed, must be free from mud and debris, and shall be thoroughly wetted prior to the placing of any concrete. Earth surfaces after being trimmed and compacted as hereinbefore provided shall be thoroughly wetted by sprinkling prior to the placing of any concrete and these surfaces shall be kept moist by frequent sprinkling up to the time of placing concrete thereon. A moisture penetration of at least 12 inches in sandy soil shall be obtained by the above sprinkling, and not less than 6 inches elsewhere, except where application of water to such a degree causes the soil to become muddy or soggy. The surface shall be free from pools of water at the time of placing concrete.

(b) Unformed concrete surfaces upon or against which concrete is subsequently to be placed and to which new concrete is to adhere shall be cleaned with an air-water jet under pressure sufficient to remove laitance, at such time, as determined by the contracting officer, when the cement film can be washed clean from the mortar and aggregate without dislodging the aggregate. Immediately prior to placing new concrete on old, to which it is to adhere, the surface of the old concrete shall be thoroughly cleaned [6] of all sealing compound and other substances that might prevent a bond with new concrete. It shall then be wetted, and surplus water removed. When, upon inspection, it is the judgment of the contracting officer that any such surface is not in proper condition for bond with the concrete about to be placed, the contractor shall roughen the surface or remove objectionable matter therefrom by wet sandblasting and again clean it before depositing concrete. Wherever concrete is to be placed on hardened concrete, or when starting to fill a deep form, the contact surfaces, after cleaning and wetting as herein provided, shall be coated with a one-inch layer of a mortar of the same ratio of fine aggregate to cement as the concrete used on the job. This mortar shall be scrubbed with wire brooms into the surfaces, upon which new concrete is to be placed, where accessible, before new concrete is placed against them. When the placing of concrete is to be interrupted long enough for the concrete to take its final set, the working face shall be given a shape by the use of forms or other means, that will secure proper union with subsequent work.

4-12. Exclusion of water. No concrete shall be deposited under water, nor shall the contractor, without explicit permission, allow still water to rise on any concrete until the concrete shall have attained its initial set. Water in motion shall not be permitted to flow over the surface of any concrete in such manner or at such velocity as will injure the surface finish of the concrete.

4-13. Mixing. (a) The cement, sand, and broken stone or gravel shall be so mixed and the quantity of water added shall be such as to produce a homogeneous mass of uniform consistency. Dirt and other undesirable substances shall be carefully excluded. All concrete shall be thoroughly mixed in a batch mixer of an approved type and size, so designed as positively to insure a uniform distribution of all the component materials throughout the mass during the mixing operation. Only sufficient water shall be used in mixing to give a workable mix, conforming to the consistency requirements of Section 4-02. The mixing of each batch shall continue not less than $1\frac{1}{2}$ minutes after all materials, including water, are in the mixer, during which time the mixer shall rotate at the speed for which it has been designed or at such speed as will produce a mass of uniform consistency at the end of the mixing period. Wherever necessary to secure proper results, the concrete shall be mixed for a longer period than herein specified. Overmixing of concrete or overloading of mixers will not be permitted.

(b) *Timing.* A batch timer and counter, including lock, release, and audible indicator, shall be installed and used on each concrete mixer.

(c) *Cleaning.* Hardened concrete or mortar shall not be permitted to accumulate on the inner surfaces of the mixer.

(d) *Addition of water.* Retempering, i. e., remixing, with the addition of water, concrete that has partially hardened, will not be permitted.

4-14. Placing concrete. (a) Concrete shall be placed in the work with the least possible delay after mixing, and in no event after it has contained [7] its water content for more than 45 minutes. Only methods of transporting and placing that will deliver into the work concrete of the proper consistency and specified maximum size without separation will be permitted. All ends of

chutes, hopper gates and all other points of concrete discharge throughout any conveying, hoisting, and placing system adopted, shall be so designed and arranged that concrete passing from them shall not be separated in falling into the form receiving it. Adequate headroom provision must be made at such points for a vertical drop and for proper baffling. No chutes or conveyor belts shall be used except as approved by the contracting officer. Chutes longer than 50 feet and conveyor belts longer than 100 feet will not be permitted. Minimum slopes of chutes shall be such that concrete of the specified consistency will readily flow in them. If a conveyor belt is used, it shall be wiped clean by a device operated in such a manner that none of the mortar adhering to the belt will be wasted. All conveyor belts and chutes shall be covered.

(b) *Manner.* Concrete shall not be dropped through reinforcement steel or into any deep form whether reinforcement is present or not, so as to cause separation of the coarse aggregate from the mortar on account of repeatedly hitting rods or the sides of the form as it falls, nor shall concrete be placed in any form in such a manner as to leave accumulations of mortar on the form surfaces above the placed concrete. In such cases hoppers and, if necessary, vertical ducts shall be used in the forms, or other means employed so that the concrete may reach the place of final deposit without separation. Concrete shall be uniformly distributed during the process of depositing, and in no case after depositing shall any portion be displaced in the forms more than 3 feet in a horizontal direction. Concrete in forms shall be deposited in uniform horizontal layers, not deeper than 2 feet, care being taken to avoid inclined layers or inclined construction joints. Each layer shall be placed while the previous layer is still soft. No concrete shall be placed except in the presence of a duly authorized representative of the contracting officer.

4-15. *Power vibrators.* As concrete is placed in the forms it shall be thoroughly settled and compacted throughout the entire depth of the layer which is being consolidated into a dense, homogeneous mass, filling all corners and angles of the forms, thoroughly embedding the reinforcement, eliminating rock pockets and bringing only a slight excess of mortar to the exposed surfaces of concrete during placement. Such settling and compacting shall be accomplished by the use of internally-vibrated, high-speed power vibrators of an approved type in sufficient numbers, with standby units as required, and of sufficient power to compact concrete in the quantities and of the medium consistency herein specified within 15 minutes after being placed. Compaction and consolidation of the concrete shall be obtained by inserting the vibrator for short periods of time at close intervals. Excessive vibration at one point shall be avoided.

4-16. *Finish of formed surfaces.* All finished, formed surfaces shall conform accurately to the shape, alignment, grades and sections as shown on the drawings or as prescribed by the contracting officer. Surfaces shall be free from fins, bulges, ridges, offsets, honeycombing, or roughness of any kind, and shall present a finished, smooth, continuous, hard surface. All sharp angles, where required, shall be rounded or leveled by the use of moulding strips, or suitable moulding or finishing tools.

[8] 4-17. *Treatment of defects on formed surfaces.* (a) As soon as forms are removed, all exposed surfaces shall be carefully examined and any irregularities found in the surface shall be immediately rubbed or ground down in a satisfactory manner so as to secure a smooth uniform and continuous surface. Plastering or coating of surfaces to be smoothed will not be permitted. Shallow defects shall be repaired with gunite or an approved compressed air mortar gun.

(b) *Patching.* Holes left by tie rod cones, and other imperfections shall not be united but shall be repaired in an approved manner with dry packed mortar, prepared from sand and cement identical with that used for the mortar in the concrete at that section, and mixed in the same proportions. Surfaces shall be made smooth and hard by steel troweling and shall receive the same kind and amount of curing treatment as required for concrete in the repaired section.

4-18. *Construction, expansion and contraction joints.* All joints shall be constructed at such points and of such dimensions as may be directed or as shown on the drawings. Vertical joints shall be formed with tongue and groove bonds or keys at such locations and of such shapes and dimensions as approved or directed. Horizontal joints shall be formed with keys, or where horizontal pressure is always in one direction, with steps. Where required, dowel rods shall be used. All concrete in vertical members shall have been in place not less than twelve (12) hours, and longer if so directed, before concrete in horizontal members resting thereon is placed. Before placing is resumed, all laitance and excessive

water shall be removed and the concrete shall be cut away, where necessary to insure a strong, dense concrete at the joint. Except as otherwise specified herein, the surface of existing concrete shall be cleaned and roughened and shall then be spread with a one-half ($\frac{1}{2}$) inch layer of mortar of the same cement-sand ratio as is used in the concrete, immediately before the new concrete is deposited. Steel water stops shall be placed at all construction joints, and in such manner, as to form a water-tight diaphragm. Copper water stops shall be placed at all expansion joints.

4-19. *Embedded items.* Before concrete is placed, all embedded items shall be firmly and securely fastened in place as indicated on drawings. They shall be thoroughly clean and free from coating, rust, scale, oil or other foreign matter.

4-20. *Test specimens.* (a) Test specimens to determine whether the compressive of the concrete is in accordance with that specified in paragraph 4-01 will be taken by the inspector. At least one set of three (3) specimens will be made for every major pour, and in general for every Two Hundred Fifty (250) cubic yards of concrete placed, but in any event a sufficient number of specimens will be taken to give a comprehensive knowledge of the concrete in each section of the work.

(b) *Taking of specimens.* All specimens will be taken from the concrete as it is placed in the forms and in accordance with the current specifications of the American Society for Testing Materials.

4-21. *Trowelled concrete surfaces.* All floor or other surfaces requiring a smooth finish, as specified in the drawings, shall be trowelled [9] to a smooth hard finished surface. Before the concrete has received its initial set, a topping mixture consisting of one part cement to two parts medium coarse sand shall be applied to all surfaces to a depth of one-half inch and smoothly finished. Such topping mix shall be struck off to the true established grade specified, after which it shall be thoroughly compacted and floated by means of wood floats. After such preliminary floating, and the concrete has set sufficiently to prevent separation of materials, the surface shall be steel trowelled until a smooth surface is obtained, free from defects and blemishes.

4-22. *Mastic for joints.* Mastic joint filler shall be constructed as shown on the plans. All mastic shall be of asphalt composition of approved quality and shall be such as to not deform by ordinary handling. Thin strips of stiffener will be allowed.

4-23. *Curing.* (a) The contractor shall protect all concrete from injury until its final acceptance by the Government. All construction joints shall be kept continuously moist, regardless of time, until they are covered with concrete. All other concrete surfaces shall be kept moist in contact with wet burlap for at least two weeks after the forms are removed. Wooden forms shall be wetted immediately before concreting and kept moist until removed. Whenever sealing compound has been applied on surfaces against which concrete is subsequently to be placed, and to which it is to adhere, the said compound shall be entirely removed by wet sandblasting or other approved means just prior to placing of the new concrete.

(b) Interior concrete surfaces to be cured by the water spray method shall be tightly closed off by bulkheads or other means or entirely surrounded by tight inclosures. The surface of the concrete within such bulkheads or inclosures shall be kept moist by an adequate sprinkling or spray system or other suitable means. The sprinkling system or wetting system used shall be provided with jets or nozzles at regular intervals and controlled by readily adjustable, automatic regulating device or devices to regulate the duration of each sprinkling and the period between successive sprinklings as required to keep the surface of the concrete continuously wet but with the smallest possible excess of water. The curing of any interior surfaces by the water spray method as herein specified shall be continued for 14 days following removal of forms.

(c) *Sealing compound method.* Wherever directed, surfaces shall be cured by the sealing-compound method. All surfaces to be cured shall be sprayed thoroughly, completely and uniformly with two coats of a commercial sealing compound, at the rate of not less than one gallon to each 200 square feet of concrete surface for each coat. Application shall be made under pressure of at least 80 pounds per square inch so as to completely seal all surfaces and not to flow off when applied to vertical surfaces. All concrete surfaces to be cured by the sealing-compound method shall be kept wet under wet burlap from the time of stripping of forms or finishing of unformed surfaces, as the case may be, until the application of the first coat of sealing compound as specified above.

[10]

SECTION V—REINFORCEMENT STEEL

5-01. *Reinforcement.* (a) *Bar placing.* Steel reinforcement bars for concrete will be furnished by the Government. Reinforcement steel will be furnished in the form of deformed bars conforming to Type B, Grade 2 of Federal Specifications for "Bars, Reinforcement, Concrete," File QQ-B-71a. All reinforcement shall, when surrounding concrete is placed, be free from rust, scale, grease or other coating which might destroy its bond with concrete. Bending and placing of steel shall be in accordance with drawings furnished or approved by the contracting officer. All reinforcement shall be secured in place, true to lines and grades indicated, by use of approved metal or concrete supports, spacers or ties, or spot welds. Supports shall be of sufficient strength to maintain the reinforcement in place throughout the concreting operation and shall be used in such manner as not to be left exposed to the face of or, in any way, mark or discolor the finished concrete surface.

(b) *Splicing.* Where splices in reinforcement, in addition to those indicated, are necessary, there shall be sufficient lap to transfer the stress by bond, as may be directed. Bars shall be lapped not less than 40 diameters and splices shall be staggered. The lapped ends of bars shall be wired together and connected properly to develop the full strength of the bar.

(c) *Coverage.* All main reinforcement shall be placed three (3) inches from any concrete surface, except as otherwise specifically indicated on the drawings.

SECTION VI—MISCELLANEOUS METAL WORK

6-01. *Miscellaneous metal work.* (a) *Installation.* All metal parts shall be installed in position and securely fastened prior to the placing of concrete. All metal parts shall be clean, free from all dirt, rust, oil, or other material deleterious to the bonding of the imbedding concrete.

(b) *Doors.* All metal doors shall be installed on the imbedded frame complete with all necessary fastenings, connections and appurtenance for efficient operation and maintenance.

(c) *Painting.* After installation, all exposed metal parts shall be thoroughly cleaned by means of wire brushes, sandpaper or other approved methods, after which they shall be painted in a good and workmanlike manner, with two coats of approved paint furnished by the Government.

SECTION VII—FENCING

7-01. *Materials.* (a) The fabric for the man-proof fence shall be 2" diamond mesh, chain link, and of width as shown on the drawing, and shall be [11] made of copper bearing steel wire of No. 9 gauge, with edges twisted and barbed finish. The fencing shall be galvanized after weaving.

The steel wire shall develop unit tensile strength of not less than 85,000 pounds per square inch.

The fencing shall conform in every respect to A. S. T. M. Specification Serial A 117-33 for "Zinc-coated Iron or Steel Chain Link Fence Fabric Galvanized After Weaving", and shall be in continuous lengths of one hundred (100) feet. It shall be similar and equal to Cyclone Invincible Fence, U. S. Steel Cyclone Fence Co. Catalog 107.

(b) *Barbed wire top strands.* Barbed wire used in the construction shall be in accordance with Federal Specification No. RR-F-221, as amended for "Fencing; Wire (barbed, netting and woven) Black and Galvanized." Type A Barbs shall be 4 points and spaced 6 inches apart.

(c) *Fence posts.* All line posts shall be two inches (2") outside diameter copper bearing steel tubing weighing not less than 2.72 pounds per linear foot galvanized inside and out by the hot dipped method in conformity with A. S. T. M. Specification No. A-123-33.

In lieu of the tubing specified, two and one-fourth inch (2¼") H-shaped sections of copper-bearing steel, weighing not less than 4.10 pounds per linear foot, galvanized as specified, may be used. All other posts except swing gate posts, shall be as specified for line posts except that three inch (3") diameter tubing weighing not less than 5.79 pounds per linear foot shall be used.

Single swing gate posts used for single swing gates wider than six feet (6') up to and including a thirteen-foot (13') opening shall be four-inch (4") tubing weighing not less than 9.1 pounds per linear foot.

Single swing gate openings used for single swing gates wider than thirteen feet (13') shall be 6 $\frac{5}{8}$ " diameter tubing weighing not less than 18.97 pounds per linear foot.

(d) *Angle brackets.* All intermediate fence posts shall be fitted with pressed steel angle brackets to support three (3) strands of barbed wire. All end and corner posts shall be fitted with heavy malleable iron angle brackets. All brackets shall incline outward at an angle of 45 degrees from the vertical and shall be of sufficient length that the top wire of the angle brackets, when mounted to the fence post, shall position the top barbed wire twelve inches (12") above the fabric and twelve inches (12") out from the fence line.

(e) *Bracing.* Gates and corner posts shall be braced with galvanized tubing 1 $\frac{5}{8}$ " in diameter, weighing not less than 2.27 pounds per foot. Gate posts shall be reinforced with auxiliary braces as shown on the drawings.

(f) *Tops.* All fence posts except those capped for and/or with angle brackets shall be capped with galvanized malleable iron fittings to exclude moisture.

[12] (g) *Top rail.* Top rail shall be 1 $\frac{5}{8}$ " outside diameter seamless copper-bearing tubing weighing not less than 2.27 pounds per foot, galvanized as specified in subparagraph (c) hereof.

(h) *Tension bars.* Tension bars shall be copper-bearing steel, three-quarters inch ($\frac{3}{4}$ ") wide, one-fourth inch ($\frac{1}{4}$ ") thick, galvanized as specified in subparagraph (c) hereof.

(i) *Brace and tension bars.* Brace and tension bars shall be of an approved type, galvanized as specified in subparagraph (c) hereof.

(j) *Gates.* Gates shall be fabricated as shown on the drawings for framed tubings and shall be of two-inch (2") diameter copper-bearing seamless tubing weighing not less than 2.72 pounds per foot and galvanized as specified in subparagraph (c) hereof. All intermediate bracing shall be 1 $\frac{5}{8}$ " outside diameter seamless steel tubing, weighing not less than 2.27 pounds per foot, galvanized as specified in subparagraph (c) hereof. Gate fillers shall be of the same fabric as the fence.

(k) *Hinges and latches.* Hinges and latches shall be of an approved design, made of malleable iron forged steel, galvanized as specified in subparagraph (c).

SECTION VIII—RAILROAD CONSTRUCTION

8-01. *Materials.* (a) All materials shall be new and unused unless otherwise specified and shall be of the best grade suitable for its intended use. Certified copies of mill inspection certificates shall be furnished for all material mill produced but such certificates will not preclude subsequent rejections of unsatisfactory materials.

(b) *Rails.* All rails shall conform to all the requirements of A. S. T. M. specification, Serial Designation A1-39 for "Open Hearth Carbon, Steel Rails." All rails shall be furnished free from kinks, crooks, or excessive rust and shall be sawed at the ends and furnished in standard mill lengths. Rails which are badly rounded or which have crystallized or which have line or surface bends will be rejected.

(c) *Track bolts.* All track bolts and nuts shall conform to the requirements of A. S. T. M. specifications, Serial Designation A-766-33.

(d) *Spring washers.* All spring washers shall conform to the requirements of appropriate A. R. E. A. specifications.

(e) *Tie plates.* All tie plates shall be standard A. R. E. A. construction conforming to the requirements of A. S. T. M. specifications, Serial Designation A-67-33.

(f) *Spikes.* All track spikes shall conform to the requirements of A. S. T. M. specification, Serial Designation A-65-33.

(g) *Joint bars.* All joint bars shall conform to the requirements of A. R. E. A. specification for "Quenched carbon, Steel Joint Bars" or [13] A. S. T. M. specification, Serial Designation A-4-14.

8-02. *Track laying.* (a) Lining and spacing of cross ties. (1) *Number required.* Ties shall be laid at the spacing as specified on the drawings.

(2) *Lining ties.* The ends of all ties shall be lined parallel and equal distance from the center line of track except in the case of switch ties which shall be lined as directed by the contracting officer.

(3) *Joint and intermediate ties.* The ties of better quality shall be used at all rail joints and on curves and shall be evenly spaced from center to center

with the exception of the switch ties which shall be spaced as directed contracting officer.

(b) *Placing ties.* Ties shall be placed with the widest heartwood side down, square to the line of rail.

(c) *Adjoining ties.* Only sufficient adjoining shall be done to obtain bearing for the entire section of the laid rail.

(d) *Tie plugs.* Spikes shall, insofar as possible, not be withdrawn once driven. If necessary to withdraw spikes, the holes made by such drawn spikes shall be immediately plugged so as to completely and tight the hole made by the withdrawn spike. In re-driving spikes for any tie spikes have been withdrawn and holes plugged, the tie shall first be turned for any new spikes are driven.

(e) *Rail braces.* On all curves, rail braces shall be installed on the outside of rail along the outside rail of the curve, for each tie, and shall be so placed to provide full bearing against the outside surface of the rail. Rail braces shall be double spiked.

(f) *Laying rail.* (1) *Unloading.* Rails shall be unloaded, stored and distributed along the track roadbed in such a manner to prevent any injury to rail. Dropping of rails in unloading will not be permitted. Rails with crooks or with kinks, or with any other defects which might impair their strength shall not be laid but shall be removed from the site of the construction as directed by the contracting officer. All rails shall be laid one at a time and all rails shall be brought square together and shall be leveled before being spiked. Rails shall be so laid that the joints in one rail shall be opposite the middle of ties in the opposite line.

(2) *Bolting.* All bolting shall be uniformly alternated from inside to outside of each joint. All connections shall be made with four bolts, each equipped with one spring washer and nut. Track bolts shall be installed when the track is laid and the nuts shall be turned snug after which bolting shall be tightened three times; the first after the track has been laid to true alignment; the second, after it has been raised on ballast, and, finally, just prior to final completion. The fishing spaces for rails shall be swabbed with heavy oil before bolting.

(3) *Gauging.* One line of track shall be laid and spiked before the other line is gauged to true spaced intervals, as herein specified. Standard gauge track tangents shall be 3'-0" and all track must be gauged before spiking curves, track shall be gauged as provided in the hereinafter schedule:

- [14] Curves of 5-6°—widen gauge $\frac{1}{8}$ "
 Curves of 7-8°—widen gauge $\frac{1}{4}$ "
 Curves of 9-10°—widen gauge $\frac{3}{8}$ "
 Curves of 11-12°—widen gauge $\frac{1}{2}$ "
 Curves of 13-14°—widen gauge $\frac{5}{8}$ "
 Curves of 15-16°—widen gauge $\frac{3}{4}$ "

When gauging track on curves, proper alignment should be maintained outside rail and the extra width of gauge applied to the inside rail. When gauge is widened on curved track, metal frogs should be attached to the gauge or iron shims used to insure uniformity. Where frogs are located inside of main track curves, the gauge of the track at the frog shall be maintained at standard gauge. Where frogs are located on the outside of curves which require extra gauging width, the width of the flange way between guard rail and the adjoining main track rail must be increased as much as the extra gauge.

(g) *Tie plates.* The contractor shall install standard 60 pound tie plates on all ties for all rail. Each tie plate shall be punched with four $1\frac{1}{16}$ " holes. All tie plates shall be so installed as to have a true even bearing on their entire surface on all ties. All rails shall be gauged prior to the installation of any tie plates and no tie plate shall be used as a rail brace or spacer. When spiking is completed, the outer shoulder of each tie plate shall have full bearing against the base of the rail.

(h) *Spiking.* All tracks shall be spiked to the tie with one spike inside and one spike outside. Spikes shall be started vertically in driving, spaced half their width from the base of the rail and shall then be driven straight to the face of the spike in contact with the rail to permit full bearing of the head on the base of the rail. All rails must be fully spiked, four spikes to the tie, which shall be driven carefully to provide the bearing above specified.

shall not be bent over the rail. Spikes should be staggered, the outside spikes of both rails being placed on one side of the tie and the inside of the spikes on the other side.

8-03. Ballasting and surfacing. All ballasting shall be evenly spread to cross section specified and shall have sufficient running surface to prevent bending or distortion of rails. All track being ballasted shall be maintained in true alignment. Both rails shall be raised uniformly at the same time by means of picks or other approved methods. In using jacks, care shall be taken that jacking shall be done close enough together to prevent bending of rail or springing of joint. Ballast shall be tamped uniformly for the entire length of tie. Tamping shall be performed from outside end of ties to one foot inside of rail. Joint ties shall be tamped last. When track has been laid and sufficiently tamped and properly compacted, the final tamping shall be made by jacking the track to final grade as specified and ballast thoroughly driven under and around each tie for their entire length by means of tamping machines, tamping picks or tamping bars. The ballasting shall be to true surface grade as shown on the drawings. After final ballasting, the entire track section shall be dressed to true section [15] as shown on the drawings, by means of templates. The edge of ballast shall be shaped to true line against form boards by means of shovels or forks and all ballast shoulders shall be uniformly shaped and compacted. The ballast shall be applied flush with top of ties in the center of track and slope each way towards the sides leaving the ends of ties exposed as shown on the drawings.

8-04. Turnouts. Turnouts shall be installed at the locations as shown on the drawings and/or as staked in the field. All frogs, switches, switch plates, switch rods, switch stands and all other necessary appurtenances shall be constructed and/or installed to provide efficient operation at all times of all turnout assemblies. Turnout curves shall be properly lined in true position by means of offset measurements from the main track rail. Stock rails shall be given a bend or set at the vertex of the switch $6\frac{3}{4}$ " ahead of the actual switch point and the switch shall be so installed to allow for $4\frac{1}{4}$ " throw. Frogs shall be installed of rigid, self guarded type of bolt design, of the length and size necessary for proper installation. Switches shall be of the size, dimension and section to adequately serve their purpose and shall be installed in accordance with general A. R. E. practice. All switches shall have installed in conjunction, suitable for efficient use, a low switch stand of heavy construction, equipped with an adjustable throw, positive in action and automatic.

8-05. Connections with main line trackage. All necessary connections of any construction specified herein with main line trackage shall be cut in and constructed under the direction and to the satisfaction of the contracting officer.

8-06. Construction of track at firing position. Firing position locations shall have a subgrade prepared and ballast laid as herein provided. After the subgrade has been ballasted and the ties laid as shown on the drawings, the entire roadbed shall have provided over and around the ballast and extending in slopes a selected fill embankment. Such embankment shall be of the section and grade as shown on the drawings and shall be made with clean, select material suitable for compacting properly as directed by the contracting officer.

8-07. Installation of track bumpers. At the end of each track run there shall be placed a track bumper as shown on the drawing or as directed by the contracting officer.

8-08. Highway crossings. Where the main lead track crosses the highway, such crossing shall be constructed as indicated on the drawings and as staked in the field. The approaches shall be graded to the elevations shown on the drawing and the subgrade shall be rolled with a suitable power roller prior to placement of crushed stone. Excessive material excavated from the approaches shall be disposed of as directed by the contracting officer. After preparation of subgrade, a base course of broken stone shall be placed to the satisfaction of the contracting officer.

After the broken stone base course has been thoroughly consolidated and the installation of the track has been completed, all pavement removed from the track crossing shall be restored in such a manner as to provide a true [16] section joining the undisturbed highway pavement. The reconstructed pavement shall be of a gradient to permit proper alignment with the track rail and the

3054 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

entire highway surface shall be replaced to provide a surface across the track equal to that existing prior to any work being performed under this contract. After the base course has been reconstructed it shall be surfaced with asphalt concrete wearing surface satisfactory to the contracting officer.

8-09. *Crossing tracks of other ownership.* The contractor shall reconstruct trackage of other ownership at the location where the main load track specifically crosses such track. The track shall be removed and reconstructed to the alignment, dimension, section and grade as shown on the drawing. All material removed from the existing trackage shall be incorporated in the reconstruction of the crossed track. Materials unsuitable for use in reconstruction shall be moved and disposed of as directed by the contracting officer, and new material necessary for proper installation as herein specified shall be provided and installed.

ARMY PEARL HARBOR BOARD EXHIBIT No. 46C

Contract No. W-414-eng-602
Supplemental Agreement No.

[Stamped:] Office Chief of Engineers. Jun 30 1941.
600.1 (Hawaiian Dept. Airfields)-99/2

SUPPLEMENTAL AGREEMENT

This supplemental agreement entered into this 22nd day of May, 1941, by between the UNITED STATES OF AMERICA, hereinafter called the Government represented by the contracting officer executing this agreement, and Hawaiian Constructors, a joint venture consisting of W. E. Callahan Construction Company, a Nebraska corporation, Gunther & Shirley Company, a Nebraska corporation and Rohl-Connolly Company, a Nevada corporation, joint contractors and adventurers, and Ralph E. Woolley, an individual operating as Ralph E. Woolley of the City of Honolulu, in the Territory of Hawaii, hereinafter called the contractor, WITNESSETH That:

WHEREAS, On the 20th day of December, 1940, the Government and Hawaiian Constructors entered into Contract No. W-414-eng-602, for the construction of works of National Defense at locations within the Hawaiian Islands, which contract was subsequently modified by Supplemental Agreements entered into May 22, 1941, and May 5, 1941, hereinafter referred to as the first Supplemental Agreement and Supplemental Agreement No. 2, respectively, and

WHEREAS, It is found advantageous and in the best interests of the United States to modify the said contract, as modified by the said first Supplemental Agreement and Supplemental Agreement No. 2, for the following reasons: skill, experience and resources of an additional general and building contractor can be advantageously used in expediting the construction of works of National Defense in the Hawaiian Islands;

NOW, THEREFORE, The said contract, as modified by the said first Supplemental Agreement and Supplemental Agreement No. 2, is hereby further modified to the following particulars, but in no others:

[2] Ralph E. Woolley, General and Building Contractor, operating as an individual of the City of Honolulu, Territory of Hawaii, is joined as coadventurer with W. E. Callahan Construction Company, a Nebraska Corporation, Gunther & Shirley Company, a Nebraska Corporation, and Rohl-Connolly Company, a Nevada Corporation, to constitute a joint venture and to act both jointly and severally, under the name of Hawaiian Constructors, as contractor in the performance of the said Contract.

THIS SUPPLEMENTAL AGREEMENT shall be subject to the favorable recommendation of the Chief of Engineers and approval of the Under Secretary of War.

IN WITNESS WHEREOF, The parties hereto have executed this agreement as of the day and year first above written.

(RESTRICTED)

(Stamped :) Office Chief of Engineers. June 30, 1941.

600.1 (Hawaiian Dept. Airfields)

Contract No. W-414-eng-602.

SUPPLEMENTAL AGREEMENT No. 4

This supplemental agreement entered into this nineteenth day of June, 1941, by and between the UNITED STATES OF AMERICA, hereinafter called the Government, represented by the contracting officer executing this agreement, and Hawaiian Constructors, consisting of W. E. Callahan Construction Company, a Nebraska corporation, Gunther & Shirley Company, a Nebraska corporation; Rohl-Con Company, a Nevada corporation; and Ralph E. Woolley, an individual trading as Ralph E. Woolley of Honolulu, T. H.; constituting a joint venture and acting jointly and severally; hereinafter called the contractor, WITNESSETH That:

WHEREAS, On the 20th day of December, 1940, the Government and Hawaiian Constructors entered into Contract No. W-414-eng-602, for the construction of works of National Defense at locations within the Hawaiian Islands, herein referred to as the said contract, and

WHEREAS, On the dates shown below the parties hereto executed supplemental agreements modifying said contract, in order to provide for additional construction work and services, and to increase the number of coadventurers acting as contractor, as follows:

First supplemental agreement, dated March 22, 1941,

Supplemental agreement No. 2, dated May 5, 1941, and

Supplemental agreement No. 3, dated May 22, 1941, and

WHEREAS, It is found advantageous and in the best interests of the United States to further modify the said contract (a) in conformity with the direction of the Under Secretary of War as published in Circular Letter (Finance No. (Contracts No. 45), dated May 16, 1941, subject, "Requirement for Cost-Plus Fixed Fee Contracts," and (b) so that construction work and services, particularly hereinafter described, in addition to that covered by the said con

and supplemental agreements thereto, may be performed for the benefit of the National Defense; and

WHEREAS, The work and services to be performed by this supplemental agreement, hereinafter referred to as supplemental agreement No. 4, are authorized by, are for the purposes set forth in, and are chargeable to, Procurement Authorities, which, with the available balances, are listed below:

(a) Appropriation 211/20540 (C of BU & A), 1941-1942, Procurement Authority No. Eng-812 P 99 A-0540-12, the available balance of which is \$23,900.00;

[2] (b) Appropriation 211/20540 (C of BU & A 1941-1942, Procurement Authority No. Eng-917 P 99 A-0540-12, the available balance of which is \$27,000.00;

(c) Appropriation 21X0540.035 (C of BU & A), No Year, Procurement Authority No. Eng-714 P 99 A-0540.035-N, the available balance of which is \$8,968.13;

(d) Appropriation 210/10535 (B & QA), 1940-1941, Procurement Authority No. QM 2611 P 99 A 0535-01, the available balance of which is \$2,046.00;

(e) Appropriation 211/20540 (C of BU & A), 1941-1942, Procurement Authority No. Eng-991 P 99 A-0540-12, the available balance of which is \$215,300.00; and

(f) Second Supplemental Appropriation Act, September 9, 1940, Procurement Authority No. Eng-820 P 99 A-(0540).152-N, the available balance of which is \$600,000.00 cash and in addition \$1,400,000.00 in contract authorization.

NOW, THEREFORE, The said contract is hereby modified in the following particulars, but in no others;

1. The contractor agrees, for and in consideration of the fixed fee being increased as hereinafter provided, to perform the work and services (in addition to that covered by the said contract as modified by prior supplemental agreements) described in Schedules "A" to "G", inclusive, attached to and made a part hereof.

2. It is estimated that the cost of all the work and services covered by this supplemental agreement is \$2,080,770.00, exclusive of the contractor's fee for said work and services. The estimated cost set forth above is based upon field data now available and is agreed to by both the Government and the contractor.

3. The fixed fee stated in said contract and in said contract as modified and amended shall be increased in the amount of \$50,915.00, which shall cover all the work and services described in said contract and in said contract as modified and amended, irrespective of the cost thereof. If the funds now available are not sufficient to perform all the work and services described in said contract and in said contract as modified and amended and if any additional sum or sums become available, the contractor may be required to perform any work and services described in said contract and in said contract as modified and amended which may be necessary to complete any of the said work and services, for which the contractor shall be paid no additional fee: Provided, however, that there shall be no adjustment in the amount of the fixed fee as provided in the said contract, or in the said contract as modified and amended because of any errors and or omissions made in computing the estimated cost of the construction of the work under the said contract, or under the said contract as modified and amended, or where the actual cost varies from the estimated cost of the work provided in the said contract, or in the said contract as modified and amended.

4. The work shall be done in conformity with the provisions of the War Department Construction policy dated June 15, 1940, File AG 600-12 (6-15-40) M-D-M, and its supplements.

5. Work to be done shall be undertaken immediately after receipt by the contractor of notice to proceed. The work shall be prosecuted with [3] faithfulness and energy and shall be completed as follows:

(a) Construct two (2) chapels on the Island of Oahu, T. H., as described in Schedule "A", within sixty (60) calendar days from date of notice to proceed.

(b) Construct one (1) paint shop and storage building on the Island of Oahu, T. H., as described in Schedule "B", within sixty (60) calendar days from date of notice to proceed.

(c) Construct two hundred ten (210) wooden tent floors on the Island of Oahu, T. H., as described in Schedule "C", within forty-five (45) calendar days from date of notice to proceed.

(d) Furnish and install shelving in Air Corps Barracks Building on Island of Oahu, T. H., as described in Schedule "D", within forty-five (45) calendar days from date of notice to proceed.

(e) Construct one (1) Armament, Instrument Inspection and Adjustment Building on the Island of Oahu, T. H., as described in Schedule "E", within one hundred and twenty (120) calendar days from date of notice to proceed.

3060 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(f) Construct protective fencing and provide floodlighting for the Hawaiian Air Depot, Hickam Field, Island of Oahu, Territory of Hawaii, as described in Schedule "F", within sixty (60) calendar days from date of notice to proceed.

(g) Construct bombproof underground storage for 200,000 barrels of reserve aviation gasoline on the Island of Oahu, Territory of Hawaii, as described in Schedule "G", within two hundred (200) calendar days from date of notice to proceed.

6. Minor changes in structures and facilities as may be found necessary in the interest of economy or required due to climatic conditions may be directed by the contracting officer without additional compensation to the contractor.

7. The work as described in Schedules "A" to "G", inclusive, shall be in accordance with the applicable paragraphs of Standard Specifications attached to and made a part of the aforementioned Supplemental Agreement No. 2.

THIS SUPPLEMENTAL AGREEMENT shall be subject to the favorable recommendation of the Chief of Engineers and approval of the Under Secretary of War.

[4]

SCHEDULE "A"

Construction of two (2) chapels at Air Corps stations to be located on the Island of Oahu, in the Territory of Hawaii, as directed by the Contracting Officer.

The chapels are to be mobilization-type buildings and construction thereof will be in general conformity with Quartermaster Corps drawings Nos. 700-1 to 1809, inclusive, and No. 643-100, Regiment Chapel.

SCHEDULE "B"

Construction of one (1) paint shop and storage building on the Island of Oahu, in the Territory of Hawaii, as directed by the Contracting Officer.

The building shall be constructed in accordance with plans to be furnished.

SCHEDULE "C"

Construction of two hundred ten (210) wooden tent floors, each size 16' x 16', at Air Corps station(s) on the Island of Oahu, in the Territory of Hawaii, as directed by the Contracting Officer.

The work shall conform to plan to be furnished.

SCHEDULE "D"

Furnishing and installation of shelving in 600-Man Barracks Building at Air Corps station on the Island of Oahu, in the Territory of Hawaii, as directed by the Contracting Officer.

The work shall conform to plan(s) to be furnished.

SCHEDULE "E"

Construction of one (1) Armament, Instrument Inspection and Adjustment Building at Air Corps Station on the Island of Oahu, in the Territory of Hawaii, as directed by the Contracting Officer.

The work shall conform to plans and specifications to be furnished.

[5]

SCHEDULE "F"

Construction of protective fencing and floodlighting for Hawaiian Air Depot, Hickam Field, Territory of Hawaii.

The fencing and floodlighting shall conform to drawings and specifications to be furnished. The work shall consist of an eight-foot chain link fence, together with necessary poles, gates, floodlights and wiring.

SCHEDULE "G"

Construction of bombproof underground storage for 200,000 barrels of reserve aviation gasoline on the Island of Oahu, in the Territory of Hawaii.

The work shall conform to drawings as follows and shall be of cut and cover type.

U. S. E. D. Honolulu District Drawings F-26/1 F-26/6 F-26/9 F-26/10

The work consists of the following items:

- (1) Excavation: Approximately 152,000 cu. yds.
- (2) Backfill: Approximately 92,000 cu. yds.
- (3) Concrete: Approximately 23,000 cu. yds.

- (4) Reinforcing steel: Approximately 5,500 lbs.
- (5) Structural steel: Approximately 1,660 tons.
- (6) Steel tanks installed: 4 50,000-barrel tanks.
- (7) Construction of two ethyl blending plants.
- (8) Construction of access road, railway siding, necessary fuel piping, valves, etc., service pipe line and pumping equipment to road and railroad, electric power and lighting system, fire protection equipment, water supply system, and such other minor appurtenances as are necessary to the proper functioning of the installation but not including piping and pumping equipment from deck to site of installation.

(9) Disposal of excess spoil material and concealment of the site as directed by the contracting officer.

[6] IN WITNESS WHEREOF, The parties hereto have executed this agreement as of the day and year first above written.

ARMY PEARL HARBOR BOARD EXHIBIT No. 47

[Copy]

WAR DEPARTMENT,
HEADQUARTERS, ARMY SERVICE FORCES,
Washington, D. C., May 5, 1943.

SPAAW 201-Wyman, Jr., Theodore
Subject: Reprimand Under 104th Article of War.
To: Commanding General.
Eighth Service Command.

1. It is directed that you administer a reprimand under the 104th Article of War to Colonel Theodore Wyman, Jr., now a member of your command, substantially as follows:

a. Pursuant to instructions of the Commanding General, Army Service Forces, War Department, you are hereby reprimanded under the 104th Article of War for your failure to enforce safety precautions in connection with the field operations of the Miller Construction Company and the Oman-Smith Company, which failure was in part responsible for the explosion and fire which occurred at Dawson Creek, British Columbia, on February 13, 1943.

b. Should you prefer to stand trial, under the provisions of the 104th Article of War rather than accept this reprimand, you will so indicate, by indorsement hereon, within three (3) days following receipt hereof. Should you elect to accept this reprimand in lieu of trial, no action other than to acknowledge receipt hereof need be taken by you.

2. Advise this officer of your action.

By command of Lieutenant General SOMERVELL:

/s/ Madison Pearson,
MADISON PEARSON,
Brigadier General, G. S. C.,
Deputy Chief of Administrative Services.

WAR DEPARTMENT,
Headquarters Army Pearl Harbor Board
7 September

Memorandum to: Commanding General, USAFPOA.
Subject: Documentary Evidence.

1. It is requested that you make available to the Board, named 1 Department, to ascertain and report the facts relating to the attack made Japanese armed forces on the Territory of Hawaii on December 7, 1941, following documents, to wit:

a. All data in whatever form, relating to the Japanese-American received by the Hawaiian Department from the War Department during period January 1, 1941 to December 7, 1941; including movements of the Japanese armed forces and probable Japanese actions.

b. Similar data received by the Hawaiian Department during the same from and through the Navy.

c. Similar data received by the Hawaiian Department during the same from the Federal Bureau of Investigation.

d. All reports relating to Japanese activities, both military and civil, in G-2 of the Hawaiian Department to the Commanding General, Hawaiian Department, or others for said period, including G-2 summaries.

e. All messages taken from the Japanese Consulate on December 7, 1941 subsequent to said date.

f. Documents captured from Japanese invading forces on or about December 7, 1941.

g. All correspondence or other writings relating to the alert of June 1

h. All orders for close-in reconnaissance by aircraft or other agencies during period January 1, 1941 to December 7, 1941.

i. Secret report of Colonel Capron describing damage to structures in Hawaii on December 7, 1941.

j. Letter of transmittal to War Department of SOP of November 5, 1941

k. Report of Colonel Berquist upon his return from school in 1941 in which discussed air warning service, stations and information centers, and general employment of Radar.

[2] l. Memorandum of General Staff asking study of air situation in Hawaii

m. Pattern of bombings by Japanese.

n. Copy of record of trial against Kuhn in Hawaii.

o. Herron's Field Order #1.

p. Complete file of O.N.I. of message taken by F.B.I. from Hawaii R.C.A. file

q. Army's A-B lists in 1941.

r. Navy's estimates based on presence of carriers in the Marshalls.

2. It has come to the attention of the Board that an exchange of information by the O. N. I. and G-2, Hawaiian Department was made during said period by means of teletype. Are there any records of these exchanges?

3. Procedure for obtaining the described documents desired to be used as evidence by the Board can be agreed upon.

George Grunert
GEORGE GRUNERT,
Lieutenant General
President

ARMY PEARL HARBOR BOARD EXHIBIT No. 50A

[3] (Basic: Memorandum from War Department, Headquarters Army Pearl Harbor Board, dated 7 September 1944, subject: Documentary Evidence)

1st Ind.

R

HEADQUARTERS USAFPOA, APO 958,
13 September 1944.

To: President, Army Pearl Harbor Board, APO 958.

1. In compliance with request in basic letter, a search was made of the files of this headquarters for documentary evidence as listed. Items in sub-paragraphs 1 c, d, e, f, p, q, r, and paragraph 2 were sought by Colonel Fielder, AG-2. The remaining items were sought by Lt Col Hain, Asst AG of S, AG-2.

2. Although a thorough search of files was made, the following were not located:

a. Letter of transmittal to War Department of SOP of November 5, 1941. The only written evidence that it *might* have been sent to the War Department was the interstaff routing slip which showed the date of publication as 8 November 1941. Apparently no record was kept because the SOP was classified only "Restricted." (Paragraph 1 j, basic.)

b. Colonel Berquist's report was not found. (Paragraph 1 k, basic.)

c. Memorandum of General Staff asking study of air situation in Hawaii was not found. However, what is believed to be a reply to this memorandum was found. (Paragraph 1 l, basic.)

d. Pattern of bombings by Japanese was not found. (Paragraph 1 m, basic.)

e. Navy's estimates based on presence of carriers in Marshalls was not found; at least none were found with any specific reference to these carriers. (Paragraph 1 r, basic.)

For the Commanding General:

Robert W. Hain,
ROBERT W. HAIN,
Lt. Col., G. S. O.,

- (f) Track Chart of Japanese Carriers—November 1941 to April 1942; reproduced from Japanese map of Pacific Area, captured at New Georgia early June 1943. Comsopac S-1865, #643. (Copy attached herewith).

ALL TIMES AND DATES UNLESS OTHERWISE SPECIFIED ARE JAPANESE TIMES AND DATES: OUR DECEMBER 7 IS JAPANESE DECEMBER 8; TIME DIFFERENCE BETWEEN TOKYO AND HAWAIIAN TIME WAS FOUR AND ONE HALF HOURS.

1. Prisoner reference (a) states SHOKAKU departed OITA (on BUNGO CHANNEL) 20 November arriving TANKAN BAY, ETOROFU ISLAND about 25

November, departing there 27/28 November taking a northerly route south of ALEUTIANS and on the night of 5 December turning south, planes flying of 0200 Japanese time (0630 Hawaiian time) for attack on Pearl Harbor.

[2] 2. Prisoner of war, reference (b), states departed SASEBO about November and arriving TANKAN BAY 20 November, that SORYU arrived November, SHOKAKU and ZUIKAKU 17 November and AKAGI, HIRYU, cruiser of the TONE Class, HIYEI and KIRISHIMA arriving TANKAN I prior 20 November. Also present at TANKAN BAY were three oil tankers, supply ship, and three submarines. The departure from TANKAN BAY 1400, 22 November, when they were joined by three submarines. After departing TANKAN their course was east until 4 December, when course was changed south. After 4 December, the tankers and supply ship were no longer seen. The night of 7 December speed was increased to 26 knots and submarines proceeded on independent patrols in the vicinity of the Task Force. Planes took off at 0100 Japanese time (0530 Hawaiian time). Note: It is believed that prisoner has confused his departure from the Japanese Empire and TANKAN BAY.

3. A composite of the interrogation of thirty-four prisoners from the HIJ captured after MIDWAY (reference (c)) states the HIRYU departed 10 November 1941 from SASEBO for rendezvous with the Hawaiian Striking Force, consisting of CARDIV ONE, TWO and FIVE (AKAGI, KAGA, SORYU, HIRYU, ZUIKAKU and SHOKAKU); CRUDIV EIGHT (TONE, CHIKUMA); and BATDIV THREE (HIYEI, KIRISHIMA); and DESRON ONE with ABUKUMA as flagship, at an anchorage either called TANGAN or TANKAN BAY in the KURILES; possibly on ETOROFU ISLAND. It was stated that island was barren, without even the vestige of a village. A stop was made at SAEKI for upkeep enroute. Departed TANKAN BAY where they had been anchored for two or three days on 25 or 26 November with the above Striking Force and carried out the attack on Hawaii on December 8 (MINUS NINE TIME).

4. This prisoner of war (reference (d)), who was confidential clerk on Staff of Admiral Yamamoto, and who helped write the stencils to mimeograph the order for the war against America and the Hawaiian Striking Force's activities, has stated in effect:

(a) The Striking Force to assemble in home water bases and depart 3 days (X Day was later set as 8 December, TOKYO TIME), which would be about 22 November as date for departure from home bases.

(b) That this force was to proceed and attack the Pearl Harbor base of the Pacific Fleet by way of TANKAN BAY. The Hawaiian Striking Force was to maintain strict radio silence and receive all traffic via TOKYO Number 1 broadcast.

(c) That deception measures were to be taken in Japan, to give the impression that the Main Force of the Japanese Navy remained in home waters.

5. The composition of the Striking Force (reference (e)), was obtained from a call sign card removed from a Japanese plane salvaged from the water near Pearl Harbor on 9 December; it showed CARDIV ONE, TWO and FIVE; CRUDIV EIGHT; BATDIV THREE and DESRON ONE as subordinate commands under command of First Air Fleet. These units were also listed by name as: Air craft carriers: AKAGI, KAGA, HIRYU, SORYU, SHOKAKU, ZUIKAKU; Battleships: HIYEI and KIRISHIMA; Heavy Cruisers: TONE and CHIKUMA; Light Cruiser ABUKUMA.

6. The track of Japanese aircraft carriers from November 1941 to April 1942 (reference (f)), shows carriers departing ETOROFU ISLAND east coast of the geographical location of TANKAN BAY on 27 November 1941 and proceeding due east to about longitude 178 west; thence a southeast course to a position roughly north of OAHU arriving December 8, 1941.

SUMMARY

7. With the exception of a difference in dates given by one prisoner of war (paragraph 2), there is an overwhelming weight of evidence that the Japanese Striking Force assembled in home waters during November and departed from the BUNGO CHANNEL area about 22 November, proceeding to TANKAN BAY (sometimes called HITOKAPPU BAY). Departing TANKAN BAY on 27 November, this Task Force, consisting of six (6) aircraft carriers, two (2) fast battleships, two (2) heavy cruisers, and one (1) light cruiser and some destroyers,

proceeded on an easterly course (to avoid being sighted by shipping) and then headed for a position to the north of OAHU, arriving there on the early morning of 8 December, Japanese time, or 7 December, Hawaiian Time.

8. TANKAN BAY does not appear on ordinary maps or charts, but does appear in a series of maps of the Japanese Empire in the Japanese National Encyclopedia, in the same position normally shown for HITOKAPPU BAY. It is highly improbable that several prisoners of war in widely separated areas would choose the name of a place unfamiliar to foreigners if they were attempting to give misleading information. It is believed that the track of the Japanese carriers (reference (f)), which shows departure from the BUNGO CHANNEl area (no departure date shown) to ETOROFU ISLAND, and departure therefrom on 27 November, confirms beyond doubt the statements of prisoners.

(Penciled note:)

The foregoing supplements my testimony given on 11 Sept.

/s/ C. H. McMorris,
Rear Admiral U. S. N.,
Chief of Joint Staff,
Cincpac and Cincpac.

(The remaining portion of Exhibit No. 51 is a map reflecting the track of Japanese aircraft carriers—November 1941–April 1942—and will be found reproduced as Item No. 59, EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 52

[1]

EXHIBIT No. 52 IN EVIDENCE

TERRITORY OF HAWAII,
OFFICE OF THE MILITARY GOVERNOR,
Iolani Palace, Honolulu, T. H., 7 November 1942.

IN THE MATTER OF—THE CONFINEMENT OF BERNARD JULIUS OTTO KUEHN, A PERSON
CONVICTED OF VIOLATING SECTIONS 31, AS AMENDED, 32, AND 34, TITLE 50, UNITED
STATES CODE ANNOTATED.

ORDER

THE MILITARY GOVERNOR OF THE TERRITORY OF HAWAII:

To: The Provost Marshal, Hawaiian Department, Fort Shafter, T. H.; and, The
Warden of The United States Penitentiary, Leavenworth, Kansas.

1. Whereas, the above named Bernard Julius Otto Kuehn, duly was convicted on February 21, 1942, by the Military Commission duly appointed for the Territory of Hawaii by the Military Governor of the Territory of Hawaii, of the following charges, to wit:

Charge I: Violation of Section 34, Title 50, United States Code Annotated; unlawfully conspiring to transmit information affecting national defense.

Specification: BERNARD JULIUS OTTO KUEHN, OTOJIRO OKUDA and NAGAO KITA, at Honolulu, Island of Oahu, Territory of Hawaii, during the period commencing on or about the 20th day of November, 1941, up to and including the date of the filing of this charge, did conspire, combine, confederate and agree together and with each other and with other persons whose names are unknown, to commit an offense against the United [2] States of America, to wit, the offense of unlawfully and feloniously, with intent and reason to believe that it was to be used to the injury of the United States and to the advantage of a foreign nation, namely Japan, communicating, delivering and transmitting, and attempting to communicate, deliver and transmit, to a foreign government, to wit, the Imperial Japanese Government, documents, codes, sketches, plans, lists and writings relating to the national defense and the movements and positions of the several units of the United States Fleet (Section 32, Title 50, U. S. C.), that is to say that during the period and at the place above set forth BERNARD JULIUS OTTO KUEHN, OTOJIRO OKUDA and NAGAO KITA did conspire, combine, confederate and agree together and with each other and with other persons whose names are unknown, with the intent and reason to believe

that the information to be transmitted relative to national defense was to be used to the injury of the United States and to the advantage of a foreign nation, namely Japan, to communicate, deliver and transmit to a foreign government, namely the Imperial Government of Japan, certain information relative to national defense and to the movements and positions of the several units of the United States Fleet by means of a plan and system of signals which were prepared by BERNARD JULIUS OTTO KUEHN and submitted to OTOJIRO OKUDA at the Japanese Consulate at Honolulu, Island of Oahu, Territory of Hawaii, which would give a concise method of transmitting to the Imperial Government of Japan and its naval and military representatives information relative to national defense and the movements and locations of the battle fleet, scouting fleet, aircraft [5] carriers and other units of the United States Fleet at Pearl Harbor, Island of Oahu, Territory of Hawaii.

That thereafter and during the existence of said conspiracy one or more said conspirators hereinafter mentioned by name did the following overt act in furtherance of and to effect the object of said conspiracy aforesaid:

OVERT ACTS

(1) At Honolulu, T. H., on or about the 28th day of November, 1941, BERNARD JULIUS OTTO KUEHN did make a trip to the Navy Yard, Pearl Harbor, Territory of Hawaii.

(2) At Honolulu, T. H., on or about the 29th day of November, 1941, BERNARD JULIUS OTTO KUEHN did prepare a plan for transmittal of information relative to the United States Fleet.

(3) At Honolulu, T. H., on or about the 30th day of November, 1941, BERNARD JULIUS OTTO KUEHN did deliver to OTOJIRO OKUDA at the Japanese Consulate, 1714 Nuuanu Avenue, Honolulu, T. H., a plan for the transmittal of information relative to the movements and positions of the several units of the United States Fleet.

(4) At Honolulu, T. H., on or about the 30th day of November, 1941, OTOJIRO OKUDA advised BERNARD JULIUS OTTO KUEHN at the Japanese Consulate that his plan for transmittal of information relative to the United States Fleet was too complicated, and instructed him to prepare a simpler plan.

(5) At Honolulu, T. H., on or about the 1st day of December, 1941, BERNARD JULIUS OTTO KUEHN did prepare a plan for the transmittal of information relative to the movements and positions of the several units of the United States Fleet.

(6) At Honolulu, T. H., on or about the 2nd day of December, 1941, BERNARD JULIUS OTTO KUEHN did deliver to OTOJIRO OKUDA at the Japanese Consulate, 1714 Nuuanu Avenue, Honolulu, T. H., a plan for transmittal of information relative to the United States Fleet units and movements.

(7) At Honolulu, T. H., on or about the 2nd day of December, 1941, BERNARD JULIUS OTTO KUEHN did deliver to OTOJIRO OKUDA at the Japanese Consulate, 1714 Nuuanu Avenue, Honolulu, T. H., a list showing the number and names of naval vessels in Pearl Harbor, T. H.

(8) At Honolulu, T. H., on or about the 3rd day of December, 1941, NAOKI KITA did transmit a plan and system of signals previously prepared by BERNARD JULIUS OTTO KUEHN to the Foreign Minister of the Imperial Japanese Government at Tokio, Japan (Section 34, Title 50, U. S. C.)

CHARGE II: Violation of Section 31, as amended, Title 50, United States Code, Annotated; unlawfully obtaining information affecting national defense.

Specifications: In that BERNARD JULIUS OTTO KUEHN did, at Pearl Harbor, Island of Oahu, Territory of Hawaii, on or about November 28, 1941, for the purpose of obtaining information respecting the national defense, with intent and reason to believe that the information to be obtained was to be used to the injury of the United States and to the advantage of a foreign nation, namely, Japan, unlawfully and feloniously obtain information concerning matters connected with the national defense, to wit, battleships, aircraft carriers, cruisers, destroyers, submarines, owned and constructed by the United States and under the control of the United States [5] and of its officers and agents, in violation of Section 31, as amended, Title 50, United States Code, Annotated.

Charge III: Violation of Section 32, Title 50, United States Code Annotated; unlawfully disclosing information affecting national defense.

Specification: In that BERNARD JULIUS OTTO KUEHN did, at Honolulu, Oahu, Territory of Hawaii, on or about December 2, 1941, with intent and reason to believe that it was to be used to the injury of the United States and to the advantage of a foreign nation, namely, Japan, unlawfully and feloniously communicate, deliver, transmit, and attempt to communicate, deliver and transmit, to a foreign government, namely, The Imperial Government of Japan, and to the military and naval forces within a foreign country, namely, Japan, and to representatives, officers, agents, employees, subjects and citizens thereof, information relating to the national defense of the United States, to wit, information relating to and concerning vessels, to wit, United States battleships, aircraft carriers, cruisers, destroyers, and submarines connected with the national defense, at Pearl Harbor, Oahu, Territory of Hawaii, their positions, locations, and movements in violation of Section 32, Title 50, United States Code Annotated.

2. And, whereas, the said Bernard Julius Otto Kuehn duly was sentenced upon said conviction of said charges on said February 21, 1942, by said Military Commission, to be shot to death with musketry;

3. And, whereas, on October 26, 1942, the said sentence duly was approved by the undersigned Military Governor of the Territory of Hawaii but was commuted to [6] confinement at hard labor for fifty (50) years; and whereas it appears necessary to the undersigned, as the said Military Governor of the Territory of Hawaii, that the said Bernard Julius Otto Kuehn be confined in The United States Penitentiary, Leavenworth, Kansas, to serve said sentence as commuted as aforesaid;

4. Now, therefore, you, the said Provost Marshal, Hawaiian Department, Fort Shafter, Territory of Hawaii, hereby are ordered to deliver, or cause to be delivered, the said Bernard Julius Otto Kuehn, to the Warden, The United States Penitentiary, Leavenworth, Kansas, for the purpose of confining him, the said Bernard Julius Otto Kuehn, in the said United States Penitentiary at Leavenworth, Kansas, to satisfy the said sentence of confinement at hard labor for fifty (50) years so imposed by the said Military Governor of the Territory of Hawaii. **HEREOF FAIL NOT.**

THE MILITARY GOVERNOR OF THE TERRITORY OF HAWAII:

To:

The Warden of The United States Penitentiary, Leavenworth, Kansas.

Bernard Julius Otto Kuehn, duly having been convicted and sentenced in the manner and form aforesaid,

You hereby are ordered to receive the said Bernard Julius Otto Kuehn in The United States Penitentiary at Leavenworth, Kansas from the said Provost Marshal, Hawaiian Department, Fort Shafter, Territory of Hawaii, and safely keep and confine him, the said Bernard Julius Otto Kuehn, in the said United States Penitentiary and cause the said sentence of confinement at hard labor for fifty (50) years [7] to be fully executed. **HEREOF FAIL NOT.**

Re signals I wish to simplify communications as follows.

1. Code (following 3 section 8 line table)

Battle force, including scouting force, are about to put to sea—

1. Several aircraft carriers plan to put to sea.
2. All Battle force has sailed 1st-3rd dates Inc.
3. Several aircraft carriers have sailed (1st to 3rd).
4. All aircraft carriers have sailed (1st to 3rd).
5. All battle force have sailed, 4th-6th dates Inc.
6. Several aircraft carriers have sailed. (4th to 6th).
7. All aircraft carriers have sailed. (4th to 6th).

2. Signal

Light in Lanikai beach house at night -----

One light from 8 pm to 9 pm indicates "1". From 9 pm to 10 pm indicate "2". The below signals until midnight, in order indicate 3 and 4. Two lights according to the time, indicate 5, 6, 7, 8.

[9] When not in accordance with (lights) above 1 full automobile light and one half light indicate 1, 2, 3, 4. Two full lights indicate 5, 6, 7, 8.

2. On the Lanakai coast during daytime from 8 am until noon every ho piece linen cloth (sheet) indicates 1, 2, 3, 4. Two pieces indicate 5, 6, 7, 8.

3. In Lanakai bay during daytime in front of harbor (Offing) a star with one star on sail indicates 1, 2, 3, 4; a star and "III" indicates 5, 6, 7, 8.

4. Light in dormer window of Kalama house from 7 pm to 1 am every indicates 3, 4, 5, 6, 7, 8.

5. "KGMB Want Ads" advertisement 9.45 am

(A) A chinese rug etc., for sale—apply P. O. box 1476 indicates 3.

(B) A complete chicken farm etc., apply as above indicates 4 or 7.

(C) Beauty operator wanted—same—indicates 5 or 8.

In the event that in accordance with one of 3 items written above from (a signal or radio message is impossible or Maui Island at a point located bet the lower road six miles north of Kula Sanatorium and Haleakala road we can be watch from the sea to the south west and south east of Maui, until receipt of the signal "EXEX" this (the following) will be repeated for several days: A small fire on the high peak.

7 pm-8 pm indicates 3 or 6; 8 pm-9 pm indicates 4 or 7; 9 pm-10 pm indicates 5 or 8.

3072 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[14]

TERRITORY OF HAWAII

OFFICE OF THE MILITARY GOVERNOR

Iolani Palace, Honolulu, T. H.

UNITED STATES OF AMERICA vs BERNARD JULIUS OTTO KUEHN

The statement of Bernard Julius Otto Kuehn made to the investigating Captain James W. Chapman, Air Corps, at the Immigration Station, local the City of Honolulu, T. H., was, in effect, as follows:

Mr. Kuehn stated that his previous detailed statements to the investigation for the Federal Bureau of Investigation were substantially true and correct that he thoroughly understood his constitutional rights relating to making statements to be used in any trial which might result from the investigation. Kuehn was at that time again advised of his rights by Captain Chapman.

States that the only reason for his original visit to Japan in about 1934 to undertake a study of the Japanese language, art, and history, with a to later serving as an instructor in Japanese art and history. He states on that trip he met Baron Kycoga who was an official of the Japanese government and that Baron Kycoga on one occasion during his visit to the Japanese Islands, which lasted approximately three months, suggested to him that it would be beneficial both to the Japanese government and to Mr. Kuehn if he could arrange to secure and transmit certain [15] information of a great value to the Japanese government, but he states that he refused to enter into such an agreement with Baron Kycoga. He states that this matter has never been mentioned again by either of them. He thinks that it may be possible that Baron Kycoga may have later contacted the Japanese Consul at Honolulu and suggested that the Consul renew the offer, but that he does not know to be a fact, nor did any member of the Japanese Consulate ever refer directly to Baron Kycoga.

He says that his wife's son, Leopold Kuehn, is now residing in Berlin, Germany, and occupies some kind of official capacity with the German government. He states that he and his wife had, since 1938 until about June of 1941, been sending a small monthly allowance of money to Leopold, together with a customary Christmas present, also in money, and occasional presents of food. He states that because of the so-called "freeze" order of the United States government effective about last May or June, he was unable to send further money to Leopold. He says that no money has gone forward to him and that in October or the early part of November he and his wife decided to again attempt to send Leopold a Christmas present of \$500 in cash if they could find a convenient way for transmitting the money. He says they first attempted to send this through the Bishop National Bank and that he talked to Mr. Lowe in the bank concerning it, but that Mr. Lowe told him that it was impossible to do so. He says he later had some correspondence with some person in South America and attempted to send the money that way, but these negotiations fell through. At that time he thought [16] that the way he could get the money to Germany would be to go to the Japanese Consulate and see if the money could be sent, possibly through the Yokahama Specie Bank and that with this in view he visited Mr. Otojiro Okuda at the Japanese Consulate.

On one of his visits to the Consulate at which the transmission of the money was discussed, he says that Mr. Okuda told him that they would attempt to transmit the money if Mr. Kuehn would agree to secure for them certain information relating to the strength and movements of the United States fleet in the Hawaiian waters. He says that he told Mr. Okuda he would secure this information for him but at the time he said this he had no intention of carrying out his promise, but was merely attempting to get Mr. Okuda to take care of the money for him and he felt this was the only way it could be done. He states that Mr. Okuda suggested that he prepare a certain code for the sending of signals by lights from his house in Kalama and also from his beach, together with an alternate set of signals by means of hanging a sheet on a clothesline during the daylight hours and with certain other alternate signals. He states that the original code which he submitted was rejected by Mr. Okuda and that the Japanese Consulate as being too complicated, and that he then prepared a simplified code. He states that he never at any time used any signals to transmit any information. He states that the meetings with

Okuda occurred during the last two or three days of November and the first two or three days of December, 1941.

He states that about the 1st or 2nd of December, 1941, [17] he prepared a list purporting to represent the strength of the United States fleet in Hawaiian waters in various types of ships and that he delivered this list to Mr. Okuda, but he states that the figures used therein were purely fictional except for such general information as he had concerning the size of the fleet from the reading of newspapers and that if any of the figures should be correct, that this is merely a coincidence. He says that he made a trip to Pearl City and, of course, drove along the main highway of Pearl Harbor two or three days before he submitted this list, but that he made no effort at that time to observe or count the number of ships in harbor.

He states that all of the money which he has received from various foreign sources including Holland and Japan represented income from the sale of certain property which he formerly owned in Germany.

/s/ James W. Chapman,
JAMES W. CHAPMAN,
Captain, Air Corps.

FEBRUARY 5, 1942.

[18]

HONOLULU, T. H., January 3, 1941.

I, Otto Kuehn, make the following voluntary statement to J. Sterling Adams and George E. Allen, whom I know to be Special Agents of the Federal Bureau of Investigation and who have informed me that I cannot be required to make a statement, further that anything I might say can be used against me in court.

In July of 1936, when I made a trip to Japan to study the Japanese language, on a Japanese boat I met a Baron KYOGOKU who was returning from England. KYOGOKU told me that he was one of the old noble Japanese families and was connected with the MITSUI family in Japan. Prior to his return from England, KYOGOKU had spent some time in Germany as well as England and he speaks both English and German fluently. When we left the boat in Yokohama, KYOGOKU asked me my address where I would be stopping and I told him the Imperial Hotel, Tokyo. He then stated that he would see me later on. Two or three days later KYOGOKU called on me at the Imperial Hotel. We spent the entire afternoon together, KYOGOKU showing me around Tokyo and I afterwards invited him for dinner at the Imperial Hotel.

I had previously told KYOGOKU that I had served in the German Navy as an officer during the World War and had recounted some of my experiences to him during that time. While we were eating dinner KYOGOKU began very tactfully to question me as to whether I would from time to time furnish him with information about Honolulu. This information, or [19] whatever I was asked to do, was to be for the Japanese Government. I refused to have anything to do with the idea and KYOGOKU never mentioned the question any more. Although KYOGOKU never again attempted to get me to give information to the Japanese Government, he visited me quite often at the hotel and took me to his castle near Gifu and he also took me cormorant fishing near Gifu. We also went to the theater and some other places and had dinner together on occasions. On all of these occasions KYOGOKU and I were alone with the exception of one time when Mr. SATO, a doctor in one of the Japanese hospitals whom I had previously met in Honolulu through Mr. KUNITOMO, was with me at a time when KYOGOKU called on me and KYOGOKU took us to dinner.

During this time KYOGOKU often told me that if there was any favor or anything that he could do for me, that all I need do was to ask him and he would do it. I left Japan about October, 1936, following about a three months visit. Before leaving Japan I obtained my quota visa for permanent residence in the United States. KYOGOKU went to the boat with me to bid me goodbye and at that time he reminded me that if he could ever do a favor for me he would be willing to do so. From the time we parted and when I returned to Honolulu, I heard nothing from KYOGOKU nor did I communicate with him in any way until 1940, with the possible exception of one Christmas card I received from him in 1936.

In the spring of 1940 my wife made a trip to Japan and returned with about \$6,000.00, which she had obtained from Dr. WILHELM HOMBERG. Following her return to Honolulu and about four weeks later, I received a letter from Dr. HOMBERG [20] advising me that it would be necessary for me to make

some arrangements to get any additional funds out of Japan; that it was becoming too difficult and dangerous for him to do this. About three weeks after receipt of Dr. HOMBERG'S letter, I wrote him suggesting that he contact Baron KYOGOKU, an old friend of mine, and that KYOGOKU could assist us in sending the money from Japan to Honolulu. With this letter I sent a Duden (German) grammar dictionary, similar to a Webster dictionary. At the same time I retained a duplicate dictionary in my possession. In the letter to HOMBERG I explained that in future communications I would use a number code which would indicate the number of the page and the word from the top of the page denoting the word intended, such as if the word "money" appeared on page 210 of the dictionary and was the sixth word down from the top, to indicate the word "money" I would send the numbers "210—6." This letter and its contents, the dictionary, were sent by me from Honolulu through Mr. KAI, purser on the KAMAKURA MARU, whom I had known in the past and who had previously brought presents from HOMBERG to my daughter. This message was sent through Mr. KAI during July, 1940.

I received no further communication from HOMBERG until September, 1940, at which time Mr. KAI telephoned me at my Kalama residence and asked me to meet him in front of the N. Y. K. office in Honolulu. I did so and he gave me a package of money containing \$10,000.00. At the same time Mr. KAI gave me a slip of paper which instructed me not to write to Dr. HOMBERG but rather to address my letters or communications to Baron KYOGOKU at a post office box number in Tokyo.

[21] During July, 1941, shortly after the freeze order went into effect and I was given to understand that each alien must submit a list of all their property, I contacted a Vice Consul at the Japanese Consulate, Honolulu, as Mr. KITA, the Consul, was not there. My purpose in doing so was to send a message to HOMBERG through KYOGOKU in the pre-arranged manner. I had prepared a brief message in the coded form mentioned above which in substance read: "Please send balance as soon as possible." At first the Vice Consul was suspicious and reluctant about sending my message but I explained as follows: I told the Vice Consul I was acting for the Japanese Government and that I had an important message to go through to Baron KYOGOKU, an important official in the Japanese Government at Tokyo. I told the Vice Consul that I needed the money before October 29 so that I could make my statement of property under the Foreign Funds Law and so that I could include this amount in my statement of property holdings as required by the foreign funds division in order that no questions would be asked at a later date relative to my source of income and how I came into possession of these monies. I intentionally gave him the impression that the money I was to get from Baron KYOGOKU was as compensation for services I had rendered for the Japanese Government. The Vice Consul agreed to send my message to KYOGOKU at this time.

After two or three weeks I came back and spoke to the Vice Consul and asked him if he had gotten an answer or any money as yet. He said no, so I again returned about three weeks later and he still said no. At that time I made arrangements with the Vice Consul that when he heard from [22] Japan regarding the money or got an answer that he should send me a post card to my box signed "JIMMIE" and he said for me not to come too often to the Consulate.

I did not contact the Consulate again nor did I receive any post card until one afternoon in the very end of October, just after the first Japanese boat came to Honolulu, a young Japanese man came to my home in Kalama and he told my son that he wanted to see me. I was in the back working in my garden. My son came and advised me he was there and I went around. He very brusquely asked me if I was OTTO KUEHN and I said "Yes," and he said, "I have something for you from Dr. HOMBERG," so I took him back to my little garden house where he gave me a package and a letter and I asked him if he had any other information for me and he said no. I opened the letter first and in the letter was a sheet of paper written in English asking if I had a short-wave transmitter and if I would be willing to make a test at a certain stated time which was on a night several nights later, on a certain wave length. This letter was typewritten and had no name on it. He gave me a sheet of paper and an envelope and I wrote on the sheet of paper that I was unable to make the test. I was quite nervous and put it in the envelope and gave it to him. I asked him if he knew what was in the package and he said no. I asked him if he wanted a receipt for the package and he said no, and he then left and I opened the package and counted the money. There were \$14,000.00 in the package, mostly in new \$100.00 bills, some \$20.00 bills. I think that this was a contact KYOGOKU was trying to make with me through this letter. As soon as he left I tore up the sheet of paper asking me to make this radio [2] test and burned it up.

It was about a week after this, and after the TAIYO MARU had sailed from Honolulu, that I again contacted the Japanese Consulate and talked to the Vice Consul and asked him to send some money to my son, LEOPOLD, in Germany. He said that he did not think it could be done and I suggested that he take it up with the Yokohama Specie Bank and I would come back two or three days later.

I went back and spoke to the Vice Consul about three days later, at which time he asked me what information I could give him about the United States Fleet and how many ships were in the harbor. He also asked me if I knew which part of the Pacific the United States Fleet usually went in on their maneuvers and how long they would be out. I told him that I could tell him how many ships there were in the harbor but that I could not tell him where the fleet was or when it would be back. He suggested that I work out a set of signals so that we could let the Japanese Fleet know how many ships were in the harbor, how many were prepared to leave and how many had already left for Japan. I told him that I could do all this.

I think that sometime between my previous contact and this time when he asked me for information about the fleet and suggested I prepare the set of signals that he had contacted KYOGOKU or someone in Japan about me. He appeared to me to be very glad to have me in his office and to have me do something for him.

About three or four days later I went back to the Japanese Consulate and showed him a set of signals containing [24] fifteen numbers, each one of which was to indicate a certain situation, as to how many ships were in the harbor, how many prepared to leave, how many had left, whether they were battle fleet, scouting fleet or aircraft carriers, exactly as previously told by me to Special Agents Adams and Allen in my statement of January 1, 1942. He told me at this time that the system was too complicated. During this visit KITA was present in the room. I did all of my talking with the Vice Consul who would speak in Japanese with KITA, the Consul, who would in turn speak in Japanese to the Vice Consul and then the Vice Consul would speak with me in English. They said that this system was too complicated and requested me to make a simpler method of signals, which I said I would do.

On Tuesday, December 2, 1941, I went back and took them two envelopes, one containing the money to be sent to my son and the other containing the simplified system of signals as described by me in my previous statement to Special Agents Adams and Allen dated January 1, 1942, and also I had written at this time some information as to the number and various types of ships in Hawaiian waters, as also set forth in that statement. I handed these two envelopes to the Vice Consul and he asked me to come in and said he would like to talk with me but I told him that it was all written out and there was no need to and turned around and went back to my car and went on into town.

[25] I have read the above statement consisting of five pages and certify that the same is true to the best of my knowledge and belief.

/s/ Otto Kuehn.
OTTO KUEHN.

WITNESSES:

/s/ J. Sterling Adams.
J. STERLING ADAMS,
Special Agent.
/s/ George E. Allen,
GEORGE E. ALLEN,
Special Agent.

*Federal Bureau of Investigation, United States Department of Justice,
Honolulu, T. H.*

[26]

HONOLULU, T. H., January 1, 1942.

I, OTTO KUEHN, make the following statement to J. STERLING ADAMS and GEORGE E. ALLEN, Special Agents of the Federal Bureau of Investigation, knowing same to be such. No threats, inducements or promises of any kind have been made to me. I make this statement freely and voluntarily, of my own free will.

I, OTTO KUEHN, was born on July 25, 1895, at Berlin, Germany. In April, 1913, I enlisted in the German Navy, as a Cadet, on the training cruiser, HERTHA, at Flensburg, Germany. After serving my training period, I was a midshipman on the German cruiser, BLUCHER, on which I served in the war until January 24, 1915, at which time I was captured by the British following a naval engagement in which the BLUCHER was sunk. I remained in a British camp, as a

prisoner of war, until January of 1918, at which time, during an exchange of prisoners, I was sent to Holland, where I remained for the duration of the war. Following the armistice, I returned to Berlin and studied architecture for three months. Following this, I again entered naval service, as a lieutenant aboard the WITTELSBACH, the mother ship of a minesweeper flotilla. I continued this navy service for an additional six months, following which I was released and placed in the Naval Reserve Corps. I then took up the study of medicine at the University of Berlin and at the University of Munich, continuing this for a period of one and one half years. During this time, 1920, I married my present wife, FRIEDEL, in Munich. Shortly before my marriage, [27] I purchased a 500-ton sail freighter, which operated between Finland and Rotterdam. My father had previously left me an inheritance of about \$50,000 cash, as well as a number of houses and government bonds. The sail freighter, known as the "ANTARES," ran on a reef, after which I sold the boat for about \$2,000.00.

In about 1921, I began working in Berlin with "SEIMENS," a machinery concern engaged in the manufacture of heavy motors, etc. I continued in this employment, serving as plant protection man, for about one year, following which I entered training with the same company to learn the business, and continued in this up until 1923. I then operated a manufacturing and distributing business of sparkling water and lemonade in Stettin, Germany, operating less than a year. Afterward, I returned to Berlin and was employed as an inspector with "POMMERSCHER MEIEREIEIEN", which business consisted in dairy products, etc. I continued in this work up until 1928, but before discontinuing this employment, about 1927, I entered into the coffee importing business in Berlin in partnership with one OVERBACK. My position was Sales Manager, and I continued the operation of the same business up until my departure from Germany in 1935. My first contact with the Nazi Party was attendance at a meeting called by HITLER in Kiel, Germany, in 1930. HITLER spoke at the meeting, which I attended with my son, LEOPOLD. Following the meeting, and on that same day, I enlisted as a member of the Nazi Party, and influenced my son to join the party also at the same time. I did not become active in the party until 1932, when Mr. SUNKEL, district leader of the [28] party at Kiel, advised me to go with REINHOLD HEYDRICH to Munich and to see a person, name unrecalled, who later became chief of police at Munich, about securing a job with the party. SUNKEL brought HEYDRICH by my home, and HEYDRICH and I took the night train, together, to Munich, after my having advanced HEYDRICH about a one-hundred-mark loan. Upon reaching Munich, HEYDRICH and I went to the City Hall Restaurant, to have a cup of coffee. HEYDRICH excused himself, stating he was going to see the person to whom SUNKEL had referred us, the party who later became chief of police at Munich, and it later developed he was given a position by this person, which turned out later to be chief of the German Gestapo system, working under HEINRICH HIMMLER, the head of the entire German police. At the time SUNKEL had sent us both to meet with this individual in Munich, he had indicated one or more positions were open and it is quite possible the position given to HEYDRICH was the one I, too, was being considered for. If such a position had been offered me at that time, I would unhesitatingly have accepted it.

HEYDRICH returned after about four hours to the City Hall Restaurant, where I was waiting in the company of the individual, whose name I have forgotten, who later became chief of police in Munich, and I accompanied them to HEINRICH HIMMLER's home, where I spoke with HIMMLER for maybe half an hour regarding Communism and the means which should be adopted in order to eradicate it from Germany, following which HEYDRICH came to me and said that HIMMLER did not like me and it would be best for me to return to Berlin, which I did. Shortly after that, I received word from SUNKEL that I was to be [29] assigned to work in Altona, Germany, for the party, as an investigator for the party to determine the identity of those individuals who were Communists and ascertain who was pro-Nazi in the Altona Police Department and residents of that vicinity. I engaged in this occupation for about six months, toward the end of which time I made a report on the chief of police in Altona, who was a party member, to the effect that he was immoral in his private life, and shortly thereafter, following some other minor troubles, I was advised that my services were no longer required, so I returned to Berlin and my coffee business.

While in Berlin, a Jewish friend of mine, PAULSSEN, came to my home and some individuals notified the party of this occurrence. They then told me to leave the Nazi Party, and I was later arrested by the police when I went to the office of a Nazi Party official to request a hearing. I was held by the police for two weeks, then placed in a concentration camp for four weeks. During this time I was not questioned. OTTO STRASSER was in this same concentration camp. During the time I was confined to the camp, my wife, FRIEDEL, and son, LEOPOLD, and Mr. BRUCKER were working for me among members of the party and I was released. At that time my son, LEOPOLD, was a stormtrooper in the party and my wife was working for the Nazi Welfare Department. About three months later, I was again arrested by the police on a charge of having attended a meeting between HITLER and VON PAPEN at Coeln, and having taken pictures of this meeting and made a report of it. I was taken into the German courts and proved my alibi that I had never been in Coeln during this time, and was released. [30] All of this occurred during the year 1933.

I returned to my coffee business but business was constantly going down and down and it was impossible for me to obtain reorders and additional business, as I was no longer a member of the Nazi Party, and during the year 1934 I wrote several articles for the newspapers and magazines on the Far East, their culture and politics, and in April, 1935, I decided to go to the Orient in order to study the Japanese language. I sailed from Bremen, Germany, in April of 1935, on the SS STUTTGART. I arrived in New York, where I stayed for six days, took a train across the country to San Francisco, where I went to the German Consulate and asked for the names of some German individuals in Honolulu whom I could contact. They gave me the name of Dr. ARTHUR HOERMANN. I sailed from San Francisco on the TATUTA MARU, in company of my wife, who had been with me since I left Germany. The balance of my family had remained in Germany. On reaching Honolulu, I got in touch with Dr. HOERMANN, and he advised that I stay at the Brookland Hotel in Honolulu. I stayed there for three weeks, and then sailed to Japan, on the ASAMA MARU, with my wife. Upon reaching Japan, we went from Yokohama to Tokyo, to the Imperial Hotel, where I contacted Professor HISAMATSU, of the Imperial University, relative to the study of the Japanese language. My wife and I traveled on to Shanghai then, and she continued on to Germany. I did not start to study the Japanese language at this time, but returned to Honolulu on the CHICHIBU MARU.

My original idea in wanting to learn the Japanese language was so that I could return to Germany and teach in the universities there. I had originally planned that my wife [31] and children would stay in Germany. However, when I decided to come to Honolulu to study the language, we thought it best that she and the children join me here.

When I returned to Honolulu, I again stayed at the Brookland Hotel in 1935, until March of 1936. During this time I was joined by my daughter, RUTH KUEHN, and son, EBERHARD KUEHN, in December of 1935. During the time I resided at the Brookland Hotel, I met a Lieutenant KENNEDY, a submarine officer in the United States Navy. I also met FRANCESCO LOMBARDO during this time. Lieutenant KENNEDY introduced me to Lieutenant NEW, also a United States Navy submarine officer, who he stated wanted to learn to speak the German language. Lieutenant NEW also introduced me to a Lieutenant Commander DURGIN. Both Lieutenant NEW and DURGIN were interested in obtaining a job as Assistant Naval Attache in Berlin. Lieutenant Commander DURGIN received the appointment. I also met SPENCER WARNER, a Commander at the Naval Air Station, Pearl Harbor, during 1936. In March of 1936, I rented a home at 2369 East Manoa Road, Honolulu, T. H., and moved there with my daughter, RUTH, and son, EBERHARD, and was joined by my wife, FRIEDEL, and son, HANS, in April of 1936. During this time I was studying the Japanese language at the University of Hawaii.

During May 1936, I rented a home at Lanikai Beach from a Mr. GRUNE. About June, 1936, I made a trip to Tokyo, to continue my Japanese language studies, and during the time I was gone my family moved to the Lanikai Beach home permanently. I returned to Honolulu from Tokyo, where I had studied at the Japanese language school for three months, about September, [32] 1936. I continued my Japanese language studies at the Japanese language School in Kailua, under Mr. IKENO, the principal of that school. He gave me private tutoring at his home.

During 1936 and 1937, I met a Major RODNEY ROBERTS, of the 64th Coast Artillery, and through him I met Major HART, of the Quartermaster's Corps. I had also met a Lieutenant HARALD LINDSAY, a submarine officer of the United States Navy, at the Brookland Hotel. These individuals visited me at my home on various occasions. I was also friendly with ARTHUR LUHR, a dentist in Honolulu, and Mr. VAN ORT, and Mr. EINDHOVEN. I also met CARL BASLER, about 1938, through my children's taking music lessons from his wife. During 1938, I purchased the Modern Steel Furniture Company, which I operated for eight or nine months, which I finally turned over to a trustee after losing about \$15,000.00. The only other employment I have had in Honolulu Iron Works, June 1941, when I went to work as a freight checker for the Honolulu Iron Works, which job I held for six weeks and quit as the work was too hard. I have since attempted to obtain a position with HAROLD CASTLE, through FRANZ MAHN of the Hawaiian Trust Company, with no success.

With regard to the income which I have been able to derive locally, I might state that in 1937 I leased eight acres of land from the Kaneohe Ranch Company, and since have sub-leased seven acres to a Japanese gardner. The other acre I use to raise fruits and vegetables for my own use. I also raise chickens at my Kalama residence, having about 200 at the present time. None of these operations are income-producing. [33] My wife, FRIEDEL operates the Kailua Beauty Shop, from which she derives an average income of approximately \$80.00 a month. This business was originally opened in June, 1940. Other friends I have in Honolulu, not previously mentioned, are as follows: MARIO VALDASTRI, a regular acquaintance, with whom my wife and I frequently play bridge, Dr. E. A. STEPHENS, Kaneohe Territorial Hospital, Kaneohe, Oahu, who prior to his divorce was a frequent visitor in my home, a slight acquaintance with Dr. MARQUIS STEVENS, Dr. and Mrs. ARTHUR HOERMANN, who were close associates up until the past two years, HENRY B. WOLTER, better known to me as HEINE, a neighbor at Lanikai, through whom I first met HEINZ PLOENJES, representative of the Roechling Steel Works, a German firm, stationed in Tokyo, Japan, from whom I have since received some correspondence. Dr. HOMBERG, also a representative of Roechling Steel Works at Tokyo, Japan, first became known to my family through RUTH, who met him in 1937, while en route to Japan on a Japanese vessel. Since that time, Dr. HOMBERG has visited Honolulu on two occasions, once in early 1938, at which time he occupied my Lanikai Beach residence, for two to three weeks, and again in September, 1938, when he stopped over only for a night on his way back to Japan.

Regarding the monies which I have received from time to time from outside sources, I wish to make the following statements: At the time I left Germany in 1935, I was only permitted to carry about ten marks with me. I have been unable since to get any of my monies out of Germany and the other members of my family were also unable to bring out additional funds. About 1918, during the first World War, I had opened a small [34] account in a Rotterdam bank. Afterwards, during the period I owned and operated the sailing freighter ANTARES I deposited funds received from the operation of the vessel in this same bank in Rotterdam. In 1934 my Aunt ELSE SVENDSON, resident in Sweden, transferred to me about \$35,000.00 as my share of the inheritance which I would have received later, which money was deposited in an Amsterdam bank. During the years 1936, 1937 and 1938, I received money transfers totaling about \$30,000.00 from these accounts through the Bishop National Bank, Honolulu. I have been unable to get any additional funds from Holland since 1938. From 1938 to the spring of 1940, I received no additional funds from the outside and as a result was forced to sell one of my wife's homes at Kalama as well as mortgage my wife's other Kalama residence and Lanikai residence. I had previously acquired these three pieces of property during 1937.

In the spring of 1940 my wife, FRIEDL, planned a trip to Japan in order to make arrangements with Dr. HOMBERG of the German steel firm, ROECHLING STEEL WORKS, Tokyo, Japan, for further funds. At that time she borrowed money from the bank on Dr. MAURICE GORDON's signature. My wife made arrangements with Dr. HOMBERG to transfer her property in Germany to him for a consideration of \$40,000.000. However, he was to first have an inquiry made in Germany to determine the value of the property and arrive at the exact figure, but in the meantime he advanced my wife \$6,000.00 on account. She brought the \$6,000.00 in cash with her on her person. Upon reaching Honolulu my wife told me that Dr. HOMBERG had promised to send more money after the lapse of five months.

[35] About five months later, around September, 1940, an additional \$10,000.00 in cash was brought by a Mr. KAI, purser aboard the CHICHIBU MARU from Dr. HOMBERG. My wife had previously made the acquaintance of Mr. KAI while on board the HAKUSA MARU on a trip from Shanghai to Germany in 1936. Mr. KAI, upon reaching Honolulu, telephoned me and then brought the money to my Kalama residence. The money was made up entirely of American currency.

In October, 1941, following the arrival of the TATUTA MARU at Honolulu from Japan, a Japanese employee of this vessel called in person at my Kalama residence and delivered to me a package enclosed in cardboard which contained \$14,000.00 in \$100.00 bills. At the time the package was delivered by this Japanese he remarked that same was from Dr. HOMBERG in Japan. The name of this Japanese is unknown to me and I had not seen him before or since. The money was afterwards given by me to my wife and I do not know where she has it hidden. However, we at no time have deposited these amounts in the banks in Honolulu, except to carry a small account.

During our residence in Hawaii, my step-son, LEOPOLD, has continued to reside and work in the Nazi Party in Berlin, Germany. He presently is employed under GOEBBELS, Minister of Propaganda. There has always been a very close relationship between LEOPOLD and my wife. Therefore she has been insistent on supplying him with foods and a monthly allowance of 50 marks. In the past, shipments of food have been made through FORTRA, INC. in New York City, and the monthly allowance was sent through the Bishop National Bank until June, 1941, when the freezing order went into effect.

[36] I talked to Mr. LOW of the Bishop National Bank several times and asked him if he would help me, if there was any legal way he could send money to my son, so Mr. LOW wrote to New York and got an answer that there was no chance of sending money. Mr. LOW told me the only chance would be to send pesos to a friend in South America and this friend could send the pesos to Germany and we found somebody in South America, whose name I have forgotten, that my wife wrote to but never received an answer in an attempt to transmit money to LEOPOLD via South America.

About the first part of November, 1941, after talking the matter over with my wife, FRIEDEL, I went to the Japanese Consulate at Honolulu and asked them to send money to my son, LEOPOLD, in Germany through the Yokohama Specie Bank. They advised me at this time that they would inquire at the Yokohama Specie Bank to see if this was possible. I spoke to one of the Vice Consuls at this time, his name I do not recall. This was my first visit to the Japanese Consulate since the summer of 1940 when I had been to see a member of the Consulate staff to find if it would be possible to send a large package of food on a Japanese liner to my son, LEOPOLD, in Germany via Japan and Russia. I was advised at this time to make inquiry at the Japanese Chamber of Commerce above the Yokohama Specie Bank, which I did and they informed me that I could send only a one-pound package.

About two or three days after my first visit to the Consul late in November of 1941, I returned and this time I spoke to the man sitting behind the large desk in the back of the room, to the left of the entrance of the Consulate.

[37] He and I went across the hall into the second room on the right from the front of the Consulate. At that time he refused to send any money to my son and I offered to assist him and the Consulate in obtaining information that they might be interested in. He asked me if I knew how many ships were in Hawaiian waters and I told him I could find out. Then I left the Consulate and went home and after three or four days returned to the Japanese Consulate, at which time I spoke to the same man and KITA, the Consul himself, in that same room, the second one on the right from the front of the Consulate. At that time I made suggestions to them stating that I had a short-wave transmitter and could send messages for them if they so desired and I also outlined a system of signalling that could be used in order to furnish information relative to the types of ships in Pearl Harbor and those that had left. This system of signalling contained fifteen sets of signals. These signals were to have been given by a light in my home at Lanakai or Kalama which could have been seen out at sea by a submarine, as follows: One light between 6 and 7 meant battle fleet in harbor; one light between 7 and 8 meant scouting force in harbor; one light between 8 and 9 meant aircraft carriers in harbor; one light between 9 and 10 meant battle fleet prepared to leave; one light between 10 and 11 meant scouting force prepared

to leave; one light between 11 and 12 meant aircraft carriers prepared to leave; one light between 12 and 1 meant battle fleet left between one and two days ago; one light between 1 and 2 meant scouting force left one to two days ago; two lights between 6 and 7 p. m. meant aircraft carriers left one to two days ago; two lights between 7 and 8 p. m. meant [38] battle fleet left three to four days ago; two lights between 8 and 9 p. m. meant scouting force left three to four days ago; two lights between 9 and 10 p. m. meant aircraft carriers left three to four days ago; two lights between 10 and 11 p. m. meant battle fleet left five to six days ago; two lights between 11 and 12 midnight meant scouting forces left five to six days ago; two lights between 12 midnight and 1 a. m. meant aircraft carriers left five to six days ago.

This same set of signals could have been sent by means of linen on the clothes line at my Lanakai home, one sheet between 6 and 7 a. m. in daylight meaning battle fleet in harbor; one sheet between 7 and 8 a. m. meaning scouting force in harbor; one sheet between 8 and 9 a. m. meaning aircraft carriers in harbor; one sheet between 9 and 10 a. m. meaning battle fleet prepared to leave; one sheet between 10 and 11 a. m. meaning scouting force prepared to leave; one sheet between 11 a. m. and 12 noon meaning aircraft carriers prepared to leave; one sheet between 12 noon and 1 p. m. meaning battle fleet left one to two days ago; one sheet between 1 p. m. and 2 p. m. meaning scouting force left one to two days ago; two sheets on line between 6 a. m. and 7 a. m. meaning aircraft carriers left one to two days ago; two sheets on line between 7 a. m. and 8 a. m. meaning battle fleet left three to four days ago; two sheets on line between 8 a. m. and 9 a. m. meaning scouting force left three to four days ago; two sheets on line between 9 a. m. and 10 a. m. meaning aircraft carriers left three to four days ago; two sheets on line between 10 a. m. and 11 a. m. meaning battle fleet left five to six days ago; two sheets on line between 11 a. m. and 12 noon meaning [39] meaning scouting force left five to six days ago; two sheets on line between 12 noon and 1 p. m. meaning aircraft carriers left five to six days ago.

They told me at that time that this system of communication was too complicated and it would be necessary for me to simplify it. I went home. One or two days prior to the time I submitted this first set of signals I had ridden by Pearl Harbor and there were very few boats in the harbor at that time. About three days later I went back to the Consulate with a simplified system of signalling, on what I think was December 2, 1941. This set of signals contained only eight combinations, as follows: No. 1 meaning battle fleet prepared to leave; No. 2 meaning scouting force prepared to leave; No. 3 meaning battle fleet left one to three days ago; No. 4 meaning scouting force left one to three days ago; No. 5 meaning aircraft carriers left one to three days ago; No. 6 meaning battle fleet left four to six days ago; No. 7 meaning scouting force left four to six days ago; No. 8 meaning aircraft carriers left four to six days ago.

These signals were to be given as follows from my Lanakai home: One light between 7 and 8 p. m. meaning No. 1; one light between 8 and 9 meaning No. 2; one light between 9 and 10 p. m. meaning No. 3; one light between 10 and 11 p. m. meaning No. 4; two lights between 7 and 8 p. m. meaning No. 5; two lights between 8 and 9 p. m. meaning No. 6, etc. These lights were to have been from a window or automobile lights. The same system could have been used with one piece of linen hung on the line at Lanakai between 8 and 9 a. m., meaning No. 1, one between 9 and 10 a. m. meaning No. 2; one between 10 and 11 a. m. [40] meaning No. 3; one between 11 a. m. and 12 noon meaning No. 4; two pieces between 8 and 9 a. m. meaning No. 5; two pieces between 9 and 10 a. m. meaning No. 6, and so forth. It was also arranged that a light in the skylight at my Kalama home between 7 and 8 p. m. would mean No. 1; one between 8 and 9 p. m. would mean No. 2; one between 9 and 10 p. m. would mean No. 3 and 6; one between 10 and 11 p. m. would mean No. 4 and 7; one between 11 and 12 p. m. (midnight) would mean Nos. 5 and 8.

It was also arranged that this same system of signalling could have been used with a star boat just off the mouth of Lanakai Beach between certain hours, a star on the sail or a star and a number on the sail meaning corresponding signals as those previously given, according to the time the boat was in that position. I do not recall the exact combinations that were to have been used to indicate each signal.

It was also arranged that on the KGMB Want-Ads program in the morning the signal could be effected to indicate numbers 3 and 6 if a Chinese rug was advertised for sale, Nos. 4 and 7 if a beauty parlor operator was advertised for:

and a third type of advertisement which I do not recall would indicate numbers 5 and 8. It was also arranged that if it was impossible to give this system of signals, a garbage fire on Maui in a certain locality between certain hours would indicate the above number signals, such as a fire between the hours of 9 and 10 p. m. would mean signals 3 and 6, and so forth. In mentioning this latter plan I had in mind a locality previously described to me by a friend, CARL BASLER, where a number of vacant lots are located. I determined the exact locality of this area by reference to a [41] map of Maui which showed the names of the two roads which border that locality and which names were mentioned in my recommended plan as bordering the area wherein the fire signals were to be effected.

It was also arranged that this same set of signals could be given by short wave radio and arrangements were made that if the Consulate desired to contact me they could do so by sending me a postcard signed "JIMMIE", to my Box No. 1476 at Honolulu. This simplified set of signals was taken to the Consulate in an envelope by me about 8:30 in the morning. At the time I went to the Consulate I was accompanied by my wife, FRIEDEL, and while she remained in the car I went to the door and handed the envelope containing this set of signals and another envelope containing \$500.00, which was to be sent to my son LEOPOLD in Germany, to the Vice Consul whose name I do not recall. I had no conversation with him at this time but went back to my car and drove on into Honolulu.

I might point out that the plan outlined by me above and that submitted to the Japanese Consulate are probably not identical in every detail with those actually submitted, although the plans outlined above are basically the same as those submitted. Differences will probably appear in connection with the hours stated for the signals to be given.

On the same occasion that I transmitted this simplified system of signalling I had also advised the Consulate that there were seven battleships, six cruisers, two aircraft carriers, forty destroyers and twenty-seven submarines, or some similar figure, in Hawaiian waters. These figures were purely fictitious as far as I knew. This information was submitted in the same [42] envelope as the one containing the latter plans.

Following the submission of these latter plans to the Consulate I have had no further contact with any representatives of the Consulate to date, neither have I received any correspondence or telephone messages from such representatives. Apparently no effort was made by the Consulate to carry either of the proposed plans into effect through me.

I have never been to the Island of Maui nor have I ever seen the island nor purchased any property there. I never had a short-wave transmitter, and my Lanakal Bench house is rented to Army people. I might state that CARL BASLER had no knowledge of my plans submitted to the Japanese Consulate. As a matter of fact I have not seen him or his wife since they departed from Honolulu about September, 1941. Further, I have had no correspondence with them except for one letter received from Mrs. BASLER about October, 1941. I rented my Lanakal residence on November 1, 1941 to two couples, one an Army doctor, age about 30, and the other an employee with the Engineers, about the same age, both of whom had been transferred from Schofield Barracks to Kaneohe. I cannot recall the names of these individuals at the present time.

The above statement consisting of eleven pages has been read by me and I have signed each page individually and I certify the same to be true to the best of my knowledge and belief, [43] and sign the same of my own free will.

3082 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

ARMY PEARL HARBOR BOARD EXHIBIT No. 58

LABORATORY REPORT

File #65-33780-697
Lab #60015

Re: HMAR; C. W. Smith; Espionage (G).
Examination requested by: San Francisco
Reference: Letter of October 23, 1941 Appel
Examination requested: Document
Specimens:

The following specimens are all photostatic copies:

- K1 One Informal Entry form No. 557109, in name of Mrs. J. H. Marsman.
- K2 One Baggage Declaration No. 871743, in name of Arthurita Randall.
- K3 One Border Declaration No. 329227, in name of J. H. Marsman.
- K4 One Baggage Declaration No. 871574, in name of Jullo Lopez.
- K5 One Baggage Declaration No. 871561, in name of Joseph A. Coppola.
- K6 One Baggage Declaration No. 871652, in name of Paul Bakhar.
- K7 One Baggage Declaration No. 871573, in name of Frusan U. Kurtz.
- K8 One Baggage Declaration No. 871761, in name of Bliss Wiant.
- K9 One Baggage Declaration No. 871724, in name of P. D. Klehn.
- K10 One Baggage Declaration No. 871751, in name of Rolf Singer.

The conclusion has been reached that specimens Q1 and Q2 in this case were not written by any of the individuals whose known handwritings have been listed as specimens K1 through K3 and K5 through K10 respectively.

For your information the known specimens listed above as K1 through K10 which were submitted by your office now reflect the following Identifying Laboratory numbers: K135 through K145 in the case entitled, "Fred Ludwig, et al., Espionage—G." (Bureau File 65-33780). Particular attention is invited to the known handwriting specimen of Jullo Lopez, K4, which is now listed as specimen K139 in the "Fred Ludwig" case.

It has been concluded that specimens Q1 and Q2 in the instant case were written by Ulrich Bonder Osten, alias Jullo Lopez, K139. It has also been concluded that specimens Q47, Q48, Q56, Q78 and Q79 in the "Fred Ludwig" case were written by Lopez, K139.

However, no conclusion was reached whether the secret ink writing appearing on specimen Q37 was written by Lopez, K139. In this connection, the attention of the New York Field Division is invited to the secret ink writing appearing on specimen Q37. If it is possible to obtain the original of this specimen or at least the original photostatic or photostatic copy of this specimen additional evidence may be developed which will permit advancing a definite conclusion with respect to this specimen. This seems particularly desirable inasmuch as this specimen appears to be signed "Konrad" which may indicate that "Vonder Osten" alias "Ildo" was the "Konrad" first referred to in the original information on which the investigation was instituted.

It is also noted that specimen Q101, the passport of Vonder Osten contained an insufficient quantity of writing to be used as the sole known specimen. This is mentioned as it may be desirable to ascertain whether other writings may be proven as known specimens of this subject for purposes of testimony.

For future reference photographic copies of specimens Q1 and Q2 are being forwarded to the New York Field Division.

Henceforth, these specimens, Q1 and Q2, also Q3 in this case, will be identified as specimens Q1173 through Q1175 in the Fred Ludwig case. A photographic copy of specimen K139 will be forwarded to your office in the next several days.

AMERICAN PRESIDENT LINES

New York - California - Orient - Round the World

ON BOARD

A. Honolulu (Island of Oahu)

Strong concentration of troops of all kind. Said to be 40000 Army and as many Navy. Lately arrived: 1500 technicians, more expected. Mainly for Army barracks and fortification MoKapu (see map). Harbor SW MoKapu is being

readied as sea plane base. Barracks for army are being built near Schofield B. (Wheeler Field and west of it, and esp. between Pearl Harbor-Honolulu. Milit. roads are being constructed or are completed (very well) all over island. On side of roads milit. cables are being put in ground. All milit. establishments prohibited for civilians, 57 officers of the F. B. I. are said to be in Oahu alone. Questioning can't be done too openly.—*Army*: seen: 17 Field Art. Regt.—64 searchlight unit (what kind?), land mission troops no number showing. *Navy*: Said to be stationed in Pearl Harbor & rest of islands 150 units of all kinds. Seen in harbor about 50 vessels at least; 5 armoured ships, big (battleships?), Saratoga and other, very small aircraft carrier, the last one outside of harbor, other big one besides Saratoga said to be there.—Seen several units of destroyers (each 4 of them tied to other, slightly higher, outmoded looking ship. Seen destr. No. 372, 383, 374, 375. Couldn't read other numbers.—1 drydock 1000 ft. stationary, other swimming dock of same length said arrived recently. Along east side of harbor (near submarine station) about 80 fuel tanks (20 in diameter—10 in height.).—*Airforce*: Nothing to be seen, save a few planes in air. Main bases southwest Pearlharbor, south of Schofield Barracks and for sea planes Mokapu bay. Plenty of auxiliary or emergency fields completed or in construction all over island.—*Fortifications*: said to be very strong ones everywhere. Seen 2 forts between Waikiki-beach and Honolulu (eastside of Waikiki). Crater of Diamondhead said containing lots of guns, esp. howitzers. Point farthest to right on photo has lookout, said to be main fire-control for guns in craters.—

Evacuation of white women said to be considered on account of many soldiers, that maybe cannot be held under control.—High labor wages: 400-600\$ a month.—

This will be of interest mostly to our yellow allies, are you interested? Might be good idea to despatch observer, if you are. Want me to find somebody? Link in Shanghai has got Honolulu papers (1 morning, 1 evening paper) through me, rather revealing stuff to read!

Seems to be still better so send somebody to Puerto Rico: Follow passenger, Lt. Cdr., been there in december says about Puerto Rico: Garrison up to now 12,000, of whom 5000 army. Improvements cost up to now \$50 million, expected to cost the double altogether.—Dry dock Isla Grande 670 x 270 feet, access to it not yet made. Air patrols day and night between Miami & British Guyana. *Airforce*: In Isla Grande accomodation in progress for 50 bombers and 100 pursuitships. (Here garrison of 65th Infantry.)—Main Army-airbase: Punta Boringuen (at Mona-Passage), stationed 4000 men and 2000 civil technicians. 1 pursuit and 2 bomber groups.—Auxiliary bases: Juana Diaz (near Ponce), here stationed 36. Pursuit group. 48. Air base Group expected with 2000 men. (In Punta Boringuen stationed now: 24. Airbase Group (formerly Kelly field) and 25. Bombardment group (from Langley Field).—Further auxiliary airbases: Arecibo (between San Juan & Boringuen; Mayaguez on west coast; St. Croix (Virgin Islands).—

Critic: lots of waste, food difficulties feared in case of war (even now 1000 tons of food alone has to be imported *daily*. No air shelters.

New York: Police headquarters for port-control: Barge-office on southernmost point of "Battery."

Munitions and Fuel ships are loaded in three different places from barges (out of quais.) Especially at Gravesend-Bay. Maybe too at New York Foreign Trade Zone (Staten Island), where airplanes, tractors and so forth are being shipped to England. This zone is equipped with "electrical eyes" for safety against spies and sabotage.

Nitrate plant in Hopewell, Virg. (said to be biggest in States) said to be ready for guncotton production in case of necessity.

Smith, please send on to Carl—82, with map & photo. H (illegible)

(The remaining portion of Exhibit No. 53 consists of photostatic copies of an envelope addressed "C. W. Smith, Esq.", a scene at Waikiki, and the reverse side of the indicated envelope. This material will be found reproduced as Items Nos. 60 and 61, EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 55

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, December 9, 1940.

3820 (National Defense)

Re. O. & R. Chapter VII.

Circular Letter (Finance No. 226) (Contracts No. 21)

Rescinded by C/L Fin 41, 1941, file 103 (1941) 41

Subject: Procurements and Contracts for National Defense Purposes.**To: All Contracting Officers and Others Concerned:**

The following procedure will govern the making of purchases and the letting of contracts for National Defense purposes by the Corps of Engineers. It includes instructions supplemental to Army Regulations, and, for the convenience of contracting officers, includes the pertinent requirements of Army Regulations, Procurement Circulars and special instructions of the Office of the Assistant Secretary of War pertaining to such purchases and contracts. It is issued as a new section to Chapter VII, Orders and Regulations, and will be kept up to date by supplemental Finance Circulars:

Section 13—Procurements and Contracts Without Advertising for National Defense Purposes.

772. Statutory provision.—Section 1 (a) of the Act approved July 2, 1940 (Public No. 703, 76th Congress) provides as follows:

“* * * That (a) in order to expedite the building up of the national defense, the Secretary of War is authorized, out of the moneys appropriated for the War Department for national-defense purposes for the fiscal year ending June 30, 1941, with or without advertising, (1) to provide for the necessary construction, rehabilitation, conversion, and installation at military posts, depots, stations, or other localities, of plants, buildings, facilities, utilities, and appurtenances thereto (including Government-owned facilities at privately owned plants and the expansion of such plants, and the acquisition of such land, and the purchase or lease of such structures, as may be necessary), for the development, manufacture, maintenance, and storage of military equipment, munitions, and supplies, and for shelter; (2) to provide for the development, purchase, manufacture, shipment, maintenance, and storage of military equipment, munitions, and supplies, and for shelter, at such places and under such conditions as he may deem necessary; and (3) to enter into such contracts (including contracts for educational orders, and for the exchange of deteriorated, unserviceable, obsolescent, or surplus military equipment, munitions, and supplies for other military equipment, munitions, and supplies of which there is a shortage), and to amend or supplement such existing contracts, as he may deem necessary to carry [2] out the purposes specified in this section: Provided, That the limitations contained in sections 1136 and 3734 of the Revised Statutes, as amended, and any statutory limitation with respect to the cost of any individual project of construction, shall be suspended until and including June 30, 1942, with respect to any construction authorized by this Act: Provided further, That no contract entered into pursuant to the provisions of this section which would otherwise be subject to the provisions of the Act entitled ‘An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes,’ approved June 30, 1936 (49 Stat. 2036; U. S. C., Supp. V, title 41; secs. 35–45), shall be exempt from the provisions of such Act solely because of being entered into without advertising pursuant to the provisions of this section: Provided further, That the cost-plus-a-percentage-of cost system of contracting shall not be used under this section; but this proviso shall not be construed to prohibit the use of the cost-plus-a-fixed-fee form of contract when such use is deemed necessary by the Secretary of War.”

772.1. Applicability of the Act.—Procurements and contracts made without advertising will be referred to as negotiated purchases and contracts. Negotiated contracts may be distinguished as to form as (1) lump-sum contracts, and

(2) cost-plus-a-fixed-fee contracts. They include all construction, supply, service, and rental contracts for the purposes stated in the Act regardless of the actual or estimated amounts involved. The authority does not include procurements and contracts for River and Harbor and Flood Control works.

772.2 Administrative directions.—The Acting Secretary of War on July 2, 1940, determined it to be necessary in the public interest and authorized contracts within the scope of Section 1 (a) of the Act to be entered into without advertising whenever that method of procurement will serve to expedite the accomplishment of the national defense program. By direction of the Assistant Secretary of War the general principles governing the letting of national-defense contracts and the labor policy adopted by the National Defense Advisory Commission (Document No. 950, 76th Congress) will be followed. Such principles and policy are set forth under the following subparagraphs (a) and (b).

(a) General principles governing the letting of defense contracts:

1. The essence of the preparedness program is the getting of an adequate supply of materials of the proper quality in the shortest space of time possible. Considerations of price alone are highly important, but in the emergency are not governing.

2. Speed of delivery of all items on the defense program is essential. This means:

(a) That orders should be placed in such a manner as to insure the most efficient use of each particular [3] facility from the point of view of the program as a whole;

(b) That proper consideration should be given to contributory industries, such as the machine tool industry, to avoid creating underlying bottlenecks;

(c) That once delivery dates are fixed, assurance be given that they will be met by the supplier.

3. Proper quality is also of prime importance. It is therefore necessary to determine first of all whether or not the supplier can meet the quality requirements, as specified. There should be a willingness on the part of both the Army and Navy, on the one hand, and of the supplier on the other to adjust specifications on a cooperative basis in order that such specifications may come as near as possible to meeting commercial standards while at the same time fulfilling the military requirements.

4. Price, while not the sole consideration, is of outstanding significance, and every effort must be made to secure a fair price. This must take recognition, among other things, of determination of proper cost factors.

5. The impact of the defense program upon the consumers must be recognized. This relates to such factors as:

(a) Due regard to the necessity of protecting civilian needs and morale;

(b) Proper health and housing conditions among employees;

(c) Consideration to possible off-season production in order to dovetail the military program into production for civilian requirements. Off-season production should also lead to lower overhead and consequently to lower prices for both the consumers and the Government.

6. Adequate consideration must be given to labor. This means compliance with the principles on this subject stated by the Commission in its release of August 31, 1940 (quoted under (b) below).

7. Undue geographic concentration of orders should be avoided, both as to procurement districts and as to industrial sections within any such procurement district. Reasons for such decentralization relate to factors of military strategy, as well as avoiding congestion that will slow down production.

8. Financial responsibility of the supplier should be examined. Ability to post a bond does not necessarily dispose of this problem. [4] The probability should exist that the supplier will be able to continue in business, at least long enough to complete his contract satisfactorily. Further, an ability to finance himself through private sources should take preference over necessity for securing Government aid.

9. The avoidance of congestion of transportation facilities should be sought. The same applies to warehousing facilities.

10. Due consideration should be given to the adequacy of power facilities, particularly where furnished by public utilities.

11. A general preference should be given to firms having experience with so-called educational orders.

12. The moral responsibility of the supplier is important, and in some respects, fundamental. There should be evidence of honest and sincere desire to cooperate

with the Army and Navy in producing what is called for, and on time, without profiteering; to assume some risks himself rather than attempting to shift all such risks to the Government; and to furnish a correct statement as to his capacity and his experience. The supplier's general standing and reputation among reputable businessmen (as distinct from his financial rating) is one index of such qualifications.

13. The Commission recognizes that competitive bidding is the better procedure in certain types of industry and circumstances. However, it is often impossible to make sure that the principles outlined above are followed when contracts are placed on the basis of price alone and are let to the lowest bidder. Therefore, in cases where competitive bidding will not fulfill the above stated needs of national defense, the Commission recommends that the use of the negotiated contract be authorized where necessary in order that these objectives be obtained in making defense purchases.

(b) Labor policy:

1. Primary among the objectives of the Advisory Commission to the Council of National Defense is the increase in production of materials required by our armed forces and the assurance of adequate future supply of such materials with the least possible disturbance to production of supplies for the civilian population. The scope of our present program entails bringing into production many of our unused resources of agriculture, manufacturing, and manpower. This program can be used in the public interest as a vehicle to reduce unemployment and otherwise strengthen the human fiber of our Nation. In the selection of plant locations for new production, in the interest of national defense, great weight must be given to this factor.

[5] 2. In order that surplus and unemployed labor may be absorbed in the defense program, all reasonable efforts should be made to avoid hours in excess of 40 per week. However, in emergencies or where the needs of the national defense cannot otherwise be met, exceptions to this standard should be permitted. When the requirements of the defense program make it necessary to work in excess of these hours, or where work is required on Saturdays, Sundays, or holidays, overtime should be paid in accordance with the local recognized practices.

3. All work carried on as part of the defense program should comply with Federal statutory provisions affecting labor wherever such provisions are applicable. This applies to the Walsh-Healey Act, Fair Labor Standards Act, the National Labor Relations Act, etc. There should also be compliance with State and local statutes affecting labor relations, hours of work, wages, workmen's compensation, safety, sanitation, etc.

4. Adequate provision should be made for the health and safety of employees.

5. As far as possible, the local employment or other agencies designated by the United States Employment Service should be utilized.

6. Workers should not be discriminated against because of age, sex, race or color.

7. The Commission reaffirms the principles enunciated by the Chief of Ordnance of the United States Army, during the World War, in his order of November 15, 1917, relative to the relation of labor standards to efficient production:

"In view of the urgent necessity for a prompt increase in the volume of production * * *, vigilance is demanded of all those in any way associated with industry lest the safeguards with which the people of this country have sought to protect labor should be unwisely and unnecessarily broken down. It is a fair assumption that for the most part these safeguards are the mechanisms of efficiency. Industrial history proves that reasonable hours, fair working conditions, and a proper wage scale are essential to high production. * * * Every attempt should be made to conserve in every way possible all of our achievements in the way of social betterment. But the pressing argument for maintaining industrial safeguards in the present emergency is that they actually contribute to efficiency."

(c) As to whether or not a prospective contractor is barred from receiving a contract by reason of findings made against him by the National Labor Relations Board, the following guide will be applied:

[6] While the labor policy of an industrial concern has an important bearing on its ability to carry out a proposed contract and the record of a concern in regard to the National Labor Relations Act may be an indication of such labor policy, the award of a War Department contract under the defense program is not to be considered as barred by the single fact that proceedings under the

National Labor Relations Act have been instituted or that findings of violations of the Act have been made by the National Labor Relations Board. In relation to this matter, consideration should be given to the seriousness of the offense charged, the stage which the proceeding has reached, the importance of the plant facilities of the particular concern to the national defense program, and similar factors. Emphasis must necessarily be placed on the prime importance of expeditious accomplishment of the defense program with due regard to efficiency and economy and to the various principles stated by the Advisory Board and approved by the President.

772.3 Authority of contracting officers.—District and division engineers, and other contracting officers specially designated by the Chief of Engineers with authority equivalent to that of a district or division engineer, may issue specifications and negotiate purchases and contracts without the approval of higher authority as provided in paragraphs 706.1 to 706.6, inclusive. Contracting officers who have been specially designated by the Chief of Engineers or by district or division engineers under paragraphs 706.1 (c) and (d), will act within the limits of authority contained in their respective letters of appointment. Specifications, awards, and contracts issued and negotiated by contracting officers not under the jurisdiction of a division office, which require the approval of higher authority, unless otherwise specifically directed, will be submitted for the approval of the Chief of Engineers.

[Handwritten in margin:] See C/L Fin 10, 1941.

772.4 Open-market purchases.—Purchases amounting to \$2,000 or less may be made in the open market under the same procedure as those set forth in paragraph 725.7, Orders and Regulations, and paragraph 4.o., AR 5-240.

772.5 Forms to be used.—(a) **Lump-sum contracts.**—Purchases amounting to \$2,000 or less may be made by purchase order as set forth in paragraph 725.3, Orders and Regulations, substituting the figure \$2,000 for the figure \$500 appearing in said paragraph. All negotiated lump-sum contracts and purchases in excess of \$2,000 will be entered into on the forms of contract prescribed in paragraphs 750.5 and 750.6, with the exception of (1), "E. D. Form No. 22," for expert services, which is exclusively for River and Harbor and Flood Control works. No standard form has been prescribed for lump-sum architectural and engineering services, and pending the issuance of such a form, they will be executed as provided in paragraph 750.6.

(b) **Cost-plus-a-fixed-fee contracts.**—All cost-plus-a-fixed-fee contracts will be executed only on standard or special forms approved by the Secretary of War. To date standard forms have been approved as follows:

- [7] 1. C. P. F. F. Form No. 1—Cost-plus-a-fixed-fee construction contract.
2. C. P. F. F. Form No. 2—Cost-plus-a-fixed-fee construction subcontract.
3. C. P. F. F. Form No. 3—Cost-plus-a-fixed-fee supply contract. (This form is applicable primarily to Air Corps contracts but may be of use as a basis for similar contracts pertaining to purchases in cases where cost-plus-a-fixed-fee form of contract is necessary and authorized.)
4. C. P. F. F. Form No. ____—Cost-plus-a-fixed-fee contract for "Architect-Engineer Services." (This form has not yet been formally approved but will be generally followed in the preparation of such contracts pending approval.)

(c) **Miscellaneous.**—For use in connection with (a) or (b) or otherwise as required, forms have been approved as follows:

1. Equipment Rental Agreement.
2. Lump-sum Construction Subcontract.
3. Emergency Plant Facilities Contract.

The standard forms will be followed without change in all possible cases. For construction works outside the continental limits of the United States, or in other cases where it is considered necessary, the form may be altered or redrafted to fit the particular needs of each case, and transmitted to the Chief of Engineers for his consideration and submission for the approval of the Assistant Secretary of War.

772.6 Preparation and distribution.—All negotiated contracts will be prepared and distributed as set forth in paragraphs 750 to 750.9, inclusive, except that:

1. One authenticated copy of all negotiated contracts (contract instrument only, less invitation, specifications, drawings, copy of bid, etc.) of \$1,000,000 or more, except those contracts which are classified as secret, confidential or restricted in accordance with AR 380-5, will be transmitted by the contracting officer executing the contract, immediately upon the final approval thereof, direct to the Assistant Secretary of War, Procurement Control Section, Washington, D. C. (AR Par. 15b (4) (a).)

[8] 2. When the contract contains terms and conditions relating to reimbursement of the cost of emergency facilities and the protection of the United States with reference to the future use and disposition of such emergency facilities, one additional copy (contract instrument *only*, but including the terms and conditions indicated), regardless of the amount of the contract, will be forwarded immediately upon final execution, direct to the Assistant Secretary of War, Procurement Control Section, Washington, D. C. (AR 5-200, Par. 15b (4) (b).)

3. The copy of all contracts required to be filed in the Returns Office, as set forth in paragraph 750.9, which are of a secret or confidential nature, shall be prepared for such filing as other contracts but will be transmitted direct to the Office, Chief of Engineers, Contract Unit, by memorandum, stating the secret or confidential nature of the papers which would warrant their not being immediately made available for public examination.

4. The signed ribbon copy of every contract required under paragraph 750.9 (b) to be forwarded to the Office, Chief of Engineers for examination and transmittal to the Audit Division, General Accounting Office, which is of a secret or confidential nature, will be transmitted by registered mail, or other special method of delivery, to the Office, Chief of Engineers, Contract Section, with memoranda stating that the contract is of a secret or confidential nature. Such contracts will be specially handled and personally delivered to the General Accounting Office where special arrangements have been provided for their safekeeping.

5. Copies of specifications and drawings made a part of negotiated defense contracts, and such contracts themselves, will not be distributed to publishers and others as set forth in paragraphs 735.8 (d), (e), (f), and (g).

772.7 Cost-plus-a-fixed-fee contracts.—(a) Approval of use.—The use of the cost-plus-a-fixed-fee form of contract requires the approval of the Secretary of War in each specific case. If a district engineer or contracting officer considers that the work can be best performed by the cost-plus-a-fixed-fee form of contract, he will submit a letter to the Chief of Engineers stating:

1. The nature of the particular work to be done.
2. The location and the estimated cost thereof.
3. The particular reasons for the use of the cost-plus-a-fixed-fee form of contract.
4. The amount of fixed fee proposed.
5. The name of the contractor proposed for the work with the reasons therefor.

[9] 6. The name of one or more alternate contractor or contractors believed to be suitable to perform the work.

7. Whether or not the proposed contractor or any alternate has been awarded any other national defense contract, and if so, the contract number, description of the work, location of the work, estimated cost, and fee for each such contract, if known to the contracting officer.

8. Waiver of bonds. (See paragraph 773).

This application with recommendations of the Chief of Engineers, will clear through the Office of the Assistant Secretary of War and the National Defense Council.

(b) Amount of fee.—The Act of September 9, 1940 (Public No. 781, 76th Congress) provides that the fixed-fee to be paid the contractor as a result of any such public works contract (cost-plus-a-fixed-fee), hereafter entered into, shall not exceed six percentum of the estimated cost of the contract exclusive of the fee as determined by the Secretary of War. The amount of the fees approved in existing construction contracts ranges from the maximum of six percent in smaller contracts of less than \$100,000 in almost a straight line to approximately two and one-half percent for contracts approximating \$30,000,000. Fixed-fees approximating three-fourths of one percent of the estimated project cost have been accepted as reasonable for architectural, engineering and design contracts.

(c) Inspection.—In addition to the inspections required by AR 5-360, such necessary inspections, audits, and supervision, to make certain that the interests of the Government are fully safeguarded with respect to quantity, quality, cost of labor, materials and services, which are to be charged against such contracts and paid for by the Government, will be made. In view of the many difficulties inherent in contracts of this nature and the necessity for the assurance of rigid honesty in their performance, the careful supervision by contracting officers is enjoined. Care will be exercised in the preparation of all cost-plus-a-fixed-fee contracts that no condition is included which would preclude or abridge the right and duty of the Government to make such inspections and audits. (See Circular Letter Finance No. 225, dated December 9, 1940.)

772.8 Designs and Specifications.—It is extremely important that designs and specifications, particularly those in connection with supply contracts, be care-

3092 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

fully prepared and that all conditions or practices which might operate to delay both procurement and production be eliminated therefrom. It is further important that changes in such specifications or designs, when issued, be limited to cases of absolute necessity. It is, therefore, directed, insofar as practicable, that:

(a) Specifications will be so clear and complete that any competent manufacturer should experience no undue difficulty in preparing bids or estimates.

[10] (b) Unusual or unproven requirements will be avoided wherever possible.

(c) Tolerances and inspection standards will, to the greatest extent possible, conform to commercial practice and be capable of realization by mass production methods.

(d) Except in cases of absolute necessity changes in specifications or designs affecting work in process and affecting contracts to be placed will be avoided during the current emergency situation.

772.9 Approval of contracts.—(a) Lump-sum contracts.—All negotiated lump-sum contracts, both supply and construction, will be subject to the approval of higher authority as provided in paragraph 706.4, except that (1) all such contracts in excess of \$100,000 or less than \$500,000, will be submitted for the approval of the Chief of Engineers; (2) all such contracts of \$500,000 or more will be subject to the favorable recommendation of the Chief of Engineers and the approval of the Assistant Secretary of War and will not be binding until so approved.

(b) Cost-plus-a-fixed-fee contracts.—All cost-plus-a-fixed-fee contracts where the estimated amount is in excess of \$50,000 and less than \$500,000 will be subject to the approval of the Chief of Engineers, and all such contracts of \$500,000 or more will be subject to the favorable recommendation of the Chief of Engineers and the approval of the Secretary of War, and will not be binding until so approved.

(c) Letters or indorsements transmitting contracts for approval will state briefly, (1) the necessity for making the procurement without advertising; (2) bidders solicited; (3) comparative cost; (4) whether or not the contractor has been awarded any other negotiated contracts; and (5) any other pertinent data.

772.10 Priorities.—A committee, known as the Priorities Committee of the Army and Navy Munitions Board, has been established and a priorities system has been prescribed by it to insure the procurement of items of Army and Navy equipment and supplies, in the quantity needed, in the order of their military importance, and with the least practicable burden to industry. It is effected by the use, at the discretion of contracting officers, of a specific preference rating to be placed on individual contracts or orders for critical items, as directed by the Committee. They do not apply to contracts for River and Harbor and Flood Control works or procurements. The instructions and procedure prescribed by the Priorities Committee for the use of preference ratings on contracts will be published in a restricted Finance Circular Letter.

772.11 Delays due to priorities.—Under the standard form of construction contract, and under the liquidated damage article of the standard form supply contract, where delivery is delayed through the observance by the contractor of a voluntary preference obligation assumed at the instance of the Government under the system of priorities established by the Army and Navy Munitions Board on August 12, 1940, contracting officers will, in accordance with paragraph 754.1, grant such extensions of time of performance or delivery as may be warranted by the facts in each case.

[11] 772.12 Reports.—Reports of procurements and awards of contracts are required as follows:

(a) Reports of awards of contracts.—(1) Reports of awards of contracts in excess of \$2,000 under authority of the Act of July 2, 1940 (Public No. 708, 76th Congress) will be submitted by the district engineer or other contracting officer making the purchase at the time the award is made. In the case of items which have been classified under AR 380-5, the word "classified" will be substituted for the quantity and description of the item. Such reports will be made direct to the Assistant Secretary of War, Procurement Control Section, Washington, D. C., and a copy thereof will be transmitted to the Office, Chief of Engineers, Contract Section, Washington, D. C. These reports will be made on ordinary letter paper and will conform to the following outline:

Office..... Date.....

REPORT OF CONTRACT SERIAL No. -----

Under authority of sec 1 (a), act July 2, 1940 (Public No. 703, 76th Cong.)
 Project No. ----- Contract or production schedule No. -----
 Name and address of contractor -----
 Location of establishment or plant -----
 where the contract will be performed -----

Quantity	Item	Unit Cost	Total Cost
		Grand Total	-----

DATES

a. Quotations requested -----
 b. Award made -----
 c. Contract executed or notice to proceed issued -----
 d. Deliveries to commence -----
 e. Contract to be completely performed -----
 Number of quotations considered -----
 Competition was not obtained in the negotiation of this contract for the following reasons (when applicable) -----
 The prices obtained in the negotiations of this contract are fair and reasonable.

 Signature of Purchasing and Contracting Officer.

[12] (2) Every report submitted in accordance with (a) above will be serially numbered by the station submitting it and the first report submitted by a station will bear the notation "Serial No. 1" immediately below the date in the upper right hand corner. Subsequent reports will be similarly numbered. Such reports as have already been submitted and not so numbered will be assigned serial numbers by the stations submitting them and information as to the numbers assigned furnished by letter to the office indicated in (a) above.

(3) For any item, to which a preference rating has been assigned in accordance with the priorities instructions of the Army and Navy Munitions Board dated August 12, 1940, appearing in the report, a notation substantially as follows will be given:

"ANMB preference -----"
 (insert rating)

(b) Purchases in excess of \$2,000, made through contracts entered into under authority of the Act referred to in paragraph (a) (1), will not be reported under entry 14 on War Department Form No. 8 as open-market purchases (par. 5, AR-240). The number of such purchases made and the total amount of funds so obligated during each month will be shown by an appropriate notation in the space below entry 9 on page one of that form. The amount reported in the notation will be included in the total shown under entry 10. The number of purchases reported in the notation will be included in the total number of "other" purchases shown under entry 12.

(c) The instructions contained in the preceding paragraphs, (a) and (b), are applicable to all purchases made from War Department funds appropriated for the fiscal year 1941. Reports referred to therein, which have not been furnished covering the obligation of such funds prior to the receipt of these instructions will be prepared accordingly. They do not apply to procurements from River and Harbor and Flood Control funds.

(d) Reports of cost-plus-a-fixed-fee contracts and land acquisitions.

(1) The Act of October 8, 1940 (Public No. 800, 76th Congress) requires the Secretary of War to submit monthly within ten days following the last day of each month, commencing on or about November 10, 1940, to the Chairman of the Committee on Military Affairs and Appropriations of the Senate and House of Representatives, certain information on all cost-plus-a-fixed-fee contracts and all land acquisitions within certain periods. The Act provides that the first report should cover the period from July 1 to October 31, 1940.

(2) Such reports will be submitted by the contracting officer who executed the contract directly to the Assistant Secretary of War, Procurement Control Section, Washington, D. C., and a copy thereof will be transmitted to the Office, Chief of Engineers, Contract Section, Washington, D. C. The report covering contracts executed during the [13] period July 1 to October 31, 1940 should

3094 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

be submitted not later than November 5, 1940, and subsequent reports will be forwarded at the time the contract is executed in each case.

(3) Reports of cost-plus-a-fixed-fee contracts will contain substantially the following information:

Office ----- Date of Report -----
Serial No. of Report -----

REPORT OF CONTRACT

Cost-plus-a-fixed-fee

Act Oct. 8, 1940

(Public No. 800, 76th Congress)

- (a) Object or objects of the contract -----
- (b) Name and place of business of the contractor -----
- (c) Estimated cost of the contract (exclusive of the fee) -----
- (d) Amount of the fee -----
- (e) Date of contract -----
- (f) Location of the project where the contract will be performed -----

Signature of
Purchasing and Contracting Officer.

(4) Reports of land acquisitions will contain substantially the following information:

Office ----- Date of Report -----
Serial No. of Report -----

REPORT OF CONTRACT

Land Acquisition

Act Oct. 8, 1940

(Public No. 800, 76th Congress)

- (a) Location -----
- (b) Area -----
- [14] (c) Intended use -----
- (d) Purchase price -----
- (e) Amount appropriated for the purpose -----
- (f) Assessed value -----
- (g) Date acquisition was accomplished -----

Signature of
Purchasing and Contracting Officer.

(e) Press releases.—(1) Semi-monthly reports on the fifteenth and last day of each month of awards of contracts for supplies and Army construction will be submitted by the contracting officer executing the contracts, directly to the Assistant Secretary of War, Procurement Control Section, Room 2513, Munitions Building, Washington, D. C., and a copy thereof will be transmitted to the Office, Chief of Engineers, Contract Section, Washington, D. C. Such reports should be transmitted in time to reach the Office of the Assistant Secretary of War within three days of the period reported. Only contracts of sufficient importance to have news interest should be included. Awards of unusual interest and importance will be reported promptly at the time of award, rather than being held for the regularly semi-monthly release and items so reported need not be included in the semi-monthly report, but some mention should be made of them. Six copies of each semi-monthly and special report is required to be furnished the Office of The Assistant Secretary of War.

(2) Information on awards should include the contracting office, name and address of the contractor, the item or items contracted for, and the amount of each award as to quantity and money value and any other pertinent information. In addition thereto, the report will contain the completion date of deliveries for all contracts in excess of thirty days.

(3) The last release for each quarter of the fiscal year, will, in addition to the usual report of recent awards, include a summary showing the up-to-date status of the procurement program for the year by suitable items or categories, showing the amounts provided for in the annual program, the amounts contracted for to date, the amounts included in outstanding invitations, and other pertinent information.

(4) If the contracting officer considers that certain awards are of a confidential or other nature to make their publication inadvisable, recommendation to that effect should accompany the release.

(f) The term "contracting officer" as used herein means division and district engineers and other contracting officers specially designated by [15] the Chief of Engineers with similar unlimited authority. The reports of such contracting officers will include all procurements and awards by contracting officers with limited authority under their supervision or direction.

773. Bonds.—(a) Lump sum contracts.—Bid bonds will not be required. Performance bonds for all supply contracts, and construction contracts under \$2,000, are discretionary with the contracting officer and should be required only in exceptional cases. Performance and payment bonds must be required for negotiated construction contracts in excess of \$2,000.

(b) Cost-plus-a-fixed-fee contracts.—The Secretary of War is authorized under the Act of September 9, 1940 (Public No. 781, 76th Congress) to waive the requirements for performance and payment bonds for public works under cost-plus-a-fixed-fee contracts. Pursuant thereto the Secretary of War has determined that the requirements of performance and payment bonds for public works for the military establishment, entered into upon a cost-plus-a-fixed-fee basis, out of funds appropriated for the fiscal year 1941, or authorized to be entered into prior to July 1, 1941, shall be waived except in cases of special circumstances. If the district engineer or other contracting officer considers that the circumstances in any particular case are such that performance and payment bonds should be required, he will include a recommendation to such effect in his letter of application to the Chief of Engineers, (paragraph 772.7) setting forth in detail the facts upon which such recommendation is based.

773.1 Liquidated-damage provisions.—For use in Engineer Corps supply and construction contracts generally, see paragraphs 734.2 (d) and 734.3 (f). The inclusion of liquidated damage clauses in supply contracts under existing emergency conditions may frequently lead to complications in delivery or performance schedules with deliveries on other contracts under the system of priorities established by the Army and Navy Munitions Board on August 12, 1940. They will accordingly be included in negotiated supply contracts only in exceptional cases.

773.2 Walsh-Healey Act.—All negotiated supply contracts in excess of \$10,000 (both lump-sum and cost-plus-a-fixed-fee) will contain the Walsh-Healey Act provisions.

773.3 Bacon-Davis Act.—All negotiated contracts for the construction or repair of public works in excess of \$2,000 are subject to the provisions of the Bacon-Davis Act and must contain a schedule of minimum wage rates as determined by the Secretary of Labor.

773.4 Eight-hour Law requirements.—The provisions of the law prohibiting more than eight hours labor in any one day of persons engaged upon work covered by Army, Navy, and Coast Guard contracts were suspended by the Act of June 28, 1940 (Public No. 671, 76th Congress, Section 5 (b)). All contracts for the construction or repair of a public work or for non-personal services in which the stipulation prohibiting work in excess of eight hours a day was theretofore required to be included, are now subject to the provisions of Section 303 [16] of the Act approved September 9, 1940 (Public 781, 76th Congress) permitting employment of laborers and mechanics in excess of eight hours per day upon payment at not less than one and one-half times the basic rate of pay. The following paragraph will be included in all such contracts:

"ARTICLE 11. Eight-hour law—Overtime compensation—Convict labor.—

(a) No laborer or mechanic doing any part of the work contemplated by this contract, in the employ of the contractor or any subcontractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work at the site thereof, except upon the condition that compensation is paid to such laborer or mechanic in accordance with the provisions of this article. The wages of every laborer and mechanic employed by the contractor or any subcontractor engaged in the performance of this contract shall be com-

puted on a basic day rate of eight hours per day and work in excess of eight hours per day is permitted only upon the condition that every such laborer and mechanic shall be compensated for all hours worked in excess of eight hours per day at not less than one and one-half times the basic rate of pay. For each violation of the requirements of this article a penalty of five dollars shall be imposed upon the contractor for each laborer or mechanic for every calendar day in which such employee is required or permitted to labor more than eight hours upon said work without receiving compensation computed in accordance with this article, and all penalties thus imposed shall be withheld for the use and benefit of the Government: *Provided*, That this stipulation shall be subject in all respects to the exceptions and provisions of U. S. Code, title 40, sections 321, 324, 325, and 326, relating to hours of labor, as in part modified by the provisions of Section 303 of Public Act No. 781, 76th Congress, approved September 9, 1940, relating to compensation for overtime."

773.5 Advance payments to contractors.—Section 1 (c) of the Act of July 2, 1940 (Public No. 703, 76th Congress) provides that advanced payments to contractors in amounts not exceeding 30 percent of the contract price, may be made prior to July 1, 1942, when necessary in the interests of the National Defense upon such terms and conditions and such adequate security as the Secretary of War may prescribe. Requests for advance payments by contractors may be made at any time after negotiations have begun. District engineers and other contracting officers upon receipt of requests from firms or contractors for advance payments will forward such requests to the Chief of Engineers who will transmit the request with his recommendation to the Assistant Secretary of War for appropriate action. The following information will be presented with each case:

(a) Amount proposed to be advanced.

(b) Amount and character of contract involved.

(c) Whether award with or without advertising or on a cost-plus-a-fixed-fee basis.

[17] (d) Terms of the proposed advance (including method and time of repayment or liquidation).

(e) Necessity for the advance.

(f) Security proposed to protect the Government against loss with the definite recommendation as to the adequacy thereof.

(g) Financial position and the general character and responsibility of the contractor.

(h) Any other information pertinent to a proper decision in the case.

(i) Appropriation available.

773.6 Assignment of claims.—The Act of October 9, 1940 (Public No. 811, 76th Congress) provides that Sections 3477 and 3737, Revised Statutes, shall not apply in any case in which the moneys due or to become due from the United States, under a contract providing for payments aggregating \$1,000 or more, are assigned to a bank, trust company, or other financing institution, including any Federal lending agency; provided that:

(a) No claim shall be assigned, in the case of any contract entered into prior to October 9, 1940, without the consent of the Secretary of War. District engineers and other contracting officers will forward any requests for approval under authority of this subparagraph to the Chief of Engineers, who will transmit the request with his recommendation to the Assistant Secretary of War for appropriate action. All pertinent information necessary for action of higher authority will be submitted with the request.

(b) An assignment may be made in the case of any contract entered into subsequent to October 9, 1940, providing its terms do not prohibit such assignment. Assignments under authority of this subparagraph will be submitted for the approval of the Chief of Engineers, but they do not require the approval of the Secretary of War.

(c) Unless the terms of a contract provide otherwise, an assignment of the contract shall—

(1) Cover all amounts payable and not already paid.

(2) Not be made to more than one party.

(3) Not be subject to further assignment, except that an assignment may be made to one party as agent or trustee for two or more financing parties.

(d) In case of an assignment, the party to whom the contract was assigned shall file written notice, and a true copy of the assignment with the—

(1) General Accounting Office.

(2) Contracting Officer.

[18] (3) Surety or sureties upon the bond or bonds, if any, in connection with such contract.

(4) Disbursing officer, if any, designated in such contract to make payment.

Any contract entered into by the War Department after October 9, 1940, may provide that payments to an assignee of any claim arising under such contract shall not be subject to reduction or set-off for any indebtedness of the assignor to the United States arising independently of such contract.

773.7 Compulsory orders.—(a) Section 9 of the Selective Service and Training Act of 1940 (Public No. 783, 76th Congress) authorizes the President, through the head of the War Department or the Navy Department, in addition to the present authorized methods of purchase or procurement, to place an order with any individual, firm, association, company, corporation, or organized manufacturing industry for such product or material as may be required, and which is of the nature and kind usually produced or capable of being produced by such establishment. Compliance with all such orders for products or material shall be obligatory.

(b) It is the policy of the War Department to continue procurement under the defense program on the basis of voluntary cooperation between industry and the Government wherever possible.

(c) In the event that in any particular case a satisfactory solution cannot be reached on such voluntary basis, a full report of circumstances will be submitted to the Chief of Engineers for submission with his recommendation to the Office of the Assistant Secretary of War. Such report of the contracting officer will include his conclusion that action under Section 9 of the Act referred to is necessary, together with the reasons therefor, and a statement that the product or material desired is normally produced or is capable of being produced by the person or corporation involved, that the price of the product or material desired as determined by him is fair and reasonable, and as to the preference over other contracts or orders to which the proposed order should be entitled. All pertinent correspondence or other documents relating to the case should accompany such report.

By order of the Chief of Engineers:

E. E. GESLER,
Lt. Col., Corps of Engineers,
Chief, Finance Section.

ARMY PEARL HARBOR BOARD EXHIBIT No. 56

[1] AFFIDAVIT OF COLONEL THEODORE WYMAN, JR. SUPPLEMENTING TESTIMONY BEFORE ARMY PEARL HARBOR BOARD

Colonel Theodore Wyman, Jr., a person subject to Military Law, appearing before me in person and being first duly sworn, deposes and says:

The following corrections should be made to the transcript of my testimony given before the Army Pearl Harbor Board on 14 September 1944:

Page 3375, line 8, the word "bridges" should be changed to "barges".

Page 3470, line 11, the phrase "not of serious occasions" should be changed to "not a series of occasions".

Page 3478, line 8, the word "light" should be deleted.

Page 3581, line 13, the name "Mr. Epsom" should be changed to "Mr. Epps".

The answer recorded as given by me on page 3539, line 16, to the effect that I did not see Mr. Rohl at the Palace Hotel is erroneous, either because of a stenographical error or because of my misunderstanding of the question when asked. I did see Mr. Rohl at the Palace Hotel with Mr. Grafe, but did not discuss the questions of whether the contract would be enlarged in scope and amount.

In view of the Board's questions on my previous appearance covering the point of when I first knew that Mr. H. W. Rohl was not an American citizen, how I discovered this fact and what I did about it, I have reviewed the files on this point to refresh my recollection. My review of these files on this point reveals an inaccuracy in my statement made [2] on page 3504, of the transcript and repeated on pages 3560, 3579, and 3580, to the effect that I "immediately" wrote the Chief of Engineers upon discovering that Mr. Rohl was not an American citizen. At the time I testified it was my recollection that I wrote the

3098 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Chief of Engineers immediately, but a review of the file indicates that I did not write this letter until August 15, 1941. Consequently I would like my answers in this regard stricken from the record and for the following statement to constitute my testimony with regard to my discovery of the fact that Mr. Rohl was not an American citizen and the action taken by me after such discovery.

The first knowledge I had that Mr. H. W. Rohl was not an American citizen was gained through the following letter dated June 2, 1941 from Hawaiian Constructors to me as District Engineer, Honolulu, T. H. :

Contract No. W-414-eng.-602

JUNE 2, 1941.

THE DISTRICT ENGINEER,

U. S. Engineer Office, Honolulu, T. H.

DEAR SIR: Referring to your letter of May 7th—my answer thereto is supplemented by the following information :

1. Mr. H. W. Rohl, who owns 25% of the stock of the Rohl-Connolly Company, a member of the joint venture known as Hawaiian Constructors, was born in Germany and is not a citizen of the United States.

2. Mr. Rohl has an application for United States citizenship pending before the Naturalization Department of the U. S. Government in Los Angeles.

3. Mr. Rohl desires and intends, if permitted, to aid the United States Government in every way possible in the defense program of the present National Emergency.

[3] 4. Mr. Rohl is not employed by the Hawaiian Constructors; he is not now, nor has he been since prior to the execution of the contract, an officer or director of the Rohl-Connolly Company.

5. Mr. Rohl does not have, nor has he ever had, access to the plans or specifications for the work under this contract, nor has he participated in the contract trials; in fact, he has purposely refused to do any of these things and intends to continue to refuse in the future until he either receives U. S. citizenship, or express permission is granted to him as provided for in the Act.

Very truly yours.

HAWAIIAN CONSTRUCTORS,
/s/ Paul Grafe,
PAUL GRAFE.

This letter was written by Mr. Paul Grafe for Hawaiian Constructors in reply to a letter that I had written to Hawaiian Constructors on May 7, 1941, which reads as follows :

MAY 7, 1941.

TWJr/mlm

HAWAIIAN CONSTRUCTORS

Pier 2-A, Foot of Channel Street, Honolulu, T. H.

GENTLEMEN: Reference is made to Cost-Plus-A-Fixed-Fee Contract Eng. 602 of your company.

Your attention is invited to the following information relative to the employment of aliens on National Defense Contracts.

[4] "1. The employment of aliens by contractors on national defense contracts is not prohibited but is restricted as stated by War Department Circular No. 121, 1940, as follows :

"Protection of classified plans and specifications.—a. No aliens employed by a contractor in the performance of secret, confidential, or restricted Government contracts shall be permitted to have access to the plans or specifications, or the work under such contracts, or to participate in the contract trials, unless the written consent of the head of the Government department concerned has first been obtained, and any person who wilfully violates or through negligence permits the violation of the provisions of this subsection shall be fined not more than \$10,000 or imprisoned not more than five years, or both.

"b. Any alien who obtains employment on secret, confidential, or restricted Government contracts by wilful misrepresentation of his alien status, or who makes such wilful misrepresentation while seeking such employment, shall be fined not more than \$10,000 or imprisoned not more than five years, or both.

"c. For the purpose of this section, the term *person* shall be construed to include an individual, partnership, association, corporation, or other business enterprise. Sec. II, act June 28, 1940 (Bull. 15, W. D., 1940)

"2. Should it become desirable, for any reason, that aliens be employed by contractors on contracts affected by the foregoing restriction, application should

be made through this office, requesting the written permission of the Secretary of War for such employment and stating fully the reasons therefor.

"By order of the Chief of Engineers:"

Information is requested as to whether or not any aliens are employed by your company who would come under the meaning of Section II, act June 28, 1940.

Very truly yours.

THEODORE WYMAN, JR.,
Lt. Col., Corps of Engineers,
District Engineer

[5] Prior to receiving Mr. Grafe's answer of June 2, 1941, I had already received an answer from Hawaiian Constructors, dated May 14, 1941, which reads as follows:

MAY 14, 1941.

Subject: Cost-Plus-A-Fixed-Fee Contract Eng.-602

THE DISTRICT ENGINEER,
U. S. Engineer Office,
Honolulu, T. H.

DEAR SIR: Reference is made to your letter of May 7, 1941 relating to employment of aliens by contractor on National Defense Contracts. We wish to report that to our knowledge we have no aliens employed by our company who would come under the meaning of Section II, act of June 28, 1940.

We require each man to sign an application for employment on which he states whether or not he is a citizen of the United States. If he is not a citizen we do not hire him, except that some Filipinos are hired in accordance with District Circular #4 of March 22, 1941.

Yours very truly.

HAWAIIAN CONSTRUCTORS,
/s/ R. A. Schwieger,
R. A. SCHWIEGER.

The occasion for my writing my letter of May 7, 1941 to Hawaiian Constructors was the receipt by me on May 6, 1941 of the following Circular Letter, dated April 21, 1941, from the office of the Chief of Engineers:

[6]

4-H
WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, D. C., April 21, 1941.

3820 (National Defense)

Re. O. & R. Chapter VII.

Circular Letter (Finance No. 104)
(Contracts No. 35)

Subject: Employment of Aliens on National Defense Contracts.

To: All Divisions and District Engineers.

1. The employment of aliens by contractors on national defense contracts is not prohibited but is restricted as stated by War Department Circular No. 121, 1940, as follows:

"Protection of classified plans and specifications.—a. No aliens employed by a contractor in the performance of secret, confidential, or restricted Government contracts shall be permitted to have access to the plans or specifications, or the work under such contracts, or to participate in the contract trials, unless he written consent of the head of the Government department concerned has first been obtained, and any person who wilfully violates or through negligence permits the violation of the provisions of this subsection shall be fined not more than \$10,000 or imprisoned not more than five years, or both.

"b. Any alien who obtains employment on secret, confidential, or restricted Government contracts by wilful misrepresentation of his alien status, or who makes such wilful misrepresentation while seeking such employment, shall be fined not more than \$10,000 or imprisoned not more than five years, or both.

"c. For the purpose of this section the term *person* shall be construed to include an individual, partnership, association, corporation, or other business enterprise. Sec. II, act June 28, 1940 (Bull. 15, W. D., 1940)."

2. Should it become desirable, for any reason, that aliens be employed by contractors on contracts affected by the foregoing restriction, application should

3100 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

be made through this office, requesting the written [7] permission of the Secretary of War for such employment and stating fully the reasons therefor.

By order of the Chief of Engineers:

E. E. GESLER,
Lt. Col., Corps of Engineers,
Chief, Finance Section.

41/774

It should be noted that Mr. Grafe advised in his letter of June 2, 1941 that Mr. Rohl was not employed by the Hawaiian Constructors; that he was not at that time, nor had been since prior to the execution of the contract, an officer or director of Rohl-Connolly Company. I knew, of course, that Mr. Rohl had not taken any active part in the supervision or management of the work under Contract No. 602. Therefore, the fact that he was not an American citizen was not important in connection with the administration of Contract No. 602.

Later, as the work on Contract No. 602 expanded, it was felt desirable by Hawaiian Constructors and by me that his services be utilized in connection with this work. On August 15, 1941, I received the following letter from Mr. Grafe of Hawaiian Constructors:

AUGUST 15, 1941.

THE DISTRICT ENGINEER
U. S. Engineer Office
Honolulu, T. H.

Re: PROGRESS OF NATIONAL DEFENSE PROGRAM
Contract No. W-414-Eng-602

[8] DEAR SIR: Mr. H. W. Rohl of 8519 Hollywood Boulevard, Los Angeles, California, applied in the U. S. District Court in Los Angeles on January 15, 1941, for his final citizenship papers, which have not yet been issued to him.

Mr. Rohl is one of the principal stockholders of the firm of Rohl-Connolly Company, members of the joint venture known as the Hawaiian Constructors, the contractors on Contract No. W-414-Eng-602.

Mr. Rohl is a man of outstanding ability, with good judgment, resourcefulness, and experience on construction work.

Mr. Rohl's services as an executive on work to be performed under subject contract are urgently needed to expedite the National Defense Program at this time, due to the large amount of work to be done, and the scarcity of supervisory personnel and efficient labor. Mr. Rohl has not taken any part in the performance of the work under subject contract, although anxious to do so, because, since he is not a naturalized citizen, he did not think it good policy to become associated with restricted and secret work.

It is requested that you ask the Department of Justice to give early attention to Mr. Rohl's application for citizenship, so that his valuable services will be available for this work, thus accelerating the progress of this part of the National Defense Program.

Very truly yours.

HAWAIIAN CONSTRUCTORS,
/s/ Paul Grafe,
PAUL GRAFE.

On the same date, I wrote the following memorandum to the Chief of Engineers, through the division Engineer, advising that Mr. Rohl's services would prove invaluable in prosecuting the work at hand under Contract No. 602, and requesting that the Attorney General's attention be invited to the facts with the request that action on Mr. Rohl's application for final citizenship papers be expedited.

[9]

" 230

Request for Final Citizenship Papers of Mr. H. W. Rohl of Rohl-Connolly Company, San Francisco and Los Angeles, California.

THE CHIEF OF ENGINEERS,
U. S. Army,
Washington, D. C.

(Thru: The Division Engineer, South Pacific Division)

1. Mr. Paul Grafe, Attorney-in-fact for the Hawaiian Constructors, a joint venture consisting of the W. E. Callahan Construction Company, Los Angeles, California; Rohl-Connolly Company, San Francisco and Los Angeles, California; Gunther and Shirley Company, Los Angeles, California; and Mr. Ralph E. Woolley, contractor of Honolulu, prosecuting Cost-Plus-A-Fixed-Fee Contract No. W-414-Eng-602, has requested the District Engineer to bring to the attention of the Engineer Department the status of Mr. H. W. Rohl, 8519 Hollywood Boulevard, Los Angeles, California, one of the principal stockholders of the firm of Rohl-Connolly Company. Mr. H. W. Rohl has applied to the U. S. District Court at Los Angeles, California, on January 15, 1941, for his final citizenship papers which, it appears, have not been issued to date.

2. Mr. H. W. Rohl is a very skillful construction supervisor. He has personally supervised several large construction jobs for the Engineer Department under various contracts, also, other agencies of the United States. Some of the outstanding work performed by Mr. Rohl was the construction of the Los Angeles-Long Beach Detached Breakwater, the construction of the Headgate Dam and other heavy construction in the State of California. Mr. Rohl is a man of outstanding ability, and of excellent judgment and resourcefulness for the management of difficult construction work.

3. Due to the fact that part of the work being performed under Contract No. W-414-Eng-602 is of a restricted nature, and because of his alien status, Mr. Rohl has been reluctant to take any active part in the supervision or management of the work under Contract No. W-414-Eng-602; therefore, his valuable services have been lost.

4. While District Engineer at Los Angeles, California, the writer had frequent contacts with Mr. Rohl in connection with the Los Angeles-Long Beach Detached Breakwater construction and the dredging of the Los Angeles Harbor. It is the writer's opinion that Mr. Rohl's loyalty to the United States is beyond question.

[10] 5. In view of the scarcity of qualified supervisory personnel for construction work in the Hawaiian Islands, it is the District Engineer's opinion that Mr. Rohl's services would prove invaluable in prosecuting the work at hand under the above cited contract; therefore, it is recommended that the Attorney General's attention be invited to the case with a request that action on his application for final citizenship papers be expedited.

THEODORE WYMAN, JR.,
Lt. Col., Corps of Engineers,
District Engineer.

Inclosure: Ltr 8/15/41 fr
Hawn Constrs.

My recommendation in this memorandum was concurred in by the office of the Division Engineer at San Francisco through the following 1st indorsement:
Subject: Request for Final Citizenship papers of Mr. H. W. Rohl of Rohl-Connolly Company, San Francisco and Los Angeles, California.

3102 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Forts 665 (Hon) 15

1st Ind.

OFFICE, DIVISION ENGINEER,
SO. PAC. DIV.,
San Francisco, August 19, 1941.

To: The Chief of Engineers, U. S. Army, WASHINGTON, D. C.
Concurring in the views and recommendation of the District Engineer.
For and in the absence of the Division Engineer:

F. C. SCHEFFAUER,
Head Engineer.

Incl: n/c

[11] In response to this recommendation, I am advised that the office of the Chief of Engineers wrote the following letter to the office of the Attorney General on this matter:

"WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, August 28, 1941.

LEMUEL B. SCHOFIELD,
Special Assistant, Bureau of Immigration and Naturalization,
Office of the Attorney General, Department of Justice,
Washington, D. C.

DEAR MR. SCHOFIELD: The Hawaiian Constructors, a joint venture consisting of the W. E. Callahan Construction Co., Los Angeles, Calif.; Rohl-Connolly Co., San Francisco and Los Angeles, Calif.; Gunther & Shirley Co., Los Angeles, Calif.; and Ralph E. Woolley, contractor of Honolulu, T. H., are working on very important defense construction at Honolulu, T. H., pursuant to Engineer Corps Contract No. W-144-eng-602.

Mr. H. W. Rohl, 8519 Hollywood Boulevard, Los Angeles, Calif., one of the principal stockholders of the Rohl-Connolly Co., applied to the United States district court at Los Angeles, Calif., on January 15, 1941, for his final citizenship papers which have not, as yet, been issued. Mr. Rohl is possessed of outstanding ability, excellent judgment, and resourcefulness for the management of difficult construction work. Some of the outstanding work performed by Mr. Rohl was the construction of the Los Angeles-Long Beach detached breakwater, the construction of the Headgate Dam at Parker, Ariz., for the Indian Service, and miscellaneous dams, tunnels, and other heavy construction in the State of California. To date, Mr. Rohl's valuable services have not been available for Government defense projects because of his alien status.

The services of Mr. Rohl are of vital importance to the expeditious completion of the afore-mentioned defense construction project because of his peculiar qualifications and scarcity of qualified supervisory personnel. It is the understanding of this office that Mr. Rohl's loyalty to the United States is beyond question. It is therefore requested that the granting of Mr. Rohl's final citizenship papers be expedited.

[12] Your consideration and cooperation will be very much appreciated.
Very respectfully

JOHN J. KINGMAN,
Brigadier General,
Acting Chief of Engineers."

I was requested by the Board to determine the date on which Hawaiian Constructors actually initiated construction work under Contract No. 602. The file reveals that this date was February 5, 1941. This is shown in the attached exhibit marked Wyman Affidavit, Exhibit "J."

The Board requested that I determine who had final authority to approve drawings, plans and specifications. My research on this point reveals the following:

1. Plans prepared by the District Engineer were first submitted to the Commanding General, Hawaiian Department, for approval. Upon receipt of approval the plans, including design calculations and specifications, were transmitted to the Division Engineer in San Francisco for his approval.

2. For AWS projects certain items of equipment, such as towers, transmitter building, and power plant, were furnished by the using agency. Designs had to be held in abeyance until receipt of drawings from the using agency.

I have searched the files in the Office of the District Engineer in order to determine whether any written answer was received to my letter of January 22,

1941, written to Mr. Rohl requesting him to come to Hawaii in connection with the handling of Contract No. 602. I can find no answer. At the time I wrote this letter I did not realize that Mr. Rohl was not [13] employed by Hawaiian Constructors, nor that he was not at that time nor had been since prior to the execution of the contract, an officer or director of the Rohl-Connolly Company. I was first advised of this situation in the above quoted letter of June 2, 1941 from Mr. Grafe. I did not follow up the request in my letter of January 22, 1941 because the Hawaiian Constructors, shortly thereafter took steps to eliminate the difficulties that were being experienced in initiating work under Contract No. 602, the existence of which difficulties were the cause of my writing this letter.

The Board inquired as to who was immediately responsible for the quality and progress of work under Contract No. 602. My answer in this regard was not as complete as it should have been. This responsibility runs through the entire chain of engineering command. It begins with the selection of the contractor. Contractors are first chosen according to experience records as well as the knowledge of them possessed by contracting officer. The latter assures himself that the contractor can perform the work, both as to quality and time requirements, because he possesses finances, management, experience, plant, and personnel. A good contractor realizes his responsibility for progress and pushes the job.

The officer in immediate contact with the work is the Area Engineer. It is the Area Engineer who has the initial responsibility of checking progress and quality of work. An Area Engineer who has more than one job Engineer who is a resident on the job. The Area Engineer and the Job Engineer are assisted by Inspectors who are chosen because of training and ability.

[14] Field Areas submit *semi-monthly* reports of progress of all items of work to the District Engineer. These reports showed the estimated percentage of work completed as originally scheduled or planned, and the *actual* percent of completion attained, with explanations of reasons for delay or of difficulties.

I offer in evidence as Exhibit "K" a sample of the monthly report for a semi-monthly period for the construction program at a station. As part of it is shown the bar diagram of progress of individual features. These reports were prescribed by instructions contained in Orders and Regulations, Corps of Engineers, Paragraphs 236 and 243, supplemented by instructions contained in Finance Circular Letter No. 225, Paragraph 21, December 9, 1940, and Circular Letter, July 24, 1941, Office of the Chief of Engineers.

Area Engineers are in constant contact with the District Office to report difficulties and seek assistance.

District Engineers carefully choose Area Engineers from men whom they know are able and vigorous operators. All District Offices have operations and/or inspection divisions whose tasks are to keep constantly in touch with the work and to inspect it both for progress and quality. Under pressure of war work most districts also had additional transportation divisions, control divisions for coordination, and expediting sections. The Honolulu District had a transportation division and a special coordinator in charge of inspection.

The next higher echelon is the Division Engineer. The Division Engineer normally receive monthly reports of operations which tell what was [15] accomplished during the month on all projects in all districts. During the war period semi-monthly reports were prescribed. (Insert here date when semi-monthly progress reports were initiated.) These reports show breakdowns for every major job into its important features. Reports show the scheduled percent of completion and the actual, with explanations and reasons for delays and difficulties. It also shows the progress expected in the next semi-monthly period. Division Engineers habitually visit all projects under them or have some of their assistants do so to the extent that the magnitude of their work permits. During the war period Division Engineers generally have so great a number of projects that they must select those projects with the highest priority or those which were suffering the most difficulties to personally inspect, leaving the others to their assistants.

The next echelon of command is the Chief of Engineers. The semi-monthly progress reports described above are transmitted to the Chief of Engineers. There the Control Section examines them minutely to determine which projects are falling behind. Those projects of chief importance which are falling behind would generally be visited at once by a special inspector. For practically every

project having fallen more than 2% behind, a special letter of explanation was required. Many times these were required by radio or telephone.

At a previous hearing I was asked, who was responsible for the "tedious process" in effect with respect to putting construction projects underway during the period from the receipt of approval of the Hawaiian Constructors contract, January 6, 1941, to December 7, 1941.

[16] These time-consuming processes were those required by law, regulations, or long established procedures. The general purposes of these laws, regulations, and long established procedures is to secure control by higher echelon and to protect the Government in expenditures as well as to insure quality of work.

The change from peacetime methods of procedure to wartime was generally accomplished by decentralization of contractual authorities to lower echelons and a relaxation of the extent of review by higher echelons. However, some changes had to be made in laws of long standing.

The procedures might be divided into general types, namely: securing technical approval through Engineer channels; and securing approvals by tactical agencies or the using services, responsible for operating, and also securing the coordination required between all responsible agencies.

In order to understand the limitations on the authority of the District Engineer and all the steps that had to be taken by him in cooperation and coordination with other agencies, it is of the utmost importance that the Board keep in mind that at the time of the negotiation of the Hawaiian Constructors' contract, it was about a year before Pearl Harbor. The great sense of urgency was not yet present, although changes from peacetime procedure were being gradually introduced. In order to make this clear I shall discuss the law, regulations, and procedures as they existed under the following general heads:

- a. Method of contracting
- b. Procedures for technical approvals
- c. Limitations on money magnitude for a and b

[17] Under each of these headings I shall compare the situation during:

(1) Peacetime procedures which were in effect through most of 1940, and up to just before the date of approval of the Hawaiian Constructors' contract, January 3, 1941.

(2) Transitional period beginning in 1940 and during the period of the Hawaiian Constructors' contract up to 7 December 1941.

(3) Immediately after Pearl Harbor and during the war period.

I submit in evidence as Wyman Affidavit, Exhibits "A", "B", "C", and "D", tabulations of the contracting authorities for advertised, negotiated lump sum, and negotiated CPFF contracts prescribed for the District Engineer, Division Engineer, and the Office, Chief of Engineers, as these authorities varied in peacetime of 1940, in later 1940, and at the time of negotiating the Hawaiian Constructors contract in December 1940, just after that date and during 1941, and just after Pearl Harbor. These tabulations were extracted from existing orders and regulations. Some orders and regulations were missing from the files of the District Engineer but any inaccuracies will not affect the conclusions from statements made. If any great inaccuracies are found corrections will be submitted after records in Washington have been examined.

The following points are stressed:

a. The low magnitude of the peacetime contractual authorities of the District Engineer and of the Division Engineer, namely \$10,000.00 for the District and \$50,000.00 for the Division.

b. The low limitation for the District Engineer continued up to February 19, 1941. As far as the approval of specifications was concerned this meant that most plans and specifications had to be submitted to the Division Engineer on the mainland.

[18] c. Under the pressure of preparation for war there was a progressive decentralization of authority as shown by the increased limits of authorities of the District and Divisions on the dates May 1, 1940, December 9, 1940, and February 19, 1941. This decentralization thus began 19 months before Pearl Harbor.

d. That negotiated contracts were not permitted before the latter part of 1940; that up to the war period the authority to negotiate had to first be secured from the Under Secretary of War.

e. That decentralization was progressive from 19 months before up to the date of Pearl Harbor. In no respect was it comparable to the great decentralization that came after Pearl Harbor. For example District Engineers during 1941

could approve lump sum advertised contracts up to \$100,000.00. Later in the war period their authority was increased to \$3,000,000.00.

f. Attention is invited to Note 2 in the District Engineers' Contractual Authority which states that decentralization up to \$3,000,000.00 went even below District Engineers to Area Engineers.

g. Exhibit "D" shows the relative authorities for the execution of change orders after contracts were once negotiated. It shows similar trends to those described above. Decentralization of authorities was begun before Pearl Harbor and immediately after almost completely decentralized for the war period. In the special case of the District Engineer in Honolulu, four days after the attack at Pearl Harbor, the Division Engineer delegated to the District Engineer all of his contractual authority. This enabled the District Engineer to take action on contract instruments up to \$5,000,000.00.

It will be seen from the above that the District Engineer in Honolulu during the period of 1941, which is the period under investigation, had [19] many limitations under the law and under regulations of the War Department which required submission of specifications, awards, and contracts to higher authority. At the same time the War Department and the Engineer Department had started decentralizing to meet the increasing tempo pressure of war work. As noted in my earlier statement priorities ascribed to Hawaiian contracts were the same as those on the continent in spite of its isolated position.

It should be added that all job orders had to be submitted by the District Engineer, Honolulu, to the Division Engineer for approval. With reference to the use of negotiated contracts, either lump sum or cost-plus-a-fixed-fee, revised statutes which had been most rigid on requiring advertising for competitive bids of contracts for public works had to be modified to permit execution of construction *without advertising* and to permit of the use of the cost-plus-a-fixed-fee form of contract. The Act which afforded this relaxation was Public No. 703, 76th Congress, approved July 2, 1940. This information was published to the field in a Circular Letter from the Chief of Engineers, December 9, 1940, and at first the negotiated contract was merely recommended in cases where competitive bidding would not fulfill the needs of National Defense. It will be noted that in the tabulation the field offices had their choice of advertised contracts and negotiated contracts; that later in the war period advertised contracts were prohibited and only the negotiated ones allowed.

From the foregoing it will be seen that the responsibility for many of the procedures which might have been said to have delayed work because of limitations of authority was not that of any individual but lay collectively in existing laws, regulations of the War Department, and of the Engineer Department which laws and regulations had many fundamental sound reasons for existence, [20] and that those responsible for such laws and regulations recognized the need for their alteration in and took proper steps to that end to meet the increased speed of pre-war conditions even though there was no certainty of war.

As stated above some of the time-consuming procedures were those necessary for coordination with the Commanding General, Hawaiian Department, and the Using Services. In my original statement I submitted one example of the procedure involved in this coordination as Exhibit "N". I desire to submit a few additional examples marked Wyman Affidavit Exhibits "E", "F", "G", and "H". It will be noted that the time interval to cover the interchange of indorsements in these coordinating staff memoranda ran up in one instance of the four examples to nine weeks. These are merely additional examples selected at random. As noted in my original statement there are hundreds of examples of such coordinating memoranda in the District Engineer files.

Through oversight one page of the schedule attached to Exhibit E, which was the study on priorities introduced by me in evidence during my testimony was not included in the exhibit. I submit this missing page in evidence as Wyman Affidavit Exhibit "I".

In connection with my statements on page 28 of my original statement read before the Board on September 14, I submitted several exhibits illustrating efforts on my part toward expediting the work under the Hawaiian Constructors' contract. I would like to submit in evidence, another exhibit bearing on this point since it is quite pertinent thereto. I am therefore submitting exhibit designed Wyman Affidavit Exhibit "L", which is a letter to [21] all contractors engaged on defense projects within the Honolulu District emphasizing how

3106 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

imperative the expedition of this work was and urging anticipation of their material and equipment requirements.

I desire to submit a reply to the "Testimony of Mr. Robert Hoffman, Area Superintendent, Hawaiian Constructors, Bellows Field, T. H., taken at Hickam Field on 21 April 1942, by Colonel Lathe B. Row, Inspector General's Department." This report was answered completely and adequately in letter of May 9, 1942 addressed to the Commanding General, Hawaiian Department, and signed by Colonel A. K. B. Lyman, Department Engineer. The latter became my successor, inasmuch as the Hawaiian Department absorbed the District Engineer's activities in February of 1942. I submit in evidence this letter in refutation of the charges made by Mr. Hoffman in said Inspector General's Report as an exhibit marked Wyman Affidavit Exhibit "M".

[22]

Theodore Wyman, Jr.,
THEODORE WYMAN, Jr.,
Colonel, C.F.

Signed and sworn to before me, the undersigned authorized to administer this oath by the 114th Article of War, on this 16th day of September 1944.

Lue C. Lozier,
LUE C. LOZIER,
*Major, Commissioned in the Judge Advocate's Department,
Army of the United States.*

	District Engineer	Division Engineer	Chief of Engineers
1 May 1940 Changes.....	Change orders not in excess of \$500 providing for changes in plans and specifications within general scope thereof; extension of time of performance.	Change orders in excess of \$500 under contracts not exceeding \$50,000 (construction & supply).	Change orders in excess of \$500 under contracts in excess of \$50,000 (construction & supply); all change orders under contracts executed on other than prescribed stan. forms regardless of amount.
19 Feb. 1941 Changes.....	Same as above.....	Change orders in excess of \$500 and not more than \$25,000 under lump sum contracts only.	Change orders in excess of \$25,000 under lump sum and all change orders CPFF contracts (latter subject to approval of higher authority as required).
War Period. (After Pearl Harbor; published 2/19/42.)	Change orders up to \$2,000,000 under stan. form contracts and where the award (authority to bind Government in cases of \$1,000,000 or more) has been approved.	Change orders in excess of \$2,000,000 and less than \$5,000,000 under stan. form contracts and where award of change order (in cases of \$1,000,000 or more) has been approved.	Due to changed conditions—where amount less than \$5,000,000. (USW—change orders above \$5,000,000)

Wyman Affidavit—Exhibit E

HEADQUARTERS HAWAIIAN DEPARTMENT

INTER-STAFF ROUTING SLIP

The Inter-Staff Routing Slip is for use of the Department Staff including the Department C/A and the B&LDO. It will be used solely for Departmental Staff inter-communication.

This slip and accompanying papers, when transferred from one Staff Office to another, will be forwarded to the interested Staff section direct, with the exception that matters concerning personnel will be routed through the Adjutant General unless a policy has been established. The Staff section originating a routing slip will fill in the subject and at the end of the 1st Indorsement list accompanying papers. Notation of enclosures added subsequently will be made by the responsible office at the end of its indorsement. Indorsements herein will be numbered in sequence and initialed by the officer in charge or an officer authorized to sign for him.

No. of Ind. From and Date	To	Subject: Gasoline Storage Tanks	
1st Ind. Sig. O. 17 July 41	Dept Engr	1. Your drawing of the Kaala Station site shows a provision for a gasoline storage tank at the summit. This office has received six of these tanks and after inspection, questions the feasibility of initially installing one of them on Kaala, as well as keeping it filled. These tanks are 4000 gallon capacity and require a tank truck to properly service them. 2. An alternate suggestion is made—Install the tank at the base of the cableway, equip it with a pump so as to fill standard drums. These drums can then be accommodated by the cable car and hauled to the top. Tank trucks can readily be driven to the base of the cableway to refill the tank. This will also provide a storage for gasoline to be used by the cable hoist.	/s/ C. A. P. C. A. P.
2nd Ind. Engr. 8 Aug 41	Sig. O.	1. Since receiving your first R/S Indorsement, I have found out that the gasoline for the power plants for these stations must be a special white gasoline. If stored at the base of the cableway, the gasoline there could not be used for the power for the cableway operations. 2. I have discussed this matter with the District Engineer. Both of us believe that these tanks probably can be cut and hauled to the top of Mount Kaala in sections and then rewelded. If this is done and the tank is installed at the top of Mount Kaala, then it could be filled by gasoline carried up in drums without any great hurry, and having the tank at the top of Mount Kaala would insure that there was a supply of gasoline for the power units. On the other hand, if the tanks were placed at the bottom and gasoline hauled to the top in drums as needed, in actual operations it might be possible for the cableway to be knocked out of action, and this would make the supply of gasoline very difficult. I therefore suggest that we plan on installing the tanks at the top of the mountain. 3. Captain Tetley told me the other day that these tanks were all designed to be located above the ground in concrete cradles. I believe if it is at all possible they should be installed under the ground and I have asked the District Engineer to have a man look at the tanks to see if this can be done. For the Department Engineer:	/s/ R. F. R. J. F., Jr.
3d Ind. Sig. O. 21 Aug 41	Engr. O	1. Concur in cutting the tanks as suggested in par 2, 2nd R/S Ind. 2. The latest information received by this office regarding the installation of these tanks indicates that they may be placed underground after being treated with hot asphalt applications. Attention is invited to Drawing OCSigO ES-D-327. 3. The question of white gasoline to be used with the PE 74 has been taken up with the Signal Corps Laboratories. The PE 74 can be modified to use regular issue gasoline. Steps are being taken to effect this modification at the earliest practical date.	/s/ C. A. P. C. A. P.

No. of Ind. From and Date	To	Subject: Gasoline Storage Tanks	
4th Ind. Engr. 22 Aug 41	Dist. Engr.	1. To note 2nd and 3rd Indorsements. 2. Return of correspondence is requested. For the Department Engineer:	/s/ F. W. H. F. W. H. DB.
5th Ind. Dist. Engr. 2 Sept. 41	Dept. Engr.	1. Noted and concurred.	T. W., Jr.

Wyman Affidavit—Exhibit F

HEADQUARTERS HAWAIIAN DEPARTMENT

INTER-STAFF ROUTING SLIP

The Inter-Staff Routing Slip is for use of the Department Staff including the Department C/A and the B&LDO. It will be used solely for Departmental Staff inter-communication.

This slip and accompanying papers, when transferred from one Staff Office to another, will be forwarded to the interested Staff section direct, with the exception that matters concerning personnel will be routed through the Adjutant General unless a policy has been established. The Staff section originating a routing slip will fill in the subject and at the end of the 1st Indorsement list accompanying papers. Notation of enclosures added subsequently will be made by the responsible office at the end of its indorsement. Indorsements hereon will be numbered in sequence and initialed by the officer in charge or an officer authorized to sign for him.

No. of Ind. From and Date	To	Subject: Installation of Gasoline Storage Tanks at Bellows Field. (S-13)	
1st Ind. Air O. 10 May 41	Engr.	With reference to your request of 9 May 1941—attached hereto is a section of the Bellows Field Reservation on which is outlined the area selected for gasoline tank installations. Plans call for an installation of twelve (12) fifty thousand (50,000) gallon tanks. It is desired that these tanks be bombproofed. The area as shown will be covered by the end of the proposed runway and is placed in a section that will need a minimum of excavation. 1 Incl: Sketch showing Gas Storage for Bellows Field. For the Air Officer:	/s/ W. J. F.
2nd Ind. Engr. 26 May 41	Air O.	1. This office does not believe that the location selected for the installation of these gasoline tanks at Bellows Field should be accepted. 2. If these tanks are to be bombproofed they must be placed a considerable distance below the level of the ground where the burster course is located. At the point chosen there will not be sufficient fill above the tanks to provide this distance, and if the tanks are dug into the ground at this point to secure greater overhead cover, there will undoubtedly be difficulties encountered with seepage water as the tanks will be below the ground water level. 3. When preliminary discussions occurred several months ago regarding the bombproofing of these 30 50,000-gallon tanks, the recommendation that this be done was based upon being able to locate the tanks where they could be dug in or tunneled into the side of a hill in long galleries where several tanks could be placed end to end. I believe that these tanks are fabricated from $\frac{1}{2}$ " or less steel plate with no supporting ribbing. If the tanks are placed in a long pit end to end, the pit could probably be dug narrow enough so that an undisturbed berm could be left at the edge of the trench and the eventual weight of the burster course could be supported in large part upon this undisturbed berm. The tanks in this case would only carry the weight of the backfill above them. If, however, the tanks are placed in a trench parallel to each other, the tank would not only have to carry the weight of the backfill but would also have to carry the weight of the burster slab and there would be some question as to whether the tanks would have sufficient structural strength to do this.	

No. of Ind. From and Date	To	Subject: Installation of Gasoline Storage Tanks at Bellows Field. (S-15)	
2nd Ind. (Con't.) Engr. 26 May 41	Air O.	4. Based on a very hasty estimate made by this office, the cost of bombproofing these tanks will be about \$200,000 more than installing them without this protection. It is believed that locating them rather widely separated in locations away from the runways where the installation can be camouflaged by vegetation should be considered in lieu of bombproofing in view of this increased cost. There is a hill about 100 yards to the south of the existing runway where some of them could be installed and camouflaged and some more high ground to the west of the proposed new runway where possibly some more of the tanks could be installed and camouflaged. 5. It is requested that these comments be given your consideration in order that an acceptable method of installation and location may be reached. For the Department Engineer: 2 Incls: Added Map	/s/ RF R. J. F., Jr.
3rd Ind. Air O. 29 May 41	Engr.	The site as shown in the attached drawing for installation of gasoline tanks at Bellows Field is approved by this office. The matter of bombproofing is considered vital and should be provided for these tanks. Gasoline is obviously one of the most important items of supply for the Air Force. Any failure of this vital item would immobilize our service. For the Air Officer: Incls—n/c	/s/ WJF W. J. F.
4th Ind. Engr. 2 June 41	Dist. Engr.	1. The attached file is on the subject of location of the gasoline tanks for Bellows Field. 2. The Air Office originally proposed that these tanks be installed on the western end of the existing runway under the fill necessary for this extension and that the tanks should be bombproofed. This office believes that the tanks installed in this location would have to be below the ground water line in order to get sufficient overhead cover and raised the question in 2nd R/S Indorsement as to whether the tanks should be bombproofed or given protection by dispersion and camouflage. We made a very hasty estimate based upon the cost of the burster course that bombproofing would cost about \$200,000 additional. 3. The 3rd R/S Indorsement from the Air Office states definitely that they desire the tanks bombproofed and proposes locating them in the small hill to the south of the existing runway. Before the question of installing these tanks and bombproof storage is presented to the Department Commander for decision, I would like your comments on the proposal and on the additional cost required to bombproof the tanks. As stated, my estimate of this additional cost at \$200,000 was based upon a very hasty comparison of bombproof costs. For the Department Engineer: Incls: n/c	/s/ RF R. J. F., Jr.
5th Ind. Dist. Engr.	Dept. Engr.	1. This office concurs in the recommendation of the Department Engineer, that gasoline tanks be not located under the ends of the runway as shown on attached tracing. 2. The location indicated on the blue-line print has the disadvantage of being near the center of the camp and of having too little area to permit dispersion and therefore would require an expensive bombproof protection. 3. A suggested site which is shown on the attached print has the advantage of: (1) Ample room for dispersion. (2) Ease of excavation, as material is sand with no rock in evidence. (3) Ease of access, to large area in which planes may be dispersed for protection, without crossing the runways. (4) Natural camouflage by existing brush and Keawe trees. Incl.: 3 Incl. Added Map.	/s/ T. W. T. W.
6th Ind. Engr. 24 June 41	Dist. Engr.	1. What is your rough estimate of increased cost if these tanks are bombproofed? For the Department Engineer. Incl: No change.	/s/ R. F R. J. F., Jr.

3114 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

No. of Ind. From and Date	To	Subject: Installation of Gasoline Storage Tanks at Bellows Field. (S-15)	
		District Engr verbally confirmed our estimate for \$200,000 additional.	
7th Ind. Engr. 14 July 41	Dist. Engr.	1. I have discussed this question of location of the gasoline tanks at Bellows Field with General Martin. I explained to him that bombproofing these tanks would take additional funds, and that these funds have not been included in the estimates submitted for Bellows Field. I also explained to him the status in regard to the \$2,000,000 allotment for installation of gasoline tanks at Hickam Field and at Wheeler Field which you recently received. 2. General Martin agrees with our belief that the first proposed location at the end of the runway is not satisfactory, and also with your statement in the 5th R/S Indorsement above, that the location in the small hill south of the existing runway is not satisfactory. He does not like the location that you suggested, however, because these tanks would then be practically in the bombing range at Bellows Field. I suggested to him then that we consider an area in the hill north of the proposed runway as indicated in red on your print. He agreed that this location would be satisfactory but before approving it finally would like to leave the question open to your engineering determination. I also passed on to General Martin your suggestion that these tanks now be installed without bombproofing, but in such a manner that a burster course could be later added when additional funds are made available. General Martin also concurred in this suggestion. 3. It is therefore requested that you give consideration to installing these tanks in the hill indicated on your print. If this site is feasible from Engineering considerations it will be approved by General Martin. For the Department Engineer: 3 Incls: n/c	/s/ R.F. R. J. F.

Subject: Transmittal of Definite Project Report and Drawings for the Installation of War Reserve Aviation Gasoline Storage in the Hawaiian Islands.

To: The Commanding General,
Hawaiian Department,
Fort Shafter, T. H.

1. Attached herewith is a copy of the Definite Project Report for the Installation of War Reserve Aviation Gasoline Storage in the Hawaiian Islands, including necessary drawings.

2. A copy of this report was forwarded to the Office of the Chief of Engineers with recommendations for the adoption of the cut and cover type of gasoline storage at Site "B" and tunnel type of construction to be used for site "A".

HEADQUARTERS HAWAIIAN DEPARTMENT

INTER-STAFF ROUTING SLIP

The Inter-Staff Routing Slip is for use of the Department Staff including the Department C/A and the B&LDO. It will be used solely for Departmental Staff inter-communication.

This slip and accompanying papers, when transferred from one Staff Office to another, will be forwarded to the interested Staff section direct, with the exception that matters concerning personnel will be routed through the Adjutant General unless a policy has been established. The Staff section originating a routing slip will fill in the subject and at the end of the 1st Indorsement list accompanying papers. Notation of enclosures added subsequently will be made by the responsible office at the end of its indorsement. Indorsements hereon will be numbered in sequence and initialed by the officer in charge or an officer authorized to sign for him.

No. of Ind. From and Date	To	Subject: Installation of War Reserve Aviation Gasoline Storage in the Hawaiian Islands	
1st Ind Engr. 11 July 41	G-4	1. There is attached a letter dated 1 July from the District Engineer which forwards a copy of his report to the Chief of Engineers on the installation of War Reserve Storage for Aviation Gasoline. In brief this report discusses four items: a. Installation of gasoline and tunnel-type galleries at Site A near Salt Lake. b. Installation of gasoline in tunnel-type galleries at Site B in the Waikakalaua Gulch. c. The installation of gasoline in cut-and-cover bombproofed tanks at Site B. d. The installation of necessary pipelines and appurtenant pumps. 2. The District Engineer finds that 83,000 barrels can be installed in tunnel-type galleries at Site A for \$1,020,374.00 or \$12.29 per barrel. At Site B storage of 200,000 barrels in tunnel construction would cost \$2,991,048.00 or \$14.96 cents per barrel. At Site B installation of storage of 200,000 barrels in cut and cover bombproof constructions would cost \$2,111,808.00 or \$10.56 per barrel; and the pipeline from Pearl Harbor to Sites A & B and distribution lines to Hickam and Wheeler Fields would cost \$407,339.00. 3. The District Engineer recommends that projects be adapted for the storage of 83,000 barrels at Site A; for 200,000 barrels at Site B in cut-and-cover bombproof construction, and for the installation of a pipeline. 4. This recommendation follows in general the original recommendations of this headquarters and the Navy when this matter was discussed last spring. At that time it was recommended that of the Army storage 50,000 barrels be installed at Site B; 50,000 installed at Site A; that the Navy storage be installed at Site A; and that all tanks be bombproofed. In the event that bombproof protection was not permitted, it was strongly recommended that the storage be installed in the sites selected, but in sufficiently small tanks to permit proper protection by dispersion. Since the project now provides for fully bombproofed protection, dispersion in small tanks is not believed essential. 5. Time for finishing the project is estimated at 8 months. Colonel Wyman has informed me that he is ready to commence operations at Site B; that the construction is included in his cost plus fixed fee contract with the Hawaiian Constructors; and that he expects to receive allotment of funds from the Chief of Engineers in the very near future to permit him to initiate construction at Site B. He also informed me that he was receiving funds from the Navy to pay for their share of the project at Site A. 6. The present War Department status of this project is as follows: We have been informed by The Adjutant General that the original	

3116 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

No. of Ind. From and Date	To	Subject: Installation of War Reserve Aviation Gasoline Storage in the Hawaiian Islands	
1st Ind Engr. 11 July 41	G-4	project for 100,000 barrels of storage has been increased to 250,000 barrels, and that funds in the amount of \$2,000,000 will be available, and that additional funds will probably be forthcoming if needed. The Navy has not specified any set amount of storage, but has specified that as much storage be secured as possible with the funds to be made available. Colonel Wyman estimates that this Navy money will be sufficient to provide storage for about 33,000 barrels of gasoline, and therefore the entire project consists of storage for between 275,000 and 283,000 barrels of gasoline, 250,000 of which is the Army share. 7. In a further discussion with Colonel Wyman today we discussed the question of the storage at Site B. As indicated on the drawings, this storage is now planned for four separate tanks of 50,000 barrels each, each with its own burster course. The tanks are separated by 200 feet as this was the original directive from the War Department before the study was made. Colonel Wyman believes that since bombproof protection is to be provided with a reinforced concrete burster course, that the tanks can be placed closer together. This will enable more than one tank to be placed under a burster course and will save concrete which can be utilized to extend the amount of lateral protection. 8. The Department Commander has been informed in general of this study, Commanding General, Hawaiian Air Force, has been informed. The District Engineer has consulted the Navy. This memorandum is submitted for information only as no action is necessary at this time. For the Department Engineer: 1 Incl: Ltr. No. 461 x-633 Ammunition Mag. 1 July 41 w/Incls	/s/ R. F. R. J. F., Jr.
2nd Ind. G-4 15 July 41	C/S-----	1. The Engineer Officer forwards herewith for the information of this headquarters one copy of the engineering study which was prepared by the District Engineer covering the storage of a war reserve of aviation gasoline. This study was prepared as a result of a directive from the Chief of Engineers direct to the District Engineer. 2. This Headquarters is vitally interested in the manner in which its war reserve of aviation gasoline is stored. While the W. D. has taken no action to indicate whether the instant study will be approved it is probable that its principal features will be used as a guide in designing the installations. It is believed that the Department Commander should be fully informed on the recommendations which have been submitted by the District Engineer. With that object in view, it is recommended that the District Engineer be requested to discuss the details of this study with the Department Commander. 3. In general, this study discusses the following: a. Installation of gasoline storage in tunnels at Site "A", southwest of Allamapu Crater. b. Installation of gasoline storage in tunnels at Site "B", in gulch near RR Station of Robinson, south of Wheeler Field. c. Same as b, except storage in cut and cover tanks. d. Pipe lines, pumps and other appurtenances. 4. It is recommended that: a. The District Engineer discuss this study with the Department Commander. 1 Incl. n/c.	/s/ C. C. B. C. C. BANK, Col. G. S. C. Asst. C. of S.

No. of Ind. From and Date	To	Subject: Installation of War Reserve Aviation Gasoline Storage in the Hawaiian Islands	
3rd Ind. C/S 7/15/41	Lt. Col. Wyman District Engineer	Please present this to the Department commander, in person. Incls: n/c	/s/ H. PHILIP HAYES, Colonel, G. S. C. Chief of Staff.
4th Ind Dist. Engr. 16 July 41	C/S.....	1. The District Engineer discussed this study with the Department Commander Wednesday, July 16th. 2. The District Engineer discussed the study with Admiral Bloch on Monday, July 14th. Admiral Bloch stated that he concurred in the plans and recommendations of the District Engineer with one exception. In view of the Naval Regulation that gasoline will not be passed over the fuel oil dock located at Pearl Harbor, the loading point should be moved to another location. The Admiral suggested that the loading point be located in the vicinity of the Quartermaster Dock at Hickam Field. The District Engineer has no objection to changing the loading point to Hickam Field. A loading point can be designed in the vicinity of the Quartermaster Dock at Hickam Field which will not interfere with normal traffic at the dock. Admiral Bloch also stated that he would desire a connection from the pipe line to the proposed Navy air facility at Barbers Point, the cost to be financed by the Navy Department. Incl. n/c	/s/ T. W., Jr.
5th C/S 7/17/41	Engr O.....	Please present to D. C. Incls: n/c	/s/ PHILIP HAYES Colonel, G. S. C., Chief of Staff.

No. 3009 June 10

I have been informed by the Division Engineer San Francisco that A-1-G is the priority covering contract W-414 Engr 784 with Interstate Equipment Corporation Elizabeth New Jersey. Materials for cableway to Kaala aircraft warning station covered by this contract. General Electric has subcontract for motor and all electrical equipment. According to division engineer a delay of about fifteen weeks in the delivery of this electrical material to contractor is strongly probable under this priority. As this Kaala station is the most important in aircraft warning system, it is essential that this cableway be completed early. In this department this aircraft service is considered to be the most important single project. War Department assistance to the Chief of Engineers to have priority on this contract changed to A-1-B is strongly recommended.

Hickam Field

Wyman Affidavit—Exhibit K

AUG. 16-31, 1941.

CONSTRUCTION PROGRAM AT AIR CORPS STATIONS

NO. 1—HICKAM FIELD, T. H.

1. LOCATION AND GENERAL DESCRIPTION:

Hickam Field is an existing military airfield located on the south shore of Oahu, approximately three miles west of the City of Honolulu. The current project consists of construction of the additional buildings, facilities, and miscellaneous works required to house and serve an Air Force Headquarters, a Wing Headquarters, two Bombardment Groups, one Air Base Group, one Transport Squadron, and attached service troops of the Quartermaster Corps, Signal Corps, Ordnance Department, etc.

2. PERTINENT DATA:

a. Directive:

(1) 4th Ind., from the Adjutant General, dated January 2, 1941, File No. AG 600.12 (12-6-40) M-D, to the Commanding General, Hawaiian Department.

(2) Letter from A. G. O. April 2, 1941, to Q. M. C. Subject: Construction of Chapels.

(3) Letter from Chief of Engineers dated May 29, 1941, to Division Engineer, S. P. D. Subject: Armament, Instrument Inspection, and Adjustment Building, Hickam Field.

b. Date layout plan approved by Air Corps:

(1) December 2, 1939.

(2) Revised layout plan approved February 8, 1941.

c. Lease of land approved: Construction is on military reservation.

d. Troop capacity of housing:

(1) Completed, 357.

(2) Under construction, 1,386.

(3) Authorized but not under construction, none.

e. Number of troops occupying stations: 5,475.

[2] f. Construction begun: Existing works begun in 1936 prior to transfer of project to Corps of Engineers.

Present construction:

(1) Administration and Housing, November 13, 1939.

(2) Hospital or Medical Corps Installation, May 28, 1940.

(3) Technical Facilities, November 20, 1939.

3. STATUS OF CONSTRUCTION:

See Table I, progress chart, and map herewith.

Percentage of Completion:	Original program	Additional program	Total program
Administration & Housing (including utilities).....	99	67	76
Hospital or Medical Corps Installation.....	98.5	92.5	94
Technical Facilities.....	88	42	60
Project as a Whole.....	93	57	69
Readiness for Occupancy and Use.....	93	57	69

4. AUTHORIZED AND ESTIMATED COST OF PROJECT:

	Original program	Additional program	Total program
a. Authorized Cost.....	\$12,821,882.00	\$3,188,906.19	\$16,010,788.19
b. Estimated Cost:			
(1) Work constructed or in place (from "Cost to 7/31/41", Fm 38A).....	6,554,888.01	422,509.17	6,977,397.18
(2) Work under way.....	1,569,127.54	1,548,947.18	3,118,074.72
(3) Work authorized, but not yet under way.....	5,100.00	818,420.76	823,520.76
(4) Total estimated cost (from "Present working Estimate as of 7/31/41", Form 38A).....	7,382,323.87	1,690,866.04	9,043,189.91

[5] 5. STATUS OF PLANS AND SPECIFICATIONS:

	Per Cent Complete	
	Plans	Specifications
Gasoline Storage Tanks.....	0	0
Aqua Gasoline Storage from domestic water to salt water.....	70	0
Chapel.....	100	0
Headquarters Building.....	98	55

¹ Previously reported as 3 units, 2 units, and 1 unit each of Service Warehouses, Day Rooms and Recreation Bldg. respectively. Funds covering construction of 1 unit of each type has been transferred to cover cost of moving a Y. M. C. A. Bldg. and a Y. M. C. A. Secretary's House from Pearl Harbor to Hickam Field.

(The map referred to under "Status of Construction," *supra* is a chart which will be found reproduced as Item No. 62, EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board)

EXHIBIT L

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
Honolulu, T. H., July 12, 1941

Subject: Material and Equipment Requirements on Defense Contracts.

To: Contractors engaged on construction of defense projects within the Honolulu District.

Recent experience on construction work has demonstrated that it is becoming increasingly difficult to secure delivery of necessary materials and equipment without undue delay in some phase of the work. It is imperative that construction of defense projects be expedited and completed as soon as practicable with due regard to considerations of economy, sound construction practice, and close adherence to the contract plans and specifications.

In order that construction on defense projects may proceed steadily and without interruption, it is considered highly desirable that all contractors anticipate material and equipment requirements and place all orders at the earliest possible date. Granting of priority ratings has materially aided delivery of certain items, however, the effectiveness of this system has been diminished by the large volume of existing business. Placing of orders at an early date materially advances date of delivery.

Cooperation of all concerned is urgently requested.

[s] THEODORE WYMAN, Jr.,
Theodore Wyman, Jr.,
Lt. Col., Corps of Engineers,
District Engineer.

5-H
MAY 9, 1942.

Subject: Statement of the Department Engineer in reply to allegations of Robert Hoffman relative to the progress of work at Bellows Field under Contract No. W-414-eng-202.

To: The Commanding General, Hawaiian Department, Fort Shafter, T. H.

1. Reference is made to the testimony of Mr. Robert Hoffman, Area Superintendent, Hawaiian Constructors, Bellows Field, T. H., which testimony was taken at Hickam Field, T. H., on the 21st of April, 1942, by Colonel Lathe B. Row, I. G. D., Department Inspector General, and forwarded to this office by Interstaff Routing Slip from the Inspector General to the Department Commander, and thence to this office.

2. From an analysis of the testimony of Mr. Hoffman, it appears to be a highly falsified general criticism of the conduct of the work by this office on the island of Oahu, a criticism of virtually all of the key personnel, and a criticism of his employers, the Hawaiian Constructors. In order to properly present the matter, it is necessary to refute his general allegations; however, these will be touched on but briefly as the actual facts presented demonstrate beyond reasonable doubt that Mr. Hoffman was grossly inefficient, either willfully or through lack of ability and apparently without integrity.

3. It has been deemed desirable, however, to answer in somewhat greater detail, the allegations made relative to the water supply and gasoline storage projects at Bellows Field, due to the importance of these works.

4. Mr. Hoffman's complete lack of integrity is evident from the answer to the fourth question appearing on page one of the testimony, wherein he falsely claims to receive \$4,200 per year from the Hawaiian Constructors payable from their funds, in addition to the \$7,800 yearly from the funds payable by the United States. His total salary was \$7,800 yearly and not \$12,000 as claimed. This deliberate and premeditated prevarication, under oath, demonstrates the worthlessness of his testimony.

5. By way of introduction, it may be stated that Mr. Robert Hoffman was employed on the mainland by the Hawaiian Constructors (cost-plus-a-fixed-fee contractors—Contract No. W-414-eng-602), for the position of Assistant Building Superintendent at a salary of \$400.00 per month (\$4,800 per annum). [2] His initial assignment at this field was confined to relatively simple wood mobilization structures. At a later date, work commenced on the runways and the first one was completed (to a usable degree) late in December 1941, with the exception of the fine grading and paving with asphalt. Subsequent promotion to \$500.00, to \$800.00 and thence to \$650.00 per month, with the title of Area Superintendent, were authorized on October 21, 1941, January 24, 1942, and March 24, 1942, respectively. Shortly, after the outbreak of war, it was noticed that the progress of work at Bellows Field was conspicuously slow. Efforts were made to speed up construction, but all such efforts failed. Mr. Hoffman either would not or could not, through incompetence, maintain anything like a normal rate. The history of the gasoline storage tanks set forth below conclusively demonstrates this fact. The source of the trouble, having been analyzed, Mr. Hoffman was removed for incompetence shortly after his last promotion (included with fifty-eight other employees) had been approved. The interests of the United States rendered this action mandatory. In no case, where the facts have been known, has this office tolerated hindrance of the defense effort by permitting incompetent personnel to remain in charge of vital projects.

6. Mr. Hoffman's motives in submitting his testimony wherein he vindictively attacks his superiors and representatives of this office are not understandable. It is noted that he submitted his evidence only after his removal. Obviously his patriotism, if genuine, would have prompted him to speak at an earlier date, as his supposedly pertinent observations were, in some cases, not disclosed for a period of six months.

7. In his testimony, it is noted that he has commented upon many matters on which he is completely uninformed. Investigation reveals that he has distorted facts to suit his peculiar purpose, and finds, it to his interest to resort to the truth only upon infrequent occasions. Inquiry from his former associates discloses that his reputation for truth and veracity, based upon their observations over a period of a year, is bad.

8. That his testimony is presented on a biased viewpoint is demonstrated by the fact that no mention is made of the outbreak of war as contributing to the difficulties encountered.

9. Since his removal, conditions have improved. The gasoline storage tanks were completed to a usable condition on May 4, 1942.

10. The discussion herein follows in general the sequence of his testimony. Mr. Hoffman first criticizes the organization of the U. S. E. D., contending that they are attempting to do a field job by remote control with men earning \$3000 to \$4800 annually and who are without the proper experience. [3] It is a well known fact that work on the mainland prosecuted under the direction of the various Engineer Offices is handled in this manner with great success, thereby demonstrating that a great multiplicity of relatively simple projects (as encountered in the Hawaiian Islands) does not require the presence in the field of government employees in the higher salary brackets. An examination of the projects under construction will result in the conclusion that they are relatively simple construction problems, far less intricate than the lock and dam structures frequently encountered in the mainland, which have been successfully constructed under the direction of the Corps of Engineers for almost the past century with the same type of organization.

11. In one of his initial statements he contends the work was being prosecuted by remote control. Actually the work at Bellows Field was largely under his control as Area Superintendent for the Hawaiian Constructors, with the Area Engineer at Bellows Field in local charge of the functions of this office. The design of work is handled in the Young Building, a forty minute drive from the field, and with direct telephone connection. The island of Oahu is divided into seven areas. The islands of Kauai, Maui (with Molokai and Lanai) and Hawaii are each separate areas. Southerly Pacific Islands comprise four additional areas. Obviously this is decentralization to a high degree. Mr. Hoffman apparently was either incapable of appreciating this fundamental fact or he chose to intentionally distort even this basic truth. This is typical of the remainder of the observations and is consistent with his general character.

12. Procurement in the Hawaiian Islands for large scale construction is necessarily something of a problem, where, as in this case, funds were not available to permit stocking of needed materials. It is evident that special materials must

be brought from the mainland and that securing such items, even when ordered by radio must take several weeks at the very minimum. Major Shields, who handled procurement and was relieved of this assignment only when it was desired to utilize his services as Area Engineer at Station "Y", is a graduate engineer, well qualified to handle any mass production procurement pertaining to the work in the Hawaiian Islands. Shortly before Major Shields' transfer to his new assignment, the total estimated cost of Contract W-414-eng-602 was less than \$15,000,000 and as of July 15, 1941, was less than \$6,000,000 at which time procurement on the mainland had already become an acute problem due to shortage and delay in securing materials. Mr. Hoffman chose to ignore entirely the recognized shortage of materials which required the complicated system of priorities which has been in effect for more than one year.

13. The criticism of the prosecution of the work on the gasoline installations may be understood more clearly after a review of the pertinent facts connected therewith. On page 3 of the testimony, it is stated that "the tunnel was driven but not completed for a period of 90 days." [4] Mr. Hoffman's personal animosity to Mr. Cherry, Superintendent of the Hawaiian Constructors, contributed largely to the change in organization by which Mr. Cherry, his crew, and his equipment were withdrawn from the work at Bellows Field to permit the Area Superintendent to handle all tunnel work in the area. When this change was effected, on December 8, 1941 (approximately) the tunnel for gasoline tanks had been driven to its full length for six tanks. However, it was decided to excavate a relatively shallow trench in the floor of the tunnel to contain a concrete pipe duct to house the pipes leading to the tanks. With the inexpert supervision and methods utilized by the Area Superintendent, work on this project was delayed for approximately three months.

14. On page 3, he states "the U. S. E. D. insisted on having the tanks within 24 hours which was a physical impossibility." This statement is without foundation nor is there any record in this office of such demand.

15. Mr. Hoffman stated (on April 21, 1942) that there was no way to fill the tanks with gasoline and he specifically mentions, "as an accredited engineer" that no plan had been made to pump gasoline in these tanks. Actually, as of May 1, 1942, a pipe line was in existence for this filling the tanks. This line extends from the tanks, up the hillside, along the road to the additional tunnels under construction, (which road is usable and accessible for heavy trucks) terminating in intake pipes providing means whereby the tanks may be filled at this point by utilizing a gravity system, which method is obviously less expensive and has many advantages over any system which Mr. Hoffman deemed necessary. It is apparent from his own statement that the relatively simple expedient of the gravity system did not occur to him. Mr. Tillman, the Area Engineer who succeeded Mr. Lynch, found stored at Bellows Field practically all of the complete pipe fittings for the tanks including the pressure release valves which Mr. Hoffman at one time said had not been shipped from the mainland and which he apparently decided to forget were stored at the site.

16. There is no genuine excuse for the delay in installing the tanks in the tunnel. The 15 pound rail referred to is part of a limited local supply used for tunnel construction. The construction at an inaccessible A. W. S. Station required the use of this light weight rail. The inaccessible location of the station required use of a pack train to deliver the rail. It is evident that the 60 pound rail could not be used for this purpose, whereas it was perfectly satisfactory and available for use at Bellows Field. Colonel Robinson directed the Hawaiian Constructors to secure immediately the needed 60 pound rail of which there is a great surplus available in Honolulu. This was for use in skidding the tanks into position. Mr. Hoffman took this incident as an excuse to delay prosecuting the work. It was entirely within his prerogative, and a part of his responsibility as Area Superintendent to expedite the action of his organization in securing the necessary rail. Instead, as in many other instances, he did nothing about the matter. [5] Mr. Cherry finally delivered 1,200 track feet of rail together with the ties to the field on February 1, 1942. The Area Engineer, Mr. Lynch, had assured Colonel Wyman that the tanks could be placed and properly connected in a period of ten days, provided that he was given an RD 8 Caterpillar and other necessary materials. These materials and the tractor were delivered in accordance with his requisition. Mr. Hoffman then installed the rail extending up the hillside from the then location of the tanks and into the tunnel. Then, at this late date, in attempting the excavation of the trench in the floor of the tunnel, he ascertained that the tracks and ties interfered with the work and he decided to remove the tracks and ties from the tunnel and stock them

outside. The necessary excavation for the pipe duct in the floor of the tunnel continued at a slow pace for a period of approximately 60 days, during which time, three of the tank saddles required for one tank were constructed at the remote end of the tunnel.

17. Mr. Hoffman insisted on pouring one set of concrete saddles, moving in one tank for same, building the next set of saddles and moving in another tank, all of which was scheduled to take 48 days. The Area Engineer, Mr. Tillman, however, insisted upon pouring the saddles first and then moving in the tanks, thereby saving a great deal of time.

18. A brief resume shows that work started on the tunnel about September 18 and stopped on December 8, 1941. Nothing further was done until about February 10th, 1942, when the trench was started. The trench was completed on March 20, 1942. The initial attempt to move the first tank on March 25, was a failure as a saddle pulled out of position due to use of improper methods. This schedule demonstrates that from December 8, 1941 to March 25, 1942, a period of 3½ months, little was done on the project except construct the saddles and excavate the trench and place therein the concrete duct for the pipes. The dilatory conduct of the Area Superintendent in this matter is difficult to understand, but may be attributed to his lack of experience in handling projects of this nature.

19. Some further delay in prosecuting the work on this project was occasioned by suspending operations on this project due to the desire of the local Air Corps to use the tunnel for some other purposes. This matter was finally settled and no change was made in the tunnel for that reason.

20. The design of both the water supply and fire protection system for Bellows Field assures adequate facilities for the completed camp. The present system is temporary only for use during construction. The facts relative to the 4" water line are that virtually all materials for this line were delivered by February 19, 1942. At that time, some trenching had been completed. Mr. Hoffman then delayed starting work until he could secure a reducer connection for the transition from 6" to 4" pipe. Upon receiving that item, he then said he needed a 6" x 6" cross fitting. Upon receiving that, he then stated he needed a 22½ degree fitting. Then, having exhausted even his ingenuity for concocting excuses, he put off from day to day initiating work on the project. [6] Finally, this office, in an effort to get the work done, assigned the project to Mr. John F. Nichols, a Honolulu contractor who completed the job in less than 6 days under a negotiated contract. Water was in the line on May 4, 1942.

21. On page 3 of the testimony, it is stated "the requisition for the materials for the 6" line was dated February 16 and until the 20th of April, neither the fittings nor the cast iron had been delivered." Actually, the Area Coordinator, Mr. Plummer, located all necessary materials for this line in the base yards, earmarked them for the Bellows Field project, and delivered receipts then in use known as "stug-outs" to the Hawaiian Constructors' Superintendent of Transportation to effect delivery of this material to the site of work. Any subsequent delay in delivery of this material is evidently a responsibility of the Hawaiian Constructors which the Area Superintendent could have remedied. However, inasmuch as Mr. Hoffman had permitted all the materials for the 4" line to remain at the site of the work without making any effort towards their installation, it is evident that expediting delivery of the material for the 6" line at that time would merely have resulted in materials for two lines, instead of one, lying idle at the site. However, it appears that some materials for the 6" line were delivered and stored on the property of the sugar company nearby, taken from there by the forces of the Hawaiian Constructors and installed in a 6" distribution line inside Bellows Field, but not in connection with the proposed 6" water supply line. It will be noted that Mr. Hoffman already knew the distribution system of Bellows Field was over-taxed and that installing this additional interior distribution line before the needed supply line merely aggravated that condition.

22. Based on his supposedly wide experience, Mr. Hoffman has apparently convinced some that he is qualified to handle the extensive construction work in the area, including runways for the airport. Mr. Tillman, who succeeded Mr. Lynch as Area Engineer, became dissatisfied with the operation of the asphalt plant at Bellows Field as the asphalt being placed in the runways was obviously unsatisfactory. Joint investigations made by Mr. Tillman and his associates in the District Office, including one engineer, especially well qualified through many years of broad experience in highway work on the mainland, indicated that Mr. Hoffman knew nothing whatsoever about the operation of this plant and that

it had been set up and assembled in a rather haphazard way. After six weeks' operations, certain vital features of the plant were on the site but not installed in the plant. Mr. Hoffman had refused to make these installations when requested to do so by the Area Engineer. After Mr. Hoffman's removal, this matter was remedied immediately.

23. On page 4 of the testimony, he states the work "is being done as only a group of saboteurs could do it." Before his removal the dilatory conduct of work under his direction, subsequent to the outbreak of war, was so pronounced that serious thought should be afforded this charge as regards his own failure (as previously mentioned) to prosecute the work with even ordinary diligence.

[7] The reference to the appointment of a political group, (mentioning four officers) opposed to Colonel Wyman is obviously nonsense. Colonel Wyman had their wholehearted support; their every effort was directed to furthering the program of this office; his appreciation of this fact is evidenced by his recommendations for their promotions. In this connection, it may be pointed out that Lt. Col. Robinson preceded Colonel Wyman to the Honolulu District, so his appointment was evidently not for the fanciful reason mentioned.

24. The handling of equipment by this office was an intelligent, honest effort to improve the then existing somewhat unsatisfactory conditions. His reference to the materials on hand, at the Honolulu Iron Works, is irrelevant inasmuch as this office placed many orders on the mainland prior to the War to effect a substantial savings to the government.

26. His reference to overstaffing is far from authoritative. Cost-plus-a-fixed-fee contracts are an innovation on which he is absolutely uninformed. Existing Government regulations require compliance with certain directives such as keeping costs, etc. The timekeeping and payroll records were also handled by this office. For these reasons, the Government Area Office must of necessity utilize a larger office force than the contractor who need not concern himself with this detailed paper work.

26. The baseyard situation has always been something of a problem due to a definite lack of a source of suitable trained employees available for this work.

27. Withdrawing work from the Hawaiian Constructors to have it accomplished by hired labor forces is the result of an effort to further the interests of the United States by prosecuting work by whatever means seem most effective. This point is illustrated by the case of the 4' water-line at Bellows Field where the failure of Mr. Hoffman to do anything at all resulted in transferring it to Mr. Nichols, who expeditiously completed the work by lump sum contract.

28. The comments upon the contract and the organization of the Hawaiian Constructors are also totally irrelevant. It will be noted (as aforementioned) that he fails to mention the current war contributing anything to the difficult conditions. This is typical of his testimony as it is evident that he is indulging in an attempt to "white-wash" himself for his sorry effort, and to subject to criticism all who failed to tolerate his own brand of inefficiency. He completely fails to mention the organizational problem arising from expanding a contract of this nature from \$15,000,000 to \$75,000,000 within two months, following a surprise attack on an isolated island having limited labor supply and a shipping shortage so severe that much badly needed construction equipment remained on the wharves at San Francisco for three months or more during the critical construction stage.

[8] The situation may be further illustrated by the fact that over a period of months, Mr. Hoffman visited projects under his jurisdiction at Ulupau and Kaneohe only two or three times, resulting in the projects coming to a standstill through absolute neglect.

29. While he states Mr. McCullough of the Hawaiian Constructors was removed because his forceful and energetic nature was undesirable, he actually left because of an almost fatal heart ailment and with the sincere regret of this office. Mr. Ellison, whom he cites as the possible source of more information, was removed, as was Mr. Hoffman, for inefficiency, but in the case of Mr. Ellison, it was noted at an earlier date. His comments on the conduct of the contract are matters on which it is believed he is entirely uninformed and as such his statements do not merit comment by this office.

30. Mr. Hoffman was thoroughly discredited insofar as this office is concerned and was removed from his post after repeated verbal requests addressed to Mr. Rohl by Colonel Robinson who assembled the facts and acted accordingly. It is sincerely regretted that his removal was not accomplished at an earlier date with the resultant benefit to the progress of the work. Mr. Hoffman was the only employee of the Hawaiian Constructors who refused to submit a written statement of his previous experience when requested repeatedly, giving as his reasons,

therefor, some fanciful excuse. In light of his sorry showing, when confronted with anything more complex than construction of wood mobilization structures, with is doubted that he possesses balanced general construction experience and that his connection with the various projects mentioned in his testimony relative to his qualification would, on cross examination, verify that fact and disclose his shortcomings. It is reported that he attempted to create dissatisfaction among his former employees.

31. By his own admission (page 4 of testimony) he required 23 days to secure rail on an island the size of Oahu where the plentiful supply and high priority carried by the gasoline storage project made the problem relatively simple. As elsewhere, his failure to assume the responsibility attached to his position is the cause of delay and he now attempts to evade the consequences by making derogatory remarks affecting several individuals including one Colonel, one Lt. Col., four Majors, one Lieutenant, and several civilians, including the executive committee of the Hawaiian Constructors, one of whom is Mr. Woolley, whose many successfully completed projects include virtually all the outstanding structures on Oahu, such as the Royal Hawaiian Hotel, both Mormon Temples, the Alexander & Baldwin Building and the Hawaiian Electric office building and power plant. The record of Mr. Woolley as an experienced constructor is absolutely unimpeachable on the visible evidence. Mr. Hoffman's statement that he "pleaded for the installation of the tanks in temporary position" would imply that the problem was, for him so difficult that even with the tunnel already completed, he could not install the tanks expeditiously. Mr. Lynch anticipated the project could be accomplished in ten days.

[9] 32. A typical irresponsible statement appears on page 10 of the testimony as follows: "The bringing of white help from the mainland early in January was a decided mistake." It is clearly evident that additional help was needed and with all island labor employed on defense projects, including more men than the plantations could freely spare, the importation of labor was the only alternative. The Navy contractors also imported labor. Over 500 additional projects, many of them large multiple units, (for example: Over 80 buildings in one evacuation camp constitute one project) were undertaken since December 7, 1941 and the local labor was then already sorely overtaxed. Many tournapulls were purchased and on the San Francisco docks awaiting shipment to Honolulu, so operators were hired accordingly. Mr. Hoffman's objections to importing skilled help including tournapull operators indicate his complete inability to grasp even the most elementary principles of supply, i. e., importing labor when the local supply is exhausted. This must seriously reduce the weight even the most optimistic person could give to his observations (on page 4 of testimony) on mass production or big organization work.

33. On page 10 of his testimony, he again evidences his mental confusion by his statement in one instance mentioning handling and development of his labor crews, "with a certain pride that I look back and see that in 25 years of construction experience I have never had a faster concrete or wood framing crew anywhere." Then four sentences later "while the native help wasn't nearly as competent as normal help on the mainland." The inconsistency is too great for possible reconciliation.

34. A year ago this office contemplated stocking-up on basis construction materials by placing large orders on the mainland; however, lack of funds necessitated reducing the quantity of materials actually ordered. Much equipment has been ordered and only since May 1, 1942, has delivery been made in substantial quantities. Mr. Hoffman obviously is unaware that purchases of material even for large projects cannot be made unless appropriations are available for such purpose.

35. The work at Bellows Field was initially confined to construction of many mobilization buildings. Later, construction of the runways focused attention on that item. The tunnel for the gasoline tanks was under the supervision of Mr. Cherry. Mr. Hoffman apparently was supplied with sufficient, adequate help so that the mobilization buildings and the excavation and placing of base course for the runways was accomplished without difficulty. However, once he was confronted with the problem of installing the tanks in the tunnel, his inability to handle the project became evident. The sequence of work, with the relatively simple projects occupying the spotlight until the last months of 1941 were contributing factors in preventing the knowledge reaching this office, of his inability to properly handle the projects in the Fifth Field Area.

36. The foregoing facts are presented to refute the allegations made. This office does not contend that the ultimate in efficiency has been maintained or that

there has been at all times a steady flow of equipment, men and materials to all projects; shortages of all three items have existed in spite of every effort. [10] Constant effort has been made and will continue to be made to improve the functioning of the organization. Allegations equivalent to sabotage, if from a responsible source, merit serious consideration. This office submits that these allegations are unfounded and are the product of an irresponsible, discredited individual who is evidently motivated by a desire to avenge his fancied wrongs. In conclusion, it is suggested for handling similar cases in the future, it would seem preferable that character investigations of claimants be made by proper authorities before such matters are submitted for consideration. This might eliminate any case where a discredited individual, released from his employment, impeached in the eyes of his associates by his own lack of truth and veracity and possibly suffering from mental aberrations could bring to highest local authorities a rambling account of half truths intermingled with falsehoods and create further interruption to important work by rendering it necessary to prepare a reply.

A. K. B. LYMAN,
Colonel, Corps of Engineers,
Department Engineer.

ARMY PEARL HARBOR BOARD EXHIBIT No. 57

HEADQUARTERS UNITED STATES ARMY FORCES,
PACIFIC OCEAN AREAS,
OFFICE OF THE SIGNAL OFFICER,
APO 958, 14 September 1944.

Memorandum to: Major General Walter H. Frank,
Army Pearl Harbor Board
Courts Martial Building, 70-B
HUSAFPOA, APO 958

1. The attached memorandum, prepared in the Office of the Signal Officer, Central Pacific Base Command, contains all the information presently available concerning the arrival of temporary and permanent air warning radar equipment at the Hawaiian Islands prior to 7 December 1941.

2. Search for records to obtain additional information is continuing and will be furnished if, or as soon as, it becomes available.

A. R. Marcy,
A. R. MARCY,
Colonel, Signal Corps.,
Actg. Signal Officer.

- 1 Incl:
Memo to Engineers dtd 12
Sept 44, subj: AWS Equip-
ment, w/5 Incls.

12 SEPTEMBER 1944.

Memo to: Major Hollensworth, Engineers.
Subject: AWS Equipment.

1. In reference to our informal conversation concerning the receipt of an release of AWS equipment to the Engineers before December 7, 1941, the following information is forwarded:

a. Receipt of AWS Fixed Station Detector Equipment by Signal Corps in Hawaii. (Following information taken from stock record cards of the AWS)

(1) Power Units:

(a) Five each received 3 June 1941, on DV-3

(b) Four each received 20 August 1941, on DV-31-42

(2) Detector Stations and Component Parts:

(a) Two each SCR-271 (Serial #1 & #2) received 3 June 1941, on DV-4. Components consisted of: Operating Equipment Assembly, per SCL; Secret Drawing ES-D-6682-C less items 1-6 inclusive, 16-19 inclusive, 21, 22, 24, 25 and SCL Secret Drawing ES-D6683 less items 2, 5, and 6, except item 3 is per SCL Drawing ES-O7324. Conduit and Conduit Fittings, per SCL Secret Drawing ES-D7129. Grounding Equipment, per SCL Secret Drawing ES-D7181. Wiring Supplies, per Bill of Material #2. Fuses (12 per set).

3132 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- (b) One each SCR-271A (Serial #1) received 3 June 1941, on DV-5. Component parts consisted of: Operating Equipment Assembly, per SCL Secret Drawing ES-D-7335-A less items 1-6 inclusive, 16-19 inclusive, 21, 23, 26, 27 & SCL Secret Drawing ES-D-7336 less items 2, 5, & 6. Feed line Chute Assembly, Part #2, per SCL Secret Drawing ES-D7334, Azimuth Indicator M-216, per Signal Corps Laboratories Model Conduit and Conduit Fittings, per SCL Secret Drawings ES-D7327 and ES-D7129, less items 9, 10, & 11. Grounding Equipment, per SCL Secret Drawings ES-D7131. Wiring Supplies, per attached Bill of Material number 1. Fuses (12 per set).
- (3) Tower and Buildings, 36 ft. (for Mt. Kaala and Haleakala)
- (a) Two each received, 29 August 1941, on DV-50-42
- (4) Tower, 100 ft., Transmitter Building (for Kokee)
- (a) Tower received 29 August 1941, on DV-50-42
- (b) Transmitter Building received 29 August 1941, on DV-50-42
- (5) Tanks, gasoline or fuel storage and so forth:
- (a) Six each received 7 July 1941, on DV-1-42.
- (6) Communications:
- (a) No definite information available at this time.
- b. Receipt of AWS Mobile Equipment by Signal Corps in Hawaii.
- (1) Six mobile detector sets were shipped by rail from New Jersey 22 July 1941, and arrived in Hawaii sometime during the first part of August. Temporary locations for these sets on Oahu was proposed the 14 August 1941, and approved on the 15th. (see Inclosure d and e)
- c. AWS Equipment Released to Engineers.
- (1) Definite information on the release of AWS equipment to the Engineers is not available at this time. The following information which has some bearing on the subject is listed below:
- (a) *Kokee, Kauai*: Tower, gasoline tanks, and building material shipped to Port Allen the 17 September 1941. (see Inclosure #a)
- (b) *Haleakala, Maui*: Necessary metal buildings and towers have been shipped to Haleakala, Maui (This statement was made in a letter dated September 23, 1941). (see Inclosure #b).
- (c) *Mt Kaala, Oahu*: No work could be done on the Kaala Detector installation until the cableway was completed. On 21 February 1942, the estimated completion time of the Mt. Kaala cableway was five weeks. (see Inclosure #c).
- d. Communications equipment was installed by Signal Corps personnel. This was dependent upon the completion of the necessary buildings.
2. Search continues for additional information which will be forwarded when located. Inclosures concerning part 1a will be forwarded 13 September.

ALLEN W. SMITH,

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT ENGINEER,
Fort Shafter, T. H., 8 September 1941.

In reply
refer to:
Engr. 676.3

Memorandum to District Engineer:

1. In accordance with conversation, Colonel Powell-Major Robinson, and Major Fleming, on the Aircraft Warning Service, it is requested that you arrange to obtain from the Signal Officer the necessary metal building and towers for installation at Kokee and Haleakala. As you know, the installation at Kokee will consist of the metal detector building and a 100-foot tower and at Haleakala, will consist of the combined metal building and 35-foot tower.

2. It is my understanding that these metal buildings are now on hand at the Signal Corps yard at Fort Shafter. This site can be verified by having someone check the buildings on hand in the yard. If the buildings are now complete, shipment of them to Haleakala and Kokee and their erection at the site should be expedited.

3134 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. It is also requested that erection of the power house at these two stations be expedited. It is understood that your office has designed and is furnishing all materials for these power houses. Their completion should be expedited in order to enable early installation of the equipment.

4. Also, in the discussion referred to, it was decided that the Signal Corps would furnish an employee at Kokee and at Haleakala to assist in the erection of the buildings and to see that they are properly screened and shielded as required. It is also tentatively agreed that the District Engineer would sub-allot funds to the Department Signal Officer to cover the cost of this employee's transportation and time while engaged on this work. In view of the need of this Signal Corps employee's assistance during the erection of the building, it is requested that you notify this office before the actual erection starts in order that arrangements can be made to send him to the site.

5. The Department Commander is extremely desirous that these stations be placed in operation without delay.

ROBERT J. FLEMING, Jr.

Subject: Aircraft Warning Service Stations

To: Department Engineer, Headquarters, Hawaiian Department, Fort Shafter, T. H.

1. In answer to your memorandum of September 8 regarding the installation of the Aircraft Warning Service buildings at Kokee, Kauai and Haleakala, Maui, and the necessary funds for furnishing Signal Corps employees to assist in erection of these buildings, the following information is submitted for your convenience:

a. The necessary metal buildings and towers have been shipped to Kokee and Haleakala.

b. The necessary steel for the power houses at these stations is now being fabricated and upon completion the erection will be expedited.

c. Bill for the Signal Corps employees' time and transportation while engaged in this work will be submitted to the District Engineer and payment will be made directly from this office instead of suballotting the necessary funds to the Department Signal Officer as mentioned in memorandum referred to above.

d. The actual erection of the metal buildings and station towers at these stations will be started as follows: Haleakala, as soon as Signal Corps employees arrive; Kokee, approximately October 1, 1941.

2. You will be notified, as soon as can be determined, the exact date that erection of buildings and tower will be started. Arrangements have been made at these stations for the accommodation of the Signal Corps employees.

3. It is requested that this office be informed the day before the employees are to leave for Maui and Kauai.

1. Your memorandum of September 8 regarding the mobile stations at Haleakala, Maui and Kokee, Kauai has been received and the following information is submitted for your guidance:

a. The barracks at Haleakala are approximately 90% complete. The garage and truck shelter, one of which is necessary to house the mobile unit, is now being designed.

b. The barracks at Kokee are approximately 10% complete. The garage and truck shelter at this station are also being designed.

2. Work on these islands is being expedited and as soon as it is possible for the mobile units to be sent to these stations you will be notified.

No. of Ind. From and Date	To	Subject: Proposed Installation of Six Mobile RDF Units on Island of Oahu	
1st Ind Sig O 14 Aug 41	G-3	1. It is proposed to install the six mobile RDF units recently received by this Department in temporary alert positions until the permanent sites have been completed. This temporary installation is expected to accomplish the following: a. Provide complete RDF coverage around the island of Oahu with multiple coverage south, southwest, and west of Pearl Harbor. b. Provide bona fide RDF intelligence to the Information Center at Fort Shafter in lieu of the "canned" messages now in use. c. Provide facilities for the training of RDF personnel on actual RDF equipment and under simulated War conditions. d. Develop accuracy and speed to reduce the time lag between RDF unit and plotting table.	
		2. The following is a list of proposed station sites, together with the reasons prompting their recommendation: a. PUU PALAILAI—coverage to the west and south—convenient to a suitable road net, C&FC cable, and messing and quartering facilities. b. WAIANAE (KANEILLIO PT)—Coverage to the west—convenient to a suitable road net, C and FC cable, and messing and quartering facilities. c. KAWAILOA—coverage to north and northwest—convenient to a suitable road net, C and FC cable, and messing and quartering facilities. d. KAAWA—coverage to the east and northeast—convenient to road net, C and FC—will require field mess, however, site chosen is on a Military Reservation. e. KOKO HEAD—coverage to the east and southeast—convenient to road net, C and FC cable, and messing and quartering facilities.

[2]

No. of Ind. From and Date	To	Subject: Proposed Installation of Six Mobile RDF Units on Island of Oahu	
1st Ind Con Sig O 14 Aug 41	G-3	1. FORT SHAFER—coverage to the south and south-west. It is desired to utilize this set to train antenna riggers, van drivers, etc., consequently it will be shifted from its alert position from time to time. The sector covered by this set is also covered by two other stations, consequently it is considered the best set on which to train the rigging personnel thus keeping all other stations at alert status.	
		3. All sites chosen are on Military Reservations and have been located close to other Army installations. It is proposed to use the existing cable system for communication inasmuch as no AWS communication equipment has been received by this Dept to date.	
		4. This office is considering the use of a mobile station on the Haleakala Road on the island of Maui. The temporary occupation of the CCC camp on Haleakala will become feasible upon receipt of the AWS communications equipment by this Dept. This station would cover the gap created by the mountains on Molokai and western Maui.	
		5. The erection of temporary stations on Makapuu Point and Diamond Head have been carefully considered, however, the problem of suitable roads to the station sites precludes their use at this time. The use of these positions would require widening the turns on the Makapuu road and enlarging the tunnel into Diamond Head and improving the road up to the rim. Adequate coverage can be obtained from a position on Koko Head which is conveniently situated with respect to roads, communications, and utilities.

REPORT
ON THE ESTABLISHMENT OF AN AWS
IN HAWAII

Prepared by Signal Office Central Pacific Base Command 31 August 1944

[1] TABLE OF CONTENTS

SECTION I

INITIAL PHASE (15 DECEMBER 1939 TO 28 MAY 1941)

1. Original War Department Directive.
2. Appointment of Board of Officers for AWS Planning.
3. Activities of original AWS Board.
4. Initial Hawaiian Department action upon receipt of W. D. approval.
5. AWS plan for HD (Result of Board Report & WD Decision).

SECTION II

DETAILS OF ACTION TAKEN IN INITIAL PHASE

1. AWS Construction.
 - a. Information.
 - b. Funds.
 - c. Construction.
 - d. Arrival of equipment.
2. Status of AWS Equipment. (Monthly Reports).
3. Signal Communication projects submitted to War Department.
4. Mt. Kaala, Oahu. (SCR-271).
 - a. Negotiation with C. G. Schofield Barracks.
 - b. Signal Communication.
 - c. Action in HD.
5. Kokee, Kauai. (SCR-271-A).
 - a. Negotiations with T. H.
 - b. Action in HD.
6. Haleakala, Maui. (SCR-271).
 - a. Negotiations with the D of I.
 - b. Negotiations with the WD.
 - c. Action in HD.
7. Information Center.
8. Nuuanu Pali, Oahu.
9. Manawahua, Oahu.
10. Mauna Loa, Hawaii.
11. Kauai Mobile Station.
12. Maui Mobile Station.

[2] SECTION III

SECOND PHASE (28 MAY 1941-DECEMBER 1941)

1. Priority and Delivery Schedule of Detectors for the Hawaiian Department.
2. Board Changes.
3. Action Taken on the New Detector Allotment Schedule.
4. Preliminary Report Submitted to War Department on Revised AWS Projects.
5. Revised HD AWS Project.
6. Safeguarding AWS Stations.

SECTION IV

DETAILS OF ACTION TAKEN IN SECOND PHASE

1. Additional correspondence regarding project (second Phase).
2. Pahoa, Hawaii.
3. Opana, Oahu.
4. Manawahua, Oahu (Fixed).
5. Makapuu, Oahu (Changed to Ulupau Head Early in 1941).
6. Kahuku Ranch, Hawaii.

3140 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

SECTION V

INSTALLATION AND USE OF FIRST SIX SCR-270-B MOBILE UNITS

1. General.
2. Original Station Locations.
3. Establishments of Temporary Information Center.
4. Tests prior to December 7, 1941.
5. AWS Activities on December 7, 1941.

[3] SECTION I—INITIAL PHASE (15 DECEMBER 1939 TO 28 MAY 1941)

1. Original War Department Directive

The plan of the War Department to establish Aircraft Warning Service in the Hawaiian Islands was first indicated in a letter dated December 15, 1939, by the Secretary of War to the Commanding General Hawaiian Department. This letter outlined the basic principles involved, and suggested the following eight aircraft detector station locations, based on a map study made by the Office of the Chief Signal Officer:

Detector Stations No.	Located on	Geographical Designation	Elevation in feet
1.....	Niihau.....	Kaao.....	1015
2.....	Kauai.....	Wekiu.....	3255
3.....	Oahu.....	Puu Kauweweole.....	1000
4.....	Oahu.....	Tantalus.....	2015
5.....	Kahoolawe.....	Puu Moiwai.....	1161
6.....	Maui.....	Kaihuakala.....	2400
7.....	Hawaii.....	Puu Ohohia.....	5535
8.....	Hawaii.....	Kane Nulo.....	3203

The letter further directed that a plan for the establishment of an AWS in the Hawaiian Department be submitted to the War Department not later than 1 May 1940. Inclosure #1 to this report shows the original War Department directive.

2. Appointment of a Board of Officers for AWS Planning

a. On receipt of the above letter from the WD the C/S, Hawaiian Department, directed a board of officers be formed. (See Inclosure #2.) In a letter dated 15 January 1940 Headquarters Hawaiian Department formed the Board of Officers. It consisted of the following members:

Colonel G. L. Van Deusen, Signal Corps, President

Lt. Colonel John H. Lindt, OAC Member

Lt. Colonel William E. Lynd, (Major), A. C. 18th Pursuit Group, Member

Capt. R. J. Fleming, Jr., C. E., Asst. Dept Engr, Member

Recorder, without vote, a Signal Corps Officer on duty at Dept. Hq. to be designated by the Dept. Signal Officer

b. The board was directed to prepare a plan for an Aircraft Warning Service for the Hawaiian Department and to be submitted to Headquarters Hawaiian Department not later than 1 April 1940. (See Inclosure #3.)

[4] 3. Activities of Original AWS Board

a. The AWS Board held its first meeting 18 January 1940. Details of the activities of the board between that date and 19 March 1940 are contained in the Preliminary Board Report which was submitted 15 March 1940 by the Signal Officer to the Chief of Staff, Hawaiian Department. (See Inclosure #4.)

b. The final report of the Board of Officers together with the letter of transmittal to the War Department, dated 17 April 1940 is shown in Inclosure #5.

The installation of one *fixed* and seven *mobile* stations was recommended to the WD as follows:

Group Priority	Priority Within Group	Island	Location	Type
I.....	1.....	Oahu.....	Mt Kaala.....	Fixed SCR-271.
	2.....	Kauai.....	Vicinity of Kokee.....	Mobile SCR-270.
	3.....	Maui.....	Haleakala.....	Mobile SCR-270.
	4.....	Oahu.....	Hickam Field.....	Intel. Ctr.
	5.....	Oahu.....	Nuuuanu Pali.....	Mobile SCR-270.
	6.....	Oahu.....	Manawahua.....	Mobile SCR-270.
	7.....	Hawaii.....	Mauna Loa.....	Mobile SCR-270.
II.....	1.....	Kauai.....	Note: A.....	Mobile.
	2.....	Maui.....	Note: A.....	Mobile.

NOTE: A. To be used as an auxiliary station in another location while the Group I station on the same island is operating, and as a substitute in the event of failure of the Group "I" station.

c. The project as outlined in the report mentioned in (b) above was approved by the War Department in the 4th Indorsement dated 27 June 1940 to the above mentioned letter with the following exceptions:

(1) Consideration be given to the establishment of the Information Center at Aliamanu rather than Hickam Field.

(2) Station at Kokee Kauai approved as a *fixed* instead of a mobile station.

(3) Station at Haleakala, Maui approved as a *fixed* instead of a mobile station. The War Department advised that \$1,400,975 was included in the FY 1941 appropriation for the establishment of an Aircraft Warning Service in the Hawaiian Department. Approximately \$580,000 of this amount was immediately available for expenditure for engineer construction and other purposes in the Hawaiian Islands.

[5] 4. *Hawaiian Department Action Upon Receipt of WD Approval* (See Inclosure #6).

a. The Adjutant General's Office Hawaiian Department notification of War Department approval to the Signal Office, 9 July 1940. The Signal Office notified the C/S, 10 July 1940, that the plan recommended by the Department Commander had been approved by WD with minor changes. The Department Engineer was next notified of the project approval and in an indorsement dated 13 July 1940 he indicated:

(1) District Engineer was ready to proceed as soon as the funds were received.

(2) Surveys were being initiated on the Kaala cableway and station by troop labor of the Third Engineers.

(3) Selection of location of information center is necessary before estimating cost of the center can start.

In a letter dated 13 July 1940, Headquarters Hawaiian Department, Department Engineer informed the Chief of Engineers, Washington, D. C. the action taken on the Aircraft Warning Service, Hawaiian Islands. In the 1st Indorsement to this letter, the Chief of Engineers indicates funds in the amount of \$50,000 to initiate construction of Aircraft Warning Service were transmitted to the Hawaiian Department by letter of 24 July 1940.

5. *AWS Plan for HD. (Result of Board Report and WD Decision).*

The Aircraft Warning Service will consist of a net of eight stations three of which are fixed stations and five mobile. North and west limits on the net are determined by the stations on the island of Kauai and the South and East limits of the net by the stations on Hawaii.

3142 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Type	Station Location	Purpose
Fixed (271).....	Kokee, Kauai.....	Primary station.
Fixed (271).....	Mt Kaala, Oahu.....	Primary station.
Fixed (271).....	Haleakala, Maui.....	Primary station.
Mobile (270).....	Puu Manawahua, Oahu.....	Relieve Kaala station of the necessity of continual search.
Mobile (270).....	Nuuanu Pali, Oahu.....	Coverage of dead space between Kaala and Haleakala stations.
Mobile (270).....	Mauna Loa, Hawaii.....	Extends coverage in the South and East direction.

The remaining two mobile stations have not been assigned a primary location. They will be stationed on Kauai and Maui to relieve the fixed stations on these islands from continually searching in a portion of their fields. The Information Center will be located at Allamanu. (See Incl #7.)

[1] SECTION II—DETAILS OF ACTION TAKEN IN THE INITIAL PHASE

THE FOLLOWING PARAGRAPHS, #1 AND #2 LIST INCLOSURES CHRONOLOGICALLY WHILE THE INCLOSURES IN THEMSELVES DO NOT FORM A STORY, THEY CONTAIN PERTINENT INFORMATION CLOSELY RELATED TO THE COMPLETION OF THE HD AWS PROGRAM AND ARE LISTED BELOW AS REFERENCES.

1. AWS Construction

a. Information received in HD for AWS Construction

- (1) Incl #8. 9 February 1940. Information on fixed detectors, SCR 271.
- (2) Incl #9. 5 August 1940. Information on design and construction of AWS buildings.
- (3) Incl #30. 27 August 1940. Instruction books for SCR 270 & CR 271 & SCR 268 have been forwarded to CG, HD.
- (4) Incl #10. 14 February 1941. Drawings for Oahu, Maui, Kauai & Hawaii.
- (5) Incl #11. 17 February 1941. Approved drawings for mobile Station shelters.
- (6) Incl #12. 19 August 1941. Instructions for the erection of towers and buildings used in AWS installations.
- (7) Incl #13. 8 September 1941. Instruction of erection of 36 foot tower and transmitter building.
- (8) Incl #14. 4 November 1941. Drawings for fixed detector equipment AWS.

b. Funds

- (1) Incl #15. 20 July 1940. Funds to be forwarded to District Engr to permit the initiation of Field Surveys for AWS sites.
- (2) Incl #16. 23 July 1940. Estimate of Engr cost for AWS construction.
- (3) Incl #17. 24 July 1940. District Engr receives \$50,000.00 to initiate AWS construction.

[2] (4) Incl #18. 18 December 1940. Requesting funds in the amount of \$27,500.00 be made available to the Engrs. by the QM for the immediate construction of mobile shelters for SCR 270's—no funds at present available for the completion for this project.

(5) Incl #19. 8 January 1941. Funds in the amount of \$130,000.00 is allotted. Money will be suballotted to Dist. Engr. \$70,000.00 is being withheld for the information center pending approval of this project by the WD.

(6) Incl #20. 5 February 1941. Net cost estimate for AWS installations.

(7) Incl #21. 8 February 1941. Funds for AWS.

(8) Incl #22. 17 July 1941. Funds in the amount of \$46,000.00 are on hand for the construction of mobilization buildings, radio shelters.

c. Construction

(1) Incl #23. 24 October 1940. Separation of detector bldg & radio communication bldg.

(2) Incl #24. 7 November 1940. Construction of Aircraft Warning Station.

(3) Incl #25. 28 November 1940. Misc. information on AWS construction regarding Col. Wymans trip to mainland.

(4) Incl #26. 26 February 1941. Housing of 9th Sig Serv Co.

(5) Incl #27. 11 April 1941. QM construction of AWS shelters.

(6) Incl #28. 1 May 1941. Change: Engrs to construct AWS shelters.

(7) Incl #29. 23 July 1941. Early completion of AWS Kokee & Haleakala. *d. Arrival of Equipment*

(1) Incl #30. 27 August 1940. Estimated arrival of detector equipment: "Much before next June (1941)" by CSO.

(2) Incl #31. 6 February 1941. Informal letter from Col Van Deusen telling Col. Powell that detector sets (both fixed & mobile) probably will arrive the fall of 1941. This is [3] due to the higher priority assigned other defense areas.

(3) Incl #32. 17 February 1941. A letter from the Secretary of War informed the Secretary of Navy that detector equipment would be available in HD by 1 June 1941 and that it could be installed in the various stations immediately.

(4) Incl #33. 20 May 1941. HD receipt of several packages (marked for AWS) containing conduit, radio equipment & accessories.

(5) Incl #34. 2 June 1941. Action has been taken to secure additional long range detectors.

(6) Incl #35. 13 June 1941. Request for information on date portable detectors can be expected—supplies the information: *Three fixed units now here.* Answered, mobile detectors will be ready for shipment to HD during 19 July 1941. Towers and buildings for two SCR 271 & one SCR 271A have been shipped (19 July 1941).

(7) Incl #36. 21 July 1941. Information received that six fixed and six mobile detector sets will be shipped to HD from mainland by end of July 1941.

(8) Incl #37. 13 August 1941. AWS equipment is ready for shipment from states.

(9) Incl #38. 16 August 1941. 2nd Ind. "Items (fixed detectors) referred to in basic communications were delivered to Signal Property Officer, AWS, Ft. Shafter on 15 June 1941. (Note: This shipment did not include towers and buildings. See Incl #35).

2. Status of AWS Equipment (Monthly Reports)

a. In a radio dated 28 August 1941 the CSO requested monthly radio reports on the status of installation of Signal AWS equipment in the HD. These monthly reports were to cover the percentaged completion of the following items: Power, Detector, communication-radio, telephone. The following sheet lists these monthly reports in tabular form:

Percent Complete

Location	Project numbers	Overall	Power				Detector				Comm-radio				Telephone			
			30 Sep 41		1 Nov 41		2 Dec 41		30 Sep 41	1 Nov 41	2 Dec 41	30 Sep 41	1 Nov 41	2 Dec 41	30 Sep 41	1 Nov 41	2 Dec 41	
			30 Sep 41	1 Nov 41	2 Dec 41	30 Sep 41	1 Nov 41	2 Dec 41	30 Sep 41	1 Nov 41	2 Dec 41	30 Sep 41	1 Nov 41	2 Dec 41	30 Sep 41	1 Nov 41	2 Dec 41	
Kokee, Kauai	R-1113	0	0	5	0	0	10	0	0	0	0	0	0	0	0	10		
Haleakala, W. Slope	R-1123	0	0	10	10	0	10	10	10	0	0	0	0	0	0	0		
Kokee, Road	R-1133	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0		
Haleakala, Maui	R-1143	0	0	0	0	0	0	0	0	0	0	0	0	0	0	00		
Information Center (Permanent)	R-1149	90	0	0	0	0	0	0	0	0	0	0	0	0	0	00		
Information Center (Temporary)																		
Mt. Kaala, Oahu	R-1155	10	0	0	0	0	0	0	0	0	0	0	0	0	0	0		
Manawahua, Oahu	R-1157	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0		

(See Incl #39 & #40.)

[4]

[5] 3. *Signal Communication Project Submitted to the War Department.*

a. *Initial discussion regarding signal communications.* On 30 July 1940 the Signal Officer HD advised the Chief Signal Officer of the signal communication requirements included in the Original Board Report, and raised the question as to whether or not the necessary radio equipment was to be procured locally. The Chief Signal Officer advised on 10 September 1940 that the radio equipment would be procured by that office, but that a complete project should be submitted to insure that all of the equipment would be furnished. (see incl 41)

b. *Project for Signal Communications.* On 17 October 1940 the Signal Officer, Hawaiian Department, furnished the Chief Signal Officer with additional details of the Signal requirements. (see incl. 42). In a reply dated 17 January 1941 the Chief Signal Officer indicated that the radio transmitters requested could be furnished, but that funds were not available to procure certain receivers and loud-speakers requested by HD. The detailed requirements at each of the sites were further outlined in the 2nd Ind. of the Signal Officer, HD to the Chief Signal Officer on 31 May 1941. (Note: Although dated 31 May, this indorsement was not mailed until about 26 June 1941. (see incl. 42). Following is a list of items included in this project and an indication of the action taken by the Chief Signal Officer in his reply 3rd ind dated 27 September 1941:

ITEM	ACTION BY oosigo
Wire Comm.—Mt. Kaala, Oahu	Approved by separate correspondence
“ “ Kokee, Kauai	Approved
“ “ Nuuanu Pali, Oahu	Disapproved (site abandoned)
“ “ Haleakala, Maui	Approved
“ “ AWS Info Center, Oahu	Disapproved
“ “ Teletype	Disapproved
“ “ Manawahua, Oahu	Approved (no requirements)
Radio Comm.	Approved

The Chief Signal Officer disapproved the AWS Information Center and Teletype requirements because he had not been informed of War Department approval of Information Center. In reply on 17 October 1941 the Signal Officer, HD, informed the Chief Signal Officer that the Information Center was already under construction at Fort Shafter and quoted the correspondence wherein the Adjutant General has been so informed. There was no further exchange of correspondence on this point.

c. Additional information on the subject of Signal Communications is included in inclosures #43, #44 and #45.

[6] 4. *Mt. Kaala* was approved as a fixed station by 4th Ind. of WD 27 June 40 to HD ltr 17 April 1940 (see Incl #5).

a. *Negotiation with Commanding General, Schofield Barracks, T. H.*

(1) The CG Schofield Barracks was notified in letter, dated 17 July 1940, that the HD was installing, with WD approval, a radio aircraft detection station on Mt. Kaala. Further it would be necessary to install a cableway to the summit of Mt. Kaala. The route of the cableway would start near the firebreak trail making it necessary to permanently withdraw a portion of the artillery range in order to insure the cableway would not be damaged. (See Incl #46).

(2) In a 1st Ind., dated 7 August 1940, the CG Schofield Barracks, pointed out that 90% of the artillery fire is concentrated in the very area that is being requested withdrawn. The range, thus reduced for firing, would be of little value as an artillery range. The training value of the range is so great that the CG recommended that every effort be made to find a route for the cableway that would not curtail the range. (See Incl #46).

(3) The HD reply, 2nd Ind. dated 17 August 1940 and a letter dated 20 November 1940, informed CG, Schofield Barracks, that after the study of additional aerial photographs the proposed location of the lower tower terminus of the cableway had been moved west of the firebreak trail. (See Incl #46).

b. *Communication.* In a letter, dated 7 September 1940, the HD submitted to the CSO a signal project for the installation of a 11 pair-19 gauge subterranean cable to the AWS Station on Mt. Kaala. (See Incl #47).

c. *Action in HD*

(1) Preliminary survey of access road completed by 12 December 1941. (See Incl #48).

(2) Work on access road to lower terminus of cableway to start (approx.) 1 February 1941. (See Incl #49).

(3) Additional information on proposed communication building for Mt. Kaala, 31 January 1941. (See Incl #50).

ALICE ANSLEY, who resides at 938 East Edgemore Road, Los Angeles, Calif.

(4) Proposed plan of buildings for Mt. Kaala are approved, 6 March 1941. (See Incl #51).

[7] (5) Survey of access road started 4 March 1941. (See Incl #52.)

(6) Cableway equipment awarded to Interstate Equipment Corps. for a two cableway system for \$57,755.00. Completion time is a 100 calendar days. 28 April 1941 (See Incl #54).

(7) Priority of Kaala cableway changed to "I-C." 26 June 1941. (See Incl #55).

(8) 21 February 1942. Aerial Tramway will be finished in about five weeks. (See Incl #56).

d. *Kaala Abandoned As a Radar Site.* About the time the cableway was completed, the usefulness of high sites for radar purposes was questioned. This was caused mainly by the poor results obtained at the Haleakala site. Construction at Kaala was therefore given a low priority and eventually was abandoned entirely for radar. The site, however, has proven very successful for VHF Fighter Control purposes.

5. *Kokee, Kauai*

a. *Negotiations with T. H.*

(1) In a letter, dated 18 July 1940, General Herron, Commanding, informed the Acting Governor of Hawaii that Congress had authorized the construction of certain military installations on the Island of Kauai as a part of the nation wide defensive program. The CG further pointed out that the site on Kauai was located in the land section of Honopu, Na Pali Kona Forest Reserve. Permission was requested to enter this reserve for the purpose of executing the necessary instrumental surveys. Further cooperation was requested by the HD in transferring the necessary territorial land to the WD. (See Incl #57).

(2) The Board of Commissioners of Agriculture and Forestry, in a letter dated 23 July 1940, granted the Army permission to make surveys for the location of the site. Mr. F. H. Locey, President of the Board, indicated this question of "turning over territorial land" to the WD would be taken up at a board meeting within a week. (See Incl #57).

[8] (3) In his acknowledging letter, dated 5 February 1941, General Herron stated that due to discrepancies between the survey and the Kauai triangulation system it would be necessary to make additional field survey in order to get an accurate description of the land desired for the site. In addition due the extensive National Defense Program it is necessary that this site be initiated without further delay. Therefore, the Army requested permission to enter the land to initiate construction of the proposed project and that upon completion of the field survey covering the boundary, the land be transferred to the control of the War Department for military purposes. (See Incl #58).

(4) The Honorable J. B. Poindexter, Governor of Hawaii granted permission 21 February 1941 for the Army to enter the government land within Na Pali Kona Forest Reserve, Island of Kauai to initiate construction of projects planned for National Defense; on completion of description and survey of the land desired for Military purposes, and executive order transferring it to the United States government will be issued. (See Incl #59).

b. *Action In HD*

(1) Reconnaissance: 26 September (See Incl #60).

(2) Plot plan station X (Detector Site).

(a) Approved: 20 March 1941 (See Incl #61).

(3) Plot plan Base Camp.

(a) Approved: 20 March 1941 (See Incl #61).

(4) Construction:

(a) 2 July 1941. Due to the shortage of local carpenters, it was necessary to employ Japanese (American Citizens) carpenters for the construction of AWS camps at Kokee. (See Incl #62.)

(b) On 30 September 1941, the District Engineer transmitted fabrication drawings for this AWS Powerhouse building for radio at station X to the Field Area at Kauai. (See Incl #63).

(c) On 22 November 1941, Signal Corps men were shipped to Kauai to install the communication cable. This project was completed 11 December 1941 (see Incl #64.)

[9] (d) 2 December 1941. Status of construction. The following is report submitted by Lt. Ralph Caceres on his trip to Kauai 3 December 1941. (See Incl #65).

1. Operating building not complete at station X.
2. Set 2 power units at station X.
3. Set 1 power unit at Base camp. The approved power units to be furnished by the Engineers were 2 diesels units for Radio Communication building at the base camp (not completed.)
4. Distribution cable is not present for lighting system. #2 cond. park way needed to make set work.
5. 100 foot tower is up.
6. Heaters are at Honolulu.
7. Water trailer at Maui.

(e) Interview with Captain Ralph Caceres on the status of construction during his trip to Kauai 3 December 1941—Capt. Carceres and Sgt. Richardson went over to Kauai:

1. Buildings are not installed—Concrete floors poured for main operating building but not for the power building.
2. Tower and turntable were up.
3. Mr. Jones in charge. Delay in putting up because of no tower plans.
4. Barracks completion—No windows.
5. The three LeRoi's were there on December 3rd.
6. The Diesels (International Generators) for base camp obtained, sometime after December 19.

7. On December 3, cable crew were installing cable between unit and base camp. M/Sgt Cleary installed cable. Cable installed by 11 December 1941 (See Incl #64).

[10] 8. Radio station on air—Mr. Nicols went over at that time—before Radar on air first part of January.

9. On 22 January full complement of 42 men.
10. February 1, 1942 mess going. Previously messing at CCC Camp.
11. February 19, 1942 Carceres and two men went over to Kauai.
12. Barracks about 40% complete.
13. Water system, non existent.
14. No water tank. No concrete construction.
15. No heating system.
16. Radar transmitter not up.
17. Power plant not up.

18. Transmitter building erected between 19 December 41, and 22 January 1942 under Lt. Caceres' supervision.

(f) 19 December 1941. Lt. Caceres sent to Kokee for period of 14 days for duty in connection with AWS (See Incl #66).

(g) 28 December 1941. Status of AWS on Kauai, (See Incl #67).

1. Operations bldg. will be completed in one or two days.
2. Radio communications building in three or four days.
3. Area Engineer instructed to equip building.
4. Diesel plants will not be delivered until February 1942. It will be necessary to use local procurement.

(5) Equipment Status: July 1941. Equipment on hand at Signal Corps area for Kokee. (See Incl #68).

- (a) 3 ea Power units.
- (b) 2 ea Gasoline storage tanks, 4,000 gallons.
- [11] (c) 1 ea SCR-271-A less tower, building and control motors.

(d) Tower and building were shipped from Ft. Monmouth during the week of 15 July 1941 (See Incl #40 & #70).

(1) Tower Installations

(a) 20 November 1943. (See Incl #69). Request for tower and details of tower foundation from CSO.

(b) (See Incl #70). Building and towers for two SCR-271 and 1 SCR-271-A will be shipped from Ft. Monmouth, week of 15 July 1941.

(c) 6 August 1941. Construction of AWS tower foundation can commence as soon as plans are received. (See Incl #70).

(d) 17 September 1941. (See Incl #72 & #98). Tower and building material shipped to Port Allen, Kauai.

6. Haleakala. The Haleakala Station was approved by the WD as a fixed detector in the fourth indorsement to the HD letter dated 17 April 1940. (See Incl #5).

a. Negotiations with the National Park Service.

(1) On receiving notification of the WD recommendations the HD sent a letter (see Incl #73) dated 18 July 1940, to Mr. Edward G. Wingate, Superintendent of the Hawaii National Park, informing him that Congress had authorized the construction of certain military installations on the island of Maui as a part of the nation wide defensive program. Further the site of the installation on Maui was to be located at the highest point of Haleakala in the National Park. The CG pointed out that the HD intended to request:

(a) Transfer to the jurisdiction of the WD of an area at the highest point of Haleakala (probably an additional area farther down the mountain near the existing road).

(b) Transfer of a right of way for a motor road from the end of the existing road to this highest point.

[12] (c) Permission to make necessary instrumental surveys of the proposed site in Haleakala National Park.

(2) Mr. Wingate in reply (See Incl #73) to General Herron on 20 July 1940 stated:

(a) Approval for the use of National Park land must come from the Department of Interior rather than Superintendent Hawaii National Park.

(b) The CG's request is being forwarded to the Director of the National Park Service.

(c) Permission is granted to make the necessary instrumental surveys, with the understanding that the natural features of the park will not be disturbed.

(3) In a letter dated 17 October 1940 Edward G. Wingate, Superintendent Hawaii National Park, requested the following information in order to properly evaluate the WD's request for transfer of National Park land:

(a) Use that the National Park land will be put.

(b) Exact location.

(c) Approximate acreage.

(d) Proposed structures.

(e) Number and location for other sites planned for island of Hawaii and Maui.

Mr. Wingate points out as in the case of the bombing range withdrawal, the Department of Interior feels that there must be available other sites outside of the park which would serve the defense needs equally well. (See Incl #74).

(4) In a letter dated 12 November 1940, Mr. Wingate, Superintendent HNPS, request that the CG consider another site on Haleakala just outside the park boundary and only 5 or 6 feet lower than the Red Hill site—location of the proposed site. (See Incl #75).

[13] (5) The CG answer (letter dated 3 January 1941) to Mr. Wingate informed him that the question of sites had been thoroughly studied with his desires in mind. The results of the study, however, indicate that to locate the station on Kokelekole rather than on Red Hill would result in a very greatly decreased field of coverage for this important installation, and therefore it was deemed advisable to use Red Hill. Not only was the site on top of Haleakala Red Hill reconsidered, but also the camp site further down the mountain. After a thorough study of all possible camp sites it was decided that the best location would be one quarter mile inside the park boundary on the east of the road up the mountain. (See Incl #75.)

(6) Therefore, the HD is requesting the WD to open negotiations with the Department of Interior for permission to extend the existing road on Haleakala to Red Hill and for the withdrawal of a small area at Red Hill and an area about 40 acres for a camp site near the point where the road up the mountain crosses the park boundary. (See Incl #75.)

(7) In radio (See Incl #76) dated 10 March 1941, Mr. Wingate informed the CG that the D of I approved the use of the proposed Haleakala installation and issued a Special Use Permit. The Army would:

(a) Expand the present CCC facilities as required for the accommodation of some 40 men and two officers.

(b) Equipment shed, and Officers quarters to be constructed adjacent to present CCC location.

(c) These buildings were to remain for Park use when the Army purposes have been served.

(d) Preliminary building plans to be prepared by Army with cooperation superintendent Hawaii NP and forwarded through him for approval by Director of National Park Service.

(e) Red Hill installations to be under similar special use permit and plans approvals for building handled similar to that for camp.

(f) Plans accompanying General Herron's letter, dated 3 January 1941, are approved. (See Incl #75.)

[14] (8) General Short, in letter dated 27 March 1941, submitted the formal request complete with plans, maps, to the Superintendent HNP. This formal request is for permission to install certain military equipment on Red Hill in the Haleakala section of the Hawaii National Park. It is requested that the necessary action with National Park Service and the Department of Interior for the issuance of a Special Use Permit permitting these installations on Red Hill. (See Incl #77.)

(9) In a radio the Superintendent, HNP notified the CG that the plans were approved and the special use permit covering the Red Hill location will be issued soon. (See Incl #77.)

(10) The D of I issued a special use permit effective 9 April 1941 for detector site at Red Hill on Haleakala. (See Incl #78.)

(11) The formal request for the permission to construct and operate a base camp within the Haleakala Section of the HNP was submitted to the Superintendent HNP by the CG HD in letter dated 26 April 1941. This request is for an area of approximately six acres. The request is complete with plans and maps. (See Incl #80.)

(12) In letter dated 16 May 1941, Mr. Wingate, Superintendent HNP, notified General Short that the CCC camp had been abandoned for the use of the Army. (See Incl. #81.)

(13) In letter dated 27 May 1941, General Short acknowledged Mr. Wingate's permission to use CCC camp and informed him that the WD had notified the HD of the approval of the D of I and the issuance of a "special use permit" would be forthcoming. (See Incl #81.)

(14) The D of I issued a special use permit effective 17 May 1941 for the use of the camp site specified by CG in Incl. #80. This special use permit specified certain requirements to be satisfied by the Army in compliance thereof. (See Incl #82.)

b. Negotiations with WD regarding transfer of land, National Park Service.

(1) On notification that Mr. Wingate was forwarding the HD requests to the Directors of the National Park Service, the HD prepared a letter the 27th July 1940 to TAG informing WD that the Superintendent of Hawaii National Parks was referring the question of securing sites in Haleakala, to the Department of Interior. (See Incl #84.)

[15] (2) The HD recommended that the WD open negotiations with the Department of Interior for securing the National Park land (at Heleakala, Maui and Mauna Loa, Hawaii to be used as detector sites). The WD in a radio-gram dated 14 September 1940, informed the HD that the transfer of land at Haleakala and Maui and Mauna Loa for AWS stations had been discussed with the Department of Interior. (See Incl #84.)

(3) In a 4th indorsement (See Incl #84 dated 16 September 1940 to the HD letter 27 July 1940 (mentioned above)) the AG advises that careful consideration must be given the Department of Interior Policy in the study of the site in National Park for these AWS stations, and for the other installations (See Incl #2 to this letter). In a letter from the Assistant Secretary of the Interior to the Secretary of War, the Interior Department policy is stated:

(a) The Department of Interior desires to cooperate in this matter.

(b) The DI is opposed to the permanent transfer of any additional land from Hawaii National Park for military purposes, unless the exigencies of military strategy make it necessary for national defense.

(c) It is also opposed to granting authority for using any part of the park temporarily therefor, unless it has been determined, after careful studies have been made that suitable land for such purposes cannot be obtained outside of the park boundaries in a manner and time reasonably necessary to meet the problems of national defense.

(d) The temporary use of any part of Hawaii National Park by the WD would be approved by the D. I. only after the submission of plans indicating how much land is to be used and the types of roads, structures, etc., which it is proposed to construct thereon. Such plans would receive prompt consideration.

(e) Should the WD request authority to use any portion of Hawaii National Park temporarily for national defense purposes, the D. I. will

require that, when it is no longer needed, it will be placed in the same condition as when authority for such use was authorized.

[16] (4) In Par #3 of the 2nd R/S Ind., (See Incl #84) the Engineers pointed out:

- (a) The preliminary board took all possible sites into consideration.
 - (b) Effectiveness of AWS depends upon the height at which the station is located; the summit of Haleakala is the only feasible site in Maui.
 - (c) The upper terminus of the truck trail on Mauna Loa is the only feasible site on Hawaii.
 - (d) Protracted negotiations with D. I. for fixed station site will delay the start of construction until fiscal year is over.
 - (e) The money for the installation of these AWS stations is all fiscal year 1941 money, and it must be spent by June 30, 1941.
- (5) Based on the above reasons HD drafted another letter (See Incl #85) dated 9 October 1940 to TAG, Washington D. C. This correspondence pointed out the establishment of a mobile AW station on Haleakala is recommended for the following reasons:

- (a) Best site on rim of Haleakala Crater can only be determined by field test.
 - (b) Limited rainfall makes local water supply impracticable.
 - (c) Operating personnel should not be quartered at the summit of Haleakala.
 - (d) The National Park Service road leading to the summit of Haleakala can be improved at reasonable cost.
- (6) In the 2nd Indorsement to this letter (See Incl #85) the OCSigO advised that:

- (a) Fixed station would be the most satisfactory.
 - (b) Decision on location of communication building should be delayed until source of water is settled.
- [17] (c) No Signal Corps funds are applicable for any additional barracks and quarters for AWS, these barracks and quarters necessary for the detachments meaning the two stations on Maui must be included under the housing project of the HD;
- (d) Delivery of first SCR-270 to the HD cannot be expected before middle of May, 1941.
 - (e) Funds for the AWS, HD expire 30 June 1941. Time does not permit service test of equipment before sites are selected.
- (7) In the fourth Indorsement (See Incl. #85) A. G. O. renders WD decision:
- (a) Permanent station with quarters for the operating personnel in the communication building.
 - (b) Requested HD reconsider recommendation and indicate by radio (See Incl #86) whether mobile station is still recommended.
- (8) Action taken by HHD on receipt of WD decision for decision.
- (a) In a Memo dated 4 December 1940 (See Incl #104) to District Engineer, the Department Engineer submitted the results of a discussion based on the HD Signal Officer's (Colonel C. A. Powell) trip to Maui, General Herron made the following decision:

1. Haleakala station will be fixed type. Building on summit will consist of standard detector building, and antenna tower, standard power house, and the erection of communication buildings.
2. Communications building at summit will have only accommodations for a small caretaking detachment of five men.
3. Installation will be located on Red Hill.
4. Base camp will be located farther down the slopes of Haleakala, possibly outside the park boundaries.
5. Main communications buildings for the fixed station will be located at the Base camp and remotely controlled from detector site.
6. Consideration will be given to locating Base camp outside of National Park so that it would only be necessary to withdraw a "dumbbell shaped" plot from at the summit of Red Hill.

[18] (9) The WD was notified of HD decision by Radio 1977-7th (See Incl #86).

(10) In a 5th Indorsement (See Incl #84) to TAG, dated 3 January 1941, to a HD letter 27 July the CG informs the WD on the status of negotiations with MP's re to Haleakala and Mauna Loa sites.

(a) General Herron, Commanding, points out that the D. I. policy is, "This department is opposed to the permanent transfer of any additional land from Hawaii National Park for military purposes unless the exigencies of Military strategy make it necessary for national defense." The General further stated, "In my opinion the particular land described herein is demanded by the exigencies of military strategy for national defense. The early completion of the AWS in this department is a matter of the deepest concern, not only to the Army but to the Navy. In this, Admiral Richardson personally concurred."

(11) As an answer (See Incl #89) to this 5th indorsement the WD radio dated 3 March 1941, stated that informal discussion with the officials NPS indicates D of I is opposed to permanent transfer of any additional land in Hawaii National Park but will grant special use permit for Red Hill installation as recommended by the HD. Proposed road location appears satisfactory. The proposed telephone line is satisfactory. Park service is opposed to use of forty acre tract for camp site; suggest use of CCC spur camp in same general locality. There are some facilities at CCC camp now and a special use permit would be granted including permit to construct additional buildings and facilities with understanding that such installations will remain for park use when WD need no longer exists. Building on Red Hill to be held to a minimum. All building plans will be submitted to Superintendent Hawaii National Park to be forwarded by him to the D of I.

(12) In radio reply to the WD telegram, General Short's answer contained the following pertinent facts:

(a) Fifth Indorsement (Incl #84) represented best thought of officers making study.

[19] (b) Your radio, Inclosure #89, AGMO, 3 March 1941 transmitted in the clear does not appear to appreciate the seriousness of the situation.

(c) "I have personally reviewed the Haleakala situation and find that the officers responsible for this project had already thoroughly considered all the questions raised in your radiogram."

(d) AWS detector equipment is expected in June 1941 (see par. 2b).

(e) Haleakala is second most important station in the system and construction should not be delayed any further. If building plans must be submitted to D of I for its detailed examination, the completion of the Haleakala station, which is vital both to the Army and the Navy in the present situation, will be unduly delayed.

(f) *The seriousness of the situation requires that all administrative obstacles be removed; this applies not only to the Haleakala installation but also to the entire project.*

(g) It is recommended that this project be decentralized and that CG be authorized to make final decision on design and layouts and such other details as may be required to expedite completion.

(13) In a reply (see Inclosure #89) to the HD radio the WD authorizes the CG to make final decision on design and layout and other details of constructions within the limitations of funds now available for AWS project in the HD and subject to the approval by the D of I for the Haleakala site. The radio further stated the D of I positively refuses the occupancy of forty acre tract and demands that preliminary building plans be submitted. In letter (see Inclosure #89) dated 31 March 1941 the CG points out the CCC camp is inadequate that it would cost the government more to rebuild it to satisfy the Army's requirements than to build a new camp. Secondly, the D of I mainly objected to the withdrawal from MP jurisdiction of a forty acre tract of land. Thirdly, Mr. Wingate, superintendent HNP, would recommend the use of a forty acre plot by a temporary use permit. With this in mind the HD department recommended that the WD reopen informal negotiations to find out if the Department of Interior would approve the temporary use of a forty acre plot.

(14) In a letter (see Inclosure #90) dated 6 March 1941, to General Marshall, Chief of Staff of the Army, General Short, Commanding for HD, points out the following pertinent facts in regard to AWS situation:

(a) Due to the present international situation the need for AWS is urgent.

(b) The Navy is vitally interested in the AWS project for the HD and are very concerned with the present inadequate warning service.

[20] (c) The Secretary of War advised the Secretary of Navy that the AWS equipment would be received in the HD some time in June and the stations operating shortly afterwards (see Inclosure #32).

(d) Admiral Kimmel has been assured that personnel would be trained and the stations in operation within thirty days after receipt of the equipment.

(e) Due to previous radiograms the WD does not appear aware of the seriousness of the situation.

(f) The fixed station on Haleakala is one of two most important stations in the warning net.

(g) The restrictions imposed by the D of I will delay the final completion of this station.

(h) "I believe that this matter is sufficiently important to be brought to the attention of the Secretary of War to see if permission cannot be obtained from the Secretary of the Interior to construct the Haleakala installation without the necessity of submitting details plans for consideration by the National Park Service."

(i) Defense of these islands and adequate warning for the United States Fleet is dependent upon the early completion of this Aircraft Warning Service.

(15) General Marshall, Chief of Staff of the Army, answering letter (see Inclosure #90) states:

(a) The War Department appreciates fully the necessity for the early establishment of the Aircraft Warning Service station in the Hawaiian Department. However, it will be necessary to comply with certain fixed regulations in these cases where facilities are to be established in lands pertaining to the Department of the Interior.

(b) "I have given these matters my personal attention and have conferred with officials of the National Park Service. War Department radiogram of March 12, 1941 outlines what appears to be the most practical solution at this time."

c. Action Taken in HD

(1) Reconnaissance completed:

- (a) Camp site: 9 & 10 December 1941 (see Inclosure #93)
- (b) Detector Site: 9 & 10 December 1941 (see Inclosure #93)

(2) Type of Building For Detector Site:

- (a) HD approval: By the 27 March 1941 (see Inclosure #77)
- (b) WD approval: Not required (see Inclosure #89)
- (c) D of I approval: 11 April 1941 (see Inclosures #77 & #91)

[21] (3) Type of Buildings for Base Camp:

- (a) HD approval: By the 26 April 1941 (see Inclosure #80)
- (b) WD approval: Not required (see Inclosure #89)
- (c) D of I approval: 17 May 1941 (see Inclosure #82)

(4) Plot Plan for AWS Station Bldg:

- (a) HD approval: 17 March 1941 (see Inclosure #94 and #95)
- (b) WD approval: 18 April 1941 (see Inclosure #95)
- (c) D of I approval: 8 May 1941 (see Inclosure #78)
- (d) Detector Camp Completed: Unknown

(5) Plot Plan for AWS Base Camp:

- (a) HD approval: 9 May 1941 (see Inclosure #95)
- (b) WD approval: not required (see Inclosure #89)
- (c) D of I approval: 17 May 1941 (see Inclosure #80)
- (d) Base Camp Completed: Unknown

(6) Equipment Arrives in HD for Red Hill on Haleakala, Maui

- (a) Electrical equipment: 15 June 1941 (see Inclosure #35)
- (b) Towers and Buildings: Unknown

(7) Equipment Shipped to Maui from Oahu:

- (a) Electrical Equipment: Unknown
- (b) Towers and Buildings: By the 23 September 1941 (see Incl. #98)

(8) Erection of Equipment (start):

- (a) Electrical Equipment: Unknown
- (b) Towers and Buildings: Unknown

(9) Erection of Equipment (finish)

- (a) Electrical Equipment: 15 January 1942 (approx.)
- (b) Towers and Buildings: 6 December 1941 (see Inclosure #106)

(10) Bombproof: Completed: 25 April 1942. (see Inclosure #96)

(11) Station in Operation: 15 January 1942 (approx.) This station operating about middle of January 1942.

(12) Miscellaneous Information on AWS Station Red Hill :

(a) Inclosure #83, #97. Discussion of the Water System for AWS Camp at Haleakala.

(b) Inclosure #60, #99, #105. Lt. Krancus made a trip to Maui in December 1941. The following is believed to be Lt. Krancus's report on the status of AWS at Maui. See Inclosure #105. This inclosure falls in the files just ahead of a letter dated 26 December 1941.

1. All equipment at the detector site, Red Hill, is set; wiring may start immediately.

2. The power shelter at the detector is not completed.

3. The dam (see Inclosure #83 & #97) is built; some of the water storage tanks are up and primed today, but the pipe line is only partially in for the Haleakala water supply. It is necessary for the Engineers to haul the water supply 30 miles at present.

4. The temperature runs very cold here there is a block of ice on the water barrel. At present there is no heater in use.

[22] 5. The base camp lacks power units; they are not available.

6. The splinter proof shelters is adequate.

(c) Inclosure #106. Installation of AWS equipment may start on Haleakala station. Status of equipment (26 December 1941) : Power house lacks windows, water pipeline requires approximately 10 days for completion.

(d) Inclosure #107. Bombproof at the Base Camp.

7. Information Center

a. *The Selection of the Fort Shafter Site.* The original project for an AWS in the Hawaiian Department submitted on 17 April 1940 (see Inclosure #5) called for the establishment of an Information Center on Hickam Field. The War Department did not approve of this location and in their 4th Indorsement, dated 27 June 1940, of the above mentioned letter suggested that the Information Center be placed at the Department Command Post at Aliamanu. A supplementary report of the AWS Board of Officers, dated 25 July 1940, recommended the establishment of the AWS Information Center at Aliamanu, and that the exact location and details of construction be determined by the Anti-bombardment Defense Board. The Department Commander approved of this location on 31 July 1940. (see Inclosure #108). The Anti-bombardment Defense Board, however, objected to the location at Aliamanu. This caused further discussion (see Inclosure #109) with the result that a location at Fort Shafter was agreed upon by all concerned and approved by the Department Commander, 26 October 1940. This decision was not, however, immediately transmitted to the War Department for approval. It is evident from Inclosures #110, #113, #114, relating to the establishment of communications at Aliamanu that the War Department assumed that the AWS Bombproof would be at that location. On 11 January 1941, the War Department was informed of the decision to locate the AWS bombproof at Fort Shafter. (see Inclosure #113). In this connection reference is made to Inclosure #19, in which the Division Engineer at San Francisco advised the District Engineer, Honolulu, that funds in the amount of \$70,000 were being withheld, pending War Department approval of the AWS Information Center. Constructional details of the AWS bombproof were discussed by the Signal Officer, Department Engineer & District Engineer (see Inclosures #111, #112, #114). Consideration was given to submitting a formal plan to the War Department covering the AWS bombproof but it was concluded (see Inclosure #115) that in view of the authority given to the Department Commander, in War Department radiogram of 12 March 1941 (see Inclosure #89) that such action would be unnecessary. In this connection reference is made to Section II, par. 4b of this report concerning the disapproval by the Chief Signal Officer on 27 September 1941 of funds for Signal Communications for the AWS bombproof at Fort Shafter for the reason that the installation of the bombproof had not been approved by the War Department.

b. *Agreement Reached on a Combined Air Defense Command Post—Fort Shafter.* In accordance with the above mentioned discussion (see Inclosure #111, #112, #114) the District Engineer prepared plans for an AWS Information Center (see Inclosure #116). These plans were not approved by the D. C. in view of the fact that the instructions had been received from the War Department to combine the bombproof structures of the AWS C. P., the Hawaiian Air Force and C. P. of the Antiaircraft Groupment. Details of this entire situation are given in the [23] memorandum shown as Inclosure #118. On 21 June 1941 the Department Commander officially notified the District Engineer to

3154 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

proceed to prepare plans for a combined Command Post. (See Inclosures #119 & #121). The final plans were submitted to the Department Commander, 14 August 1941 (See 3rd Indorsement, Inclosure #119).

c. *Information Center Equipment.* Plans for the Information Center were forwarded on 27 August 1941, by the Department Signal Officer to the Chief Signal Officer so that the necessary specialized equipment could be procured. (See Inclosures #122 & #123). On 13 December 1941 the Chief Signal Officer advised that the Mobile Information Center equipment at Drew Field, Florida was being shipped to Hawaii, (See Inclosure #124). Because of shipping difficulties this equipment did not arrive in Hawaii until 28 March 1943 (See Inclosure #127). The voluminous exchange of radiograms on this subject between the Department Signal Officer and the Chief Signal Officer and others is shown in Inclosures #124, #125, #126, #127). The transfer from the temporary Information Center (Construction described in Section V, par. 3 of this report) to the permanent Information Center was made on April 1, 1942.

8. *Nuuanu Pali, Oahu* was originally approved by WD as a mobile station in 4th Indorsement to HD letter dated 17 April 1940 (See Inclosure #5). In a later HD decision this site was abandoned and replaced by a mobile set at Makapuu, Oahu (See Inclosures #142 & #144).

9. *Manawahua, Oahu.* This mobile station was approved by WD in the 4th Indorsement to HD letter dated 17 April 1940 (See Inclosure #5). With the new allotment of detectors to HD (6 Fixed and 6 mobile see Inclosure #134) Manawahua detector station was changed to a fixed station (See Inclosure #142 & #144).

10. *Mauna Loa, Hawaii*

a. Original plans (See Inclosure #5) called for a mobile detector at the upper terminus of the 'ruck trail on the southern slopes of Mauna Loa. Action was instigated by the HD to secure land in the NP for both Haleakala and Mauna Loa sites (See Inclosures #73, #74, #75, #128, #129, & #130).

b. Additional information is contained in Inclosures #131, #132, & #133.

c. Mauna Loa site was replaced by a mobile detector at Kahuku Ranch Hawaii (See Inclosures #142 & #144.)

11. *Kauai Mobile Station.* The original plan (Inclosure #5) and the subsequent revised plan (Inclosures #142 & #144) called for a mobile stand-by detector to relieve the fixed detector from continually searching in its area. Because of the more urgent need for mobile detectors elsewhere in the Department a set was never installed at this location.

12. *Maui Mobile Station.* Same as paragraph 11 "Kauai Mobile Station."

[1] SECTION III—SECOND PHASE, 28 MAY 1941 TO DECEMBER 1941

1. *Priority & Delivery Schedule of Detectors for the Haw'n Department.*

a. In a letter 28 May 1941, received 12 June 1941, the WD indicated the Priority & Delivery Schedule for SCR-270 and SCR-271's for the HD. The schedule indicated that the HD was to receive a total of 6 fixed (271) and 6 mobile (270) Radar Sets. This was different from the previous planned schedule of detector sets. The WD had approved the installation of three fixed (271) and five mobile (270) detector sets for the HD (see Inclosure #5).

b. The letter of 28 May 1941 mentioned above indicated that the HD was scheduled to receive radar equipment in accordance with the following approximate time table:

March 1941-----	3 fixed sets (271)	6 Mobile sets (270)
June 1941-----	2 fixed sets (271)	
July 1941-----	1 fixed set (271)	
Total -----	6 fixed sets (271)	6 mobile sets (270)

c. The WD further advised that if it had not already been done, a reconnaissance should be conducted to determine detector sites. The necessary land should be acquired and the sites prepared for the detectors schedule for delivery

so that stations may be established without delay on receipt of equipment. (see Inclosure #134).

2. Board Changes (see Inclosure #136).

In a letter dated 10 June 1941 the Board of Officers was reorganized. The Board then consisted of the following members:

Lt. Col. Carroll A. Powell, (05742), Sig. C., President
Lt. Col. Wm. H. Murphy, (06835), Sig. C., Member
Lt. Col. Albert P. Hegenberger, (01081), Member
Major Isaac H. Ritchie, (012322), C. A. C. Member
Major Robert J. Fleming Jr., (017095), CE., Asst. Dept Engr., Member
Capt. Kenneth P. Bergquist, (019863), AC, Member

Recorder, without vote, a Sig C Officer on Duty at Dept. Hq. to be designated by Signal Officer.

3. Action Taken in HD on the New Detector Allotment Schedule (see Incl. #137)

a. On receipt of the above letter (Inclosure #134), the Board of Officers' Committee for selecting detector sites prepared a list of sites for the consideration of the Board of Officers at their next meeting.

b. Lt. Col. Powell, President of the Board of Officers, called a meeting of the board for 17 June 1941. This Board Meeting made a map study of the locations and decided on a time for a ground and aerial reconnaissance of the proposed sites.

[2] c. After completing the reconnaissance the Board decided the following sites were acceptable:

- (1) The site, 1½ mi. west of Paho Village, Hawaii.
- (2) The site, at Kilanea Point, Kauai.
- (3) The site at Opana Triangulation Station, Oahu.
- (4) The site at Makapuu Point, Oahu.

4. Preliminary Report Submitted to the WD on the Revised AWS Projects for HD

a. In a letter dated 8 July 1941, received in HD 21 July 1941, the WD indicated the basic information that was to be included in the report submitted to WD on the revised AWS project for the 6 fixed and 6 mobile aircraft detector sets (See Inclosure #135).

b. On receipt of this letter the Signal Officer, in a 1st R/S Indorsement dated 19 August 1941, requested the DEO to supply the DSO with the engineer's portion of the information requested by the WD. (See Inclosure #138.)

c. Based on Engineer's and SigO's data, a radiogram dated 13 September 1941, was drafted to the WD submitting, in advance, the sites selected and the cost estimates for the revised AWS project. (See Inclosure #139).

d. The SigO, HD, submitted the cost estimate for the Signal portion of the revised AWS project of the CSO in a radiogram dated 16 September 1941. (See Incl #140). In a radio reply, dated 22 September 1941, the CSO pointed out that the items contained in the radiogram of the 16th must have WD approval before they could be included in budget estimates. The CSO further recommended that the HD submit a letter showing complete justification for the additional detector sites and their cost estimates. (See Incl #141).

e. In a letter dated 16 September 1941 (See Incl #140), the District Engr. HD, submitted the cost estimate for the Engineer portion of the revised AWS project to the C of E. In 1st Ind. to the letter, dated 3 October 1941, the C of E recommended that the sum of \$315,200.00 from the funds available to the CSO be allotted to the C of E so that the AWS installation in the HD would proceed without delay. The CSO, in the 2d Ind. recommended that the HD submit a report on the new AWS project for the WD approval. On receipt of such approval the CSO could allot funds to the C of E to the extent available under the current appropriations. TAG in the 3d Ind. authorized the sub-allotment of necessary funds to initiate such action as may be necessary to expedite construction of the additional AWS detector stations.

3156 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

f. In a letter, dated 29 September 1941, (See Inclosure #141) the Commanding General, HD, submitted the following list of detector sites for the revised AWS project:

Type	Location	Status
Fixed (271).....	Mount Kaala, Oahu.....	Unchanged.
Fixed (271).....	Haleakala, Maui.....	Unchanged.
Fixed (271).....	Kokee, Kauai.....	Unchanged.
Fixed (271).....	Pahoa, Hawaii.....	Additional Set.
Fixed (271).....	Opana, Oahu.....	Additional Set.
Fixed (271).....	Manawahua, Oahu.....	Additional Set.
Mobile (270).....	Kokee, Kauai ¹	{ Unchanged. To be used to relieve fixed station from continually searching its area.
Mobile (270).....	Haleakala, Maui ¹	
Mobile (270).....	Makapuu, Oahu.....	To replace previously approved location at Nuuanu Pali, Oahu.
Mobile (270).....	Kahuku Ranch, Hawaii.....	To replace previously approved location at Mauna Loa, Hawaii.
Two Mobile (270).....	Oahu.....	To be used as Mobile reserve on the island of Oahu in the event of failure of fixed station.
Information Center.....	Fort Shafter.....	No change.

¹ NOTE.—The above stations are not located at the fixed detector site but only use the fixed detector's Base Camp.

[3] g. The inclusion of the above listed additional detectors sets in the HD AWS plan necessitates the use of additional funds. The net cost estimates is summarized as follows:

Engr's Phase.....	\$315,233.00
SigC's Phase.....	218,400.00
Total Net Cost estimate.....	533,633.00

5. Revised HD AWS Project

a. The HD submitted a report, 8 October 1941, to the WD titled, "Survey of the Air Warning requirements for the HD". This report reviewed the complete AWS picture; listed the recommended changes due to additional detectors allotted to HD by the WD; summarized each detector site, touched on the Signal Communications and the information Center; and listed the additional funds required to complete this revised AWS program. (see Inclosure #142).

[4] b. The "Revised Project Covering Installation Aircraft Warning Equipment" was submitted to WD in a HD letter dated 19 December 1941. This letter, (see Inclosure #144), covered the description of the Signal portion of the revised HD AWS project. In par. 1, 2d Ind. to this letter the OCSigO mentioned that the Aircraft Warning Project for Hawaii had been approved by the Secretary of War, 28 December 1941. See Inclosure #146 for the Secretary of War's letter approving the HD revised AWS project.

c. Approval of Detector Sites.

(1) In a radio (see Inclosure #145) sent 10 November 1941, the HD explained that due to the disposition of personnel and equipment the District Engineer is advantageously situated to commence immediate development of the following sites:

- (a) Kilauea Point
- (b) Opana, Oahu
- (c) Makapuu Point, Oahu
- (c) Pahoa Village, Hawaii
- (e) Kahuku Ranch, Hawaii

The radio referred the WD to previous HD letters, 29 September 1941 and a 1st Ind. to TAG letter 8 July 1941 (Inclosures #141 & 142 respectively) submitting these sites for approval. The HD requested that the WD radio "Immediate Radio Approval" of these sites. A search of the Signal, Engineers, and AG (HD) has as yet revealed no answer to this radiogram.

(2) In a letter (see Inclosure #146) dated 28 December 1941 the Secretary of War granted authority to CSO to sub-allot funds and take such other action necessary for the construction and installation of the AWS detector stations, Filter Centers, and Information Centers within the HD as determined by the Commanding General, HD, to be required. This constituted approval of AWS Project (see Inclosure #144) submitted by C. G. to WD.

(3) In radio dated 30 December 1941, the HD requesting additional detectors as "Recent experience demonstrated number AWS detect stations on island of

Oahu inadequate for continuous early warning". The HD further recommended that these additional radios (3 SCR-271 as indicated by inclosure #2 to this letter, Incl #146) and that the three radio sets, SCR-271, still due the department be expedited. In radio reply dated 9 January 1942, the CSO informed the HD that five more sets of this type would be shipped in January and February 1942. One radio set SCR-271-A was being prepared for immediate shipment to Hawaii result of HD radiogram 1468. The CSO further requested that the HD expedite the preparation of and forward at an early date the projects for other locations of these sets. (see Inclosure #146, see Inclosure #150 for information on shipping these sets).

6. *Safeguarding AWS Stations.*

a. A memorandum dated 14 December 1941, to Col. Wyman indicated that the C. G. desired to splinterproof all the vital AWS station buildings. This would include the installation of splinterproof protection around the detector house of the fixed stations and also protection of the trucks housing the equipment of the mobile stations (see Inclosure #147 & 148).

[5] b. On 20 December 1941, the DC directed that immediate action be taken to camouflage all the AWS stations. In the 2d R/S Ind. 19 January 1942, the Engineer indicated to G-4 that AWS were being camouflaged and the dummy stations would be constructed as soon as antennas are completed (See Inclosure #149).

c. Additional information is listed in inclosure 151 regarding the expediting of the AWS project.

SECTION IV—DETAILS OF ACTION TAKEN IN THE SECOND PHASE

1. Additional correspondence regarding project (second phase)

a. 30 December 1941, *Reconnainance* for the establishment of sites for the additional detectors (see Inclosure #153).

b. Funds.

(1) Inclosure #154. Funds in the amount of \$7,785.00 are required to install commercial power service at Kokee, Kilauea, Point, Haleakala, Pahoa Village, and Kahuku Ranch (see Inclosure #154).

(2) Authorization to CG, HD to incur all the necessary obligations to meet the urgent requirements for AWS HD (see Inclosure #155).

c. Status of Construction on AWS projects (see Inclosure #156 & #158)

d. Project numbers assigned to the additional AWS sites (see Inclosure #157)

e. Shipment of Equipment for additional sites (see Inclosure #159)

2. *Pahoa, Hawaii* was approved by a letter dated 28 December 1941, from the Secretary of War to the CSO as a fixed station (see Inclosures #144 & #146)

a. Topographical survey: 15 September 1941 (see Inclosure #160 & #161)

3. *Opana, Oahu* was approved by a letter dated 28 December 1941, from the Secretary of War to the CSO as a fixed station (see Inclosures #144 & #146).

During 7 December 1941, there was a mobile detector operating at this site (see Section V, par. 2 for further discussion).

4. *Manawahua, Oahu.* This station was originally approved as a mobile detector station (see discussion under Section II, par. 10 and Inclosure #5). With the new allotment of detectors (see Inclosure #134) the HD decided on a fixed station in place of the mobile station. The HD requested early approval of this fixed station (25 November 1941) so that the Engineers could start work on the minimum requirements of the site immediately (see Inclosure #164).

a. Proposed AWS installation: Approved 27 November 1941, (see Inclosure #163)

5. *Makapuu, Oahu* was approved by a letter from the Secretary of War to the CSO date 28 December 1941 (see Inclosures #144 & #146) as a mobile detector. This was to replace the previously planned mobile site at Nuuanu Pali (see Section II, par. 9.)

[1] SECTION V—INSTALLATION AND USE OF FIRST SIX SCR-270B MOBILE UNITS

1. *General.* The first six SCR-270B Mobile Units for the Hawaiian Department were shipped from the Signal Corps Laboratories, Fort Monmouth, New Jersey, July 23, 1941 (see Inclosures #36 & #165). These sets arrived in the Hawaiian Department during the first part of August, 1941 (see Inclosure #166).

2. *Original Station Locations.* On August 15, 1941 the Department Commander approved the use of these stations at the Puu Palalalai, Waianae, Kawalloa, Kaawa, Koko Head, and Fort Shafter (see Inclosure #166). Mobile sets were

installed at these locations with the exception of Puu Palaili. The set scheduled for this location was used at Schofield Barracks for training purposes until the latter part of November 1941, when it was installed at Opana, Oahu. The set was placed at Opana principally as a result of a radiogram, dated 30 October 1941, from Lt. Col. C. A. Powell, who was on temporary duty on the mainland to the acting Dept. Signal Officer Lt. Col. W. H. Murphy advising that tests be made at proposed locations. (See Inclosure #167.) During this early period the sets were used about five hours per day, six days per week (see Inclosure #168). A request was submitted by the Signal Officer on 23 August 1941, to the Engineers Officer to expedite the completion of the mobile barracks facilities. (See Inclosure #169.)

3. *Establishment of a Temporary Information Center.* The desirability of establishing a temporary Information Center for training and possible tactical purposes was realized during the early part of 1941. On May 21, 1941, a request for funds for this purpose was submitted to the Chief Signal Officer. The funds were allotted on 25 May 1941. (See Inclosure #170.) The photographs shown on Incl #171 show the status of the construction of the temporary Information Center at Bldg. #307, Fort Shafter during August 1941. In connection with the establishment of this Information Center the Department Commander dispatched a letter on 5 August 1941, to Commander-in-Chief, U. S. Pacific Fleet and to the Commandant, 14th Naval District, Pearl Harbor, requesting Navy liaison officer be assigned to the Aircraft Warning Facilities. These appointments were subsequently made by the Navy Officials (see Inclosure #172). The possibility of the use of ground observers in connection with AWS was considered at various times, but was considered impractical. Correspondence pertaining to this subject is shown in Inclosure #173.

4. *Test of Mobile Detectors Prior to December 7, 1941*

a. On the morning of 27 September 1941, a simulated raid was made on the Island of Oahu by a flight of carrier based Navy planes. This flight was first picked up at their point of orbit, supposedly near their carrier, at an azimuth of 224° and a range of 85 miles. The raid, made up of two separate waves of flights, started at 0558 and 0610½. The bogey was intercepted by the defending air force at 0616 at the azimuth 225° and a range of 26 miles. The raiding force was theoretically destroyed before an attack on Pearl Harbor could be realized. [2] The returning planes were tracked out to their carrier at 0735 where they disappeared from the radar screen. The plots of this simulated raid were made by the mobile detector at Koko Head and Waiānae sites. The records of this trial raid are shown in the charts under Inclosure #175.

b. Inclosure #176, 3 November 1941. A discussion of the unusual ranges (greater than 150 miles) being obtained off of various mountains on the other islands by the several of the Mobile detectors on Oahu, was sent to the CSO for his information.

c. Inclosure #177, 4 November 1941. Discussion of the arrival of a trans-pacific flight of B-17 bombers the morning of 22 October 1941. Comparative plots were obtained from the detector at Kaawa (50 ft. elevation) and the detector at Koko Head (675 ft. elevation).

5. *AWS Activities on 7 December 1941*

a. *Operational Order.* On 27 November 1941 the acting Dept. Signal Officer received instructions from the Asst. Chief of Staff G-3 to start operating the detector stations from two hours before dawn until one hour after dawn. This order was transmitted immediately to the Commanding Officer Aircraft Warning Company. The detector stations were operating in accordance with the above schedule on 7 December 1941, (see Inclosure #178).

B. *Detector Operation on 7 December 1941.* Reference is made to Inclosure #179, which covers the official report of Lt. Col. W. H. Murphy who made a personal investigation concerning the detection of the Japanese attack.

c. *Reports to the Chief Signal Officer.* Reference is made to Inclosure #181 covering the official report of the Dept. Signal Officer to the Chief Signal Officer concerning the detection of the Japanese attack 7 December 1941.

STEPHEN EARLY, ESQ.,

Office of the President, Washington, D. C.

DEAR MR. EARLY: I fully realize what a hideous offense it is to make a charge against a person if the charge is false, or, if one would inculcate for personal gain, or, solely, to harass the accused that is why I am writing you, so that an investigation, (should you see fit to make one), can be made with the least danger of causing the accused an injury, if he be innocent. (If a leopard ever change his spots.)

This person that I herewith accuse, is now a rich general contractor in Los Angeles County; twenty-three years ago he and I worked together on the south bank of the Bear River; fifty-five miles north of Sacramento, California. We became very confidential, I knew him, then, to be an under cover agent of the Imperial German Government.

Shortly after our Government (U. S. A.) entered the first World's War, the accused made a dash for Mexico so full of goose pimples that he looked like a boy with the measles; so wet with cold sweat: as some one held a sprinkling pot over him full of ice water. For years I forgot about the accused.

Now comes a fellow workman who was on the same job twenty-three years ago. This workman went to France: Com. M. 110th Inf.; this veteran knows more about the accused than I do. The veteran comes to me propelled by the fact that the accused now has large contracts in the harbor of our Western Metropolis.

The veteran joins in with me in making this accusation.

To get to the man that I knew twenty-three years ago, one would have to have power, to tear off three different veneers: Fraternal, Social and Financial.

May I tell you that I was born in Virginia City, Nevada, fifty-nine years ago.

I place my life and my honor at the service of country.

Respectfully and sincerely

WILLIAM HENRY ENRIGHT.

ARMY PEARL HARBOR BOARD, EXHIBIT No. 60

[CONFIDENTIAL]

NAVY DEPARTMENT

DIVISION OF NAVAL INTELLIGENCE
COUNTER INTELLIGENCE BRANCH

Op-16-B-7 (G)

Date: 14 AUGUST 1944.

Memorandum for Army Pearl Harbor Board. Attn. Major Clausen, Room 4743,
Munitions Building.

Subject: ROHL, Hans Wilhelm.

Enclosure:

- (A) Copy ONI card, 2 Oct. 1940, Subject: ROHL, H. W.
- (B) Copy 11ND NIS Rept., 17 Oct. 1940, Subject: ROHL, H. W.
- (C) Copy 11ND NIS Rept., 5 March 1941, same Subject.

1. Enclosures (A), (B), and (C) are forwarded for your information, in accordance with your telephone request.

2. The information forwarded herewith is extremely confidential in character and its security must be preserved, by carefully safeguarding its existence and source, as well as the names of any informants mentioned therein. In no case, if the report covers an investigation of an individual, shall the report be shown to the subject, nor shall copies be made of it, nor shall the Office of Naval Intelligence be mentioned in connection with any action on the basis of such report.

Date: OCTOBER 17, 1940.

Confidential

Subject: ROHL, H. W.

Report made at: Los Angeles

Report made by: Waldo W. Drake Lt. Comdr. I-V(S) USNR

Period covered: October 14, 1940 Status of case:

Origin of case: ONI card October 2, 1940

Character of investigation: Personal interview with contacts of subject.

Enclosures: ONI card, October 2, 1940 Copy to O.N.I.; 12ND

Source File No.: #20975 ND11/A8-2/QQ ONI File No.:

Synopsis: Careful investigation reveals that subject, and Master of the pleasure yacht "VEGA", Captain Otto MATTHIES are both loyal citizens.

Comment and recommendations:

- Reporting officer has known subject and MATTHIES since 1926.
2. The vessel is manned by 9 U. S. Citizens and 1 Norwegian national, a sailor named Harold HARTVIGSEN.
3. Subject and his wife are persons of refinement. At the present time the vessel is only used to carry owner's family and week-end guests to Santa Catalina Isd.
4. Informant is a dissatisfied ex-employee.

Serial LA/bl/573

Confidential

SUBJECT: *ROHL*, Hans Wilhelm, President, *ROHL & CONNALLY Co.*, Los Angeles, California.

Report made at: Los Angeles, California. Date: March 5, 1941.

Report made by: Lieut. A. A. Thomas, USNR.

Period covered: March 4, 1941. Status of Case: Closed

Origin of Case: Originated from C. A. *EMERICK*, Customs Agent in Charge, Los Angeles, California.

Source File No.: ND11/EF30/A8-5. Copy to: ONI (2) FBI-LA (1)

SYNOPSIS:

Subject, German born and resident of U. S. for 25 years, is part owner in firm known as Hawaiian Constructors engaged in confidential construction work for U. S. Army in Hawaii. Also owner of yacht "VEGA" having radio telephone Station KLVC under FCC license. Part of Subject's business in wife's name.

COMMENT AND RECOMMENDATIONS:

Comment: Inspector *DUNN* believes subject to have been dishonest in his actions and that his actions indicate possible subversive activity.

Recommendation: In View of the fact that three other agencies of the U. S. are investigating subject it is recommended that this office desist from further action.

Approved:

/s/ B. L. Canaga,
B. L. CANAGA,
Captain, USN, (Ret.)

Confidential

MARCH 5, 1941.

SUBJECT: *ROHL*, Hans Wilhelm, President, *ROHL-CONNALLY CO.*, business address: 8159 Hollywood Blvd., Los Angeles, California, Residence Address, 4351 Alhambra Ave., Los Angeles, California.

1. This investigation is predicated upon information supplied to this office by C. A. *EMERICK*, Customs Agent in Charge, to the effect that subject is an alien, and is engaged in National Defense projects in violation of H. R. 9822.

2. Investigating office called on Mr. P. B. *DUNN*, Immigrant Inspector, Bureau of Immigration, Federal Building, Los Angeles, whose active file disclosed the following:—

Subject is not a citizen of the U. S., but filed Form 2214, which is a certificate of arrival, date at present unavailable. Since subject has obtained government work, pressure has been brought to bear to expedite the obtaining of citizenship papers.

Subject is owner of yacht "VEGA", Flagship of the Coast Patrol, which is under the jurisdiction of the Sheriff's Office, Los Angeles County. Said yacht has a radio telephone, Station KLVC, necessitating an FCC license. FCC license requires a sworn statement to the effect that owner is a U. S. citizen.

Much of subject's business is in part ownership of wife. As U. S. laws forbid an alien to own more than 25% of stock of a business, it is presumed that subject is using this means to violate law. Subject is 40% owner of firm known as

3162 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Hawaiian Constructors, said firm is engaged in very secret construction work for the U. S. Army in construction of antiaircraft bases, underground storage and tunnels, etc., in the defenses of Hawaii.

Subject is 54 years old and has lived in the U. S. for some 25 years.

3. Inspector *DUNN* advises that investigation of subject is now proceeding and that copies of this investigation will be forwarded to DIO, 11ND, San Diego, California. He also advised that the Bureau of Internal Revenue, U. S. Customs Office, is also conducting an investigation.

4. COMMENTS AND RECOMMENDATIONS:

Comment: Inspector *DUNN*, who is conducting investigation for Immigration Department, feels that subject has been dishonest in his actions and that appearances at this stage of the investigation indicate a possibility of subversive activity. He states subject could very easily engage in subversive activities should he so desire, and that subject's deliberate hiding of non-citizenship status is suspicious.

Recommendation: In view of the fact that three other agencies of the U. S. are investigating subject, it is recommended that this office desist from further action.

5. INVESTIGATION LEADS:

None.

ARMY PEARL HARBOR BOARD EXHIBIT No. 61

CROSS REFERENCE SHEET

MAIN SUBJECT:

Corps of Engineers Operations in Canada
(Canol Project)

To:

From: M/A Canada #2026

BRIEF SUMMARY:

Enclosed are copies of letters addressed to American Minister by Dept. of External Affairs, Canada which are more or less self-explanatory and serve to indicate the manner in which the U. S. Army Canol Project in Canada is being conducted by Col. Wyman; Canadian Govt. may see fit to request recall of Col. Wyman; by Disposition Form dated 11-10-42 to Operations Division.

Classifier: 26

Typist: 26

321.19 G-2, Operations Division

No. 2026 JSG: D

SEPTEMBER 26, 1942.

Subject: Corps of Engineers Operations in Canada (Canol Project)

To: Chief, MIS, G-2, War Department, Washington.

1. Enclosed are copies of letters addressed to the American Minister, Mr. Moffat, by the Department of External Affairs, Canada. These letters are more or less self-explanatory and service to indicate the manner in which the United States Army Canol Project in Canada is being conducted by its representative, Colonel Theodore Wyman, C. E.

2. Unofficially Canadian Offices have reported more than once of the high-handed manner in which Colonel Wyman has conducted himself in Canada. And, during the visit of Mr. Moffat and the undersigned to the Canadian Northwest different people including high officers of the Royal Canadian Mounted Police spoke disparagingly of this officer. This is indeed unfortunate. Unless something is done to correct this situation it is the opinion of this office that the Canadian Government may see fit to request the recall of Colonel Wyman.

3. The contents of the enclosures were communicated to the State Department by Mr. Moffat.

4. This communication is forwarded in the belief that it is a serious concern of the War Department and of particular interest to your office.

JOHN S. GULLET,
Colonel, G. S. C.,
Military Attache.

SUMMARY OF STATEMENTS MADE

BY

BRIGADIER GENERAL L. T. GEROW,

ASSISTANT CHIEF OF STAFF, WAR PLANS DIVISION

BEFORE

MILITARY COMMISSION.

DECEMBER 18, 1941

DEVELOPMENT OF CURRENT WAR PLAN

1. Joint Action of the Army and the Navy state the governing policies for joint action of the Army and Navy. These policies serve as basic guides in the preparation of war plans.

2. A war plan is prepared to meet a specific situation requiring the use of all or part of the Army and Navy of the United States. The plan in current use is known as Basic War Plan—Rainbow No. 5. Broadly considered, it consists of the following documents;

a. Report of the United States—British Staff Conversations, dated March 27, 1941 (ABC-1).

b. Joint United States-Canada War Plan No. 2 (ABC-22).

c. Joint Army and Navy Basic War Plans—Rainbow No. 5.

d. Navy War Plan and subordinate plans based thereon.

3. The Joint Board in April, 1941, developed the Joint Army and Navy Basic War Plan—Rainbow No. 5 based on a. and b. above. The work incident to the preparation thereof was done by The Joint Planning Committee. The Joint Army and Navy Basic War Plan—Rainbow No. 5 was approved by the President, the Secretary of War, and the Secretary of Navy in May, 1941.

4. Based on this joint plan the Army War Plans Division prepared Army Strategic Plan, which consists of Operations Plan—Rainbow No. 5, and Concentration Plan—Rainbow No. 5. A copy of Operations Plan—Rainbow No. 5 was sent to the Commanding General, Hawaiian Department on August 21, 1941. Receipt was acknowledged on September 3, 1941. A revision of Joint Army and Navy Basic War Plan—Rainbow No. 5 was approved by The Joint Board on November 19, 1941, and a copy of The Joint Army and Navy Basic War Plan—Rainbow No. 5, Revision No. 1, was sent to the Commanding General, Hawaiian Department on November 28, 1941. Receipt therefor has not as yet been received.

5. The missions assigned the Hawaiian Coastal Frontier under the Army Strategic Plan are as follows:

3164 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

a. Joint—Hold Oahu as a main outlying naval base and control and protect shipping in the coastal zone.

b. Army—Hold Oahu against attacks by land, sea, and air forces and against hostile sympathizers. Support naval forces in the protection of the sea communications of the Associated Powers and the destruction of Axis sea communication by offensive action against the enemy forces or commerce located within tactical operating radius of occupied air bases.

c. Navy—Patrol the Coastal Zone; control and protect shipping therein; support the Army.

6. For the purpose of indicating the extent of the frontier defense measures to be taken under specific situations, categories of defense are established. Army Strategical Plan—Rainbow No. 5 placed the Hawaiian Coastal Frontier in Category D. This category assumes the possibility, but not the probability of a major attack.

[3]

WAR PLANS, HAWAIIAN COASTAL FRONTIER

1. War Plans, Hawaiian Coastal Frontier consist of the following documents:

a. Joint Coastal Frontier Defense Plan, Hawaiian Coastal Frontier.

b. Joint Defense plan, Hawaiian Theater, Naval Operations Annex.

c. Army Operating Defense Plan, Hawaiian Coastal Frontier, Operations Orders, and plans subordinate thereto.

d. Hawaiian Defense Project.

2. These plans are based on Joint Army and Navy Basic War Plan Orange prepared for a situation involving a war in the Pacific between the United States and Japan. The Joint Mission, the Navy Mission, and the Category of Defense under the Orange Plan is the same as that under the Army Strategical Plan—Rainbow No. 5. The Army Mission under the latter plan has been somewhat broadened. Under all plans in existence the War Department's concept of the most probable form of attack which an enemy would adopt against Oahu was a surprise attack consisting of raids and bombardments by ships' fire and air forces and action by local sympathizers.

3. The Joint Coastal Frontier Defense Plan (prepared by the Commanding General, Hawaiian Department and the Commandant 14th Naval District) and the Army Operating Defense Plans were forwarded to the War Department for review at time of issue, and published revisions thereto have been furnished from time to time. Such plans are not formally approved by the War Department and are not commented upon unless it appears that they are not in consonance with the Basic Army Plan as to concept, mission, and means assigned. Plans in force in the Hawaiian Department on December 7 were in process of revision based on the Army Strategical Plan—Rainbow No. 5 and recent changes and additions made in the means provided the Hawaiian Department.

4. Joint Coastal Frontier Defense Plan, Hawaiian Department and Fourteenth Naval District, which was revised March 28, 1941, prescribes the joint security measures to be taken for the protection of the Fleet and the Pearl Harbor Base. The following extracts from this plan are quoted in order to indicate the joint agreement in force on December 7, 1941:

"I. GENERAL.

"1. In order to coordinate joint defensive measures for the security of the fleet and for the Pearl Harbor Naval Base for defense against hostile raids or air attacks delivered prior to a declaration of war and before a general mobilization for war, the following agreements, supplementary to the provisions of the HCF-39, (14 ND-JCD-13), are adopted. These agreements are to take effect at once and will remain effective until notice in writing by either party of their renouncement in whole or in part. Frequent revision of these agreements to incorporate lessons determined from joint exercises will probably be both desirable and necessary.

"II. JOINT AIR OPERATIONS.

"2. When the Commanding General of the Hawaiian Department and the Naval Base Defense Officer, (the Commandant of the 14th Naval District), agree that the threat of a hostile raid or attack is sufficiently imminent to warrant such action, each commander will take such preliminary steps as are necessary to make available without delay to the other commander such proportion of the air forces at his disposal as the circumstances warrant in order that joint operations may be conducted in accordance with the following plans.

"a. Joint air attacks upon hostile surface vessels will be executed under the tactical command of the Navy. The Department Commander will determine the Army bombardment strength to participate in each mission. With due consideration to the tactical situation existing, the number of bombardment airplanes released to Navy control will be the maximum practicable. This force will remain available to the Navy, for repeated attacks, if required, until completion of the mission, when it will revert to Army control.

"b. Defensive air operations over and in the immediate vicinity of Oahu will be executed under the tactical command of the Army. The Naval Base Defense Officer will determine the Navy fighter strength to participate in these missions. With due consideration to the tactical situation existing, the number of fighter aircraft released to Army control will be the maximum practicable. [5] This force will remain available to the Army for repeated patrols or combat or for maintenance of the required alert status until, due to a change in the tactical situation, it is withdrawn by the naval Base Defense Officer (Commandant, 14th Naval District), and reverts to Navy control.

"c. When naval forces are insufficient for long distance patrol and search operations, and Army aircraft are made available, these aircraft will be under the tactical control of the naval commander directing the search operations.

"d. In the special instance in which Army pursuit protection is requested for the protection of friendly surface ships, the force assigned for this mission will pass to the tactical control of the Navy until completion of the mission."

5. A defense project of an overseas department includes:

First, a statement of the mission to be carried out by the Department Commander as defined by the War Department; second, a brief estimate of the situation outlining the most probable threats against the successful execution of this mission and indicating the course of action and the means necessary to carry out the mission; and, third, a concise statement of the requirements in troops, in defensive installations, construction other than housing, and the supplies and equipment considered necessary to carry out the mission. This summary includes priorities for accomplishment of the requirements enumerated and consolidated estimates of cost. The defense project is revised annually and is submitted to the War Department for approval.

6. The Hawaiian Defense Project, 1940, was approved by the War Department on September 17, 1941. The project contains revisions up to September 29, 1941. The following extracts from this document indicate the mission, the category of defense, and the possible and probable war situations as understood by the Commanding General, Hawaiian Department:

"Forms of hostile attacks. The basis of the forms of attack listed below is the War Department assignment of Category "D" to this Department.

"Possible enemy attacks against the OAHU area in the order of probability are:

"(a) Submarine—torpedo and mine.

"(b) Sabotage.

[6] "(c) Disguised merchant ship attack by blocking channels, by mines, or by air or surface craft.

"(d) Air raids carrier based.

"(e) Surface ship raids.

"(f) Major combined attack in the absence of the U. S. Fleet."

* * * * *

"Basis for Planning.

"Missions and Conditions.

"(a) All defense plans of Oahu will be based upon the following conditions:

"The currently assigned category of defense will be Category D.

"The defense of Oahu will be joint defense by Army and Navy forces under the missions as stated in Joint Army and Navy Basic War Plan Orange.

"(b) Possible and Probable War Situations are:

"(1) That sea lanes from continental United States to Hawaii are open and that the garrison of Hawaii will be reinforced from continental United States.

"(2) That the most probable form of attack is a surprise attack consisting of raids, and bombardments by ships' fire and air forces, and action by local sympathizers.

"(3) That the sea lanes from continental United States will be closed and that there may be an attack by a major expeditionary force. From the War Departments point of view, this contingency is so remote that it will [7]

3166 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

make no additional allowances of either men or reserves to meet it. This is commonly referred to as the 'cut-off from the Mainland situation'.

"(4) The latter contingency forms the basis for our training, as being all inclusive and providing maximum reality for the troops during their training.

"(c) *Conclusion.*

"To adopt a defense plan adequate initially, to meet an enemy's maximum effort."

ALERTS

1. Following is the chronological record of alerts held by the Army, sometimes in conjunction with the Navy, since July 17, 1940. (Some entries included to indicate awareness of situation.)

June 17, 1940

Radiogram War Department to C. G., Hawaiian Department. "Immediately alert complete defensive organization to deal with trans-Pacific raid to greatest extent possible without creating public hysteria or projecting undue curiosity of newspapers or alien agents. Suggest maneuver basis. Maintain alert until further orders. Instructions for secret communication direct with Chief of Staff will be furnished you shortly. Acknowledge."

June 17, 1940

Radiogram from C. G., Hawaiian Department to War Department answering the above:

"All antiaircraft observation and security detachments in position with live ammunition and orders to fire on foreign planes over restricted areas and in defense of any essential installations. No excitement. Navy in-shore and off-shore patrols in operation."

June 24, 1940

[8] Letter General Herron to Chief of Staff: (Reference to alert ordered above)

"I have just come in from seeing the dawn patrols take the air and the anti-aircraft standing to their guns at dawn . . . I have been gratified by the precision with which the planes get off each morning at 4:30 a. m. . . ."

June 27, 1940

Letter prepared from Chief of Staff to General Herron, but not sent on account of secrecy. Explain reasons for the above alert, which were:

"Briefly, the combination of information from a number of sources lead to the deduction that recent Japanese-Russian agreement to compose their differences in the Far East was arrived at and so timed as to permit Japan to undertake a trans-Pacific Raid against Oahu following the departure of the United States fleet from Hawaii. . . ."

"Whether the information or discussions were correct, I cannot say. Even if they were, the precautions you have taken may keep us from knowing they were by discouraging any overt act."

"In any event, it would have been foolhardy not to take special precautions. The world is so troubled and changing so rapidly that I think it wise for you to keep the command definitely on its toes until I give you the all clear signal."

July 16, 1940

Radiogram from Chief of Staff to C. G., Hawaiian Department: (Gives authority to relax alert)

"You are authorized at your discretion, to relax alert provisions except that first, precautions against sabotage will be continued on the basis of instant readiness; second, aerial patrol measures can be reduced to a training status, but so arranged as to be reestablished on an alert basis on short notice."

August 28, 1940

Letter Chief of Staff to General Herron, asking reactions as to continued alert:

[9] "As to the alert, I want your frank reaction. Is it imposing too heavy

a tax to continue on the present basis . . . ? It is a very difficult business and I am deeply concerned that we do not exhaust the morale of the command by heavy requirements during what is supposed to be a period of peace, yet a failure would be catastrophic."

September 6, 1940

Reply to General Herron reference burden imposed by alert. "My absolute frank and honest opinion is that the alert as now carried on here does not dull the keen edge, or exhaust morale. I think that our real power accumulates and that the maneuvers being held will build up materially and easily the effectiveness of the alert."

"The presence of the fleet here and its frequent putting to sea with absolute secret destinations and periods naturally eases the situation very much."

July 7, 1941

Radio sent to C. G., Hawaiian Department:

"For your information deduction from important information from numerous sources is that the Japanese government has determined upon its future policy and is supported by all principal Japanese political and military groups. This policy is at present one of watchful waiting involving probably aggressive action against the military provinces of Russia if and when the Siberian garrison has been materially reduced in strength and it becomes evident that Germany will win a decisive victory in European Russia. Opinion is that Jap activity in the south will be for the present confined to seizure and development of naval, Army, and air bases in Indo-China, although an advance against the British and Dutch cannot be entirely ruled out. The neutrality pact with Russia may be abrogated. They have ordered all Jap vessels in United States Atlantic ports to be west of the Panama Canal by first of August. Movement of Jap shipping from Japan has been suspended and additional merchant vessels are being requisitioned."

July 25, 1941

Joint dispatch sent by Chief of Staff and Chief of [10] Naval Operations by naval radio:

"Appropriate addresses please deliver copies to Commanding Generals of Philippines, Hawaiian, and Caribbean Defense Commands and also to General Chaney in London. You are herewith advised that on July 26 the United States will impose economic sanctions against Japan. It is expected that these sanctions will embargo all trade between Japan and the United States subject to modification through the medium of a licensing system for certain matériel. . . . Japanese funds and assets in the United States will be frozen except that they may be moved if licenses are granted for such movement. It is not expected that Japanese merchant ships in ports of the United States will be shifted at this time. United States flag merchant ships will not at present be ordered to depart from or not to enter ports controlled by the Japanese. Chief of Naval Operations and the Army Chief of Staff do not anticipate immediate hostile reaction by Japanese through the use of military means but, you are furnished this information in order that you may take appropriate precautionary measures against any possible eventualities. Action is being initiated by the United States Army to call the Philippine Army into active service at an early date. Except from immediate Army and Navy subordinates, the contents of this dispatch are to be kept secret."

October 18, 1941

Radiogram sent by War Department to C. G., Hawaiian Department: "Following War Department estimate of Japanese situation for your information. Tension between the United States and Japan remain strained but no abrupt change in Japanese foreign policy appears imminent."

November 24, 1941

Radiogram from Chief of Naval Operations to Commander-in-Chief, Pacific Fleet: "There are very doubtful chances of a favorable outcome of negotiations with Japan. This situation, coupled with statements of Nippon Government and movements of their naval and military forces indicate in our opinion that a

3168 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

surprise aggressive movement in any direction including an attack on the Philippines or Guam is a possibility. The Chief of Staff has [11] seen this dispatch and concurs and requests action addresses (CINCAF, CINCAP, COMS 11, 12, 13, 15) inform senior Army officers their respective areas. Utmost secrecy is necessary in order not to complicate an already tense situation or precipitate Jap action. Guam will be informed in a separate dispatch."

November 26, 1941

Extract of secret cablegram sent to C. G., Hawaiian Department: "It is desired following instructions be given pilots of two B-24's on special photo mission. Photograph Jaluit Island in the Caroline Group while simultaneously making visual reconnaissance. Information is desired as to location and number of guns, aircraft, airfields, barracks, camps, and naval vessels including submarines X X X before they depart Honolulu insure that both B-24's are fully supplied with ammunition for guns."

November 27, 1941

Secret first priority message to C. G., Hawaiian Department: "Negotiations with Japanese appear to be terminated to all practical purposes with only the barest possibilities that the Japanese Government might come back and offer to continue. Japanese future action unpredictable but hostile action possible at any moment. If hostilities can not, repeat can not, be avoided, the United States desires that Japan commit the first overt act. This policy should not, repeat not, be construed as restricting you to a course of action that might jeopardize your defense. Prior to hostile Japanese action, you are directed to undertake such reconnaissance and other measures as you deem necessary but these measures should be carried out so as not, repeat not, to alarm the civil population or disclose intent. Report measures taken. Should hostilities occur, you will carry out the tasks assigned in Rainbow 5 as far as they pertain to Japan. Limit dissemination of this highly secret information to minimum essential officers."

November 28, 1941

Radlogram C. G., Hawaiian Department to Chief of Staff: "Report department alerted to prevent sabotage. Liaison with Navy reurad 472, the 27th."

[12]

December 7, 1941

Radio to C. G., Hawaiian Department, from Chief of Staff (left Message Center at 12:17 P. M.): "Japanese are presenting at 1:00 P. M., Eastern Standard Time, today what amounts to an ultimatum also they are under orders to destroy their code machine immediately. Just what significance the hour set may have we do not know but be on alert accordingly. Inform Naval authorities of this communication."

Means Provided for Defense

1. Troops.

Units with strength thereof actually present in the Hawaiian Department on December 7, 1941, are shown in Tab "A".

2. Airplanes.

See Tab "B".

3. Antiaircraft Materiel.

The status of antiaircraft materiel in Hawaiian Department on December 7, 1941, was as shown in Tab "C". Existing shortages had not been met because of nonavailability of equipment.

4. Seacoast Defense.

See Tab "D".

5. Aircraft Warning Service.

(a) The approved project provides for 6 mobile detector sets and 6 fixed sets to be located as shown on the attached map. All of these sets have a rated range of 120 miles, but under favorable conditions efficient service has been obtained in excess of the rated range.

(b) The six (6) mobile sets and three (3) fixed sets were on hand in the Hawaiian Department December 7, 1941. The remaining three fixed sets had not been shipped from the mainland.

(c) The three (3) fixed sets on hand were scheduled for installation at the sites given below. Construction had started, but had not been completed.

Mt. Kaala, Oahu
Kokee, Kauai
Haleakala, Maui

[13] (d) The six (6) mobile sets were scheduled for the locations shown on the attached map. Their actual location on December 7, 1941, is not known to the War Department.

6. Considered broadly, defense projects which have been under construction for some time and for which funds have been provided are as follows:

Bunkers for dispersed airplanes
Development of airfields
Bombproofing of vital installations
Bombproof ammunition storage
Command and Fire Control Cable System
Storage for gasoline and oil defense reserves (Splinter-proof)
Military roads, trails and railroads
Modernization of seacoast artillery
8" Railway battery positions

7. All reasonable requests by the Commanding General, Hawaiian Department for funds and the supply of equipment & materiel have been met within the means available.

ARMY PEARL HARBOR BOARD EXHIBIT No. 64

JOHN WEINER, Investigator for House Military Affairs Committee.

It was expected that at the February 15 hearings of the Committee there would be testimony indicating that during the Spring of 1942 in Hawaii Colonel

Wyman and three other Army officers participated in an evening of drinking in a hotel barroom. Wyman became quite intoxicated and stated:

"There are probably a good many things which I have done during my life that are not exactly right, but there is one thing I have not done and that is to sell out my country the way that s. o. b. Rohl did to his German friends. I should never have trusted him and what I should do now is take this service revolver, go out and shoot him and then blow my own brains out."

It is said that Weiner has an affidavit from a Capt. Guiter who was attached to the General Staff at Washington in July 1943 embodying Wyman's remarks.

The day after the carousal Capt. Guiter and the other officers reported the incident to the G-2 office at Honolulu. Nothing was heard for about six weeks when the officers were called in and statements taken. Nothing further was heard of it.

Subject: Orders.

To: Each officer named.

1. Pursuant to the provisions of Public Law 339, 78th Congress, approved 13 June 1944, a Board of officers is hereby appointed to ascertain and report the facts relating to the attack made by Japanese armed forces upon the Territory of Hawaii on 7 December 1941, and to make such recommendations as it may deem proper, as follows:

<i>Name</i>	<i>Station</i>
Lt. Gen. George Grunert, O1534, USA. President.	Hq, 2d Service Command, Governors Island, New York.
Maj. Gen. Henry D. Russell, O212769, USA. Member.	WD Manpower Board, V Section, Columbus, Ohio.
Maj. Gen. Walter H. Frank, O2871, USA. Member.	4001st AAF Base Unit, Patterson Field, Ohio.
Col. Charles W. West, O12774, JAGD.	USMA, West Point, N. Y.

Recorded, without vote.

2. Such military and civilian personnel may be assigned to assist the Board as the Board shall request.

3. The Board will convene at Washington, D. C., at the call of the senior member and will hold sessions at such time or times and at such place or places as it may deem advisable. The Board is empowered to prescribe its own procedure and is authorized to employ a civilian reporter or reporters.

4. The members of the Board assigned to command positions will retain command while performing duties with the Board.

5. During the period of operations of the Board, approximately sixty (60) days, the members are authorized to perform such travel, including repeated travel, within the continental United States as may be directed by the President of the Board. For travel outside the continental United States, the President of the Board will request The Adjutant General to issue such orders as may be required.

6. Military and civilian personnel will render the Board all necessary information and assistance.

7. Travel directed is necessary in the military service. 501-1 P 432-02, 03, 212/50425. The provisions of War Department Circular No. 60, cs, and War Department Circular No. 260, cs, apply.

ROBERT P. PATTERSON,
Acting Secretary of War.

ARMY PEARL HARBOR BOARD EXHIBIT No. 70

[1] OFFICE MEMORANDUM—UNITED STATES GOVERNMENT

Date: AUGUST 25, 1944.

To: Lieutenant General George Grunert, U. S. Army.
President, Army Pearl Harbor Board, Munitions Building, Washington, D. C.

From: John Edgar Hoover, Director, Federal Bureau of Investigation.

Subject: Confidential—By Special Messenger.

I will take this means of replying to your letter of August 21, 1944, in which you request a review of the files of this Bureau for the purpose of furnishing to you a résumé of the activities of the Federal Bureau of Investigation in Hawaii immediately prior to December 7, 1941. It should be pointed out at the outset that it was the policy of this Bureau to make available to the War and Navy Departments all information in its possession bearing upon matters within the jurisdiction of the War and Navy Departments or reflecting upon the internal security of Hawaii. It can be safely stated that any information the FBI possessed in these categories was furnished to the War and Navy Departments.

JURISDICTION

On June 26, 1939, the President of the United States issued a confidential directive to the heads of the various Government departments which stated in part as follows:

"It is my desire that the investigation of all espionage, counterespionage and sabotage matters be controlled and handled by the Federal Bureau of Investigation of the Department of Justice, the Military Intelligence Division of the War Department and the Office of Naval Intelligence of the Navy Department. The directors of these three agencies are to function as a committee to coordinate their activities. No investigations should be conducted by any investigative agency of the Government into matters involving actually or potentially any espionage, counterespionage or sabotage except by the three agencies mentioned above."

As a result of this Presidential directive, the directors of the three agencies named by the President in order to coordinate their respective activities subscribed to a "delimitation of jurisdiction agreement". The original agreement was dated June 5, 1940, and was subsequently revised and reissued on February 9, 1942. The agreement of June 5, 1940, which was, of course, in effect on December 7, 1941, is quoted as follows:

"I. It is agreed that in conformity with the directive contained in the President's memorandum of June 26, 1939, as augmented by his directive of September 6, 1939, responsibility for investigation of all espionage, counterespionage, sabotage and subversive activities will be delimited as indicated hereafter. Responsibility assumed by one organization in a given field carries with it the obligation to provide a pool of all information received in that field but it does not imply the responsible agency alone is interested in or will work alone in that field. Close cooperation between the three agencies in all fields is a mutually recognized necessity.

[2] "II. FBI will assume responsibility for all investigations of cases in these categories involving civilians in the United States and in its territories with the exception of the Panama Canal Zone, Guam, Samoa and the Philippine Islands.

"FBI will keep MID and ONI informed of important developments such as—

"(a) Developments affecting plants engaged on Army or Navy contracts.

"(b) Developments affecting vital utilities.

"(c) Developments affecting critical points of transportation or communication systems.

"(d) Cases of actual or strongly presumptive espionage or sabotage, including the names of individuals definitely known to be connected with subversive activities.

"FBI will act as the coordinating head of all civilian organizations furnishing information relating to subversive movements.

"III. FBI will assume responsibility for investigation of all cases in these categories directed from foreign countries on those occasions and in those situations in which the State, War or Navy Departments specifically request investigation of a designated group or set of circumstances.

"FBI to keep MID and ONI informed of important developments.

"IV. MID will assume responsibility for investigation and disposal of all cases in these categories in the Military Establishments, including civilians employed on military reservations or under military control. It will also assume responsibility for the investigation of cases in these categories involving civilians in the Canal Zone, the Republic of Panama and the Philippine Islands.

"MID will inform FBI and ONI of important developments.

"V. ONI will assume responsibility for investigation and disposal of all cases in these categories in the Naval Establishment, including civilians under naval employ or control and all civilians in Guam and American Samoa.

"ONI to inform FBI and MID of important developments.

[3] "VI. FBI will assume responsibility for ascertaining the location, leadership, strength and organization of all civilian groups designated to combat 'Fifth Column' activities (overt acts of all sorts in cooperation with the armed forces of an enemy). FBI will transmit to MID, ONI and the State Department information concerning these organizations and any information received concerning their possession of arms."

On May 15, 1941, Brigadier General Sherman Miles of G-2, Captain Alan G. Kirk, Director of the Office of Naval Intelligence and myself affixed our signatures to a memorandum entitled "Definition of Jurisdiction". This memorandum, in part, is as follows:

"Acting under the authority of a Presidential directive issued on June 26, 1939, the Federal Bureau of Investigation, the Military Intelligence and the Division of Naval Intelligence have worked closely together in establishing and maintaining a complete coverage of the field of espionage, sabotage, counterespionage, subversive activities and violations of the Neutrality Act. The Military Intelligence Division exercises investigational jurisdiction in this field in matters relating to enlisted and civilian personnel of the War Department and in cases arising on military reservations and complete investigational jurisdiction in the Panama Canal Zone. Naval Intelligence assumes the responsibility for carrying out the investigative operations in all cases involving officers and enlisted men of the Navy, Naval Reserve, Marine Corps, Marine Corps Reserve, and the civilian personnel under the employ or control of the Naval Establishment and the outlying islands of the Fourteenth Naval District, such as Palmyra, Johnston and Wake, and civilian jurisdiction in the Alaskan Peninsula, Aleutian Islands and the Pribilof Islands. The Federal Bureau of Investigation assumes the primary responsibility for all cases within the United States, Puerto Rico, Hawaiian Islands, Virgin Islands and Alaska, not specifically involving personnel of the War and Navy Departments. Naval Intelligence and the Federal Bureau of Investigation exercise joint coverage in the handling of Japanese counterespionage."

In furtherance of the statement contained in this memorandum that Naval Intelligence and the Federal Bureau of Investigation exercised joint coverage in the handling of Japanese espionage, the minutes of a conference between representatives of the War, Justice, Treasury and Navy Departments on April 2, 1941, as furnished to the Federal Bureau of Investigation by Captain A. G. Kirk, Director of Naval Intelligence, on April 7, 1941, reflect that "it was reaffirmed that the FBI and ONI would carry out as promptly as possible the steps presently being taken to insure complete coverage of the alternate Japanese system".

[4] In further clarification of the jurisdiction in Hawaii with respect to Japanese matters, permit me to quote in full a memorandum addressed to me by Assistant Director Hugh H. Clegg of the Federal Bureau of Investigation dated July 19, 1940.

"I talked today with Captain Nixon and Captain Phillips, who, it is understood, will later succeed Captain Nixon when he goes to sea, both of ONI. We discussed the handling of Japanese espionage matters and the counterespionage work which should be undertaken. Both Nixon and Phillips indicated they had for years been

focusing their attention on the Japanese problem, since Japan for a number of years appeared the most likely enemy. A war with Japan would be quite largely a Naval problem. Naturally, they were concerned.

"They have developed a number of informants. They have quite a large volume of information. It appears that Anderson has recently told Nixon to send their information to the FBI. At least, he asked if this had been done. Nixon has informed him that it had not. They pointed out the problems involved and the contacts that had already been established. This at least has delayed the information already in the Navy Department's files being sent to the Bureau. Nixon pointed out the difficulties in getting Japanese translators; he pointed out the handicaps under which the Bureau will be working without the vast amount of background knowledge, a great deal of which has not been placed in writing, and the difficulties involved in assimilating the store of information which is a matter of record in the Navy Department. He pointed also to the large increase in work of the Bureau in proportion to the increase in Special Agents.

"I pointed out the difficulties involved, since we were contacting transportation companies, including railroads and airplane travel companies, and finding that they had similar contacts which they had not canceled, and that it would obviously be irritating to various contacts to have to report to two or several governmental agencies; that I felt definitely there should be an understanding in the fixing of responsibility instead of leaving it in a nebulous state as at present. Nixon stated that at present, under the agreement, the work belonged to the FBI except where the Naval establishments were directly affected, but it could be told that Nixon personally and, I believe, Phillips, were desirous of retaining a large share of jurisdiction over Japanese espionage.

"They stated they would join in a recommendation as follows:

[5] "(1) The full responsibility for all intelligence work relating to Japan and Japanese in the United States and in the Territory of Hawaii would be assumed by ONI.

"(2) In the event any case investigated by them reached a point where they believed prosecution was desirable, they would submit all facts and information to the FBI with the request that the information be examined and such investigations as were necessary from a standpoint of getting legal evidence be conducted by the FBI with a view of presenting the facts to the U. S. Attorney for prosecution; that such investigations conducted by the FBI would be made only in cases wherein prosecution was desired and upon the specific request of ONI.

"(3) Any information in possession of the FBI or which the FBI receives in the future concerning Japanese or intelligence work relating to Japan or Japanese would be transmitted to ONI; all information presently in the possession of ONI, with the exception of the names of certain confidential informants of ONI, will be furnished to the FBI; and in the future, information in these categories as it is received will be furnished by ONI to the FBI. The purpose of the FBI receiving any of this information would be, not for investigative purposes, but so that the Bureau's files may be completed and the information assimilated so that if, in the future, a time comes when the FBI is to assume jurisdiction over such matters, the proper background and available records would be on hand.

"The above enumerates the gist of the attitude of Captain Nixon and Captain Phillips. They were personally entirely agreeable to it. It was obvious that they could not speak for Admiral Anderson and had no authority to commit ONI to this program."

In a conference in Washington, D. C., in July of 1941, I informed Special Agent in Charge R. L. Shivers of the Honolulu Office that I had advised Admiral Walter Anderson, Director of the Office of Naval Intelligence, and Colonel McCabe, Director of the Military Intelligence Division, that I would not assume the full responsibility for investigation of matters pertaining to Japanese espionage because the Federal Bureau of Investigation was not prepared to take over the full responsibility. I acquainted Mr. Shivers with the fact that I had informed Admiral Anderson and Colonel McCabe that the Naval Intelligence would have to assume and continue primary responsibility for Japanese espionage investigations until the Federal Bureau of Investigation could prepare to take over that phase of the work in full. I also informed Special Agent in Charge Shivers that the Office of Naval Intelligence had specialized in Japanese espionage for many years; that the FBI knew nothing of Japanese espionage and Japanese [6] intelligence matters prior to 1939; that it was not equipped with translators, interpreters and informants and could not undertake the full responsibility for Japanese espionage until it had been able to equip itself to do so. Admiral Walter Anderson also informed Special Agent in Charge Shivers of the Honolulu Office of

substantially the same facts on the battleship West Virginia at Honolulu soon after he took command of the battle force at Pearl Harbor, which was some time previous to July of 1941.

Further evidence of the fact that the Federal Bureau of Investigation did not assume sole and primary responsibility for Japanese espionage activity in the United States and its territories, including the Hawaiian Islands, and did not consider itself so responsible, is to be found in a letter dated December 14, 1940, addressed to the Special Agent in Charge at Honolulu, Hawaii, by me which letter was written in response to an inquiry made of me by the Special Agent in Charge concerning the division of investigative jurisdiction of Japanese matters in Hawaii between the Office of Naval Intelligence and the Federal Bureau of Investigation.

This letter, in part, states: "Further, the Bureau does not consider it advisable or desirable at this particular time for your office to assume the responsibility for the supervision of all Japanese espionage investigations in the Territory of Hawaii."

In another letter dated June 24, 1941, addressed to the Special Agent in Charge of the Honolulu Office, the subject of jurisdiction in Japanese espionage cases was further discussed, and he was further informed: "The Bureau is not yet prepared to handle the investigation of Japanese activity exclusively on the mainland, and consequently the Bureau cannot authorize the assumption by your office of exclusive jurisdiction in matters relating to Japanese activities in the Hawaiian Islands."

The delimitation agreement which gave the Office of Naval Intelligence equal and concurrent jurisdiction with the Federal Bureau of Investigation in investigations involving Japanese intelligence was known to the Office of Naval Intelligence and the Office of Military Intelligence in Honolulu. The Special Agent in Charge at Honolulu has discussed the delimitation agreement with Captain I. H. Mayfield, District Intelligence Officer of the Fourteenth Naval District, Lieutenant Colonel Morrill W. Marston, Colonel Kendall J. Fielder, and Lieutenant Colonel George W. Bicknell, all of whom have been associated with the Office of Military Intelligence since the Federal Bureau of Investigation opened an office there in August, 1939. The Special Agent in Charge informed all of these officers that the Federal Bureau of Investigation was not equipped to take over the exclusive investigation of Japanese espionage matters because of a lack of translators, language students and informants among the Japanese populace. The Special Agent in Charge further informed these gentlemen that the Office of Naval Intelligence had agreed to carry on the Japanese work primarily until such time as the Federal Bureau of Investigation was able to take it over.

[7] These conversations have taken place from time to time at the Weekly Intelligence Conferences which the Special Agent in Charge of the Federal Bureau of Investigation at Honolulu and the above named individuals held.

I am attaching for your information a copy of the delimitation agreement which was finally drafted to incorporate all existing memoranda and understandings. You will note that on page four under the caption "ONI will be responsible for:" is the provision "2. Jointly with FBI, the coverage of Japanese activities in the categories enumerated in Paragraph I." (i. e. espionage, counterespionage, subversion and sabotage) Likewise, under the caption "FBI will be responsible for:" you will notice that paragraph four provides "Jointly with ONI, the coverage of Japanese activities in these categories. ONI will continue its coverage of Japanese activities as heretofore and FBI will continue to expand its operations in this field." It appears evident from the last quoted sentence that the Office of Naval Intelligence was clearly recognized as having the primary responsibility for Japanese coverage even as of February 9, 1942.

Following the Presidential directive referred to previously, weekly conferences were held at Hawaii between the Special Agent in Charge of the Honolulu Field Office of this Bureau and the officers in charge of the local offices of G-2 and ONI. These conferences, which were quite informal, offered an excellent medium of coordination, and it was the practice of those present to freely discuss all recent developments regardless of whether the matter under discussion might be strictly within the investigative jurisdiction of any particular agency present. In this regard, it should be noted that daily liaison was maintained, particularly with Colonel George W. Bicknell whose offices were located immediately adjacent to the offices occupied by the Federal Bureau of Investigation. Special Agent in Charge Shivers and Colonel Bicknell were on intimate personal terms and their contacts throughout the day were frequent. It was in accordance with my instructions that all reports of an intelligence nature with respect to Hawaii were furnished

to appropriate representatives of the War Department, both at Washington, D. C. and Honolulu. Four times yearly a review was made of all intelligence activities and trends entitled "Quarterly Intelligence Summary". This was likewise furnished to the War Department at Washington, D. C. The last such report furnished immediately prior to December 7, 1941, was one dated November 15, 1941. I am attaching hereto for your information a copy of a portion of that report (pages 928-942) which I think is pertinent to the matter under consideration.

HONOLULU FIELD OFFICE

The Honolulu Field Division of the Federal Bureau of Investigation was originally opened in April of 1931. This office was closed in May of 1934, and was again reopened in August of 1937. The office was again closed April 30, 1938, due to the insufficiency of funds to continue its operation.

[8] Up to this time, the personnel of the Honolulu Office consisted merely of the Agent in Charge and one stenographer. The office was reopened again with Mr. R. L. Shivers as Special Agent in Charge in August of 1939. After this office was opened, three Agents, including Mr. Shivers, and one stenographer were assigned to this Field Division, this force being shortly thereafter augmented with the addition of two stenographers.

In June of 1940, six additional Agents and two additional stenographers were assigned to the Honolulu Office, making a total Agent force of nine, and a stenographic force of five. One Agent was designated as Resident Agent at Hilo, Hawaii. The force was steadily increased so that in June of 1941 the investigative personnel including the Agent in Charge, numbered fourteen.

On December 7, 1941, there was a total of sixteen Special Agents, including the Agent in Charge, and nine clerical employees assigned to the office.

JAPANESE CONSULAR AGENTS

As a result of a survey conducted by the Honolulu Field Office, the results of which were, of course, made available to the War and Navy Departments, both at Hawaii and in Washington, it was ascertained that there were over 200 Japanese Consular Agents present in the Hawaiian Islands at one time, the number of which varied greatly due to immigration, appointments, resignations and deaths. The activities of the Japanese Consular Agents in the Hawaiian Islands were the subject of considerable concern to the Federal Bureau of Investigation, and the Special Agent in Charge of the Honolulu Field Division submitted the following letter dated September 3, 1940:

"There is being transmitted herewith a list of Japanese acting as consular agents within the Territory of Hawaii for the local Japanese Consul. It is observed in the Act governing the registration of agents of foreign principals and of foreign governments that these are exempted from its provisions—

'... any member of the staff of or person employed by a duly accredited diplomatic or consular officer of a foreign government who is so recognized by the Department of State of the United States, other than a public relations counsel or publicity agent, whose status and the character of whose duties as such member or employee are of record in the Department of State of the United States.'

"It is requested that it be ascertained of the Department of State whether or not the names, status, and character of duties of the aforementioned consular agents are of record in the Department of State. If not, it is desired to know whether such consular agents can be considered to fall within the scope of the Act. If it is determined that [9] "these consular agents are not subject to the provisions of the Registration Act, as such, would their status be changed in any respect so that they would come within the purview of this Act, provided they are engaged in disseminating propaganda for the Japanese Consul or the Japanese Government?

"It has been learned from a confidential source that one of the consular agents telephoned to the Japanese Consulate in Honolulu and asked a representative of the Consulate if he should register under the terms of the Allen Registration Act. The member of the Consulate staff advised the Consular agent that he was not subject to the terms of this act and should not register because he was a diplomatic officer under the jurisdiction of the Japanese Foreign Office.

"These consular agents are scattered throughout the Hawaiian Islands and the Bureau can readily see that they constitute a source of information over wide

areas, which if used for espionage purposes would be in a position to furnish the consulate invaluable information on fleet movements, army posts, and all general information that would be of value to the Japanese Government.

"In the event it is determined that any or all of these consular agents are subject to the provisions of the Registration Act, this office desires to conduct an immediate investigation for the purpose of ascertaining their activities looking toward a prosecution of those consular agents who have violated the terms of the Registration Act by not having registered as prescribed.

"While this office is not aware of the full extent of the duties of the consular agents, it is believed that they are required to look after the interests of the Japanese populace in their respective communities, to keep alive the Japanese spirit, and to do the bidding of the Japanese consulate. They are undoubtedly looked upon by the Japanese populace as representatives of the Japanese consulate and the Japanese Government and the Emperor of Japan and for that reason wield considerable influence in determining the actions and molding the thought of the Japanese populace in Hawaii, especially among the alien element."

This matter was taken up with the State Department which advised that none of these consuls were notified pursuant to Section 233, Title 22, United States Code, which requires all agents of foreign governments to be notified to the Secretary of State. A letter was addressed to Honorable Adolf A. Berle, Jr., Assistant Secretary of State, dated September 28, 1940, which read as follows:

[10] There is enclosed a list of Japanese acting as consular agents in the Territory of Hawaii for the Japanese Consul at Honolulu.

"Will you please inform me whether the names, status, and character of the duties of these individuals as consular agents, are of record in your department.

"Can you also advise me whether these consular agents come within the purview of the Registration Act. If it is your opinion that they do not come within the purview of this act, would their status be changed in any respect if they are engaged in the dissemination of propaganda for the Japanese Consul or the Japanese Government?

"Since these individuals may come to the attention of the Honolulu Field Division of this Bureau from time to time, and that Division may desire to conduct some investigation into their activities, will you also please advise me whether these individuals are subject to diplomatic immunity?"

Under date of October 14, 1940, this Bureau received a letter from Assistant Secretary of State Adolf A. Berle, Jr., which read as follows:

"I acknowledge the receipt of your letter of September 28, 1940 enclosing a list of Japanese acting as consular agents in the Territory of Hawaii for the Japanese Consul at Honolulu.

"In reply to your inquiry, I have to inform you that none of the individuals named is on record in the Department of State as a member of the diplomatic or consular service of a foreign government, nor is any of them registered with the Secretary of State pursuant to the provisions of the Act of June 8, 1938, as amended, requiring the registration of agents of foreign principals.

"If the individuals named are agents of, receive compensation from, or are under the direction of the Japanese Consul, the Japanese Government, or any other foreign principal as that term is defined in the first section of the Act of June 8, 1938, as amended, and are engaged in activities not within the exceptions to the provisions of the Act, they would be considered subject to the requirement of registration.

"The individuals named are not considered entitled to diplomatic immunity, and the Department has no objection to such investigation of their activities as the Federal Bureau of Investigation may desire to make."

[11] After the above fact had been determined with regard to a number of these consular agents, and it was felt that all Consular agents were acting in similar capacities, the matter of prosecution of them was presented to the Criminal Division of the Department of Justice, first in the case of Yoshio Koike on March 31, 1941. This memorandum is as follows:

"I am in receipt of information from the Honolulu Field Division that it is in possession of a certificate of appointment of Yoshio Koike as a Consular Agent in January of 1936. This individual is not now acting in that capacity.

3182 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

"There is enclosed a photostatic copy of this certificate. A free translation of this certificate is as follows:

THE JAPANESE CONSUL GENERAL AT HONOLULU

YOSHIO KOIKE is authorized to be an agent to receive the various requests and applications of the residents of the Onomea District for the next two years.

JANUARY, 1938.

Imperial Consul General at Honolulu

The seal is said to be that of the Japanese Consul General at Honolulu.

"The Honolulu Office believes that all Consular Agents in Hawaii and the mainland of the United States have similar certificates. These Consular Agents are required to follow certain set of rules which are as follows:

1. Notice to Agents:

Term of office is two years, starting in January 1938 and ending December, 1939.

2. Any change of residence or leave for Japan:

The Consulate is to be immediately notified. For failure to do so the appointment will be revoked and another appointed.

3. The scope of the agent's activities is restricted to his residential district and if any agent changes his residence to another district the appointment will be revoked.

4. The agent will cooperate.'

[12] "It is the understanding of the Honolulu Field Division that these Agents are not paid any salary by the Japanese Government but are remunerated by fees charged the person requiring their services.

"I am advised by a representative of the State Department that Yoshio Koike was not notified to the Secretary of State as a Consular Agent or as an agent of Japan at the time he was issued this certificate.

"Since it appears that many of these Japanese Consular Agents may not be notified to the Secretary of State, is it your opinion that these individuals who occupy a position similar to that occupied by Yoshio Koike and engaged in the same activities are violating Section 233, Title 22, U. S. Code, requiring agents of foreign governments to be notified to the Secretary of State? Or do these individuals come within the exception to this statute which states that diplomatic or Consular officers or attaches do not have to be notified? If these individuals do not have to be notified under Section 233, Title 22, U. S. Code, do they have to register as agents of foreign principals under Section 233 a to g, Title 22, U. S. Code, requiring agents of foreign principals to be registered with the Secretary of State? It would appear that they do not come within the exceptions of this statute which state that the term 'agent of a foreign principal' does not mean:

'(1) A duly accredited diplomatic or Consular officer of a foreign government who is so recognized by the Department of State of the United States; or

'(2) Any official of a foreign government recognized by the United States as a government, other than a public relations counsel or publicity agent, or a citizen of the United States whose status and the character of whose duties as such official are of record in the Department of State of the United States.'

"This is particularly true since the State Department advises that Yoshio Koike was never notified to the Secretary of State as an agent of Japan, or as a Consular Agent."

The Consular Agents' cases were again presented to the Criminal Division of the Department of Justice on April 7, 1941, in the case Itsuo Hamada in the following memorandum:

"There is enclosed a copy of the report of Special Agent F. G. Tillman, Honolulu, T. H., dated March 10, 1941.

[13] "I am informed by the Honolulu Field Division that there are approximately 234 individuals in Honolulu who are acting as Consular Agents in a capacity similar to that of Itsuo Hamada. Will you please advise me whether the information as developed with regard to Itsuo Hamada will justify the prosecution of this individual for violation of Section 233, Title 22, U. S. Code, requiring agents of foreign Governments to be notified to the Secretary of State, or if his activities are such as will justify prosecution of this individual for violation of Section 233 a to g, Title 22, U. S. Code, requiring agents of foreign principals to be registered with the Secretary of State.

"A prompt reply to this memorandum will be appreciated inasmuch as it will serve to determine what investigation should be made in the cases of the other 234 Consular Agents in the Hawaiian Islands."

The reports concerning the activities of Itsuo Hamada and Yoshio Koike, as well as the reports concerning the activities of their fellow consuls, were made available to the War Department in Hawaii and the Criminal Division of the Department of Justice.

On June 2, 1941, the Federal Bureau of Investigation received the following radiogram from the Honolulu Field Division:

"JAPANESE CONSULAR AGENTS TERRITORY OF HAWAII. DEPARTMENT HAS REQUESTED OPINION OF U. S. D. A. HERE REGARDING PROSECUTION UNDER REGISTRATION ACT OF TWO HUNDRED THIRTY FOUR CONSULAR AGENTS. U. S. D. A. WIRED DEPARTMENT RECOMMENDING IMMEDIATE PROSECUTION AND ADVISING THAT THE DEPARTMENT COMMANDER OF THE U S ARMY HAWAIIAN ISLANDS WAS OPPOSED TO SUCH ACTION AT THIS TIME ON GROUNDS IT MIGHT RESULT IN UNFAVORABLE ACTION ON PART OF JAPANESE COMMUNITIES ALTHOUGH SUCH ACTION WOULD NOT INTERFERE WITH ANY PLANS OF THE HAWAIIAN DEPARTMENT FOR THE DEFENSE OF THE ISLANDS."

On June 23, 1941, the Bureau was advised by the Special Agent in Charge of the Honolulu Field Division in a letter as follows:

"Reference is made to the radiogram sent to the Bureau dated June 2, 1941, stating that the Attorney General's Office of the Department had requested an opinion from the United States Attorney at Honolulu regarding prosecution under the Registration Act of the 234 Japanese Consular Agents in Hawaii.

"As stated in the aforementioned wire, Mr. ANGUS M. TAYLOR, Jr., the Acting United States Attorney here, wired the Department recommending immediate prosecution but advised at the same time that Lieutenant General WALTER SHORT, Department Commander of the United States Army in Hawaii, was opposed to such action at this time on the grounds that it might react unfavorably on the Japanese community, although such action would not interfere with any plans of the Hawaiian Department for the defense of the islands.

[14] "The United States Attorney is in receipt of a further communication from the Department requesting to be advised if there has been any change in the opinion of General SHORT concerning this matter and requesting to be advised of the practical effect of his opposition.

"Acting U. S. Attorney ANGUS TAYLOR has informed me that he has communicated with General SHORT through Lieutenant Colonel H. W. MARSTON, who is in charge of the Military Intelligence Office for the Hawaiian Department, and has been informed that the General has not changed his opinion in this matter and will actively oppose the prosecution of these individuals by recommending to the War Department, if necessary, that the matter be taken up with the Attorney General with a view of preventing the arrest and prosecution of the Japanese Consular Agents at this time.

"As I understand it, the primary objective of General SHORT is that since the Registration Act has been in effect since September, 1939, he does not believe it would be considered fair play if the Government should at this time arrest the 234 Japanese Consular Agents who have been acting as such since the enactment of the law, and he feels that it would be regarded by the Japanese community as a hostile act designed to harass the Japanese aliens and American citizens of Japanese ancestry in the Hawaiian Islands.

"I am informed by the United States Attorney that he will present the opinion of General SHORT to the Department and will again reiterate his recommendation that the Department authorize prosecution against the Consular Agents."

On July 1, 1941, the following memorandum was sent to the Department of Justice by me:

"I am in receipt of a communication from the Special agent in Charge of the Honolulu Field Division in which he advises that although the Acting United States Attorney in Honolulu has approved the prosecution of the Japanese Consular Agents, Lieutenant General Walter Short, Department Commander of the United States Army in Hawaii, has opposed this action on the ground that it might react unfavorably on the Japanese community.

"I am informed that the primary objection of General Short is that since the Registration Act has been in effect since September, 1939, he does not believe it would be considered fair play if the Government should at this time arrest the 234 Japanese Consular Agents who have been acting as such since the enactment

of the law, and he feels that it would be regarded by the Japanese community as a hostile act designed to harass the Japanese aliens and American citizens of Japanese ancestry in the Hawaiian Islands.

[15] "This is furnished you for your information. Of course, the investigations to date have been based on the proposition that these individuals are acting as agents of a foreign government who have not been notified to the Secretary of State, which statute is Section 233, Title 22, U. S. Code, this statute being enacted in 1917."

On July 14, 1941, the Criminal Division of the Department of Justice, in response to inquiry previously made of it by the Federal Bureau of Investigation, advised as follows:

"Reference is made to your memorandum dated July 1, 1941, in the above entitled matter.

"For your information, the Department of State has advised the Department that these individuals are not considered to have the status of diplomatic or consular officers or attaches and the Department of State perceives no objection to the contemplated prosecution of these individuals for violation of Section 233 of Title 22 of the United States Code.

"Although the Criminal Division is now prepared to authorize the prosecution of certain of these Japanese Consular Agents, it seems that the objection of Lieutenant General Walter Short, Department Commander of the United States Army in Hawaii, must be given consideration. Accordingly, the Criminal Division has advised the Secretary of War of the facts and its recommendation that prosecution in a certain number of these cases be instituted without further delay."

On August 4, 1941, the Criminal Division of the Department of Justice forwarded copies of a letter dated July 25, 1941, with its enclosure from the Secretary of War concerning these Consular Agents. The Federal Bureau of Investigation was advised that the Criminal Division was not "prepared at this time to authorize the prosecution of these Agents, but still has the matter under consideration." The enclosures forwarded by the Criminal Division are as follows:

"Upon receipt of your letter of July 14, 1941, on the subject of the prosecution of certain unregistered Japanese Consular Agents in the Territory of Hawaii I dispatched a secret radiogram to the Commanding General, Hawaiian Department, directing him to radio his recommendations stating clearly his reasons and objections if any to the proposed prosecutions.

"A paraphrased copy of his reply is attached hereto.

"I concur in the statements and objections set forth by the Commanding General, Hawaiian Department, and strongly recommend that a warning be issued to these unregistered Japanese Consular Agents, through their accredited Consul General in Honolulu, to register by a certain date, say within a period of thirty days after promulgation of the warning, under penalty of prosecution for violation of our laws.

[16] "I believe that such a warning will effect the desired registration and contribute materially toward the Commanding General's campaign to secure the loyalty of the Japanese population of the Territory."

The paraphrased copy of the radiogram is as follows:

"Paraphrase of Code Radiogram
Received at the War Department
at 9:58, July 22, 1941

"Hawaii, filed July 21, 1941.

"We are at present engaged in a counter propaganda campaign whose object is to encourage loyalty of the Japanese population of Hawaii on promise of fair treatment. The present outlook of results of this campaign on entire population is very favorable. Success of the campaign would promote unity and greatly reduce proportions of our defense problem. Espionage Act of June 15, 1917 referred to in your radio of July 19, 1941 has been in effect here since August 1939 with no attempt at local enforcement. As result of careful survey of situation, considering available facts and opinions FBI and other Federal agencies I believe not over ten per cent of the unregistered consular agents in Hawaii are aware they have violated our laws. I believe further that prosecution at this time would unduly alarm entire population and jeopardize success our current campaign to secure loyalty Japanese population.

"In my opinion fair play demands that warning be given to consular agents to register by a certain date on penalty of prosecution. I believe development of loyalty among Japanese population more important than punishment of a few

individuals. It is impractical to place total Japanese population of one hundred sixty thousand in concentration camps."

"SHORT"

The Federal Bureau of Investigation, from April 7, 1941, by various memoranda had requested the Criminal Division for opinions as to prosecution with regard to various other consular agents. The Criminal Division was followed on numerous occasions in an attempt to prosecute these individuals without success, due primarily to the fact that the War Department had interposed objections to prosecution as set out above.

In August, 1941, the Criminal Division, in nearly all cases of this type, was asked to advise if it was its intention to institute prosecution of these various individuals, and in September replies were received from the Criminal Division that a decision as to the authorization of prosecution was still under consideration by the Department of Justice, the United States Attorney at Honolulu, and other interested agencies.

[17] From the very beginning of the investigation of these individuals of Japanese nationality, it was thought that they might be engaged in activities dangerous to the internal security of the island, for on one occasion, that of Reverend Unji Hirayama, Japanese Consular Agent on the Island of Maui, a confidential informant had advised that this individual had been requested by a member of the Japanese Consulate to keep this member of the Consulate informed as to the movements of the United States fleet in the vicinity of Maui. This information was from an unimpeachable source which could not be used in evidence.

On October 3, 1941, the Federal Bureau of Investigation directed a letter to the Special Agent in Charge of the Honolulu Field Division, advising him to conduct immediate, thorough investigations of all of the Japanese Consular agents in the Territory of Hawaii to determine if they were engaged in espionage, subversive, or propaganda activities in an effort to develop information of this character which would overcome the objections of the War Department to prosecution. On receipt of this letter, the Special Agent in Charge immediately assigned five Special Agents exclusively to the further investigation of these Japanese Consular agents for the purpose of carrying out the foregoing instructions. All reports submitted were furnished to ONI and G-2, both in Honolulu and Washington, D. C.

When the United States Attorney at Honolulu informed Special Agent in Charge R. L. Shivers, on or about June 20, 1941, that he had been instructed by the Department of Justice to furnish his opinion as to the prosecution of the Japanese Consular Agents, he conferred with the Special Agent in Charge, who furnished him with the facts and reports developed to that time concerning the activities of these agents. The Special Agent in Charge at that time informed Captain I. H. Mayfield, District Intelligence Officer, Fourteenth Naval District, Honolulu, Lieutenant Colonel Morrill W. Marston, War Department, G-2, and his assistant, Lieutenant Colonel George W. Bicknell, at a conference with these individuals that the United States Attorney had been requested to submit his opinion concerning the prosecution of the Consular agents. The Special Agent in Charge asked these Naval and Military authorities their opinion on prosecution, and, speaking individually for themselves, each person present, including the Special Agent in Charge, was of the opinion that the Consular agents should be prosecuted.

Captain Mayfield of Naval Intelligence and Colonel Marston of Army Intelligence stated that while that was their personal opinions they could not speak for their respective Commanders, who were at that time Admiral Claude C. Bloch, Navy, and General Walter C. Short for the Army. The Special Agent in Charge stated to these representatives that it was a criminal prosecution which should be determined solely by the United States Attorney and he assumed that the Commandant of the Navy Yard and the Commanding General of the Army would regard it as a criminal prosecution with which they would not attempt to interfere.

The day following this conference Captain I. H. Mayfield informed the United States Attorney that Admiral Claude C. Bloch looked upon the matter as purely a criminal proceeding over which he had no jurisdiction and with which he would not attempt to interfere, but that it was his personal opinion the Consular Agents should be prosecuted. Lieutenant Colonel Morrill W. Marston reported to the United States Attorney the following day that Lieutenant General Walter C. Short was opposed to prosecuting the Consular agents for the reasons here-

3186 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

inbefore set out, and if necessary to prevent it, would communicate with the War Department in Washington.

[18]

TELEPHONE COVERAGE

In order to be properly advised of all attempted espionage activity, this Bureau, deeming that war with Japan and Axis powers was imminent, felt it desirable to monitor all long distance telephone conversations between Hawaii and Japan.

Under instructions of the Attorney General, the FBI cannot install telephone taps except with the personal authorization of the Attorney General. In order to accomplish this purpose a memorandum was submitted to the Attorney General on September 2, 1941, for authority to install a technical surveillance which would insure this coverage. This authority was not granted by the Attorney General until October 22, 1941.

It is believed that if an earlier coverage had been effected, much information of value might have been obtained for the results thereof, after this installation, were extremely satisfactory. For instance, the Honolulu Office of the Federal Bureau of Investigation, as a result of this surveillance, received information that at about 5:00 p. m. on Friday, December 5, 1941, Motokazi Mori of Honolulu talked by telephone to an unidentified relative in Japan.

A transcript of this telephone call is as follows, and the parentheses including the letters "J" and "H" preceding each recorded conversation indicate "J" for Japan and "H" for Honolulu:

(J) Hello, is this Mori?

(H) Hello, this is Mori.

(J) I am sorry to have troubled you. Thank you very much.

(H) Not at all.

(J) I received your telegram and was able to grasp the essential points. I would like to have your impressions on the conditions you are observing at present. Are airplanes flying daily?

(H) Yes, lots of them fly around.

(J) Are they large planes?

(H) Yes, they are quite big.

(J) Are they flying from morning till night?

(H) Well, not to that extent, but last week they were quite active in the air.

(J) I hear there are many sailors there, is that right?

(H) There aren't so many now. There were more in the beginning part of [19] this year and the ending part of last year.

(J) Is that so?

(H) I do not know why this is so, but it appears that there are very few sailors here at present.

(J) Are any Japanese people there holding meetings to discuss US-Japanese negotiations being conducted presently?

(H) No, not particularly. The minds of the Japanese here appear calmer than expected. They are getting along harmoniously.

(J) Don't the American community look with suspicion on the Japanese?

(H) Well, we hardly notice any of them looking on us with suspicion. This fact is rather unexpected. We are not hated or despised. The soldiers here and we get along very well. All races are living in harmony. It appears that the people who come here change to feel like the rest of the people here. There are some who say odd things, but these are limited to newcomers from the mainland, and after staying from three to six months, they too begin to think and feel like the rest of the people in the islands.

(J) That's fine.

(H) Yes, it's fine, but we feel a bit amazed.

(J) Has there been any increase in ---?--- of late? That is, as a result of the current tense situation.

(H) There is nothing which stands out, but the city is enjoying a war building boom.

(J) What do you mean by enjoying a war building boom?

(H) Well, a boom in many fields. Although there is no munitions industry here engaged in by the army, civilian workers are building houses for the army personnel. Most of the work here is directed towards building houses of various sorts. There are not enough carpenters, electricians and

plumbers. Students at the high schools and university have quit school and are working on these jobs, regardless of the fact that they are unskilled in this work.

(J) Are there many big factories there?

(H) No, there are no factories, but a lot of small buildings of various kinds are being constructed.

[20] J. Is that so?

(H) It is said that the population of Honolulu has doubled that of last year.

(J) How large is the population?

(H) The population increase is due to the present influx of Army and Navy personnel and workers from the mainland.

(J) What is the population?

(H) About 200,000 to 240,000. Formerly there were about 150,000 people.

(J) What about night time?

(H) There seems to be precautionary measures taken.

(J) What about searchlights?

(H) Well, not much to talk about.

(J) Do they put searchlights on when planes fly about at night?

(H). No.

(J) What about the Honolulu newspapers?

(H) The comments by the papers are pretty bad. They are opposite to the atmosphere pervading the city. I don't know whether the newspaper is supposed to lead the community or not, but they carry headlines pertaining to Japan daily. The main articles concern the US-Japanese conferences.

(J) What kind of impression did Mr. Kurusu make in Hawaii?

(H) A very good one. Mr. Kurusu understands the American mind, and he was very adept at answering queries of the press.

(J) Are there any Japanese people there who are planning to evacuate Hawaii?

(H) There are almost none wishing to do that.

(J) What is the climate there now?

(H) These last few days have been very cold with occasional rainfall, a phenomena very rare in Hawaii. Today, the wind is blowing very strongly, a very unusual climate.

[21] (J) Is that so?

(H) Here is something interesting. Litvinoff, the Russian Ambassador to the United States, arrived here yesterday. I believe he enplaned for the mainland today. He made no statements on any problems.

(J) Did he make any statements concerning the US-Japan question?

(H) No. Not only did he not say anything regarding the US-Japan question, he also did not mention anything pertaining to the Russo-German war. It appears he was ordered by his government not to make any statement.

(J) Well, that means he was very different from Mr. Kurusu.

(H) Yes.

(J) What kind of impression did Litvinoff make?

(H) A very good one here. He impressed the people as being very quiet and a gentleman.

(J) Did he stop at the same hotel as Mr. Kurusu?

(H) Yes, at the Royal Hawaiian Hotel overnight. He has already enplaned for the mainland.

(J) Do you know anything about the United States fleet?

(H) No, I don't know anything about the fleet. Since we try to avoid talking about such matters, we do not know much about the fleet. At any rate, the fleet here seems small. I don't (know if) all of the fleet has done this, but it seems that the fleet has left here.

(J) Is that so? What kind of flowers are in bloom in Hawaii at present?

(H) Presently, the flowers in bloom are fewest out of the whole year. However, the hibiscus and the poinsettia are in bloom now. (J) does not seem to know about poinsettias. He admits he doesn't know.

(J) Do you feel any inconvenience there due to the suspension of importation of Japanese goods?

(H) Yes, we feel the inconvenience very much. There are no Japanese soy, and many other foodstuffs which come from Japan. Although there are enough foodstuffs (Japanese) left in stock to last until February of next year, at any rate it is a big inconvenience.

[22] (J) What do you lack most?

(H) I believe the soy is what everyone is worried about most. Since the freeze order is in force, the merchants who have been dealing in Japanese goods are having a hard time.

(J) Thanks very much.

(H) By the way, here is something interesting about Hawaii. Liquor sells very fast due to the boom here. The United States, which twenty years ago went under prohibition, is today flooded by liquor. British and French liquors are also being sold. The Japanese merchants, whose business came to a standstill due to the suspension of importation of Japanese goods, engage in liquor manufacture. The rice from the United States is used in brewing Japanese sake here, and the sake is exported back to the mainland.

(H) explains that the Japanese sake brewed in Honolulu is called "Takara-Masamune"; that a person named Takagishi was the technical expert in charge of the brewing; that said Takagishi is a son-in-law of Grand Chamberlain Hyakutake, being married to the latter's daughter; and that said Takagishi returned recently to Japan on the Taiyo Maru. He adds that Japanese here and the Americans also drink sake. He informs (J) that Japanese chrysanthemums are in full bloom here, and that there are no herring-roe for this year's New Year celebration.

(J) How many first generation Japanese are there in Hawaii according to last surveys made?

(H) About fifty thousand.

(J) How about the second generation Japanese?

(H) About 120,000 or 130,000.

(J) How many out of this number of second generation Japanese are in the United States Army?

(H) There aren't so many up to the present. About 1,500 have entered the army, and the majority of those who have been drafted into the army are Japanese.

(J) Any first generation Japanese in the army?

(H) No. They do not draft any first generation Japanese.

(J) Is that right, that there are 1,500 in the army?

[23] (H) Yes, that is true up to the present, but may increase since more will be inducted in January.

(J) Thank you very much.

(H) Not at all. I'm sorry I couldn't be of much use.

(J) Oh no, that was fine. Best regards to your wife.

(H) Wait a moment please?

(J) off phone.

It is noted that this telephone conversation lasted approximately eighteen minutes and appeared to have some hidden meaning, in view of the language used, the topics discussed, in themselves being of a character which would not ordinarily warrant the expense incurred on this particular occasion.

The Japanese translator of our Honolulu Office completed the translation of this telephone conversation at about 2:00 p. m. on December 6, 1941. Copies of the full text of the conversation, after being translated, were furnished to representatives of the Office of Naval Intelligence and Military Intelligence. These translations were submitted to Captain I. H. Mayfield and Lieutenant Colonel George W. Bicknell of the Military Intelligence Division of the Army, Hawaii. The Special Agent in Charge of the Honolulu Office telephoned the Office of Naval Intelligence at about 2:00 p. m., December 6, for Captain I. H. Mayfield, who was not in. The Special Agent in Charge then talked to Lieutenant Denzel Carr, Japanese expert in the Office of Naval Intelligence, informing him that a call had just been translated which appeared to the Special Agent in Charge to be very important.

Lieutenant Carr was furnished with the substance of the Mori conversation over the telephone and was requested to get in touch with Captain Mayfield immediately as the Special Agent in Charge believed he would want to take up the contents of the call with his superiors. The Special Agent in Charge at Honolulu had been advised several days before December 6 by Captain Mayfield of the Naval Intelligence Office that the Navy was in possession of secret information through which they would be able to know when Japan would move and the direction this move would take. Captain Mayfield informed the Special Agent in Charge, "If I suddenly call you some night and say I am moving to the West,

you will know that Japan is going into the Malaya; and if I say I am moving over on the North side, you will know Japan is going to move against Russia." Captain Mayfield stated that the Navy had secret information as to how this knowledge and information would be furnished by Japan, indicating that it was some code message in Japanese broadcasts. Not knowing the full import [24] of the manner in which Japanese movements would be indicated and not having been furnished with the full information by Captain Mayfield, the Special Agent in Charge at Honolulu felt that strange portions of the Mori conversation might be the key which would indicate Japanese movements.

The Special Agent in Charge also contacted Lieutenant Colonel George W. Bicknell of the Army about 5:00 p. m. at his home in Aiea Heights, informing him that a very important message had been intercepted between Japan and Honolulu, and requesting him to come to the office immediately to get a copy of the message as it was believed he would want to take it up with his superior officers.

The Special Agent in Charge and Special Agent F. G. Tillman of the Honolulu Office, who had been conducting Japanese surveys and investigations in Honolulu, pointed out to Captain Mayfield and Colonel Bicknell on December 6, 1941, what appeared to be significant statements in this conversation, and stated particularly the belief that the references to flowers indicated some purpose of being able to locate the Island, and the fact that it appeared highly unreasonable that anyone in Japan spending the money to talk to Honolulu for eighteen minutes would discuss flowers, the weather and the climate, also pointing out the significance of the inquiry about when and at what times the patrol planes went out and came in.

Captain Mayfield stated he was sure there was some hidden message which would be of value if they could only decode it, but that there was nothing in the message in line with previous information indicating Japanese movements.

It appears, and seems probable now, that the flowers hibiscus and poinsettia, mentioned in the conversation, may have referred to battleships and cruisers, as there were no cruisers in Pearl Harbor at the time of the attack.

[25]

CABLE COVERAGE

As far as it is known to this Bureau no governmental agency tapped cable wires in or out of Hawaii. The only cable facilities available were those of the Commercial Pacific Cable Company. This company declined to make available to any of the intelligence agencies the content of any messages sent to or from the Japanese Consulate in Honolulu and Japan. The Federal Bureau of Investigation in Honolulu never received prior to December 7, 1941, copies of any messages sent by cable. The commercial companies by which ordinary wires were sent to and from Japan, such as the RCA Communications Company, the Mackay Radio Company, and the Globe Wireless Company, all transmitted their messages by radio.

The managers of these companies all refused to make available the content of messages to and from Japan, sent or received by the Japanese Consul. They likewise refused to furnish this information to the other intelligence agencies. However, in November of 1941, the Office of Naval Intelligence, through Captain I. H. Mayfield and Admiral Claude C. Bloch, Commandant of the Honolulu Navy Yard, did arrange with Mr. George Saranoff, President of RCA, while he was in Honolulu, to have the local manager furnish ONI with all telegrams to and from Japan, sent or received by the Japanese Consul, effective as of December 1, 1941. On February 12, 1942, the Honolulu Office first learned that ONI had obtained the messages from December 1 to 4 on December 5, 1941. At no time prior to December 7, 1941, did the FBI receive copies of these messages.

While it is not definitely known, this Bureau received indications at least that the Army Signal Corps was engaging in intercept activity, monitoring short-wave messages going to and from Honolulu, including those sent by RCA, Globe Wireless, and Mackay Radio Company. The FBI's belief is based on conversations held by FBI officials with representatives of the Army and the Navy. Two instances substantiating this belief are as follows:

1. On January 16, 1941, my assistant, Mr. E. A. Tamm, submitted a memorandum to me advising that he had been talking to Captain Nixon and Colonel Lester, at which time he referred to the Japanese intercept stations for Japanese messages in the Hawaiian Islands. These individuals had assured him that this Bureau was receiving the results of all matters of interest to the FBI

3190 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

which were obtained through these intercepts. At that time there was some discussion of adopting some type of code symbols which would indicate whether the information furnished this Bureau was obtained through an intercepted communication or otherwise. No agreement was reached with regard thereto at that time. Mr. Tamm advised that this discussion with Colonel Lester and Captain Nixon dealt with intercepts concerning strictly ship movements and not commercial messages.

[26] 2. The FBI was advised by reliable sources in Hawaii that the Army was intercepting messages, but that this was an Army secret and that intercepted messages were sent to Washington for decoding. Advice was further received from a reliable source in Hawaii by the FBI that the Army and Navy were operating intercept stations in the City of Honolulu for the purpose of intercepting radio traffic between the Orient and the United States, particularly Japan. Information was received also indicating that the intercept stations operated by the Navy were primarily for the purpose of intercepting radio messages relating to Japanese fleet movements and that this activity did not include amateur radio bands.

The Federal Communications Commission had operated stations at Honolulu for at least a year prior to December 7, 1941. The scope of their activity was not known to the Special Agent in Charge at Honolulu. At no time prior to December 7, 1941, did the FBI Field Office in Honolulu ever receive any intercepted messages from ONI, G-2, or the Federal Communications Commission.

On April 28, 1941, the Honolulu Field Division in a letter entitled "Weekly Conferences, FBI, ONI and G-2" advised the following:

"The question of Army and Navy jurisdiction in the matter of radio censorship was discussed and the method and manner of monitoring radio broadcasts from Tokyo direct to the Hawaiian Islands was discussed. These programs are being recorded by the Federal Communications Commission Monitoring Station at Honolulu and arrangements will be made through Colonel Bicknell of G-2 to obtain the use of these records for transcription and translation, copies of the translations to be made available to the FBI and ONI.

"Captain Mayfield stated that he has outlined the intended setup in the censorship of radio which will be necessary in the event the United States is embroiled in the present conflict. Captain Mayfield has already requested a large increase in personnel to handle this work and it is particularly noted that at the time of this conference some of the officers requested had already been assigned to the office of ONI at Honolulu for this purpose and it appeared that the Navy is proceeding at this time with the completion of the personnel and the complete censorship of radio."

[27] A similar letter dated May 5, 1941, contains the following:

"The question of Japanese broadcasts over JZK from Tokyo was brought up and it was brought out that the Federal Communications Commission is monitoring that particular broadcast. The broadcast is for a period of 15 minutes in English and then for about an hour in Japanese. It is a broadcast from Tokyo specifically to the Japanese residing in Hawaii. The FCC makes transcriptions of the English and Japanese broadcasts and furnishes the Japanese transcription to Washington for translation. It was decided that the agencies represented should make an effort to get the FCC to permit us to transcribe and translate these broadcasts. It was agreed that the FBI would transcribe the English broadcasts and that ONI would transcribe and translate the Japanese broadcasts. A sufficient number of copies will be furnished to FCC to forward to its headquarters in Washington, and sufficient copies will be furnished ONI, G-2, and the FBI for the respective offices use and transmission to Washington."

The above-mentioned monitoring was confined solely to news flashes and news broadcasts directed at the Hawaiian Islands by the radio in Tokyo.

For about a period of two weeks thereafter the FBI in Honolulu did transcribe the English broadcasts by having a stenographer listen to the records furnished by FCC and type up the content. Thereafter the Office of Naval Intelligence took over the whole project in order to release the FBI employee for other more important work.

EVIDENCE OF MATERIAL WHICH COULD HAVE BEEN OBTAINED IF BUREAU HAD ACCESS TO TELEGRAPH COMMUNICATIONS

The telegram file of the Japanese Consul was found at the Consulate when the police guard was established about noon of December 7, 1941. This telegram file was not complete, but it has been translated and decoded.

On December 20, 1941, the Mackay Radio Company at Honolulu, on the direction of the Military Governor of Honolulu, turned over to the Federal [28] Bureau of Investigation all telegrams sent to and received from Japan during the month of November, 1941. Since the attack, all messages sent via Globe Wireless Company to and from Japan for the period from December 1 to December 7, 1941, were furnished to the Federal Bureau of Investigation.

From these messages it is apparent that the Consulate at Honolulu was very active in keeping the Japanese Government advised concerning the military, diplomatic and naval activities of the United States. Illustrations of the type of material which was sent and could have been obtained had the proper coverage been afforded are set out below. It will be recalled that Nagao Kita, mentioned in the succeeding messages, is Consul General of the Japanese Government at Honolulu.

Referring to last paragraph of your No. 123.

1. The Army ordered several hundred balloons for training at Camp Davis NC on the American mainland. They considered (at that time) the practicability of their employment in the defense of Hawaii and Panama. Investigation of the vicinity of Pearl Harbor reveals no locations selected for their use or any preparations for constructing moorings. No evidence of training or personnel preparations were seen. It is concluded that their installation would be difficult. Even if they were actually provided they would interfere with operations at nearby Hickam Field, Ewa Field and Ford Island. The whole matter seems to have been dropped.

2. Am continuing in detail the investigation of the non-use of nets for torpedo defense of battleships and will report further.

No. 369

6 DEC. 1941.

From: KITA.

To: WASHINGTON-TOKYO.

On the evening of the 5th the BB Wyoming (sic!) and one sweeper entered port.

DD-17

am-8

Ships in dock:

CL-4

DD-2

(CA AND CV ALL ———)

PS-OV CANNOT BE FOUND IN THE FLEET (?)."

I have been advised that the symbols used in the quoted messages are those used by the Navy in referring to units of its fleet and are as follows:

- [32] BB—Battle Ships.
- CL—Light Cruisers.
- DD—Destroyers.
- AM—Mine Sweepers.
- CA—Heavy Cruisers.
- CV—Aircraft Carriers.

I regret that my absence from the city on the dates mentioned in your letter will make it impossible for me to discuss these matters with you personally. However, I hope that the foregoing will adequately serve the needs of your inquiry at this time. In the event you desire any elaboration on any of the points covered in this letter, I will be glad to have Assistant Director D. M. Ladd appear before you to discuss them with you.

Enclosures

[1]

STRICTLY CONFIDENTIAL

FEBRUARY 9, 1942.

Subject: Delimitation of Investigative Duties of the Federal Bureau Investigation, the Office of Naval Intelligence and the Military Intelligence Division
The Agreement for Coordination of the Federal Bureau of Investigation, Office of Naval Intelligence and the Military Intelligence Division.

I. The undersigned have reviewed the directive contained in the President's Memorandum of June 28, 1939, as augmented by his directive of September 6, 1939, the Delimitation Agreement of June 5, 1940, and the supplemental interpretation and agreements thereunder. It is now agreed that responsibility for investigation of all activities coming under the categories of espionage, counter-espionage, subversion and sabotage, (hereinafter referred to as "these categories") will be delimited as indicated hereafter. The responsibility assumed by one organization in a given field carries with it the obligation to provide a pool of all information received in that field but it does not imply the reporting agency alone is interested in or will work alone in that field. Close cooperation between the three agencies in all fields is a mutually recognized necessity.

II. FBI will be responsible for:

1. All investigation of cases in the categories involving civilians in the United States and its territories with the exception of the Republic of Panama, the Panama Canal Zone, Guam, American Samoas, Palmyra, Johnston, Wake and Midway Islands, the Philippine Islands and the Territory of Alaska other than that specifically described in Paragraph III.

[2] 2. Investigation of all cases directed from foreign countries on those occasions and in those situations in which the State, War or Navy Departments specifically request investigations of designated group or set of circumstances.

3. The coordination of civilian organizations furnishing information regarding subversive movements.

4. Jointly with ONI, the coverage of Japanese activities in these categories. ONI will continue its coverage of Japanese activities as heretofore and FBI will continue to expand its operations in this field.

5. Keep MID and ONI advised of important developments, such as:

(a) Developments affecting plants engaged on Army or Navy contracts.

(b) Cases of actual and strongly presumptive espionage and sabotage, including the names of individuals definitely known to be connected with subversive activities.

(c) Developments affecting vital utilities.

(d) Developments affecting critical points of transportation and communication systems.

(for c and d above, no protective coverage is contemplated)

6. Ascertaining the location, leadership, strength and organization of all civilian groups designated to combat Fifth Column Activities (overt acts of all sorts in groups of armed forces of enemies); and transmitting to MID, ONI and

3194 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

State Department information concerning these organizations and any information received concerning their possession of arms.

[3] 7. Keeping ONI and MID informed of any other important developments.

III. MID will be responsible for:

1. Investigation and disposal of all cases in these categories in the military establishment including civilian employ, military reserve and military control.

2. The investigation of cases in these categories involving civilians in the Canal Zone, the Republic of Panama, the Philippine Islands and the Alaskan Peninsula and islands adjacent including Kodiak Island, the Aleutian and Pribilof Islands and that part of the Alaskan Peninsula which is separated by a line drawn from Iliamna Bay northwest to the town of old Iliamna and thence following the south shore of Lake Iliamna to the Kvichak River to Kvichak Bay.

3. Informing FBI and ONI of any other important developments.

[4] IV. ONI will be responsible for:

1. Investigation and disposal of all cases in these categories in the Naval establishment, including civilians under Naval employ or control, and all civilians in Guam, American Samoa, Palmyra, Johnston, Wake, and Midway Islands.

2. Jointly with FBI, the coverage of Japanese activities in the categories enumerated in Paragraph I.

ONI will continue its coverage of Japanese activities as heretofore, and FBI will continue to expand its operations in this field.

3. Informing FBI and MID of any important developments.

V. The ultimate test of cooperation and coordination of the Intelligence agencies is the manner in which they function under conditions of national emergency or actual warfare. There should be no doubt as to the identity of the agency or official who is primarily responsible for carrying on intelligence operations under the broad conditions for which the governing principles are listed hereinafter.

PERIOD OF MARTIAL LAW

VI. It is further agreed that when a state of martial law has been declared by the President, the Military Commander assumes responsibility for Intelligence coverage. He has authority to coordinate intelligence activities of the participating agencies within the limits of their available personnel and facilities by the assignment of missions, the designation [5] of objectives, and the exercise of such coordinating control as he deems necessary. He is not authorized to control the administration or discipline of the subscribing agencies to which he does not belong, nor to issue instructions to such agencies beyond those necessary for the purposes stated above.

VII. Personnel of the subscribing agencies will still send reports to and be under the continued supervision of their respective headquarters. The subscribing agencies will render such aid and assistance to the Military Commander and his designated representatives as are possible and practicable. All pertinent information, data, and other material that are or may be necessary or desirable to him shall be furnished by the most expeditious means and methods possible consistent with requisite security. The headquarters of the subscribing agencies will promptly be advised of all information and data appropriately identified as having been furnished to the Military Commander.

VIII. It is assumed that the Military Commander will not hesitate to call upon any governmental agency outside the three subscribing agencies to this agreement for any assistance, cooperation, or activity.

PERIODS OF PREDOMINANT MILITARY INTEREST, NOT INVOLVING MARTIAL LAW

IX. In time of war certain areas will come into prominence as potential theatres of operation. When a Military Commander of such a potential theatre is designated, he definitely has interest in, though not control of, the civilian life within the area. In order that the Military Commander may prepare himself for the discharge of the possible responsibility which may affix to him, the following procedure is agreed upon:

[6] 1. Agents of the FBI, of ONI, and of MID will continue to function in accordance with the provisions of paragraphs II, III, and IV.

2. In addition thereto the Military Commander may take steps to analyze the facilities existing and to explore the manner in which complete coverage will be obtained if martial law is declared. Adequate liaison with the other two intelligence services will insure that the Military Commander will have the

benefit of the experience, judgment and knowledge of the representatives of the other services.

3. The Military Commander is authorized to request and receive such information from the three agencies as he may desire and they may be able to furnish.

[7] X. The analysis and exploration referred to above will show the coverage furnished by each of the subscribing agencies and any additional coverage each subscribing agency can undertake. When the Commander feels that more complete coverage is required, it is recognized that his service is authorized to augment the coverage. Prior to any invasion of the spheres normally coming under the cognizance of the other subscribing agency, the Military Commander should obtain the necessary authority from the War Department.

XI. Irrespective of the fact that the preceding recommendations have placed the initiative in the hands of the Military Commander, whenever either of the other two services feel that such a survey to determine adequacy of coverage should be undertaken, it should be so recommended through the director of each service.

XII. The above provisions contemplate that the War Department will be the agency administering martial law. When appropriate, the same principles will govern the Navy Department.

PERIODS OF NORMAL CONDITIONS

XIII. Under these conditions, the Federal Bureau of Investigation, the Office of Naval Intelligence and the Military Intelligence Division will operate in accord with the provisions of paragraphs II, III and IV.

XIV. From time to time it may be desirable in the light of changing conditions to modify or amend this delimitation agreement. Such amendments or modifications when agreed upon by the heads of the [8] subscribing agencies shall be issued in the form of a revised delimitation agreement and not as separate instructions.

RAYMOND E. LEE

Assistant Chief of Staff G-2, War Department.

T. S. WILKINSON,

Director, Office of Naval Intelligence.

J. EDGAR HOOVER

Director, Federal Bureau of Investigation.

JAPANESE ACTIVITIES HAWAIIAN ISLANDS

The information set forth below will supplement the information contained in the Bulletin dated May 15, 1941, pages 891 through 897.

The predominant racial group in the Territory of Hawaii is the Japanese, who constitute 37.3 per cent of the population, or 157,905 persons, to which must be added the residents of the Korean race who are in fact Japanese nationals although usually anti-Japanese in sympathy and action. This group composes 1.6 per cent of the people in Hawaii, or 6,851 persons. The Japanese races therefore total 164,756 persons or 38.9 per cent of the total population of Hawaii, 423,330 persons. These figures are based on a report compiled from the returns of the Sixteenth Decennial Census of the United States by the Bureau of Census.

Data obtained through the registration of aliens in compliance with the Alien Registration Act of 1940 reveal that there are 41,346 aliens of the Japanese race, or Japanese nationals, residing in Hawaii.

The alien Japanese are disposed to organize almost every conceivable purpose, a psychological characteristic apparently brought with them from Japan, and it can be safely assumed that every Japanese alien resident in Hawaii belongs to one or more purely Japanese organizations. An effort has been made to separate these innocuous groups from organizations which are potentially in a position to engage in acts which might be inimical to the best interests of the United States. A study of these organizations existing in the Territory of Hawaii has brought out that their influence or authority flows in five distinct channels which are interlocked through the duplication of activity, the plurality of positions held by many individual Japanese such as a Buddhist priest being also principal of a Japanese Language School and a Consular Agent or an officer or member of an organization appearing in another category. These five major channels of influence have been previously mentioned in the Bulletin dated May 15, 1941.

It has been determined that each of these channels is at least strongly influenced, if not directly controlled, by groups of similar type and purpose within Japan. The consular organization is obviously controlled by the Japanese Foreign Ministry and the religious sects and organizations supervised by the headquarters of each individual sect in Japan, which is, in turn, under Japanese Governmental supervision. A large number of the groups organized for social purposes are the so-called prefectural societies, comparable to American state societies, which are in direct contact with the home prefecture of their members. The educational organization has, at least, a liaison connection with the Japanese Imperial Educational Association which has seen fit to confer honors upon local Japanese educators. The business houses are tied to Japan by reason of their being branches of Japanese firms in many instances and in all cases importers of Japanese goods. The Honolulu Japanese Chamber of Commerce was until lately a branch of the Japanese Chamber of Commerce and Industry at Tokyo, Japan, and the Hilo, Hawaii, Japanese Chamber an associate but not a member as evidenced by the directory of the organization within Japan. The Overseas Japanese Central Society, as a liaison agency for all Japanese residing in countries foreign to Japan, is connected with all Japanese organizations in the United States, particularly with organizations of a civic type and in their contact with Japan.

CONSULAR ORGANIZATION

The center of the consular organization, as well as alien Japanese activity, in the Territory of Hawaii is belived to be in the Japanese Consul General at Honolulu. This Consul General, Nago Kita, has a staff of nine persons, including a Vice-Consul, Chancellor, two Secretaries and five Clerks. In addition to these the Consul General is in constant contact with six prominent local Japanese who have been termed his "Advisory Council."

It has been learned that the Japanese Consulate when desiring that certain instructions or news be disseminated among the Japanese in Hawaii communicates with the more prominent Japanese societies, they being the United Japanese Society of Honolulu, the Honolulu Japanese Chamber of Commerce, the Hilo Japanese Chamber of Commerce, and the Hilo Japanese Society, as well as the Japanese Press, which follows the directions of the Consulate.

The largest and most ramified group under the direction of the Consul General is that of the "Consular Agents" or "Toritsuginin." There are presently 219 of these agents so situated geographically as to form a comprehensive information system for the Japanese Consulate. These men are in all instances alien Japanese, well educated and above the average in intelligence. Some investigation has been conducted concerning these Consular Agents and it has been determined that one is the holder of the Eight Court Rank, Senior Grade of Imperial Japan, and that at least one other is a Reserve Officer in the Japanese Army. Further, information has been received indicating that many of them are non-quota aliens engaged as Buddhist priests and principals or teachers in the Japanese Language Schools.

These Consular Agents are distributed among the islands according to the following table:

Hawaii	72
Maul	48
Kauai	46
Oahu	48
Molokai	4
Lanai	2
Total	219

It will be noted from the above that all of the islands are well supplied with Japanese Agents, and it is interesting to note in connection with the denials of many of these Consular Agents that they are under the control of Consul General, that there are none located in the city of Honolulu proper where the Consulate is situated.

RELIGIOUS ORGANIZATIONS

The largest and most far-reaching Japanese organizations are the various religious sects of which the Japanese are adherents. Each community in the Hawaiian Islands, no matter how small, in which there are Japanese residents has one or more Buddhist temples or "Fukyojo" (preaching places).

The immigrant Japanese are primarily agricultural laborers and being simple folk they are readily influenced by the priests because of the respect in which they hold these men. Further, in view of the large total congregations of these churches and the fact that services are held in the Japanese Language and in accordance with Japanese customs, the Buddhist and Shinto sects are in an excellent position to disseminate Japanese propaganda. The Shinto shrines are especially important in this regard as they are primarily concerned with ancestor worship, the worship of the Imperial Family of Japan and the teaching of the Japanese spirit "Kudo." It will be further noted that many of the Buddhist priests, as well as Shinto priests, cannot be considered as aliens who desire permanent residence in the United States for they entered as non-quota aliens usually indicating that they plan to stay approximately five years.

The Hompa Hongwanji is the largest and most influential Buddhist sect in the Territory of Hawaii as well as in Japan where its membership is said to comprise seventy-five per cent of the Buddhists due to the fact that the Abbott, or head, is related to the Japanese Imperial Family. This sect in Hawaii is directed by Hompa Hongwanji Betsuin (Branch Temple) at Honolulu, under the leadership of Bishop Bikyo Kuchiba, who was sent to Hawaii to take charge of this organization by the headquarters of the sect in Japan. The sect also has a large number of priests who entered as non-quota aliens and who have lived in the Islands only a short time.

There are 22,399 Japanese following the Buddhist faith who belong to the Hompa Hongwanji sect, which has 38 temples, 57 priests and 25 schools in the Territory of Hawaii.

Information has been received that there are 39 known Shinto shrines in the Territory of Hawaii which follow a variety of Shinto sects. However, many of the Shinto sect have sub-sects or groups within them which meet at regular intervals, utilizing the services of the priest of the main shrine. Therefore, it is possible for one shrine to house many deities and to enshrine many individuals. The congregations of these Shinto sects are not organized as in the case of the Buddhist and Christian sects and it has been impossible to determine the number of adherents to Shintoism in Hawaii. However, it is believed there are at least 40,000 persons visiting Shinto shrines.

PROPAGANDA AGENCIES

The Buddhist and Shinto sects, the Japanese Language Schools and the civic and commercial societies tend to act as Japanese propaganda agencies due to the inherent nature of their work in the Japanese communities and the fact that their business is usually carried on in the Japanese Language.

(1) *Overseas Radio Broadcasts*

The Japanese radio stations in Japan continue to direct programs to the United States through the Hawaiian Islands particularly over Station JZK. However, on September 1, 1941, the frequency of this station was changed from 17795 kilocycles to 15160 kilocycles, and the designation of the station was changed from JZK to JLU4. Upon the changing of frequency, the Japanese press in the Hawaiian Islands commented that the reception was none too good and that apparently the Japanese were far behind the United States in their radio technique. The press further criticized the programs as being banal and of little interest. The broadcasts of this radio station prior to approximately October 1, 1941, were in general anti-American in their expressions. However, subsequent to that date they appeared to be more friendly to the United States or at least not openly anti-American.

(2) *Japanese Consulate General at Honolulu*

The Japanese Consulate at Honolulu continued to receive from time to time cases of newspapers and magazines such as the "Tokyo Gasette" until the act freezing the assets of Japan was placed in effect. No information has been received indicating that the Consulate has exhibited any of the motion picture films in its possession produced and distributed by the Kokusai Bunka Shintokai (Society for International Cultural Relations) of Tokyo, Japan.

(3) *Overseas Japanese Central Society*

The Overseas Japanese Central Society (Kaigai Doho Tyuokai) has not made any headway in organizing branches in the Territory of Hawaii, but it does appear that this society acts for the local Japanese organizations in their corre-

3198 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

spondence with both the Japanese Government and Japanese business houses or quasi-governmental institutions. According to newspaper comments, the Overseas Japanese Central Society was also active in the evacuation of Hawaiian-born Japanese or Japanese who are residents of Hawaii from Japan following the freezing action.

(4) Tours

Since the order freezing assets of Japanese went into effect, the organization of tours to Japan ceased abruptly. The Japanese press, in commenting on these tours, indicated that a number of Japanese were in effect stranded in Japan and that two tour parties had broken up while in that country.

JAPANESE LANGUAGE PRESS

There are nineteen newspapers and magazines printed in the Japanese language in the territory of Hawaii, of which only two are of any outstanding importance, these being the Nippu Jiji and the Hawaii Hochi, published daily at Honolulu. Nine of these papers are published at Honolulu, these being as follows:

THE HAWAII HOCHI
THE NIPPU JIJI
THE HAWAII SHIMPO
THE JITSUGYO-NO-HAWAII
THE DOBO—a monthly magazine
THE RAKUEN JIHO—a monthly magazine
THE KYODAN JIHO—a monthly magazine
THE SHOGYO JIHO—a monthly commercial magazine
HAWAIIAN JAPANESE CIVIC ASSOCIATION COURIER—a monthly magazine
HAWAII SUNDAY NEWS—a weekly
PLANTATION CHRONICLE—a monthly magazine

On the Island of Hawaii there are three publications. These are as follows:

THE HAWAII MAINICHI and
THE KWAZAN—daily newspapers
THE KONA ECHO—published weekly.

Published on the Island of Maui there are three newspapers, as follows:

THE MAUI SHINBUN and
THE MAUI RECORD—both published bi-weekly
THE SHIN-JI-DAI—published monthly

On the Island of Kauai there are two newspapers, as follows:

THE KAUAI SHIMPO and
YOEN JIHO—both published weekly

All of these newspapers from time to time carry pro-Japanese editorials and news articles and in most instances are bilingual and printed for the Japanese residents of this Territory.

JAPANESE

PROPAGANDISTS

AND

AGENCIES

WALKER MATHESON

This will supplement information appearing on page 907 of the book entitled "Subversive Activities in the United States", Quarterly Report, dated November 15, 1940.

Walker Matheson is a native New Yorker. His father was for years connected with the Chicago Tribune of Chicago, Illinois. It is reported that he was at one time editor of the Living Age and that he has a rather unsavory reputation among newspapermen in New York City.

From a confidential informant information was received that an organization known as World Reviews, Inc. publishes the Living Age and also operates a news service known as the Negro News Syndicate. Irving Harvey Williams, a British subject, who is registered as an alien under the Alien Registration law, is President of World Reviews, Inc.

According to this informant, The Living Age magazine published at 25 West 45th Street, New York City, is controlled, subsidized and operated by and for the benefit of the Japanese government. This magazine formerly was published at 420 Madison Avenue, New York City. It publishes an annual yearbook known as "The World Over", which was started in 1933. There have been three issues to date.

The Negro News Syndicate is a news service which has a mailing list consisting of sixty newspapers in the United States, including one in Washington, D. C. According to informant, it is presently in the process of being incorporated and the papers of incorporation have been prepared, although they have not as yet been filed with the proper state office in New York. This syndicate is likewise controlled and subsidized by the Japanese government for the purpose of playing up the color question.

It is reported that the setup as to both publications originated in the spring of 1938 with Walker Matheson whose father was a newspaperman in Tokyo, Japan, and who at that time was living in New York City with Joseph Hilton Smyth. According to the information received, Matheson approached Smyth and stated that there was a magazine available on Park Row, New York City, which magazine could be operated by them with the financial backing of a party who Matheson knew would be interested in financing the magazine. According to informant, as a result of this approach by Matheson, the magazine was taken over, the deal consummated, and the Japanese government reportedly put up the necessary money. The amount involved was a trifle over \$10,000.00. It is reported that the annual loss since 1938 of the Living Age is approximately \$10,000.00 which deficit has been underwritten from the same Japanese source.

The publishing name of the Living Age is World Reviews, Incorporated. When the magazine was first taken over, a private tip sheet was distributed weekly entitled "The Foreign Observer", but this has since been discontinued.

Reportedly, the Japanese go-between who handled the financing is K. Fukushima, formerly of New York and now in San Francisco or vicinity. It is believed he is probably connected with the Japanese Consul in San Francisco, and attends the annual meeting in Tokyo in connection with the budget for foreign relief work.

All salaries and expenses of both the Living Age and the Negro News Syndicate are paid in cash which the Bureau's informant is of the opinion is secured from a branch bank in or near Radio Center, New York City.

Since the transfer of Fukushima to San Francisco, his place has been taken by one Honda who holds a position in the Japanese Consulate in Radio City similar to that of a Vice Consul. It is reported that Honda frequents a Japanese restaurant on Fifty-sixth Street just off Fifth Avenue, and also frequents the Nippon Club, Columbus Circle.

Since 1938 Matheson and Smyth have had a disagreement with regard to the editorial policy, which disagreement resulted in Smyth's securing a release from the management of the magazine and is presently only participating to the extent of advising or consulting in a strictly editorial capacity.

Lamar Middleton is the present editor of the Living Age. He is an ex-newspaperman and author. He is apparently strictly an editor and is not connected in any way with the Japanese connection, according to the informant, having only been in charge of the magazine since January of 1941.

According to the informant, the circulation of the Living Age is approximately 3,000, most of this not being a paid circulation. There are no advertisements and no apparent source of revenue.

Joseph Hilton Smyth has published many articles and books and is considered to be one of the best foreign editors in the United States, according to the informant.

According to information received, the losses for the magazine have been paid by Williams and Matheson; at least, that is what the records are apt to show. Williams apparently has borrowed his money to pay these expenses, but it is not known how Matheson gets his money.

3200 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

HISAKUTU K. WATANABE

This will supplement information appearing on pages 9 to 11 of the book entitled "Subversive Activities in the United States", Quarterly Report, dated November 15, 1940.

According to an article appearing in the July 20, 1940, issue of the China Weekly Review, Watanabe gets \$325 per month for propagandizing in San Francisco and surrounding areas.

Investigation concerning this individual reflects that he resides at 1792 Post Street, San Francisco, California, and his occupation is given as importer of Japanese liquor. It is stated that he has a reputation for being pro-Japanese and a very heavy drinker. He is 40 years of age and married. It is stated that although he makes remarks favorable to the United States when he is talking in English, whenever he speaks in Japanese he is very pro-Japanese. He is reportedly very active in Japanese government affairs in this country.

ALEXANDER CAIRNS

This will supplement information appearing on page 903 of the book entitled "Subversive Activities in the United States", Quarterly Report, dated November 15, 1940.

Reverend Alexander Cairns is and has been since 1932 the Pastor of the Ampere Parkway Community Church (Presbyterian). Prior to that time he was employed as writer and lecturer for himself. He has delivered numerous addresses in and around Newark, New Jersey on "My Life in Japan" and "The War in China". He reportedly was paid \$25 for each address so given by the Japanese Legation in New York City.

He has published a circular on his repertoire of addresses which includes one concerning Japan with a notation which reads, "The American mind is poisoned with hatred of the Japanese people, a hatred which is both unreasonable and regrettable; 90% of the people in Japan can no more be blamed for the war in China than for the earthquakes in Tokyo."

A check of this individual's bank account reflects that he has only a very mediocre income and that there have been no very large deposits or withdrawals. A recent check of his bank account has indicated that the highest balance in the month of April, 1941 and subsequent months was \$130.72. His deposits indicate that he apparently has not been receiving a large income from his lecture work, as very few checks from organizations have been deposited.

The 1934-1935 edition of Who's Who in America reflects that Cairns was born in Belfast, Ireland, September 7, 1871, a son of James and Mary Jane Cairns. He was brought to the United States in 1873, has a Ph. D. from Adrian College in Michigan, received in 1897; a B. D. Degree received in 1899 and an M. A. Degree received in 1909, also receiving an L. L. D. Degree in 1926. He married Mary Annie Obee on August 12, 1897. He was ordained as a minister in 1897 and was a teacher from 1897 to 1901 in Japan; a pastor in the United States from 1901 to 1906; a lecturer from 1907 to 1920; pastor of the High Street Presbyterian Church, Newark, New Jersey from 1920 to 1925; a lecturer since 1926, a columnist from 1927 to 1929; and pastor of the Presbyterian Church, Bloomfield, New Jersey from 1933 to the present time. Also reflected was the fact that Cairns has lectured in the United States and throughout Canada on the following subjects: "The Man Worth While", "Diplomacy and Destiny", "Washington, the Warrior", "The Golden Age", "Lincoln, the Liberator", "The Martyrs of Intolerance" and "The Goose that Lays the Golden Eggs". Cairns is listed as belonging to the following organizations: Linnaean Society, Sigma Alpha Epsilon, Masons and Institute Forum.

On interview Cairns advised that his present occupation is that of lecturer and pastor and that he has been more or less engaged in these two occupations all his life. Due to the fact that he has been a missionary and a teacher in Japan from 1897 to 1901 and has been somewhat interested in missionary work in that country since that time, he feels qualified to speak about the Japanese people and also feels it is an interesting subject to some groups before which he has spoken. Because of his speeches he deemed it advisable to register with the Secretary of State, particularly since he received \$25 each for the lectures given him upon Japan from a group of Japanese businessmen in New York City.

He advised that due to the international situation and the fact that it would be improper to continue making speeches at the present time he notified the State Department in July of 1940 that he had ceased making speeches concerning

Japan as well as receiving any money from the Japanese. Since that time he has had no connection with any Japanese and has received no money from them.

The State Department records reflects that his registration statement was revoked in July of 1940. Investigation verifies the fact that Cairns has ceased making Japanese propaganda speeches. No further investigation is being conducted concerning this individual.

EXHIBIT A TO ARMY PEARL HARBOR BOARD TOP SECRET TRANSCRIPT

[SECRET]

[1] SUMMARY OF FAR EASTERN DOCUMENTS

By authority A. C. of S., G-2

Date 20 Aug. 43 (R. S. B.)

Original summary forwarded to the Chief of Staff on 20 August 1943. Returned on 26 August with paper clips attached, pencil notes, and parts crossed out by General Marshall, Chief of Staff.

26 August 1943

Memorandum for the Record:

The attached memorandum from the Secretary, General Staff, and Tab A, the Summary of Far Eastern Documents, were given to me by General Strong at approximately 2:00 P. M., 26 August 1943, with instructions to revise Tab A as directed. Tab B, the Summary of European Documents, although prepared in the same manner as Tab A, that is, containing estimates by G-2, staff studies, memoranda and other entries of evaluated intelligence was not returned to General Strong. It is to be inferred that it will be forwarded to the President as compiled and that Tab A is to contain only raw unevaluated Military Attache reports. The Chief, Far Eastern Unit, was instructed to revise Tab A as quickly as possible as directed in Col. Sexton's memorandum.

At about 2:45 P. M., 26 August 1943, General Strong directed me to include Military Observers' reports with Military Attache reports in Tab A.

R. S. BRATTON,
Colonel, General Staff Corps,
Chief, Intelligence Group.

1 Encl.

Memo for Gen. Strong from Sec., Gen. Staff, 26 Aug. 1943.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington, August 26, 1943.

Memorandum for General Strong:

The attached tab does not comply with the directive in that it contains much material other than MA reports. The Chief of Staff desires that it be revised to contain *only* MA reports.

By direction of the Chief of Staff:

(Signed) W. T. Sexton,
W. T. SEXTON,
Colonel, General Staff,
Secretary, General Staff.

[1] JAPAN'S WAR POTENTIAL AND INTENTIONS

Explanatory Notes

The yearly summaries which follow are based on information contained in intelligence documents consisting of reports, memoranda, estimates, et cetera. The references in the left margin of the summaries are to the Far Eastern file and G-2 file of intelligence documents which accompany these summaries. For example, G-2 13 refers to the document so marked in the G-2 file; FE 1 to the first document in the Far Eastern file. Efforts have been made to show in the summaries the origin of the statements in the text but in some instances this has

3202 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

not been practicable as the same information may have come from several sources. It is therefore suggested that when the source is desired, the marginal references be compared with the tables of contents of the intelligence documents. Such a procedure will furnish a ready index to the source of the text of the summaries.

The following abbreviations have sometimes been used:

Chief, FE----- Chief, Far Eastern Section, Intelligence Branch, G-2, War Department General Staff.
G-2----- The Assistant Chief of Staff, G-2 (Military Intelligence Division), War Department General Staff (unless some other G-2 is specified.)
MA----- Military Attache or Assistant Military Attache.
MO----- Military Observer.
ONI----- Office of Naval Intelligence, Navy Department.
WPD----- War Plans Division, War Department General Staff.

When use is made of such expressions as "Tokyo reported," "Manila reported," reference is made to reports from the G-2 representative stationed at such places. In Manila it would be G-2 on the staff of the Commanding General, Philippine Department; in Singapore or Bangkok, the MO; in Tokyo, Chungking, Hongkong, or Peking, the MA.

[2]

1937

- FE 1 During the first half of 1937, the military leaders of Japan were building up a war psychology. One of the most formidable instruments
FE 3 used as an army propaganda agency was the Imperial Reservists Association, with a large well disciplined membership scattered throughout Japan. The Army was engaged in a six-year expansion program providing for (a) Increase of the Air Corps and Anti-aircraft Defenses; FE 4
(b) Increase of the Military Force in Manchukuo; (c) Improvement of Military Training Facilities; (d) Replenishment of War Materials; (e) Organization of Industry in the Interest of National Defense.
FE 4 In the budget debate in the Diet, during the early months of the year, references were made to the so-called "Continental Policy" and "Southward Expansion". While most of the pronouncements on expansion came from army leaders, there was indication of concurrence by the
FE 2 Navy when Rear Admiral Sekine, addressing a private gathering said: "Even with no naval treaty, we need not worry. Our duty is clearly to go ahead with our preparations for overseas development."
FE 17 In early July the so-called China Incident began and what at first
FE 19 appeared to be a local incident in North China developed into a major
FE 23 conflict engulfing a large portion of the Chinese Republic. Following
FE 25 the outbreak of hostilities, Japan began mobilizing the Army and the
FE 27 movement eventually took on the proportions of a general mobilization. Four divisions were added to the active army by reconstituting similar
FE 30 units disbanded in 1925.
FE 32 The Japanese War Office extended the terms of service for members of mobilized units and units in China until ordered transferred to the reserves, except such privates as might be ordered discharged. Special volunteer officers, reservists of all ranks and grades, called into active service, were to serve until relieved from active service. For members of non-mobilized units at home stations, including conscript reserve privates, where the term would normally expire in 1938 the term was extended to 1939.
FE 31 The Japanese War Office, as of 30 September, estimated that there were available 4,750,000 trained and partly trained reservists meeting physical requirements. The Military Attache, in Tokyo, estimated Japan
FE 37 had 950,000 troops under arms as of 25 October. The Imperial Head-
FE 42 quarters was established in the Imperial Palace on 20 November. Only on two previous occasions was this headquarters established, namely, in 1894, just prior to the Sino- [3] Japanese War, and in 1904 following the outbreak of the Russo-Japanese War.
FE 24 Appropriations for the Army during 1937-38 totalled Yen 2,464,078,117, including supplementary appropriations of Yen 1,422,712,700 or 45 percent of the expenditures voted for the year, which amounted to Yen 5,483,-

- FE 322 364,279. Defense appropriations, both Army and Navy, represented 71.86 percent of the total budget, compared with 47.24 percent during 1936-37.
- FE 21 Few thoroughly modern army airplanes were in use in 1937, but prospects of improvement were excellent with an ambitious building program for 1937-38. The new 97 (1937) type planes compared favorably with service models of foreign nations. Contracts were let for 500 new 97 (1937) type planes for delivery by 1 July 1938. Squadron strength increased from 53 to 59. Trained pilots numbered about 1400 with 238 trained during the year. The number of obsolete planes decreased but the number of available planes increased by only 34 to 1223 planes of all types on 1 July. Several new airplane companies were formed and
- FE 14 plans were made for increasing production facilities with the industry, generally, showing fresh growth and new life.
- FE 26 Legislation of a war-time character enacted by an extraordinary session of the Diet meeting 3 September, included the "Munitions Industry
- FE 18 Mobilization Law" and "Military Secrets Protection Law". The Cabinet
- FE 40 Planning Board was reorganized to plan for complete control of industry, finance and labor, in accordance with the need of the national defense program.
- FE 23 An unfriendly attitude toward foreign powers was manifested on several occasions during military operations in China. It was clearly
- FE 27 stated by the Senior Aide to the Navy Minister, that peaceful commerce with China would not be interfered with but should a situation develop like that in Spain, Japan might change her policy. Nevertheless, there were several incidents involving British and American nationals. The
- FE 23 attitude toward Great Britain was decidedly unfriendly, although Russia
- FE 35 was constantly referred to as the immediate and potential enemy.
- FE 33 The reaction to President Roosevelt's "Quarantine" speech of 5 October was one of shocked disappointment without any demonstration of enmity. Likewise, the sinking of the American gunboat "Panay" brought
- FE 43 an official expression of regret with offer of restitution. The public and the press expressed hope that the United States would be magnanimous in its judgment of the incident.
- FE 39 The seriousness of the Far Eastern situation was summarized in a memorandum to the Chief of Staff from the Assistant Chief of [4] Staff, G-2, War Department, dated 4 November. The memorandum reads in part as follows:
- "There is a possibility, fantastic as it may seem, that Japan contemplates military action against Great Britain in the Orient at a time when she is involved in Europe, with the idea of seizing Hongkong and Singapore and ultimately acquiring the Dutch oil fields and control of trade routes to the Orient.
- "It is not improbable that this country will be compelled to apply the Neutrality Act and ultimately become involved."

[5]

1938

- FE 44 The MA in Tokyo reported on 6 January that the amicable settlement of the Panay Case should not obscure the fact that nationalistic groups in Japan harbor "considerable irritation and ill-feeling" toward the United States because of our "interference in the affairs of East Asia".
- FE 58 Japanese often reiterated that the United States "does not understand Japan", or "fully recognize the justice of Japan's stand", and in
- FE 59 so doing they made it evident that "understanding Japan" really meant giving her a free hand in East Asia.
- FE 59 The Japanese Foreign Minister stated in March that "Japan desires stabilization in the Far East, with herself as the central figure", and that "there will be no conflict between Japan and the United States as long as they understand each other".
- FE 60 Tokyo reported on 18 March that the Shiunso Society, a Japanese nationalist group, stated in newspaper advertisements addressed to the American people that the way for the United States to get "peace in the Orient" was to stop oppressing Japan; "... respect the position of Japan, the greatest power in the Orient; ... make absolutely no political activity or economic operations having political significance without the understanding of Japan; ... guide other Powers to take the same attitude".

FE 75 Tokyo reported on 1 July that the Japanese Army Air Corps was undergoing a "most widespread modernization program." On 1 July the number of Army planes were estimated to be 1,455 with 305 additional planes ordered but not delivered. The increase in first line army planes from 782 to 1,093 and the decrease in obsolescent planes from 435 to 359 during the preceding 12 months was "due largely to the tremendous Army production program which commenced during the spring of 1937 and continues at present". Japanese aircraft production facilities were unable to meet the increased demands of the Army and Navy, however, and the Army bought 80 Fiat bombers abroad. During the preceding year Japanese army squadron strength increased from 59 to 80, and on 1 July army pilots numbered 1,600, with 350 trained during the preceding 12 months.

FE 68 Increasing Japanese irritation over the foreign aid rendered the
FE 72 Chinese Government by foreign powers was reflected in numerous
FE 73 reports from the Far East during 1938. France was especially singled
FE 74 out for allowing the use of French Indo-China railways in transporting
FE 77 material to the Chinese and for objecting to Japan's apparent intention
FE 78 of occupying Hainan Island.
FE 85
FE 86
FE 77

The MA in China on 15 July quoted Prince Konoe as saying that "foreign aid alone is prolonging the life of the Chiang Kai-shek regime" and that "Japan would take both economic and diplomatic measures to dissuade the foreign powers from aiding 'Chiang Kai-shek'".

FE 68 While the Japanese were using discriminatory measures and other
FE 72 pressure against French, English, and American interests in Japanese-
FE 85 occupied territories in the hope of stopping foreign aid to China, Ger-
FE 68 many tried to strengthen its ties with Japan by such acts as the
recognition of "Manchoukuo" on 12 May, the ban on German exports
FE 72 of arms to China in June, and the withdrawal of German military
FE 77 advisers from China in July.

FE 73 [8] Russo-Japanese relations remained strained as a result of
FE 78 continued delay in renewal of the fishing agreement and recurrent
FE 79 border incidents, especially the fighting at Changkufeng during July
FE 82 and August.

FE 80 During the European crisis over Czechoslovakia in September, the
FE 81 MA in China reported by radio that a Japanese-controlled newspaper
in Tientsin and a Japanese military spokesman in Shanghai indicated
that Japan was prepared to support Germany and Italy even to the
point of war.

FE 85 After the League of Nations authorized the imposition of economic
sanctions upon Japan, but left it up to the individual nations to take
action as they saw fit, the MA in China commented on 12 October that
FE 86 such decisions mean nothing unless strong nations "are willing to go
to war to back them up". Japan answered this League of Nations
action by severing all relations with that organization on 2 November,
but the Japanese retained their Mandated Islands.

FE 87 Tokyo reported that the United States note of 6 October relating
to the Nine Power Treaty brought Japanese newspaper comments,
probably government-inspired, to the effect that this treaty was "out-
moded" and could not "be made a cloak for political interference with
Japan's aims."

FE 61 The Japanese Army continued its advance in China, having over-
FE 77 run over 500,000 square miles of territory in China by the end of 1938.
FE 86 Japan began to consolidate her military and economic gains in North
FE 60 and Central China, and the semi-official North China Development
FE 72 Company and the Central China Development Company emphasized
FE 76 the expansion of communication and transportation facilities, and the
FE 73 production of iron, steel, coal, and synthetic oil to strengthen the
Japanese military machine.

[9]

1939

FE 92 The territorial expansion of Japan was advanced early in the year
by the occupation of Hainan Island. On 28 February Tokyo inter-
preted the significance of recent Japanese pressure upon French Indo-

- China and related to this aggression the strategical implications involved: "The occupation of Hainan is so obvious a form of pressure on the French that it is universally assigned a political motive of reaction, in spite of official denials. Occupation of the island not only gives Japan a potential naval base right in the front-yard of China, but it also provides a close-in base leading into China and French territory." Concurrently, the Military Attache evaluated the reaction of the Japanese press to "recent manifestations of Japanese foreign policy": "These developments [i. e., United States sale of planes to France and proposed fortification of Guam], along with parallel diplomatic action by the United States, England and France concerning Hainan and previous issues, are widely interpreted as indications of abandonment by the U. S. administration of the isolationist tradition of U. S. foreign policy, and of an alignment of the democratic powers against the authoritarian states including Japan." FE 92
- subsequent statement from the Military Attache in China on 7 March 1941 reported the Japanese occupation of Hainan as a strategic move directed toward French Indo-China, Hong Kong, Singapore, and the Philippines rather than a military expedient for current operations in China. FE 94
- On 8 March Tokyo dispatched further evidence of Japanese offensive measures designed to bring the nation closer to a war-footing. Of particular significance was the proposal of a new "Law for the Protection of Secrets Concerning Military Resources," supplementing the provisions of the Military Secrets Protection Law of October 1939. FE 95
- The rapid expansion of Japanese armaments was reflected in the 1939-40 budget passed by the Diet. On 10 April Tokyo reported the sum for defense amounted to ¥6,432,155,345, which was 73.9 percent of the total budget. Both the Army and the Navy were improved and modernized, large sums being allocated to artillery, aviation, motorization, and new ships. FE 103
- The Combat Estimate of Japan, revised by G-2 as of 31 March 1941 with minor changes in April, May, and July, showed that Japanese armed strength had increased very considerably during the preceding years. Comparisons of figures from 1936 and 1939 Combat Estimates follow: FE 322
- FE 101
- FE 7

	Principal combatant ships.....	200	(1,500,000)

- FE 101 The following concluding paragraphs in the 1939 Combat Estimate show the efficiency of Japan's Armed Forces and the strength of its strategical position:
- "The Japanese sailors are well trained. The efficiency of the personnel of the Japanese Navy is equal to that of the British or American Navies. The morale is excellent. The Japanese Navy is modern, balanced, and ready for prompt service. The Combined Fleet works on a schedule of employment that is certain, with the quality of personnel, to produce a highly efficient organization, and the one will operate smoothly and effectively in time of war.
- "Naval aviation has developed from fair to good, and is being rapidly expanded with modern planes and equipment.

Geographical

"Prior to July, 1937 Japan was essentially a militarily strong island empire whose principal islands more or less paralleled the east coast of the Asiatic Mainland from Kamchatka to a point opposite Hongkong. To the eastward her mandated islands dotted the Pacific north of the Equator between the Philippines and Hawaii. On the continent of Asia lay the Japanese territory of Korea and the Japanese controlled and dominated state of Manchoukuo.

[11] "In March, 1939, after some 20 months of war with China, Japan had added to the territory under her military control over 500,000 square miles of eastern China, including the principal ports, centers of trade and industry, railways and inland waterways, and also the principal Chinese islands southward to include Hainan. Voluntary relinquishment by Japan of the dominant influence so acquired appears highly improbable. In consequence, she now has ready access to important raw materials in China; blocks all sea approaches north of Haiphong to the southeastern coast of Asia, flanks all routes from the east to the eastern and northeastern coast of the mainland; and is in a remarkably strong strategical position for defense against any distant naval power.

Conclusions

"The Japanese Army, though the bulk of it is widely extended over eastern China at the ends of long lines of communications, is well organized, trained and equipped. It has been eminently successful during some 20 months of active offensive operations, and its morale is high. By assuming the defensive in China, Japan can concentrate and operate with an effective army of about 1,000,000 men either in the Japanese archipelago or elsewhere in eastern Asia against any new opponent.

"Japan's Navy, standing next in strength to those of Great Britain and the United States, is modern, well balanced, and ready at war strength for active operations. It is relatively strong in battle cruisers, destroyers, and submarines. It would be a formidable opponent to the navy of any power or those of any combination of powers attempting offensive operations in the Western Pacific Area.

"Japan's geographic position is such that her navy on the strategical defensive could from time to time successfully assume the tactical offensive.

"So long as the sea routes between Japan and eastern Asia are under the control of the Japanese Navy it would be extremely difficult for any power or combination of powers to defeat the Japanese Army in Japan or in the eastern part of the Asiatic Mainland."

FE 102 On 1 April the Military Attache in Tokyo reviewed tactical doctrines of the Japanese Army, as established by new combat regulations of 1939 and by observation of current military operations in China. The report stated that the Japanese were making great efforts to modernize the Army and were spending large sums on aviation, motorization and mechanization, and on increasing the strength of the division artillery. They were at the same time endeavoring to increase the efficiency of organization and tactical operation. Observation of the Japanese Army indicated that it was not a spectacular force but one rugged and capable, and that, "fired with its devotion to duty and patriotism, it would prove a dangerous foe on a battlefield of its own choosing."

FE 104 [12] Tokyo reported on 12 April further legislation enacted to establish the nation upon a more secure war-footing. Articles 2 and 6 of the National General Mobilization Law were invoked to provide 1) governmental limitation of dividends, and 2) governmental regulations of wages in factories employing more than 50 workers and of a maximum working day of 12 hours.

FE 105 In April, the Military Attache in Japan, reviewing the trend in military aviation toward expansion, stated that since the beginning of the war in China, the personnel and aircraft strength of the Army Air Corps had increased 60 per cent. Production had increased 125 per

FE 106

FE 134 An impending crisis in Japanese-American relations was reported on 20 November by the Military Attache in Japan. Included among citations of threatening Japanese policy were the Japanese War Minister's assertions that the Army intended to press the China Incident to a successful conclusion "without over-much regard for public opinion" * * * and that although abrogation of the Japanese-American commercial treaty would undeniably affect Japan's material mobilization plans, "this situation can be met and our policy toward the United States should be a strong one."

FE 188 [14] The year closed with the Japanese opening the lower Yangtze River. With reference to this move, the Military Attache in Japan, in his report of 22 December, estimated that such conciliatory policies might temporarily ease relations but had little long-run significance in view of the ambitious continental policy of the Japanese, from which "they were not likely to be evicted except by force of arms or circumstance."

1040

FE 139 [15] As the year began the serious of the Far Eastern situation was summarized on 8 January by the Chief, Far Eastern Section, Intelligence Branch, G-2, in a confidential lecture delivered to the faculty and students of the Army War College. The concluding remarks were:

"As to ourselves and our interests in the Far East, the future is not a bright one if we cling to the ideal involved in the renouncement of war as an instrument of national policy.

"Regardless of agreements made or to be made between our State Department and the Japanese Foreign Office, the armed forces of Japan have effectively slammed shut the 'Open Door'. It is unlikely that they can be talked into reopening it.

"Our economic stake in the Orient has gone the way of the whole edifice of diplomatic pretense which, for years, has concealed reality in the Far East.

"This stake, by some standards, such as those of national integrity and prestige, is an important one. By other and possibly more practical or business-like standards it is inconsequential, and may well be written off the books.

"The decision as to whether it is worth fighting over is, of course, not one to be made by the members of our profession.

"To one whose task it has been to follow the course of events in the Orient, however, it appears that some clear thinking on the part of the American people, leading to a decision on the question is in order.

"If the decision be that the stake is not worth salvaging, then our Government should cease making futile protests and gestures—futile because they are neither addressed to the group controlling Japan's destiny nor couched in the only language this group understands—that of the sword.

"If the decision be otherwise, we must prepare at once to go the whole way in carrying armed force to Asia, in which case our most dangerous frontier today is not in Europe, as many people would have us believe.

"It lies in the Western Pacific."

FE 140 Reporting on 11 January that the imminent fall of the Abe Cabinet was due in part to Japanese concern over the approaching non-treaty status with the United States, the MA in China stated that Japanese political and military leaders "are anxious to appease us only until their 'immutable policy' of a Far Eastern hegemony is well on the road toward accomplishment. Thereafter they feel they can disregard American opinion and pressure with impunity."

FE 142 [16] In commenting to the Far Eastern Section, G-2, on 18 January on the feasibility of establishing an unofficial American air corps in Free China, Major E. C. Whitehead, Air Corps, stated: "Chennault (now Major-General Chennault) has a high opinion of Japan's ability to conduct air war."

3210 CONGRESSIONAL INVE

- FE 143 Following the expiration of the loan on 26 January, the Japanese were in a "state of delirium" and the abrogation of the trade treaty toward an eventual attack on the Indies.
- FE 144
- FE 146 The Japanese interpellation made to the Chinese Government was a determination to continue the Japanese war policy in Occupied China.
- FE 147 On 30 March the Chinese Government, a current estimate emphasized that Japan's "peace" was only a "peace" in exchange for the exchange of such materials as the scarcity of these materials. It directed the Japanese to consider the application of the loan and its position weighed. Clearly, if the Japanese, the possible loss of the loan to Japanese aggression remaining liberal sentiment in the arms of Germany, the jingo element in the American Government, its fury, regardless of the American Powers. The only result would be to bow before the Western Pacific, or according to G-2, in forwarding the statement in part: "At the time of the attack on Pearl Harbor, the positive economic head. It is well known that the Japanese markets and sources are avoiding this weapon only to effect further destruction. No discernible difference in Japan's course to American power is in the background."
- FE 149
- FE 150 The American non-resistance policy was interpreted as a determination to try to bring about a settlement on 10 April that the Japanese, England and France with the United States China policy in return for the European war.
- FE 151 Tokyo reported on 2 April that the attack on Holland were for the maintenance of the Japanese position so presented as to invite the way for intervention.
- FE 153 The increase in the Japanese war effort for by plans to reorganize the Japanese to improve armaments, to continue the Japanese efforts for the years following the end of the Japanese war, the decrease in the "China" policy, the Japanese campaigns were not excluded from the national budget war.
- FE 322
- FE 152 After the German invasion of Poland, the Japanese concern over the German situation was a major factor in the Japanese naval force in the Pacific Islands.
- FE 154 G-2 informed the Chief of the Japanese naval force in the Pacific Islands.

FE 155 On 31 May, G-2 reported to the Chief of Staff that the Japanese Navy might step forward with its "Southward Advance" as a panacea for Japan's economic ills. Pointing out that the American position with respect to the Pacific area had reached a critical stage, this report stated in part: "Our relations with Japan have deteriorated to such an extent that conciliatory gestures made at this time might well be interpreted by the Japanese as a sign of weakness and fear on our part, whereas threatening acts and gestures, whether or not we are prepared to follow them through to logical conclusions, may push Japan into the camp of the totalitarian aggressors of Europe. No discernible diplomacy has been exercised successfully to mould Japan's course in accordance with our desires. The need appears urgent, therefore, for the formulation and announcement of a national decision [18] as to advantageous and realizable objectives sought by us in the Far East, to the end that the armed services may proceed intelligently to prepare plans in conformity with those objectives."

This G-2 report of 31 May to the Chief of Staff outlined the Pacific situation in part as follows:

1. The Mandated Islands of Japan form a strategic barrier across Pacific sea lanes which menaces American defense and communications lines and cuts the United States off from the rubber and tin supplies of East Asia.

2. The French position in the Far East has deteriorated to such an extent that France has little chance to counter Japanese moves.

3. Japan sees in the present situation a "golden opportunity" to move against England's possessions at Hongkong and southward.

4. Japanese pressure was being exerted on the Netherlands Indies to gain economic concessions.

5. Thailand's policy is reported to be controlled by Army and Navy officers with pro-Japanese leanings.

FE 156 Tokyo reported concentrations of Japanese troops on the islands of Formosa and Hainan on 7 June, while a report dated 10 June stated that the impending American embargo on the export of machine tools had created "quite a furore" in Japan and that agitation for "positive action" against the Netherlands Indies was increasing.

FE 158 The MA in China reported large Japanese military, naval, and air force concentrations on Hainan Island. The present goal is apparently French Indo-China, this report of 12 June added, but the "ultimate objective is of course complete domination of the East Asian seaboard."

FE 159 On 19 June G-2 forwarded to the Chief of Staff details of a Japanese ultimatum to Great Britain which required that the Hongkong and Burma borders be closed and that British troops be withdrawn from Shanghai if a Japanese declaration of war was to be averted.

FE 160 G-2 reported to the Chief of Staff on 20 June that the Japanese attitude toward the United States was stiffening and that the fall of the Yonai Cabinet is indicated, resulting in an Army-dominated regime or even in a military oligarchy. A concentration of Japanese war vessels was directed toward French Indo-China.

FE 161 The increasingly stiff Japanese attitude toward the United States was again reported by G-2 to the Chief of Staff on 26 June, mentioning a Japanese public relations official in New York as saying: "Japan [19] will play ball with Germany to the utter disregard of where this may lead as far as America is concerned". Manila cabled on 28 June that the main Japanese fleet was moving southward, and that landing maneuvers were being held near Palau.

FE 163 Tokyo estimated that Japan had a minimum of 4,040 Army and Navy airplanes of all types, with 1,510 additional planes contracted for and not delivered, on 1 July. The personnel of the Japanese Army Air Corps and Naval Air Service was estimated to total 4,565 officers, 1,350 cadets, and 63,045 enlisted men on 1 July. Army and Navy pilots numbered 5,950. Further improvement in military aviation was expected with the establishment of the Hokota Army Air School for training in light bombing, as this would release the facilities at the Hamamatsu Army Air School for more extensive training in heavy bombardment and would be conducive to more efficient training in both light and heavy bombardment.

FE 169

3212 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- FE 164 On 11 July Tokyo reported that within Japan "the issue is at present sharply drawn between those who favor a closer tie-up with Germany and prompt action against Allied possessions in the Far East, and those who, distrusting Germany or feeling that immediate action is not necessary or desirable, would continue to concentrate on accomplishment of the China venture." Pending a decision, the Japanese Army concentrated troops, ready for action, opposite both Hongkong and the French Indo-China border.
- FE 165 G-2 reported to the Chief of Staff on 20 July that diplomatic relations "between Japan and the United States have deteriorated to an extent that neither threats nor offers of appeasement from Washington would be effective"
- "Resignation of the Yonai Cabinet under Army pressure; and organization of a totalitarian group under Prince Konoye signify a departure of the track for closer alignment with the Axis powers against Britain"
- "To sum up, it is clear that the day has passed when official statements of disapproval from Washington will deter Japan from further aggressive moves. Neither will the negative restraint implied by the American fleet at Hawaii halt ardent Japanese nationalists who are to capitalize upon the present 'golden opportunity' to expand the Japanese Empire"
- "It is improbable that Japan will take any positive action against Great Britain at Hongkong or at Singapore until she knows the outcome of the present phase of British-German hostilities. It is predicted with reasonable certainty, however, that the foreign policy . . . will from the outset be more aggressive with respect to India, Burma, French Indo-China, and the Dutch East Indies, and with respect to foreign interests and concessions in China."
- FE 166 [20] Tokyo reported that Army Districts in Japan were reorganized, effective 1 August, to increase the efficiency of the Japanese Army for national defense, training, and administration.
- FE 172 In the opinion of the MA in Tokyo the shake-up in the Japanese foreign service probably indicated an effort to remove men who were pro-American or pro-Allied. He reported on 4 September that the number of Japanese advocating an alignment with the Rome-Berlin Axis was increasing and that from a military standpoint the Japanese Army would not find it difficult "to take over the northern part of China."
- FE 174 On 19 September Tokyo reported that the Japanese Army continued to avoid further commitments in China in order to be ready for action if and when a favorable opportunity presented itself for a new venture elsewhere. If the European war seems to point to a long-drawn-out struggle, the Japanese will eventually decide to seize the desired territories, counting on having time to organize their conquests for dealing against the final European victor. The Japanese felt that the United States was certain to object to this expansion, was likely to retaliate by economic means, and might possibly oppose aggression with armed force. The Japanese believed time would be on their side, however, they felt it would be years before America's naval and military strength could be built up sufficiently for major operations in the Far East while the German menace still existed. The most radical immediate action, however, would probably be a move across French Indo-China with or without acquiescence, to hasten the conclusion of the China War.
- FE 175 G-2, Manila, reported on 1 October: "It is the opinion of this office that the Japanese are in deadly earnest in all their activities and aspirations." The United States lacked sufficient "visible evidence of power in the Far East, and war with Japan would come unless corrective action were taken at once."
- FE 177 Tokyo reported on 5 October that the Tripartite Pact was signed after Japan realized that the United States was irreconcilably opposed to Japanese expansion in Asia. Japan has decided to change her traditional policy "at least quiet relations" with the United States to pursue a course to satisfy her national "ambition." The statement of Prince Konoye, in which he flatly declared that the question of peace or war in the Pacific "will be decided by whether Japan and

United States respect and understand the stand of each other" expressed the determination of the Japanese not to be dissuaded from their present ambitions by any half-way measures. Other reports from Japan, China and the Philippine Islands during October emphasized the tense state of Japanese-American relations and the probability of continued Japanese aggression.

FE 178
FE 179
Manila

G-2

FE 180
FE 181
FE 182

On 31 October the MA in China reported that if a non-aggression [21] pact could be signed with Russia, Japan would probably continue her southern expansion regardless of its effect on Japanese-American relations.

FE 184 Details of a new 10-Year Plan to weld Japan, China, and "Manchukuo" into a close-knit economic unit were transmitted from Tokyo on 18 November, with comment on the great potential strength of Japan's economic position if such plans were to succeed.

FE 185 G-2, Manila, reported on 20 November that Japanese troops on the islands of Hainan and Formosa were undergoing training in extensive landing operations. Stating that Japan would not attack if we were strong enough to afford reasonable chance of failure, Manila recommended that several divisions of the Philippine Army be mobilized at once and that essential war materials be shipped to the Philippines. Large-scale troop reinforcements from the United States were not believed immediately necessary.

FE 186 Reports from both China and Japan discussed the Japanese Army's evacuation of Kwangsi Province in November, and indicated that Japan's next move would probably be into French Indo-China. The MA in China, in commenting on Japan's plans with regard to the troops being assembled on the islands of Formosa and Hainan, observed that "some even presume an attack on the Philippines via Lingayen Gulf".

FE 188 Tokyo reported on 12 December that Ambassador Nomura's mission to try to improve Japanese-American relations was probably "doomed from the start" because the Japanese Government was "completely in the hands of the more chauvinistic elements" and was not prepared to make concessions in the Japanese program for East Asia which would be acceptable to American opinion.

G-2 13 On 27 December G-2 reported to Mr. John J. McCloy, Special Assistant to the Secretary of War, that by 1 September, 1941 the Japanese Army Air Corps and Naval Air Service would have an estimated 200 combat squadrons, averaging about 12 planes per squadron. These Japanese air combat units would include approximately 50 squadrons of heavy bombers and 80 squadrons of medium and light bombers.

[22]

1941

JANUARY

FE 190 In forwarding the English text of the Japan-Thailand Treaty of Amity, the Tokyo MA called attention to the progress of Japanese designs on French Indo-China and on bases for operations against Malaya and Singapore. G-2 interpreted the concurrent southward movement of part of the Japanese fleet to be a form of pressure on the French in the French-Thai dispute. The Chief, FE, transmitted to the Chief of the Intelligence Branch a report from the American Ambassador at Tokyo that the Japanese were rumored to be planning a mass attack on Pearl Harbor.

FE 193 A Manila intelligence report of 18 January to G-2 said in part: "Steps should now be taken by the War Department to designate the Department Commander as Commander-in-Chief, United States Army Forces in the Far East, with appropriate temporary grade. Several divisions of the Philippine Army should be ordered mobilized and mustered into the Federal Service at once, so that they may become integrated in the combat team, and so that their organization, equipment, and training can become perfected prior to the need for their use. This is a front line. The covering force is too small to permit

of a long-range mobilization have an expeditionary force of 10 divisions, 2 brigades, 1 regiment artillery, 1 regiment various types. An analysis indicates that Japan is not now in a position to effect a campaign under favorable conditions prove fatal."

FE 197 Japan was reported by Spratly Islands southwest parachute troops arrived China.

G-2 19 G-2, estimating Alaska situation:

G-2 19 "In the first phase of a reasonably be expected to peninsula and other under pressure to southeastern Alaska directly upon the outbreak reinforced with aviation, aircraft : : : :

[23] "In any case, in and surprise attacks again as against Alaska."

FE 206 Tokyo reported on the Security Act and said that many sources of information

FE 202 was promoting border trans serving the peace" between

FE 203 commented on Japan's willingness to tolerate no interference in inclusion of the Netherlands many Japanese divisions all of which indicated Japan under certain conditions in Indies.

FE 215 G-2 transmitted to War position of the Japanese near Formosa (between 4 vessels) could be used to be an attempt to threaten might be preparation for Hainan. On 12 March Chinese

FE 227 recommended "the immediate

- Service of at least five divisions of the Philippines Army. The Advisability of immediate action cannot be overstressed." The German Ambassador at Tokyo asked that Japanese shipping lines help evacuate German nationals from the Philippine Islands. According to the Singapore MO, [24] the British estimated that the Japanese could move six divisions simultaneously against Malaya, of which two would assail the northern border and the others would land at Kota Bharu, Kuantan and Mersing.

May

- FE 226 G-2 informed the Under Secretary of War of the phenomenal increase in Japanese purchases of oil drilling and processing equipment immediately before the Export Control Act went into effect in February. Meanwhile on 2 May Tokyo cabled a warning that the reported increases of Japanese strength in Formosa, Hainan and French Indo-China were greater than normal for the China Incident and "may be there in readiness for a move against Singapore or East Indies." A report from Chungking on field operations warned that the Japanese would probably attempt an all-out drive to conclude the China Incident in order to have a free hand for southward expansion should the United States become involved in the war in Europe. In transmitting the Japanese Army Budget for the fiscal year 1941-42 the Tokyo MA contrasted it with the budget for the preceding year, and pointed out that the China Incident expenditures alone could not explain its expansion.
- FE 228 Convinced that war with Japan was inevitable, G-2 prepared and issued a *Handbook on Japanese Military Forces* (TM 30-480, 273 pp., 14 May). A warning not to underrate the fighting ability of the enemy was sounded on page 218 as follows:
- "Tactics are without meaning unless studied in relation to the human agent who will apply them in battle. This manual has avoided excursions into the field of Japanese military psychology and national characteristics; however, it should be read with a constant eye to the nature of the Japanese Army for which these tactics are designed. It is an army easily misjudged by the foreign officer who sees first of all its straggling columns, slovenly dress and unmilitary bearing. Just as there is no glitter to its accouterments, there is little theoretical excellence to recommend its tactics; but it is an army which excels in durability and performance. In the same way that its infantry 'straggles' 30 miles a day and arrives at its destination on time with surprisingly few casualties, its command and staff can be counted on to evolve plans and orders which, without being brilliant tactical combinations, are practicable and workable schemes for getting a maximum performance from the Japanese soldier. Furthermore the Japanese Army which fought with bows and arrows in 1870 is thoroughly capable of learning from its mistakes and advancing with the new developments of warfare. While its swaggering self-confidence may receive some rude jolts in a major war, it is a rugged army fired with a devotion to duty and a narrow patriotism which make it a dangerous foe on a field of its own choosing."
- G-2 64 [25] On 24 May G-2 prepared for WPD an estimate of the current situation which named the isolation or containing of the Philippines and an attack of Malaya, British Borneo and the Netherlands Indies as possible courses of Japanese action.
- FE 235 G-2 prepared an *Economic Estimate of Japan* (61 pp. 27 May, 1941) which in assessing Japan's economic war potential stated (pp. 59-61): "Japan's present policy is to extend political control over a vast region. Raw materials in this area are to be conscripted and markets opened and held by force. The wider this territory becomes the larger become the requirements for materials to extend such an economy. Germany in Europe is a current example of Japan in Asia. Japan realizes now that only by military occupation can her bloc economy succeed.

JUNE

- FE 253 Tokyo reported that the Japanese Government was facing great difficulty in preserving restraint vis-a-vis internal public pressure for strong and direct action toward the Netherlands Indies after the failure of trade negotiations at Batavia. On 4 June Tokyo also wrote that in May certain Japanese officers attached to northern units were receiving inoculations against yellow fever.
- FE 239
- FE 242 Hongkong reported that on 14 June twenty-seven Japanese transports conveyed by twenty-one destroyers were off the China coast travelling [27] southward, and expected to be off Hongkong on 17 June. Manila on 24 June stated: "The removal of the U. S. Fleet from the Pacific will unleash Japan." Manila also forwarded a British report that 25,000 Japanese troops had received parachute training in China and Japan and that 1500 of these were stationed near Canton. On 25 June Hongkong further reported that three convoys, totalling about 50 transports, had been seen during the preceding fortnight and were believed to have gone to the Pescadores or Formosa. The MA, Mexico, FE 243 forwarded a report that the Japanese were constructing special small submarines for attacking the American fleet in Pearl Harbor, and that a training program then under way included towing them from Japan to positions off the Hawaiian Islands, where they practiced surfacing and submerging.
- FE 255 On 27 June Chungking cabled the opinion that the Japanese would be reluctant to make a major move until results of border incidents revealed the potential of the Russians, and that the sudden German offensive against Russia had caused a temporary lull in the threatening attitude toward the United States.
- FE 250

JULY

- FE 256 On 1 July Manila relayed a British Intelligence report that partial mobilization of all forces was under way in Japan.
- FE 271 On 12 July Hongkong reported 19 Japanese transports moving southward from Formosa. On the same day Tokyo cabled: "Considerable scale of mobilization and unusual secrecy attending it now beyond question". Tokyo believed the Government, however, was still seeking to avoid positive commitments. Two days later Tokyo cabled that it was "now evident that large scale mobilization underway covered by unusual secrecy. Some newly mobilized men being sent to Manchoukuo but unable determine number or whether any being sent south."
- FE 266
- FE 265
- FE 270
- FE 274 The Chief of Staff was informed by G-2 on 15 July that on 12 July the Japanese delivered a virtual ultimatum to Vichy, with a 20 July deadline, in which they demanded the use of eight air and two naval bases in southern French Indo China.
- FE 279
- FE 273 The Singapore Observer on 16 July summarized the military situation together with notes on naval and air defense potential, and concluded that "The defense of Malaya requires six brigades. . . . The question of the defense of Singapore, however, is largely controlled by circumstances in other theaters of the present war. . . ." Singapore also estimated that Japanese strength in French Indo-China was approaching 40,000 men and believed there would be forcible seizure of additional bases. The Chinese G-2 was reported to anticipate an early invasion of French Indo-China, and to believe that areas newly ceded to Thailand were to be used as air bases. Some Japanese ships calling at
- FE 287
- FE 279
- FE 272
- FE 258 [28] Manila were commandeered by the Tokyo Government and
- FE 262 forced to abandon schedules.
- FE 280 London reported belief that the Japanese had completed all preparations for taking over French Indo-China bases. Manila reported the "new Japanese Cabinet, in our opinion, war-minded and capable of taking action." In a strategical estimate for the Chief of Staff on
- FE 281
- G-2 94 18 July G-2 reported Japan to have 1,064,000 tons of naval shipping and 6,200,000 tons of merchant shipping, and estimated that Japan had ground strength of 62 infantry divisions, probably to be increased to 64 by 1 July 1943. A summary of aircraft production potential on the

3218 CONGRESSIONAL INVESTIGATION PEARL HARBOR

- G-2 95 same date indicated "a maximum annual production of 7000 engines. These totals would gradually diminish of hostilities with a major power. However, continue the Axis might alleviate this condition." On the intelligence, G-2 recommended to the Chief of Staff a complete embargo be instituted by the U. S. A.
- FE 285
- FE 285a On 26 July Tokyo cabled: "Largest single demobilization for China War now under way under a secrecy involving restrictions on movements foreigners." Some Japanese in Tokyo interpreted the of Japanese credits as the first step toward a final mobilization. Additional manpower mobilization was reported. The FE 286 their vessels to defer entering any American Pacific FE 278 to the Canal, any British port on the Indian Ocean FE 284 port, certain ports of East Africa, or any Australian Netherlands Indies, or Philippine ports.

AUGUST

- FE 287 The occupation of southern French Indo-China was
FE 305 drastic shipping control measures were instituted Cabinet. Tokyo reported five main forces, composed (54 divisions) located overseas. Japan demanded the FE 306 Thai naval and air bases. Bangkok commented: "A Japanese Bangkok Mobilization move is anticipated due to FE 288 Chungking forwarded British estimates that Japanese exclusive of baby tanks and armored machine gun companies, each consisting of 150 tanks, with an equal number. In addition the MA at Chungking forwarded the FE 307 that the actual strength of the Japanese Army was forty and twenty independent brigades (approximately fifty with 300,000 men in training, possibly ready in three reserves were believed to number 210,000. Eleven organized from reserves already trained and sixteen training. These figures include corps, army and sea artillery was believed to be available for only eight [29] Technical equipment was believed to be insufficient potential strength was estimated by the Russians divisions.
- FE 290 Estimates were forwarded from London that no Japanese were mobilized during June and July, and FE 302 estimates, forwarded from Chungking, placed Japanese 49 divisions, with 54 available by the end of August would be complete.
- G-2 107 The Chief of Staff was informed that G-2 believed Government, with the sanction of the Emperor, had course of expansion southward for reasons of economic security, and that the "co-prosperity sphere" would "regardless of other developments in the world situation these policies, it was believed that Japan intended military pressure on French Indo-China and Thailand for an attack on Siberia, but to be made at her convenience. It was believed that Japan would resort to every means to keep the United States out of the war, but the following sounded:
- "The great danger in the situation lies in the fact that Japanese military and naval authorities are in complete control of their Government. We have seen an extraordinary example of discipline and self-control in the military . . . We can, unfortunately, expect no such restraint on the part of the Japanese military. We think they will at least follow for a time the policies of the Government."
- "The exercise of increasingly strong 'power' of the United States is clearly indicated."
- FE-300 Chungking reported Japanese plans to take over concessions and to capture American marines in Shanghai.
- FE-291 Tokyo estimated on 5 August that the aircraft

- FE-292 at maximum wartime capacity, could produce annually the equivalent of 4,500 two-place, single-engine military airplanes. Actual production for the period 1 July 1940 to 30 June 1941 was estimated to be 2,700 combat aircraft. It was concluded that since the end of 1939 the aircraft industry had increased production by about one-half, and capacity by about two-thirds, while completion of construction then in sight would give a capacity double that of 1939. The number of employees engaged in the manufacture of airplanes had increased 55 per cent, and employees in engine manufacturing plants had increased in number 57 per cent from 1938-39 to 1940-41.
- FE-292

September

- FE-311 Tokyo MA reported on the organization and high quality of the [30] Japanese military signal communications system, and commented that Japanese radio equipment was "comparable to our own in every respect".
- FE-316 Japan set up a National Defense General Headquarters in a move to improve arrangements for the defense of Japan Proper.
- FE-317 Invocation of the last drastic measures of the 1938 National Mobilization Law (revised), and a tense political atmosphere were reported by Tokyo to indicate that the day for a final decision on "immutable" policies was drawing near. Internally the nation was mobilizing for total war. Two hundred and forty Japanese planes were reported in French Indo-China. Economic, diplomatic and military pressure was being brought to bear on Thailand by the Japanese.
- FE-310 The crisis in Japan was described by G-2 on 23 September for the Chief of Staff, with the repeated recommendation that "The exercise of increasingly strong 'power diplomacy' by the United States is clearly indicated." The Singapore MO forwarded a British Far Eastern estimate that seasonal weather conditions precluded an attack on Singapore before spring. Manila wrote that Japanese morale was high, almost bordering on fanaticism, and while added emphasis was being placed on military training in schools, older students were being required to abandon some of their classes for industrial work. A
- FE-314 G-2 summary of Japan's national defense budget showed 63.14 per cent of the total National Budget was to be used for war purposes in the fiscal year 1941-42.
- G-2 124
- FE-318 G-2 prepared for the Chief of Staff a *Brief Periodic Estimate of the World Situation* for 3 September-1 December 1941. Although in summary it was thought that "her most likely, but by no means certain, course is inaction", the courses of action thought to be open to Japan included an occupation of Thailand in disregard of American opinion, the seizure or isolation of Hongkong and the Philippines and an attack upon Singapore or an attack upon Burma and the Burma Road. As for the most probable action, it was believed that—
- FE-315 "Japan, beset with uncertainties, will probably 'buy' time by entering into negotiations with the United States. A cabinet upset in Japan, a not unlikely event, will change the whole picture. The present [third Konoe] cabinet, however, will initiate no additional aggression on the part of Japan until all diplomatic means of relieving pressure have been explored and exhausted. This does not preclude independent action on the part of Japan's armies in the field . . ."
- FE-322 The following is an extract from the combat estimate of the same document:
- G-2 116 "Japan has an active army of about 2,000,000 including an air [31] force of 55,000 and a trained and partially trained reserve of 3,500,000 men.
- "The active forces are deployed over a wide area from Karafuto and Manchoukuo in the north to the Southern French Indo-China—Thailand border in the south. The estimated number of active divisions or their equivalent is 68, plus 15 depot divisions in Japan Proper. Japan has recently mobilized approximately 500,000 reserves which have been utilized as replacements and in forming new units included in the above estimate.
- "Japan has been withdrawing a considerable number of her troops from China and despatching them to Indo-China and Manchuria. Some

of these have been replaced by Manchurian and puppet troops. Since the outbreak of the Russo-German war in Manchoukuo have been increased from 8 to 19 divisions including 4 tank regiments and 4 cavalry regiments about 500,000 officers and men. The Japanese Army is an efficient fighting force. Officers are well qualified for their various duties in peace and war. The staff has been trained during difficult tactical operations in China. The enlisted men are somewhat lacking in initiative, are well trained, extremely well disciplined, courageous and aggressive to the point of fanaticism. The Japanese have been consistently successful in tactical point of view and only combat with a modern army will determine Japan's relative efficiency compared to other armies. Japan's army is physically hardy and psychologically loyal to the Emperor, devotion to duty and a fanatical spirit which make it a dangerous foe on the Asian continent.

"The Japanese Army and Navy air forces have made great progress since 1937. Personnel strength of Army and Navy air forces combined is approximately 3,743 combat planes. The Army squadrons and the Navy has 124 squadrons. Plane design has been of formidable opposition has left them undisputed. Four years of continuous air operations have increased the proficiency of Japanese aviation in no small degree. Recent acquisition of new planes and technical advisors has contributed to their proficiency.

"The Japanese Army is the best equipped army in the world, however, is inferior to that of any of the modern armies. The shortage of raw materials and production capacity for a large number of new divisions which can be organized, even partially trained manpower is ample for her anticipated needs. Personal equipment appears to be sufficient and in general there is a shortage of organizational equipment such as other mechanized equipment, antiaircraft weapons and artillery.

"Japan has a navy consisting of approximately 20,000 officers exclusive of about 20,000 in the naval air corps. The navy strength comprises over a million tons already under construction. The navy is divided into two main fleets, the Combined Fleet and the Japanese Naval Force. The Combined Fleet consists of the North, Central and South Divisions. The Combined Fleet is based in home waters.

"The Japanese naval personnel is well trained—better trained than that of the British and American navies. The fleet is modern, well balanced, and ready for prompt service. The navy is strong in aircraft carriers and tenders; it would be a serious opponent to the navy of any power or those of any powers attempting offensive operations in the west.

October

G-2 129 On 2 October, G-2 prepared a report for the Chief of Staff. The crisis in Tokyo, described Konoe's desire to maintain peace and advocated forceful diplomacy vis-a-vis Japan, and the possibility of increasing military and economic pressure.

FE 327 On 14 October Hongkong reported the presence of Japanese ships in the Pearl River.

FE 331 Commenting on heavy troop movements into Fukuoka, Tokyo concluded on 20 October that "If the rumored increase in the number originally agreed upon there cannot remain, it will be to the intention behind it."

FE 332 Tokyo reported that General Tojo, on becoming Prime Minister, his status as an officer on the active list, an unprecedented move, and concluded that the third Konoe cabinet fell because of army criticism of its policy towards French Indochina. Conversations in Washington, and policy vis-a-vis America.

FE 329 The Chief of Staff was further advised by G-2 that the person selected by General Tojo may be expected to have a strong background, will be otherwise anti-foreign and highly nationalist.

- FE 335 Chunking reported the official French Indo-Chinese view to be that the Japanese would attack Thailand about 15 November. London
- FE 334 cabled "Japanese troops in Indo-China will be strengthened as follows: 38,000 there now; an estimated 20,000 enroute, and an additional 20,000 included in Japanese plans." A general southward movement of
- FE 336 Japanese shipping in the Western Pacific was reported on 27 October from Singapore, together with intelligence that aircraft carriers and 60 flying boats, fighters and bombers were operating in the Mandated Islands.
- FE 328 The China MA cabled that "Increased Nazi activity in Japan plus the cabinet crisis and attacks on U. S. by spokesmen and press considered strong evidence of drastic action in the near future."
- FE 339 [33] By radio on 29 October Manila reported that the "C in C combined naval and air forces" had been ordered to Takao, Formosa, where it was believed an expeditionary force was being organized.
- FE 340 On 30 October Chungking radioed that Japanese strength in French Indo-China was then 57,000 troops, and steadily increasing in numbers. He anticipated a possible drive through Yunnan toward the Burma
- FE 341 Road. Thailand was reported ready to capitulate in the hope that the country would be saved from the ravages of war.

November

- FE 343 The G-2 *Estimate of the Far Eastern Situation* prepared for WPD on 2 November stated the probabilities of an attack on Thailand, the containing or isolation of the Philippines and Hongkong, the seizure of the Netherlands Indies, and a possible direct attack upon Singapore.
- FE 347 G-2 on 10 November, concurred in a British opinion that Japan
- FE 348 no longer felt that it must make every effort to avoid war with the
- FE 346 United States, and Kurusu's trip was reported by G-2, Manila, to be for the purpose of determining if America's stand was a bluff. The
- FE 358 Japanese Consul-General at Batavia recommended that on the outbreak of war all Japanese should report promptly to the Netherlands Indies authorities for internment, thus avoiding violence. The Singapore
- FE 345 British, however, were reported by the U. S. MO to believe that no attack could be expected before April because of the prevailing northeast
- FE 347 monsoon over Malaya. British opinion in Tokyo, relayed by the London MA, was that Japan would find it too difficult to attack Malaya or the Burma Road and hence might be expected to attack the Netherlands Indies.
- G-2 147 On 15 November G-2 reported to the Chief of Staff that the Japanese were equipped to carry on chemical warfare, and had done so upon occasion in China and "in the opinion of G-2, they will undoubtedly use gas whenever and wherever it seems necessary or profitable for them to do so."
- FE 352 On 16 November Tokyo estimated production of aircraft at 200 planes per month for the Army. All factories in the aircraft industry had gone on a 3-shift 24-hour day in mid-June. The MA estimated that the current monthly maximum for production was 420 military planes, including trainers.
- FE 354 Conclusions reached in a summary of British Intelligence as of 18 November, were that (a) failure of agreement in the Washington talks would require a major Japanese decision whether to risk probable war; (b) Japan would probably not attack Siberia at that time; (c) unless agreement was reached in Washington, the war in China would continue; (d) Japan probably did not intend to attack the Burma Road at that time; (e) the occupation of Thailand, best possibility for the [34] moment, would pave the way for an attack upon Malaya later, yet minimize the risk of a general war.
- FE 356a Based on all the information available, including that from the State Department and the most secret sources, and after consultation among G-2, WPD, and the Navy, a message was dispatched on 24 November from the Office of the Chief of Naval Operations to the Commanders-in-Chief, Asiatic Fleet (Manila) and Pacific Fleet (Pearl Harbor) and the naval commandants at San Diego, San Francisco, Seattle and Balboa with the request that senior army officers in their respective areas also be informed. This message stated, among other

FE 361c instructed them to memorize a prescribed emergency key word. They were further instructed to destroy all codes and ciphers except three cipher systems which could be readily destroyed and, when it became necessary to destroy these, to rely solely upon the memorized key. A copy of the message to Peiping was sent to the American Military Observer in Hongkong for his information.

G-2 159 A supplementary estimate by G-2 of the military situation on 5 December raised the Japanese active army air force figure to 65,000. The trained and partially trained army reserves were estimated increased to 4,750,000. Personnel figures for the naval air forces were raised to 35,000 men. Figures for combined army and navy [36] plane strength were raised to 5,353 combat planes, of which the Army had 2,362 (136 squadrons) and the Navy 2,991 (159 squadrons). This estimate concluded that:

"Japan, because of her geographic location including her bases on Formosa and Hainan, flanks all sea approaches to the southeastern coast of Asia north of Saigon; lies athwart all routes from the east to the eastern and northeastern coast of the mainland; and is in a remarkably strong strategical position for defense against any distant naval power. The Formosa base is the key to this position; neutralization of Formosa would imperil all her troops and installations south of Japan proper. However, Japan's geographic position is such that her navy on the strategical defensive could from time to time assume the tactical offensive. Japan's greatest weakness lies in the vital necessity of keeping open the water lines of communication to her forces in central and south China and Indo-China over routes that are vulnerable to underwater and air attack from hostile bases in the Philippines, Malaya, Burma and China."

FE 361d On 5 December G-2 instructed G-2, Hawaiian Department, to confer immediately with a naval officer on duty at Pearl Harbor, who had learned from most secret sources that weather broadcasts from Tokyo would include information regarding Japan's intention to break diplomatic relations with certain designated powers including the United States.

FE 362 On 6 December G-2 reported to the Chief of Staff that the Japanese had 125,000 troops and 450 planes in French Indo-China, 50,000 troops and 200 planes on Hainan and 40,000 troops and 400 planes on Formosa.

FE 363 On the day before the attack on Pearl Harbor a Japanese convoy with naval escort appeared off Cambodia Point in the Gulf of Siam.

FE 366 Melbourne radioed that on 6 December the Netherlands Far East Command had ordered the execution of mobilization Plan A-2 upon learning of Japanese naval movements out of Palau.

FE 366a On the morning of 7 December, G-2 learned that the Japanese Ambassador had received instructions to deliver to the Secretary of State at 1 o'clock in the afternoon a statement which rejected an American proposal of 26 November and which asserted that it was impossible to reach any agreement through further negotiations. Based on this information the Chief of Staff after consultation with G-2 and WPD, wrote a first priority radiogram which was dispatched about 12:17 p. m. to the Commanding Generals of the United States Army Forces in the Far East, Caribbean Defense Command, Hawaiian Department, and Fourth Army. The message read as follows:

[37] "Japanese are presenting at one p. m. Eastern Standard time today what amounts to an ultimatum also they are under orders to destroy their Code machine immediately stop Just what significance the hour set may have we do not know but be on the alert accordingly stop Inform naval authorities of this communication stop".

TOP SECRET

EXHIBIT B TO ARMY PEARL HARBOR BOARD

TOP SECRET TRANSCRIPT

From: Tokyo (Toyoda).

To: Honolulu.

September 24, 1941.

J-19.

#83.

Strictly secret.

Henceforth, we would like to have you make reports concerning vessels along the following lines insofar as possible.

1. The waters (of Pearl Harbor) are to be divided roughly into five sub-areas. (We have no objection to your abbreviating as much as you like.)

Area A. Waters between Ford Island and the Arsenal.

Area B. Waters adjacent to the Island south and west of Ford Island. (This area is on the opposite side of the Island from Area A.)

Area C. East Loch.

Area D. Middle Loch.

Area E. West Loch and the communicating water routes.

2. With regard to warships and aircraft carriers, we would like to have you report on those at anchor, (these are not so important) tied up at wharves, buoys and in docks. (Designate types and classes briefly. If possible we would like to have you make mention of the fact when there are two or more vessels along side the same wharf.)

23280 Trans. 10-9-41 (S)

3236 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

From: Washington (Nomura).

To: Tokyo.

October 14, 1941.

Purple.

#943 (Part 1 of 2)^a (To be handled in Government Code).

I had an interview with Rear Admiral TURNER. If I sum up what he me, it is this:

"What the United States wants is not just a pretense but a definite proposition. Should a conference of the leaders of the two governments be held without a definite preliminary agreement, and should, in the meantime, an advance be made into Siberia, the President would be placed in a terrible predicament. Japan speaks of peace in the Pacific and talks as if she can decide matters independently and so it would seem to me that Japan could set aside most of her obligations toward the Three-Power Alliance. As to the question of withdrawing or stationing troops, since it is impossible to withdraw troops all at once, it would seem that a detailed agreement could be arranged between Japan and China for a gradual withdrawal."

He speculated on the various difficulties which Japan had to face internally. It seems that this opinion of his has also been given to the Secretary of State.
ARMY 5854 23570 SECRET Trans. 10/16/41 (2)

^a For part 2 see S. I. S. #23516.

#943 (Part 2 of 2).^a

He said that should the Russo-German war suddenly end and should many offer Great Britain peace, it would be after all a German peace. England would not now accept it. Now, this man is a responsible fellow in an important position and I take it that this is the view of the Navy. On the other hand, HOOVER and his following consider that should Moscow make a separate peace with Berlin and should Berlin then turn to London with generous peace terms, this whole fray would end with unimaginable quickness. CASTLE told me that HUGH GIBSON feels the same way and that Japan, too, should be on the alert for this possibility. This, however, I take to be a minority view entertained by the Isolationists. MOORE^c reports that Secretary HULL and Senator THOMAS that he is proceeding patiently with the Japanese-American negotiations, but he hopes that Japan will not mistake this for a sign of weakness on America's part, and that no answer had arrived to the memo of October 11. KIPLINGER^d reports that there is a very good basis for rumors of a cessation of hostilities between Russia and Germany and that the chances for war between Japan and the United States are fifty-fifty.

ARMY 5854 23516 SECRET Trans. 10-15-41 (7)

^a Part 1 of 2 not available.

^b Former U. S. Ambassador to Japan.

^c American legal advisor to Japanese Embassy in Washington.

^d A Washington newspaper correspondent.

From: Tokyo (Toyoda).

To: Washington.

October 16, 1941.

#671.

Although I have been requested by both the German and Italian Ambassadors in Tokyo to give them confidential information on the Japanese-American negotiations, I have, in consideration of the nature of the negotiations, been declined to do so. However, early this month, following the German attacks on American merchant ships and the consequent (revival?) of the movement for the revocation of the Neutrality Act, the German authorities demanded that the Japanese Government submit to the American Government a message to the effect that the Japanese Government observes that if the ROOSEVELT Administration continues to attack the Axis Powers increasingly, a belligerent situation will inevitably arise between Germany and Italy on the one hand and the U.

States on the other, and this would provide the reasons for the convocation of the duties envisioned in the Three Power agreement and might lead Japan to join immediately the war in opposition to the United States. We have not, as yet, submitted this message because, in view of the Japanese-American negotiations, we found it necessary to consider carefully the proper timing as well as wording of the message. The German authorities have been repeatedly making the same request and there are reasons which do not permit this matter to be postponed any longer. While Japan on the one hand finds it necessary to do something in the way of carrying out the duties placed upon her by the Three Power Alliance she had concluded with Germany, on the other hand, she is desirous of making a success of the Japanese-American negotiations. Under the circumstances, we can do no other than to warn the United States at an appropriate moment in such words as are given in my separate wire and as would not affect the Japanese-American negotiations in one way or another. This message is a secret between me and you.

(Separate wire)

The Imperial Japanese Government has repeatedly affirmed to the American Government that the aim of the Tripartite Pact is to contribute toward the prevention of a further extension of the European war. Should, however, the recent tension in the German-American relations suffer aggravation, there would arise a distinct danger of a war between the two powers, a state of affairs over which Japan, as a signatory to the Tripartite Pact, naturally cannot help entertain a deep concern. Accordingly, in its sincere desire that not only the German-American relations will cease further deterioration but the prevailing tension will also be alleviated as quickly as possible, the Japanese Government is now requesting the earnest consideration of the American Government.

ARMY 5901 23631 SECRET

From: Washington (Nomura).
To: Tokyo.
October 22, 1941.
Purple. (CA).

I have already wired you something about my present psychology. I am sure that I, too, should go out with the former cabinet. I know that for some time the Secretary of State has known how sincere your humble servant is, yet how little influence I have in Japan. I am ashamed to say that it has come to my ears that this is the case. There are some Americans who trust this poor novice and who say that things will get better for me, but, alas, their encouragement is not enough. Among conferees here in the United States there are also some who feel the same way, but, alas, they are all poor deluded souls. As for Your Excellency's instructions, WAKASUGI can carry them out fully. Nor do I imagine that you all have any objections. I don't want to be the bones of a dead horse. I don't want to continue this hypocritical existence, deceiving other people. No, don't think I am trying to flee from the field of battle, but as a man of honor this is the only way that is open for me to tread. Please send me your permission to return to Japan. Most humbly do I beseech your forgiveness if I have injured your dignity and I prostrate myself before you in the depth of my rudeness.

ARMY 6017 23859 SECRET Trans. 10-23-41 (7)

From: Tokyo.
To: Washington.
5 November 1941.
(Purple-CA).
#736.

(Of utmost secrecy)

Because of various circumstances, it is absolutely necessary that all arrangements for the signing of this agreement be completed by the 25th of this month. I realize that this is a difficult order, but under the circumstances it is an unavoidable one. Please understand this thoroughly and tackle the problem of saving the Japanese-U. S. relations from falling into a chaotic condition. Do so with great determination and with unstinted effort, I beg of you.

This information is to be kept strictly to yourself only.

JD-1: 6254 SECRET (D) Navy Trans. 11-5-41 (S-TT)

3238 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

From: Tokyo.
To: Hongkong.
November 14, 1941.
Purple.

Cir. #2319 (To be handled in Government Code).

(Strictly secret outside the Department)

Though the Imperial Government hopes for great things from the American negotiations, they do not permit optimism for the future. If the negotiations collapse, the international situation in which the Empire finds herself will be one of tremendous crisis. Accompanying this, the Empire's foreign policy as it has been decided by the cabinet, insofar as it pertains to China, is:

a. We will completely destroy British and American power in China.
b. We will take over all enemy concessions and enemy important rights and interests (customs and minerals, etc.) in China.

c. We will take over all rights and interests owned by enemy powers in China, though they might have connections with the new Chinese government, if it becomes necessary.

In realizing these steps in China, we will avoid, insofar as possible, exhausting our veteran troops. Thus we will cope with a world war on a long time scale. Should our reserves for total war and our future military strength wane, we have decided to reinforce them from the whole Far Eastern area. This has become the whole fundamental policy of the Empire. Therefore, in consideration of the desirability to lighten our personal and material load, we will encourage the activities of important Chinese in their efforts in the occupied territories insofar as is possible. Japan and China, working in cooperation, will take over military bases. Thus, operating wherever possible, we will realize peace throughout the entire Far East. At the same time, we will place great importance upon the acquisition of materials (especially from unoccupied areas). In order to do this, all in the cabinet have concurred, in view of the necessity, in a reasonable relaxation of the various restrictions now in effect (after you have duly realized the critical situation which has brought these decisions into being you will, of course, wait for instructions from the cabinet before carrying them out).

In connection with the above, we have the precedent of the freezing of Japanese assets. We are wiring you this particularly for your information alone. Please keep absolutely quiet the existence of these decisions and the fact that they have been transmitted to you.

This message is direct to Nansu,* Hokudai,* Shanghai, Tientsin, Hankow, Canton, and Hongkong. Hokudai* will transmit to Kalgan and Tientsin. Tsingtao will transmit to Tsinan. Canton will transmit to Amoy.

1. The warships at anchor in the Harbor on the 15th were as I told you in my #219^a on that day.

Area A^b—A battleship of the Oklahoma class entered and one tanker left port.

Area C^c—3 warships of the heavy cruiser class were at anchor.

2. On the 17th the Saratoga was not in the harbor. The carrier, Enterprise, or some other vessel was in Area C. Two heavy cruisers of the Chicago class, one of the Pensacola class were tied up at docks "KS". 4 merchant vessels were at anchor in Area D^d.

3. At 10:00 a. m. on the morning of the 17th, 8 destroyers were observed entering the Harbor. Their course was as follows: In a single file at a distance of 1,000 meters apart at a speed of 3 knots per hour, they moved into Pearl Harbor. From the entrance of the Harbor through Area B to the buoys in Area C, to which they were moored, they changed course 5 times each time roughly 30 degrees. The elapsed time was one hour, however, one of these destroyers entered Area A after passing the water reservoir on the Eastern side.

To be handled in Government Code.

The United States is using the excuse various competent countries. In view of we are continuing these negotiations of expected moves, should we, during the course enter into our scheduled operations, the

for the rupture of negotiations will be cast upon us. There have been times in the past when she could have considered discontinuing conversations because of our invasion of French Indo-China. Now, should we, without clarifying our intentions, force a rupture in our negotiations and suddenly enter upon independent operations, there is great fear that she may use such a thing as that as counter-propaganda against us. They might consider doing the same thing insofar as our plans for Thai are concerned. Nevertheless, such a thing as the clarification of our intention is a strict military secret; consequently, I think that it might be the better plan, dependent of course on the opinions of the Government, that the current negotiations be clearly and irrevocably concluded either through an announcement to the American Embassy in Tokyo or by a declaration for internal and external consumption. I would like, if such a course is followed, to make representations here at the same time.

Furthermore, in view of the fact that there are considerations of convenience having to do with my interview with the President, should there be anything that you would want me to say at that time, please wire me back at once.

Transpacific Radio Telephone (Note—Following is a pre version of conversation between Ambassador Kurusu and the Office American Division Chief Yamamoto on Sunday night

KURUSU. "It is all arranged for us to meet Hull tomorrow short one from you, didn't we? Well, we will meet him in reality is a longer one coming isn't there? In any case we are going

the short one." (i. e. telegram. The longer one is probably Tokyo's reply to Mr. Hull's proposals.)

YAMAMOTO. "Yes. I see."

KURUSU. "The President is returning tomorrow. He is hurrying home."

Y. "Is there any special significance to this?"

K. "The newspapers have made much of the Premier's speech, and it is having strong repercussions here."

Y. "Is that so?"

K. "Yes. It was a drastic statement he made. The newspapers carried large headlines over it; and the President seems to be returning because of it. There no doubt are other reasons, but this is the reason the newspapers are giving."

(Pause.)

"Unless greater caution is exercised in speeches by the Premier and others, it puts us in a very difficult position. All of you over there must watch out about these ill-advised statements. Please tell Mr. Tanl."

Y. "We are being careful."

K. "We here are doing our best, but these reports are seized upon by the correspondents and the worst features enlarged upon. Please caution the Premier, the Foreign Minister, and others. Tell the Foreign Minister that we had expected to hear something different, some good word, but instead we get this." (i. e. Premier's speech.)

(After a pause, Kurusu continues, using voice code.)

K. "What about the internal situation?" (In Japan)

Y. "No particular—one or two words faded out—."

K. "Are the Japanese-American negotiations to continue?"

Y. "yes."

K. "You were very urgent about them before, weren't you; but now you want them to stretch out. We will need your help. Both the Premier and the Foreign Minister will need to change the tone of their speeches!!!! Do you understand? Please all use more discretion."

Y. "When will you see them. The 2nd?"

K. "Let's see . . . this is Sunday midnight here. Tomorrow morning at ten. That will be Monday morning here."

(Pause.)

"Actually, the real problem we are up against is the effects of the happenings in the South. You understand don't you?"

Y. "Yes. Yes. How long will it be before the President gets back?"

K. "I don't know exactly. According to news reports he started at 4:00 this afternoon. He should be here tomorrow morning sometime."

Y. "Well then—Goodbye."

#986 (Strictly Secret) (To be held in the most secret outside the Department).

1. Japan-American negotiations have been in progress for a year. Over a period of half a year the Imperial Government has made the cornerstone of its national policy regarding the situation in the Pacific. In the adjustment of relations with the United States, she has based her policy on that alliance. With the intent of participating in the war, she boldly assumed negotiations.

2. Therefore, the present cabinet, in defending the Empire's existence and continuing the negotiations carried on the question of the evacuation of Japanese from Indo-China, were completely in opposition.

Judging from the course of the negotiations, it came to loggerheads when the United States logical tendency of managing international relations upon this tradition between the United States and England. The United States in all this was brought about by a new order by Japan, Germany, that is to say, the aims of the Tripartite Alliance. Japan was in alliance with Germany. Of friendly relations between Japan and Germany. From this point of view, the divorce of the Imperial Government was brought out at the last meeting of negotiations of the last few days it is clear that the Imperial Government is not in the United States. It became clear, inevitably be detrimental to our cause.

ARMY 6944 25554 SECRET

From: Tokyo.
To: Berlin.
November 30, 1941.
Purple.
#986 (Part 2 of 2).

3. The proposal presented by the United States on the 26th made this attitude of theirs clearer than ever. In it there is one insulting clause which says that no matter what treaty either party enters into with a third power it will not be interpreted as having any bearing upon the basic object of this treaty, namely the maintenance of peace in the Pacific. This means specifically the Three-Power Pact. It means that in case the United States enters the European war at any time the Japanese Empire will not be allowed to give assistance to Germany and Italy. It is clearly a trick. This clause alone, let alone others, makes it impossible to find any basis in the American proposal for negotiations. What is more, before the United States brought forth this plan, they conferred with England, Australia, the Netherlands, and China—they do so repeatedly. Therefore, it is clear that the United States is now in collusion with those nations and has decided to regard Japan, along with Germany and Italy, an enemy.

ARMY 6944 25555 SECRET Trans. 12-1-41 (NR)

From: Washington.
To: Tokyo.
1 December 1941.
(Purple).
#1227.

Indications are that the United States desires to continue the negotiations even if it is necessary to go beyond their stands on the so-called basic principles. However, if we keep quibbling on the critical points, and continue to get stuck in the middle as we have been in the past, it is impossible to expect any further developments. If it is impossible from the broad political viewpoint, to conduct a leaders' meeting at this time, would it not be possible to arrange a conference between persons in whom the leaders have complete confidence (for example, Vice President Wallace or Hopkins from the United States and the former Premier Konoye, who is on friendly terms with the President, or Adviser to the Imperial Privy Council Ishii). The meeting could be arranged for some midway point, such as Honolulu. High army and navy officers should accompany these representatives. Have them make one final effort to reach some agreement, using as the basis of their discussions the latest proposals submitted by each.

We feel that this last effort may facilitate the final decision as to war or peace.

We realize of course that an attempt to have President Roosevelt and former Premier Konoye meet, failed. Bearing in mind the reaction to that in our nation, it may be to our interest to first ascertain the U. S. attitude on this possibility. Moreover, since we have no guarantee either of success or failure of the objectives even if the meeting is held, careful consideration should first be given this matter.

We feel, however, that to surmount the crisis with which we are face to face, it is not wasting our efforts to pursue every path open to us. It is our opinion that it would be most effective to feel out and ascertain the U. S. attitude regarding this matter, in the name of the Japanese Government. However, if this procedure does not seem practical to you in view of some internal condition, then how would it be if I were to bring up the subject as purely of my own origin and in that manner feel out their attitude. Then, if they seem receptive to it the government could make the official proposal.

Please advise me of your opinions on this matter.

Re my #857*.

1. The date set in my message #812** has come and gone, and the situation continues to be increasingly critical. However, to prevent the United States from becoming unduly suspicious we have been advising the press and others that though there are some wide differences between Japan and the United States, the negotiations are continuing. (The above is for only your information).

2. We have decided to withhold submitting the note to the U. S. Ambassador to Tokyo as suggested by you at the end of your message #1124***. Please make the necessary representations at your end only.

3. There are reports here that the President's sudden return to the capital is an effect of Premier Tojo's statement. We have an idea that the President did so because of his concern over the critical Far Eastern situation. Please make investigations into this matter.

#1232 (Part 1 of 2).
Re my #1231.

Today, the 2nd Ambassador KURUSU and I had an interview with Under-Secretary of State WELLES. At that time, prefacing his statement by saying that it was at the direct instructions of the President of the United States, he turned over to us the substance of my separate wire #1233*. Thereupon we said: "Since haven't been informed even to the slightest degree concerning the troops in French Indo-China, we will transmit the gist of your representations directly to our Home Government. In all probability they never considered that such a thing as this could possibly be an upshot of their proposals of November 20th. The Under-Secretary then said: "I want you to know that the stand the United States takes is that she opposes aggression in any and all parts of the world." Thereupon we replied: "The United States and other countries have pyramided economic pressure upon economic pressure upon us Japanese. (I made the statement that economic warfare was even worse than forceful aggression.) We haven't the time to argue the pros and cons of this question or the rights and wrongs. The people of Japan are faced with economic pressure, and I want you to know that we have but the choice between submission to this pressure or breaking the chains that it invokes. *We want you to realize this as well as the situation in which all Japanese find themselves as the result of the four-year incident in China; the President recently expressed cognizance of the latter situation.

#1232 (Part 2 of 2).

Furthermore, I would have you know that in replying to the recent American proposals, the Imperial Government is giving the most profound consideration to this important question which has to do with our national destiny." Under-Secretary of State WELLES said: "I am well aware of that." I continued:

3250 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

"We cannot overemphasize the fact that, insofar as Japan is concerned, it is virtually impossible for her to accept the new American proposals as they now stand. Our proposals proffered on the 21st of June and the proposals of September 25th, representing our greatest conciliations based on the previous proposal, still stand. In spite of the fact that the agreement of both sides was in the offing, it has come to naught. At this late juncture to give thoughtful consideration to the new proposals certainly will not make for a smooth and speedy settlement of the negotiations. Recently, we promised to evacuate our troops from French Indo-China in the event of a settlement of the Sino-Japanese incident and the establishment of a just peace in the Far East. In anticipating the settlement of fundamental questions, the question of the representations of this date would naturally dissolve." The Under-Secretary assiduously heard us out and then said: "The American proposals of the 26th were brought about by the necessity to clarify the position of the United States because of the internal situation here."

Then he continued: "In regard to the opinions that you have expressed, I will make it a point immediately to confer with the Secretary."

I got the impression from the manner in which he spoke that he hoped Japan in her reply to the American proposals of the 26th would leave this much room.

Judging by my interview with Secretary of State HULL on the 1st and my conversations of today, it is clear that the United States, too, is anxious to peacefully conclude the current difficult situation. I am convinced that they would like to bring about a speedy settlement. Therefore, please bear well in mind this fact in your considerations of our reply to the new American proposals and to my separate wire #1244^a.

Separate telegram
MEMORANDUM

1. The Government of Japan, prompted by a genuine desire to come to an amicable understanding with the Government of the United States in order that the two countries by their joint efforts may secure the peace of the Pacific area and thereby contribute toward the realization of world peace, has continued negotiations with the utmost sincerity since April last with the Government of the United States regarding the adjustment and advancement of Japanese-American relations and the stabilization of the Pacific area.

The Japanese Government has the honor to state frankly its views concerning the claims the American Government has persistently maintained as well as the measures the United States and Great Britain have taken toward Japan during these eight months.

2. It is the immutable policy of the Japanese Government to insure the stability of East Asia and to promote world peace, and thereby to enable all nations to find each BOAMPYQBR place in the world.

Ever since the China Affair broke out owing to the failure on the part of China to comprehend Japan's true intentions, the Japanese Government has striven for the restoration of peace and it has consistently exerted its best efforts to prevent the extension of war-like disturbances. It was also to that end that in September last year Japan concluded the Tri Partite Pact with Germany and Italy.

#902 (Part 2 of 14).

However, both the United States and Great Britain have resorted to every possible measure to assist the Chungking regime so as to obstruct the establishment of a general peace between Japan and China, interfering with Japan's constructive endeavours towards the stabilization of East Asia, exerting pressure on The Netherlands East Indies, or menacing French Indo-China, they have attempted to frustrate Japan's aspiration to realize the ideal of common prosperity in cooperation with these regions. Furthermore, when Japan in accordance with its protocol with France took measures of joint defense of

French Indo-China, both American and British governments, wilfully misinterpreted it as a threat to their own possession and inducing the Netherlands government to follow suit, they enforced the assets freezing order, thus severing economic relations with Japan. While manifesting thus an obviously hostile attitude, these countries have strengthened their military preparations perfecting an encirclement of Japan, and have brought about a situation which endangers the very existence of the empire.

JD-1: 7143 SECRET Navy Trans. 12-6-41 (S)

From: Tokyo.

Purple
#902 (Part 3 of 14).

Nevertheless, facilitate a speedy settlement, the Premier of Japan proposed, in August last, to meet the President of the United States for a discussion of important problems between the two countries covering the entire Pacific area. However, while accepting in principle the Japanese proposal, insisted that the meeting should take place after an agreement of view had been reached on fundamental—(75 letters garbled)—The Japanese government submitted a proposal based on the formula proposed by the American government, taking fully into consideration past American claims and also incorporating Japanese views. Repeated discussions proved of no avail in producing readily an agreement of view. The present cabinet, therefore, submitted a revised proposal, moderating still further the Japanese claims regarding the principal points of difficulty in the negotiation and endeavoured strenuously to reach a settlement. But the American government, adhering steadfastly to its original proposal, failed to display in the slightest degree a spirit of conciliation. The negotiation made no progress.

From: Tokyo.
To: Washington.
December 6, 1941.
Purple
#902 (Part 4 of 14).

Thereupon, the Japanese Government, with a view to doing its utmost for averting a crisis in Japanese-American relations, submitted on November 20th still another proposal in order to arrive at an equitable solution of the more essential and urgent questions which, simplifying its previous proposal, stipulated the following points:

(1) The Governments of Japan and the United States undertake not to dispatch armed forces into any of the regions, excepting French Indo-China, in the Southeastern Asia and the Southern Pacific area.

(2) Both Governments shall cooperate with a view to securing the acquisition in the Netherlands East Indies of those goods and commodities of which the two countries are in need.

(3) Both Governments mutually undertake to restore commercial relations to those prevailing prior to the freezing of assets.

The Government of the United States shall supply Japan the required quantity of oil.

(4) The Government of the United States undertakes not to resort to measures and actions prejudicial to the endeavours for the restoration of general peace between Japan and China.

(5) The Japanese Government undertakes to withdraw troops now stationed in French Indo-China upon either the restoration of peace between Japan and China or the establishment of an equitable peace in the Pacific area; and it is prepared to remove the Japanese troops in the southern part of French Indo-China to the northern part upon the conclusion of the present agreement.

JD-1: 7143 SECRET Navy Trans. 12-6-41 (S)

3254 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 5 of 14).

As regards China, the Japanese Government, while expressing its readiness to accept the offer of the President of the United States to act as "Introducer" of peace between Japan and China as was previously suggested, asked for an undertaking on the part of the United States to do nothing prejudicial to the restoration of Sino-Japanese peace when the two parties have commenced direct negotiations.

The American government not only rejected the above-mentioned new proposal, but made known its intention to continue its aid to Chiang Kai-Shek; and in spite of its suggestion mentioned above, withdrew the offer of the President to act as the so-called "Introducer" of peace between Japan and China, pleading that time was not yet ripe for it. Finally, on November 28th, in an attitude to impose upon the Japanese government those principles it has persistently maintained, the American government made a proposal totally ignoring Japanese claims, which is a source of profound regret to the Japanese Government.

JD:1 7143 SECRET Navy Trans. 12-6-41 (S)

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 6 of 14).

4. From the beginning of the present negotiation the Japanese Government has always maintained an attitude of fairness and moderation, and did its best to reach a settlement, for which it made all possible concessions often in spite of great difficulties.

As for the China question which constituted an important subject of the negotiation, the Japanese Government showed a most conciliatory attitude.

As for the principle of Non-Discrimination in International Commerce, advocated by the American Government, the Japanese Government expressed its desire to see the said principle applied throughout the world, and declared that along with the actual practice of this principle in the world, the Japanese Government would endeavour to apply the same in the Pacific area, including China, and made it clear that Japan had no intention of excluding from China economic activities of third powers pursued on an equitable basis.

Furthermore, as regards the question of withdrawing troops from French Indo-China, the Japanese government even volunteered, as mentioned above, to carry out an immediate evacuation of troops from Southern French Indo-China as a measure of easing the situation.

JD:1 7143 SECRET Navy Trans. 12-6-41 (S)

From: Tokyo.
To: Washington.
December 4, 1941.
Purple.
#902 (Part 7 of 14).

It is presumed that the spirit of conciliation exhibited to the utmost degree by the Japanese Government in all these matters is fully appreciated by the American government.

On the other hand, the American government, always holding fast to theories in disregard of realities, and refusing to yield an inch on its impractical principles, caused undue delays in the negotiation. It is difficult to understand this attitude of the American government and the Japanese government desires to call the attention of the American government especially to the following points:

1. The American government advocates in the name of world peace those principles favorable to it and urges upon the Japanese government the acceptance thereof. The peace of the world may be brought about only by discovering a mutually acceptable formula through recognition of the reality of the situation and mutual appreciation of one another's position. An attitude such as ignores realities and imposes one's selfish views upon others will scarcely serve the purpose of facilitating the consummation of negotiations.

7143 SECRET

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 8 of 14).

Of the various principles put forward by the American government as a basis of the Japanese-American agreement, there are some which the Japanese government is ready to accept in principle, but in view of the world's actual conditions, it seems only a Utopian ideal, on the part of the American government, to attempt to force their immediate adoption.

Again, the proposal to conclude a multilateral non-aggression pact between Japan, the United States, Great Britain, China, the Soviet Union, The Netherlands, and Thailand, which is patterned after the old concept of collective security, is far removed from the realities of East Asia.

(2) The American proposal contains a stipulation which states: "Both governments will agree that no agreement, which either has concluded with any third powers, shall be interpreted by it in such a way as to conflict with the fundamental purpose of this agreement, the establishment and preservation of peace throughout the Pacific area." It is presumed that the above provision has been proposed with a view to restrain Japan from fulfilling its obligations under the Tripartite Pact when the United States participates in the war in Europe, and, as such, it cannot be accepted by the Japanese Government.

JD: 1 7143 SECRET Navy Trans. 12-6-41 (S)

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 9 of 14).

The American Government, obsessed with its own views and opinions, may be said to be scheming for the extension of the war. While it seeks, on the one hand, to secure its rear by stabilizing the Pacific area, it is engaged, on the other hand, in aiding Great Britain and preparing to attack, in the name of self-defense, Germany and Italy two powers that are striving to establish a new order in Europe. Such a policy is totally at variance with the many principles upon which the American Government proposes to found the stability of the Pacific area through peaceful means.

3. Whereas the American Government, under the principles it rigidly upholds, objects to settling international issues through military pressure, it is exercising in conjunction with Great Britain and other nations pressure by economic power. Recourse to such pressure as a means of dealing with international relations should be condemned as it is at times more inhuman than military pressure.

JD-1 : 7143 Navy Trans. 12-6-41 (S)

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 10 of 14).

4. It is impossible not to reach the conclusion that the American Government desires to maintain and strengthen, in collusion with Great Britain and other powers, its dominant position it has hitherto occupied not only in China but in other areas of East Asia. It is a fact of history that one country—(45 letters garbled or missing)—been compelled to observe the status quo under the Anglo-American policy of imperialistic exploitation and to sacrifice the —es to the prosperity of the two nations. The Japanese Government cannot tolerate the perpetuation of such a situation since it directly runs counter to Japan's fundamental policy to enable all nations to enjoy each its proper place in the world.

3256 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 11 of 14).

The stipulation proposed by the American Government relative to French Indo-China is a good exemplification of the above-mentioned American policy. That the six countries,—Japan, the United States, Great Britain, The Netherlands, China and Thailand,—excepting France, should undertake among themselves to respect the territorial integrity and sovereignty of French Indo-China and equality of treatment in trade and commerce would be tantamount to placing that territory under the joint guarantee of the governments of those six countries. Apart from the fact that such a proposal totally ignores the position of France, it is unacceptable to the Japanese government in that such an arrangement cannot but be considered as an extension to French Indo-China of a system similar to the n—(50 letters missed)—sible for the present predicament of East Asia.

JD:1 7143 SECRET Navy Trans. 12-6-41 (S)

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 12 of 14).

5. All the items demanded of Japan by the American government regarding China such as wholesale evacuation of troops or unconditional application of the principle of Non-Discrimination in International Commerce ignore the actual conditions of China, and are calculated to destroy Japan's position as the stabilizing factor of East Asia. The attitude of the American government in demanding Japan not to support militarily, politically or economically any regime other than the regime at Chungking, disregarding thereby the existence of the Nanking government, shatters the very basis of the present negotiation. This demand of the American government falling, as it does, in line with its above-mentioned refusal to cease from aiding the Chungking regime, demonstrates clearly the intention of the American government to obstruct the restoration of normal relations between Japan and China and the return of peace to East Asia.

JD:1 7143 SECRET Navy Trans. 12-6-41 (S)

From: Tokyo.
To: Washington.
December 6, 1941.
Purple.
#902 (Part 13 of 14).

5. In brief, the American proposal contains certain acceptable items such as those concerning commerce, including the conclusion of a trade agreement, mutual removal of the freezing restrictions, and stabilization of the Yen and Dollar exchange, or the abolition of extra-territorial rights in China. On the other hand, however, the proposal in question ignores Japan's sacrifices in the four years of the China Affair, menaces the empire's existence itself and disparages its honour and prestige. Therefore, viewed in its entirety, the Japanese government regrets that it cannot accept the proposal as a basis of negotiation.

6. The Japanese government, in its desire for an early conclusion of the negotiation, proposed that simultaneously with the conclusion of the Japanese-American negotiation, agreements be signed with Great Britain and other interested countries. The proposal was accepted by the American government. However, since the American government has made the proposal of November 26th as a result of frequent consultations with Great Britain, Australia, The Netherlands and Chungking, ANDND* presumably by catering to the wishes of the Chungking regime on the questions of CHTUAL YLOKMMTT** be concluded that all these countries are at one with the United States in ignoring Japan's position.

#902 Part 14 of 14.

(Note. In the forwarding instructions to the radio station handling this part, appeared the plain English phrase "VERY IMPORTANT")

7. Obviously it is the intention of the American Government to conspire with Great Britain and other countries to obstruct Japan's efforts toward the establishment of peace through the creation of a New Order in East Asia, and especially to preserve Anglo-American rights and interests by keeping Japan and China at war. This intention has been revealed clearly during the course of the present negotiations. Thus, the earnest hope of the Japanese Government to adjust Japanese-American relations and to preserve and promote the peace of the Pacific through cooperation with the American Government has finally been lost.

The Japanese Government regrets to have to notify hereby the American Government that in view of the attitude of the American Government it cannot but consider that it is impossible to reach an agreement through further negotiations.

APPENDIX No. 2

WAR DEPARTMENT, ARMY PEARL HARBOR BOARD

CROSS-REFERENCE INDEX TO TESTIMONY BEFORE ARMY PEARL HARBOR BOARD

This Cross-Reference Index has the following features:

1. Titles and sub-titles are listed alphabetically.
2. Main titles are shown in full capital type; sub-titles are preceded by a hyphen and are in regular type; secondary sub-titles are preceded by two hyphens; a few sub-titles are preceded by a triple hyphen; e. g.,

MARSHALL

-Communications with Short

-Message 7 December

--Washington Signal Office handling

3. The references to the record are by name of witness and page number, thus STIMSON 4072, means the testimony of Secretary of War Stimson on page 4072 of the transcript of the testimony.

4. The Index proper is paged with arabic numerals. The cross-reference key to this Index is paged with Roman numerals, and appears on pages *ii* thru *xix*. The cross-reference key is designed to give the arabic page numbers of the Index on which the titles and sub-titles will be found.

5. Related subject matter is frequently found listed under two or more titles or sub-titles. For example, references concerning aircraft available in Hawaii on 7 December 1941, will be found under the following headings:

ARMY-NAVY EXCHANGE OF INFORMATION

-Planes available, daily reports p. 23

ATTACK ON PEARL HARBOR

-Only 3 U. S. fliers got in air p. 26

HAWAIIAN DEFENSE

-Army planes available p. 31

HAWAIIAN DEFENSE

-Navy fighter planes available p. 33

RECONNAISSANCE

-By Army

-Insufficient planes p. 67

[4] **RECONNAISSANCE**

-By Army

-Planes available p. 68

RECONNAISSANCE

-Distant by Navy p. 68

-Navy planes available p. 70

6. In using the Index, the following steps are suggested:

(a) *Select all relevant main titles on page iv* which could possibly cover the subject sought; for example, take the subject of the 27 November message from the War Department to General Short. Relevant main titles, found in the list on page *iv*, are:

ALERTS IN HAWAII

ALERT NO. 1

3260 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

ARMY-NAVY COOPERATION
ARMY-NAVY EXCHANGE OF INFORMATION
MARSHALL
NAVY
RECONNAISSANCE
SHORT

(b) Select all relevant sub-titles on pages *v* through *xi*; e. g., in the example suggested in (a) above, if it is desired to find out all matters bearing on the 27 November message and its results, each of the main titles listed will be found to have several relevant sub-titles, like

ALERTS IN HAWAII
-Laxity alleged, late November p. 11
-No Army-Navy cooperation on p. 12
ALERT NO. 1
-Decision by Short p. 13
-Differences from Alerts 2 and 3 p. 14
-Not a mistake p. 14
-Planes ready in 4 hours, under p. 15
ARMY-NAVY COOPERATION

AIRCRAFT WARNING SERVICE (See also HAWAIIAN DEFENSE PROJECTS; WYMAN, COL. THEODORE; and related titles.)

- An Army function p. 1
- Attempt to expedite by Short p. 1
 - Contra p. 1
- Considered most important project p. 1
 - Contra p. 1
- Construction by District Engineer p. 1
- Continuous operation not reported to Navy p. 1
- Contract, Wyman arranged p. 1
- Degree completed 7 December p. 1
- Delays, causes of p. 2
 - Arrival of equipment p. 2
 - Diversion of equipment p. 2
 - Not by Washington p. 2
 - Contra p. 2
 - Not contractors p. 3
 - Not lack of personnel p. 3
 - Contra p. 3
 - Personnel difficulties p. 3
- Difficulties of permanent erection and location p. 3
- Effort to get functioning p. 3
- Equipment present, except cables p. 3
- Fixed, equipment delivered October 1941 p. 4
- Funds allotted p. 4
- Haleakala Job Order 41.0 p. 4
- Higher command, not AWS-minded p. 4
- Highest priority p. 4
 - Contra p. 4
- Information Center p. 4
 - In general p. 4
 - Communication with stations, not good p. 4
 - Development of p. 4
 - Functioning p. 4
 - Naval liaison requested p. 5
- Interceptor Command p. 5
 - Activated 17 December p. 5
 - Contra p. 5
 - Air Force cooperation p. 5
 - Jealousy, Signal and Air Corps p. 5
 - Navy should know from Lt. Burr p. 5
 - "No definite organization" p. 5
- Job Order for Mt. Kaala Road p. 5
- Job Orders, summary p. 5
- Job Order 23.1 p. 5
- Kokee Job Orders 23.0, 23.1 p. 5
- Missing equipment p. 6
- Mobile equipment, all arrived (Jul 41) p. 6

3262 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

AIRCRAFT WARNING SERVICE—Continued

- Mobile stations used as soon as received p. 6
 - Contra* p. 6
- Navy assistance, Commander Taylor p. 6
- Navy assisted p. 6
 - Contra* p. 6
- Navy liaison officer, Lt. Burr. p. 6
- Navy notified of delay after 5 August p. 6
- No trained control officers or operators p. 6-7
- [vi] -No training scheduled, 7 December p. 7
- Not dependent on height p. 7
 - Contra* p. 7
- Not increased after 27 November p. 7
- Number of stations, changed p. 7
- Only on Oahu p. 7
- Only real Army reconnaissance p. 7
- Operating 7 December p. 7
 - Detected planes p. 8
 - Disputed p. 8
 - Lt. Tyler on duty during attack p. 8
 - Merely training p. 8
 - Purpose, anti-sabotage p. 8
- Operation before 7 December p. 8
 - Contra* p. 8
- Operation, in general p. 9
- QM received for shipment in July p. 9
- Range, effective p. 9
 - 200 miles, permanent stations p. 9
 - 75 miles, for mobile stations p. 9
 - 130 miles p. 9
 - 150-200 miles p. 9
 - 120-140 miles p. 9
- Refer to letter, S/N to S/W, 24 January p. 9
- Report, 24 November p. 9
- Signal Corps, technical responsibility p. 9-10
- Stations contemplated p. 10
- Tactical plan p. 10
- Twenty-four hour use not required by situation p. 10
 - Contra* p. 10
- Use ordered by Short p. 10
 - 4 to 7 A. M. p. 10
- WD interest in p. 10
- Wyman not responsible for material p. 10

ALERTS IN HAWAII (See also ALERT NO. 1 and HAWAIIAN DEFENSE -SOP, 5 November and WAR DEPARTMENT.)

- In general p. 11
- Alarmed public p. 11
 - Contra* p. 11
- Ammunition issued p. 11
- By Army, no effect on Navy p. 11
- Laxity, alleged, late November p. 11
- Morale, affected p. 11
 - Contra* p. 11
- Never ordered by WD p. 11
 - Contra* p. 12
- No Army-Navy cooperation on p. 12
 - Contra*, when Navy "lost" Jap ships p. 12
- Number of p. 12
- [vii] ALERT NO. 1 (See also HAWAIIAN DEFENSE -SOP 5 November; JAPANESE IN HAWAII; JAPAN—Caution not to provoke; and related titles.)
- In general p. 13
- Considered satisfactory p. 13
- Decision by Short p. 13
 - Navy not consulted p. 13
 - Plan to "slide" to No. 3 p. 13
 - Reasons for p. 14

ALERT NO. 1—Continued

- Differences from alerts 2 and 3 p. 14
- Not a mistake p. 14
- Contra* p. 15
- Planes ready in 4 hours, under p. 15
- “Sabotage-minded” p. 15-16
- War Department never objected p. 16
- WPD not informed of p. 16

ARMY MISSION IN HAWAII (See also NAVY MISSION IN HAWAII; HAWAIIAN DEFENSE; RECONNAISSANCE; and related titles.)

- Air fields defense p. 17
- CG, free from WD control p. 17
- WPD not concerned with p. 17

ARMY-NAVY AGREEMENTS (See also ARMY-NAVY COOPERATION; ARMY-NAVY EXCHANGE OF INFORMATION; and related titles.)

- Joint Air Operations Agreement, 21 March p. 18
- No call for Army help 7 December p. 18
- Never fully complied with p. 18
- Joint Coastal Frontier Defense Plan p. 18
- Washington consent needed to put in effect p. 18
- Contra* p. 18

ARMY-NAVY COOPERATION (See also ARMY-NAVY AGREEMENTS; ARMY-NAVY EXCHANGE OF INFORMATION; and related titles.)

- In general p. 19
- Antiaircraft defense not perfectly coordinated p. 19
- Army-Navy maneuvers p. 19
- Before Short p. 19
- Conferences between Short and Kimmel p. 19
- Conference 27 November—Kingman, Martin, Mollison, Bloch p. 19
- Conference 27 November—Martin, Short, Kimmel, Mollison p. 20
- Confidence in Navy p. 20
- Not justified p. 20
- Defense projects, liaison p. 20
- Directed by letter, WD, 7 February p. 20
- Joint headquarters p. 20
- Joint headquarters construction p. 20
- Navy confidence in Army p. 20
- [viii] -Navy jealous p. 20
- Navy never checked on p. 20
- No joint staff meetings p. 20
- Not on alerts p. 20
- Operations office liaison, complete p. 20
- Contra* p. 20
- Very good p. 20
- Contra* p. 20

ARMY-NAVY EXCHANGE OF INFORMATION

(See also ARMY-NAVY AGREEMENTS; ARMY-NAVY COOPERATION; and related titles.)

- In general p. 21
- Air Force knowledge of Jap concentrations p. 21
- Army, full disclosure to Navy p. 21
- Navy liaison officers p. 21
- Army measures after 27 November p. 21
- “Complete reciprocity” p. 21
- Contra* p. 21
- Confidence in the Navy p. 21
- FBI p. 21
- Fleet activities 27 November–7 December p. 21-22

APPENDIX No. 5

This appendix consists of comparisons of the Records of the Roberts Commission and the Army Pearl Harbor Board as to any conflicts between the two Records.

Witness	Statements RC	Statements APHB	Conflicts and discrepancies
Major General Walter Campbell Short. (Vols. 2 and 14, RC—, Vols. 4 and 5, APHB)	In response to question "The only thing that the Joint Agreement between you seems to cover is distant reconnaissance?", General Short responded, "Yes. That was very definitely placed upon the Army even to the point of controlling the planes, which is the only logical way because otherwise if two people are made responsible they may be making reconnaissance in the same sector and another sector may be forgotten." (Vol. 2; 56.) "Up to time of attack, small amount of this wire (for fencing air fields against sabotage or uprisings) * * * had been received * * *". (Vol. 2; 45.) "The first of the three inch guns to fire down there was at 8:30, and all of the three inch guns were in action by 10:00 o'clock". (Vol. 2; 81) "* * * by 8:50 all of the pursuit that was serviceable were in the air. * * * By 11:40 all the bombers that were still serviceable were in the air—and sent out on distance reconnaissance." (Vol. 2; 85). "They made a search * * * starting * * * at 11:27 they sent—first at 11:40, at 1300, and 1350, and then the first search they made under Navy control was at 1520 * * *". (Vol. 14; 1635). "* * * the 24th Division * * * were out firing on enemy planes as early as 8:11. They moved to battle positions about 8:30, and at 5 o'clock in the afternoon all troops in this group were in battle positions and had one day firing. * * * the 25th Division also started moving into its battle position at 8:30 and by 4 in the afternoon was in its battle position with one day of firing." (Vol. 2; 88). "My reconnaissance under the plan with the Navy is limited to just the immediate offshore of the Island, ordinarily limited to 15 miles. The Navy had assumed full responsibility for the distant reconnaissance". (Vol. 2; 107.)	"* * * long-distance reconnaissance was definitely a function of the Navy * * *". (Vol. 4; 281) "* * * wherein all the long range reconnaissance of both the Army and Navy functioned under one plan so that there would not be any duplication of reconnaissance and there would be an undivided responsibility. So that the Navy definitely had the responsibility." (Vol. 4; 282.) No fencing received by 7 Dec. (Vol. 4; 290.) "We had not gotten the material at the time of the attack (for the fence)". (Vol. 5; 477.) "The first three inch guns to get into action at 8:15, and between 8:15 and 10:00 they were all put in readiness". (Vol. 4; 314) "* * * by 7:50 all the pursuit that was in condition to get into the air was put into the air." (Vol. 4; 317). "The pursuit planes were actually in the air by 8:50 * * * taking a little longer for the bombers * * * they were actually in the by 11:27". (Vol. 5; 459). "* * * Gen. Martin * * * at 11:27 sent planes out on his own mission * * *". (Vol. 4; 373). "The 24th Division turned out at 8:10 and returned the fire of the enemy planes and at 8:30 they were moving out to their battle positions. The 25th Division was also moving out to their battle positions by 8:30. By 4 o'clock the 24th Division were all in battle positions and the 25th by 5 o'clock." (Vol. 4; 316). Distant reconnaissance meant "anything beyond the 20 mile zone". (Vol. 4; 373) "The close-in reconnaissance going out 20 miles". (Vol. 5; 473).	Conflict in responsibility for reconnaissance. Slight discrepancy in whether fencing received. Slight discrepancy in time. Some slight confusion on questions of time. Some slight discrepancy in question of time. Discrepancy in extent of inshore patrol.

Witness	Statements RC	Statements APHB	Conflicts and discrepancies
Major General Walter Campbell Short—Continued	"So we made a comprehensive study and had asked to have probably 184 B-17s so that we could make a 360-degree patrol for a thousand miles." (Vol. 2; 147.) Didn't see Navy message of 27 Nov. "this is a war warning". (Vol. 2; 143.) No Naval Officers at AWS at the interceptor command station on morning of 7 Dec 1941. "There had been on previous days, and as a matter of fact the Navy had felt that it would be a good idea to have a little more of that . . . Total of 30 officers at interceptor command station including the normal quota of three Naval Officers. (Vol. 2; 69-70) Did not know the Naval Officer concerned with cooperating in a technical sense. "It might have been Capt. DeLany but I think it was more likely the officer doing corresponding work under Adm. Bloch, but, I do not know". (Vol. 14; 1628)	"We had asked . . . we made a study and showed them it was necessary to have 187 B-17s for a proper reconnaissance in case the Navy was ever pulled out . . .". (Vol. 4; 324.) "If I feel sure that I have seen that message, although we couldn't find a copy of it in our headquarters, when we looked for it, for the Roberts Commission Report. That was during the period when I was down there at Kimmel's headquarters every day for three or four days and in all probability he either read it to me, or I read it right there, because it is familiar to me, but we couldn't find a copy". (Vol. 4; 415-416.) Whether a Naval man was actually detailed as part of the Information Center witness could not say definitely. "I know the request had been made, that it was contemplated, and I thought it had been carried out." (Vol. 5; 493)	Slight discrepancy in number of B-17s requested. Confusion as to whether had or had not seen Navy message of 27 Nov. Confusion as to whether or not Navy man detailed to interceptor command post by Navy.
Major George S. Welch (Then Lt.) (Vol. 4 RC. Vol. 18 APHB).	In testifying as to the enemy planes brought down witness declared "I was given credit for 5, but I did not see the other one." (Vol. 4; 426). In response to the question whether there were any machine guns, witness responded "No, sir," and later in response to the question "Was there any installation of anti-aircraft guns ready for action then?" witness responded "No, Sir, there were none ready. There were pits dug, but no guns in them." (Vol. 4; 427).	In speaking of the number of Jap planes shot down witness declared "I claimed 4 definitely." (Vol. 18; 2012). " . . . the men had machine guns out, .30 caliber ground guns and they shot back at this man, this Jap." (Vol. 18; 2011).	Some confusion in testimony concerning the number of planes brought down by witness. The question as to whether there were or were not machine guns.
1st Sgt Lowell V. Klatt (Vol. 4, RC —. Vol. 13, APHB)	" . . . we would see them cut loose with their machine guns, and numerous places there was splinters flying and things like that. And at that, why, I figured it was something important, so I told my detail to get their packs, get the trucks down, and be ready to take off. And while I was doing that Lt. Saltzman gave the word that we were on the alert, to go to our battalion command post and set up communications." (Vol. 4; 465)	Witness testified that Lt. Saltzman notified witness before the bombing to "get my stuff and hit the field." (Vol. 13; 1460)	Slight discrepancy as to time witness received order.

3340 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Witness	Statements RC	Statements A PHB	Conflicts and discrepancies
1st. Sgt. Lowell V. Klatt—Continued	In response to question, did both planes crash or just one, witness replied "No, Sir; only the second one, the one that swung to the left. We didn't get a chance to fire at the first one to amount to anything because he pulled away from us pretty fast, but the other one pulled—swung right around broadside to us." (Vol. 4; 467)	"The communications officer, Lt. Saltzman, and I were fortunate enough to knock both of the down with BAR fire." (Vol. 13; 1461)	Slight discrepancy in number of planes brought down by witness.
Colonel Walter C. Phillips. (Vol. 3 RC. Vol. 10 APHB)	Witness states he did not believe the Navy furnished him a copy of telegram sent by Navy operations on 27 Nov. (Vol. 3; 212) "• • • hostilities or attack from without, any such thing wasn't visualized by us at that time • • • we didn't visualize anything from without at that time, Sir". (Vol. 3; 215; cf. 236) Witness stated that Alert No. 1 was sufficient to carry out the directive of 27 Nov. (Vol. 3; 221)	"That message was received by the General, and I believe it was read to us all, I am not positive about that though". (Vol. 10; 1115) Witness stated that all higher commanders and staff were "all thoroughly alert and fully conscious of the possibility" or imminence of war, "the Navy as well as the Army". (Vol. 10; 1116) "I was fully aware of the possibility of such a thing. (Vol. 10; 1117; see also 1128) Witness admits that under Alert No. 3, fighters could have gotten into the air in from 5 to 7 minutes meeting the attack and rendering it less devastating. Witness admits he failed to recommend the most effective steps to meet the worst attack the enemy could bring against him. In mitigation, witness stated that subsequent message from W.D. G-2 directed to anti-sabotage measures con fired action taken. (Vol. 10; 1125-1128) Witness admitted not following Leavenworth teaching. (Vol. 10; 1128) Witness testified in the event of sabotage or attack the question of fire is a greater hazard, consequently, the more dispersed the planes are the less chance there is of fire spreading.	Witness evasive. C of 8 normally gets communications before CO. Did he know contents or not? Flat contradiction. Did he expect attack or not? Conflict as to witness' belief in sufficiency of Alert No. 1.
Major General Howard C. Davidson, commanding Tenth Air Force. (Vols. 2 and 14, RC— Vol. 36 APHB)	Witness testified that dispersal of airplanes adds to the risk of sabotage. (Vol. 2; 196)		Direct conflict on advisability of "bunching" airplanes.

APPENDIX No. 6

Table of important dates

Date	Event	Record page reference
11 February 1922.....	Washington Treaty with Japan.....	4469
1925.....	Rohl married Mrs. Hubert.....	3995
1927.....	Rohl bought yacht PANDORA.....	3995
1932.....	Rohl-Connolly firm formed.....	3995
21 January 1938.....	VEGA arrived in Honolulu from Balboa.....	4115, 4119, 4120
1940.....	Maid at Biltmore Hotel saw Rohl and Wyman intoxicated.....	4024
20 February 1940.....	Ltr District Director, Los Angeles District, to District Director, Honolulu.....	4110, 4111
April 1940.....	Admiral Bloch arrived in Pearl Harbor.....	1470, 1529
May 1940.....	Army alerted, Navy not alerted.....	212
May 1940.....	Tabulations decentralization begun.....	3845
1 May 1940.....	Increases in limit of authority of Dist. & Div. Engrs.....	3873
1 May 1940.....	General Miles entered upon assignment as acting Assistant Chief of Staff, G-2, War Department.....	91
1 June 1940.....	Message Herron to C of S re conditions due to Alert.....	3321
13 June 1940.....	Military Appropriations Act for \$125,000 for Military Intelligence was signed.....	732
15 June 1940.....	Army went on all-out alert for six weeks.....	214
17 June 1940.....	Message from Washington directing all-out alert.....	213
17 June 1940.....	Alert.....	1, 925
17 June 1940.....	Message from W. D. (Adams) to go to Alert.....	3, 317
17 June 1940.....	Herron's message "H-17th, Secret.".....	3318
17 June 1940.....	WD order for HD Alert.....	4304
19 June 1940.....	Wire from WD to ease up on alert.....	215
19 June 1940.....	Message CG, HD from WD (Adams).....	3318, 3319
19 June 1940.....	Message to C of S from Herron.....	3319
20 June 1940.....	Herron replied to wire of 19 June from WD.....	215
21 June 1940.....	Herron wired C of S re alert; no Navy alert.....	216
21 June 1940.....	Message from Herron to C of S that Navy not on Alert.....	3320
22 June 1940.....	Strong signed message for Marshall to Herron to keep on alert.....	216, 3320
27 June 1940.....	Appropriation of \$135,000 for Military Intelligence by Second Deficiency Appropriations Act.....	732
27 June 1940.....	WD approved sites for radar at Kaala, Kokee and Haleakala.....	3895
28 June 1940.....	Act of Congress.....	4109-4110.
2 or 7 July 1940.....	Act of Congress.....	3840.
8 July 1940.....	Message Herron to C of S re conditions due to Alert.....	3321.
8 July 1940.....	Ltr Enright to Stephen Early wherein suggestion made that Rohl was agent of the Imperial German Government (Exhibit 59).....	4028-4030.
10 July 1940.....	Message C of S to Herron re wear and tear on equipment due to Alert.....	3321-3322
13 July 1940.....	Money available for construction of permanent radar installations.....	3896.
15 July 1940.....	Message Herron to C of S re alert.....	3322
16 July 1940.....	Message C of S to CG, HD, re alert.....	3322-3323
24 July 1940.....	Chief of Engrs gave Dist. Engr. \$50,000 toward construction cost of permanent radar installations.....	3896
25 July 1940.....	\$6,060 allotted to Hawaiian Department for Military Intelligence.....	733
1 August 1940.....	Mobile SCR-270s arrived.....	3897-3898
4 August 1940.....	Alert of 17 June 1940 ended.....	1924
5 August 1940.....	Ltr. Chief of Engrs. to Chief, Signal Office, re furnishing designs of AWS structures at earliest possible date.....	3441
5 September 1940.....	Joint Board 314 contemplated storage tanks for 250,000 barrels for the Army and 100,000 for the Navy, (on basis of estimated cost of \$2.00 per barrel in commercial tanks of 25,000 barrel capacity).....	3458
8 October 1940.....	Appropriations Act for \$100,000 for Military Intelligence.....	732
15 October 1940.....	Ltr. Herron to Marshall outer Navy patrol.....	213-214
16 October 1940.....	Memo or message from CNO.....	3305
16 October 1940.....	Ltr. Arnold to Martin re new equipment being sent to Hawaiian Islands not later than 1 July 1941.....	1869
November 1940.....	Wyman contacted Grafe about work in Hawaii.....	2289
2 November 1940.....	Field Order No. 1 (Mission Orders); Operations Orders HD.....	3324-3339
2 November 1940.....	General Martin went on duty in Hawaii.....	1852
4 November 1940.....	Ltr. to Hannum from Gesler re cost-plus-fixed-fee contract.....	3389-3390
6 November 1940.....	Ltr. Hannum to Wyman re W-414-ENG-602.....	2033
6 November 1940.....	Letter to Wyman from Hannum re cost-plus-fixed-fee contract.....	3391-3392
15 November 1940.....	Allotment to HD increased by \$1,500 for Military Intelligence.....	735

3342 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Table of important dates—Continued
